DOCUMENT DE RÉFÉRENCE 2016

CONTAINING THE ANNUAL FINANCIAL REPORT

AND THE MANAGEMENT REPORT

AMF AUTORITÉ DES MARCHÉS FINANCIERS

This *Document de référence* was filed with the *Autorité des marchés financiers* (French Financial Markets Authority or AMF) on April 3rd, 2017, in accordance with Article 212-13 of its General Regulation. It may be used in support of a financial transaction if it is supplemented by a Securities Note as specified by the AMF. This document has been prepared by the issuer and is binding on the signatories.

Pursuant to Article 28 of EC Regulation No. 809/2004, the following information is incorporated by reference into this *Document de référence*:

- the consolidated financial statements prepared in accordance with IFRS for the fiscal year ended December 31, 2015 and the related Statutory auditors' report on pages 196 to 254 of the *Document de référence* filed with the AMF on April 28, 2016 under number R. 16-035.

This document is available free of charge from the Company's registered office, and an electronic version is available on the website of the French Financial Markets Authority (www.amf-france.org) and on the Company's website (www.implanet.com).

TABLE OF CONTENTS

CROSS-REFERENCE TABLE

The cross-reference table below shows the following in this *Document de référence*:

The information which makes up the annual financial report (Article L. 451-1-2 of the French Monetary and Financial Code and Article 222-3 of the AMF General Regulation),

The information which makes up the Company and Group annual management report (Article L. 225-100 et seq. of the French Commercial Code);

Annual financial report		***Document de référence***
1	Statement by the person responsible for the annual financial report	Section 1.2
2	Management report	See index below
3	Statement on Statutory auditors' fees	Section 2.4
4	Consolidated financial statements in accordance with IFRS	Section 20.1
5	Separate financial statements prepared in accordance with French standards	Section 20.3
6	Statutory auditors' report on the consolidated financial statements prepared in accordance with IFRS	Section 20.4.1
7	Report by the Statutory auditors on the annual separate financial statements prepared according to French standards	Section 20.4.2

Annual management report		***Document de référence***
1	Position and activity of the Group in the last fiscal year	Section 6, Section 9 and Section 20
2	Review of the financial statements and results	Section 9 and Section 20
3	Progress made and issues encountered	Section 6, Section 9 and Section 10
4	Main risks and uncertainties Use of financial instruments by the Company	Section 4
5	The Group's research and development activity	Section 11 and Section 9.2.1.2
6	Foreseeable developments of the Group's position and outlook	Section 6.2 and Section 12
7	Significant subsequent events	Section 20.1 and Section 20.9
8	Proposed allocation of net income	Section 20.10.2
9	Non tax-deductible expenses	Section 20.10.3

GENERAL COMMENTS

Definitions

The following terms are defined as follows in this *Document de référence*, unless otherwise indicated to the contrary:

- The "**Company**" or "**Implanet**" means Implanet SA, which has its registered office at Technopole Bordeaux Montesquieu, Allée François Magendie, 33650 Martillac, France, and is registered in the Bordeaux Trade and Companies Register, under number 493 845 341;

- The "**Group**" refers to Implanet SA and its US subsidiary, Implanet America, Inc.;

- "***Document de référence***" means this document filed with the AMF;

- "**Date of the *Document de référence***" means the document filing date.

Notice

The *Document de référence* contains information relative to the Company's business and the markets in which it operates. This information is based on research carried out either within or outside the Company (e.g.: industry publications, specialist studies, information published by market research companies and analysts' reports). The Company considers that this information gives a true and fair image of its reference market to date and its competitive positioning in this market. Nonetheless, it has not been possible to have this information verified by an independent expert and Company cannot guarantee that the same results would be obtained by a third party using different methods to collate, analyze or calculate this market information.

The *Document de référence* also contains information on the Company's objectives and growth priorities. This information may be identified by the use of the future or conditional tenses and words relating to future situations, such as "estimate", "consider", "aims to", "expect", "intend", "should", "wish" and "could" or variations on these expressions or similar terminology. Readers are advised that these objectives and growth priorities are not historical facts and may not be interpreted as a guarantee that the facts and data set out will materialize, or that the underlying assumptions will be verified or that the objectives will be reached. By their nature these objectives may not be attained and the information presented in the *Document de référence* could prove erroneous. The Company is in no way obliged to update the information, subject to applicable regulations and in particular the **"AMF"** General Regulation.

Investors are also invited to take into account the risk factors described in Chapter 4 "Risk factors" herein before making their investment decision. The materialization of all or some of these risks could have a negative impact on the Company's business, position, financial results or objectives. Moreover, other risks that have not yet been identified or that are considered non-material by the Company, could have the same negative impact and investors could therefore lose all or part of their investment.

1. PERSONS RESPONSIBLE

1.1. PERSON RESPONSIBLE FOR THE *DOCUMENT DE RÉFÉRENCE*

Ludovic Lastennet, CEO of Implanet

1.2. STATEMENT OF THE PERSON RESPONSIBLE

Martillac, on April 3rd, 2017

I certify that, having taken all reasonable care to ensure that such is the case, the information contained in the *Document de référence* is, to the best of my knowledge, in accordance with the facts and contains no omission likely to affect its import.

I certify that, to the best of my knowledge, the financial statements have been prepared in accordance with the applicable accounting standards and give a true picture of the Company's assets, financial position and results and of all of the companies included in the consolidation, and that the information in the management report on pages 10 and 11 give a true picture of the development of the Company's business, results and financial position and of all of the companies included in the consolidation as well as a description of the main risks and uncertainties they face.

I have obtained a completion letter from the Statutory auditors stating that they have checked the information relating to the financial position and the financial statements presented in this *Document de référence* and that they have read all of this *Document de référence*.

Ludovic Lastennet
Chief Executive Officer

1.3. PERSON RESPONSIBLE FOR THE FINANCIAL INFORMATION

David Dieumegard
Chief Financial Officer
Address: Technopole Bordeaux Montesquieu - Allée François Magendie, 33650 Martillac, France
Telephone: +33 (0)5 57 99 55 55

2. AUDITORS

2.1. STATUTORY AUDITORS

Ernst & Young Audit, member of the Versailles regional company of auditors, 1-2, Place des Saisons, 92037 Paris La Défense Cedex, France
represented by Laurent Chapoulaud and Jean-Pierre Caton
Date of appointment: April 30, 2013
Duration of appointment: 6 years
Expiry of appointment: General Shareholders' Meeting called to approve the financial statements for the fiscal year ending December 31, 2018

INKIPIO Audit, member of the Lyon regional company of auditors, Immeuble Le Sans-Souci, 19, rue des Tuiliers, 69003 Lyon, France
represented by Clément Albrieux
Date of appointment: November 19, 2013
Duration of appointment: 6 years
Expiry of appointment: General Shareholders' Meeting called to approve the financial statements for the fiscal year ending December 31, 2018

2.2. DEPUTY AUDITORS

AUDITEX, member of the Versailles regional company of auditors, 1-2, Place des Saisons, 92037 Paris La Défense Cedex, France
represented by Christian Scholer
Date of appointment: April 30, 2013
Duration of appointment: 6 years
Expiry of appointment: General Shareholders' Meeting called to approve the financial statements for the fiscal year ending December 31, 2018

INKIPIO SAS, member of the Lyon regional company of auditors, 78 A rue Guy Lussac, 01440 Viriat, France
represented by Gérard Albrieux
Date of appointment: November 19, 2013
Duration of appointment: 6 years
Expiry of appointment: General Shareholders' Meeting called to approve the financial statements for the fiscal year ending December 31, 2018

2.3. INFORMATION ON AUDITORS HAVING RESIGNED, BEEN DISMISSED OR NOT BEEN REAPPOINTED

Not applicable.

2.4. DECLARATION OF FEES PAID TO THE AUDITORS

The table below shows the Statutory auditors' fees paid by the Company over the last two years:

Amounts in euros, excl. VAT	12/31/2016		12/31/2015	
	Ernst & Young	INKIPIO AUDIT	Ernst & Young	INKIPIO AUDIT
Statutory audit work	102,300 (1)	79,700 (1)	114,000 (2)	76,000 (2)
Other services and due diligence directly linked to the statutory audit work	4,172	-	4,100	-
Subtotal	**106,472**	**79,700**	**118,100**	**76,000**
Other services rendered				
- Tax				
- Other				
Subtotal	**-**	**-**	**-**	**-**
Total	**106,472**	**79,700**	**118,100**	**76,000**

(1) Including fees of €30,576 for Ernst & Young and €22,000 for Inkipio Audit in connection with the capital increase of November 2016.

(2) Including fees of €43,000 for Ernst & Young and €19,000 for Inkipio Audit in connection with the capital increase of March 2015.

3. SELECTED FINANCIAL INFORMATION

3.1. HISTORICAL FINANCIAL INFORMATION

The financial information selected and presented below is taken from the Group's consolidated financial statements prepared in accordance with IFRS for the fiscal year ended December 31, 2016 in Section 20.1 "Consolidated financial statements prepared in accordance with IFRS for the fiscal year ended December 31, 2016" of the *Document de référence*.
The accounting and operating data presented below should be read in conjunction with the information in Sections 9 "Financial position and results" and 10 "Cash and share capital".

Simplified consolidated balance sheets (in € thousands) *IFRS*	**12/31/2016** 12 months *Audited*	**12/31/2015** 12 months *Audited*
TOTAL ASSETS	**16,458**	**16,290**
Non-current assets	**3,169**	**3,047**
of which intangible fixed assets	494	635
of which property, plant and equipment	1,233	1,426
of which other non-current financial assets (1) (2)	1,443	986
Current assets	**13,288**	**13,243**
of which inventories	3,555	3,469
of which trade receivables	2,507	2,539
of which other receivables	968	777
of which other current financial assets (1) (2)	191	5,309
of which cash and cash equivalents	6,067	1,150
TOTAL LIABILITIES AND EQUITY	**16,458**	**16,290**
Shareholders' equity	**9,660**	**9,726**
Non-current liabilities	**967**	**1,804**
of which amounts due to personnel	101	83
of which non-current financial liabilities	866	1,721
of which derivative instrument liabilities	-	0
Current liabilities	**5,831**	**4,761**
of which current financial liabilities	2,836	1,873
of which derivative instrument liabilities	2	120
of which provisions	55	55
of which trade and other accounts payable	2,166	2,135
of which tax and social security liabilities	751	560
of which other creditors and miscellaneous debt	22	18

(1) At December 31, 2016, other non-current financial assets were mainly composed of negotiable medium-term notes and term deposits for €1.4 million. Current financial assets solely comprise the guarantee deposit given to Kreos.

(2) At December 31, 2015, other non-current financial assets were mainly composed of negotiable medium-term notes and term deposits for €0.7 million. Current financial assets are only made up of liquid negotiable medium-term notes.

Simplified consolidated income statements (in € thousands) *IFRS*	**12/31/2016** 12 months *Audited*	**12/31/2015** 12 months *Audited*
Operating income	**8,116**	**6,879**
Of which revenue	7,825	6,653
Operating expenses	**(14,997)**	**(14,511)**
Net operating income	**(6,881)**	**(7,632)**
Net financial income	**(407)**	**(375)**
Total net income/(loss)	**(7,288)**	**(8,008)**
Net earnings per share (in euros/share)	(0.39)	(0.83)

Statement of cash flows (in € thousands) *IFRS*	**12/31/2016** 12 months *Audited*	**12/31/2015** 12 months *Audited*
Cash flows from operating activities	**(5,892)**	**(6,811)**
Of which free cash flow	*(5,736)*	*(6,017)*
Of which variation in working capital requirement (-)	*155*	*794*
Cash flows from investing activities	**4,054**	**(3,235)**
Of which acquisition of fixed assets	*(570)*	*(433)*
Of which financial investments (1)	*4,623*	*(2,802)*
Cash flows from financing activities	**6,815**	**9,273**
Of which capital transactions and issue of convertible bonds with warrants attached (OCABSA) (2)	*6,649*	*10,796*
Of which borrowing and factoring	*166*	*(1,524)*
Impact of changes in exchange rates	(60)	(187)
Change in cash	**4,917**	**(961)**

(1) Cash flows associated with financial investments primarily relate to subscriptions for and withdrawals from financial investments (negotiable medium-term notes and term deposits).

(2) Cash flows generated by financing activities are primarily from capital increases in 2016 and 2015, amounting to €6 million and €10.1 million respectively, net of costs.

Cash burn, incorporating cash flows from operating activities, acquisitions of fixed assets and funding streams from borrowing and factoring, was down 28% at €6.3 million in 2016, compared with €8.8 million in 2015.

Net indebtedness in (in € thousands) *IFRS*	**12/31/2016** 12 months *Audited*	**12/31/2015** 12 months *Audited*
Non-current financial debts	866	1,721
Current financial liabilities	2,836	1,873
Cash and cash equivalents	(6,067)	(1,150)
Current and non-current financial assets	(1,356)	(5,964)
Total net indebtedness (1)	**(3,721)**	**(3,521)**

(1) The total cash and financial investments included in current and non-current financial assets exceeds the amount of financial debts.

3.2. INTERIM FINANCIAL INFORMATION

Not applicable.

4. RISK FACTORS

Investors are asked to consider all of the information included in the Document de référence, including the risk factors described in this Chapter, before deciding to subscribe or purchase Company shares. The Company has reviewed the risks that could have a significant negative impact on the Group, its business, financial position, results, outlook or its ability to fulfill its objectives. It considers that, at the date of the Document de référence, there are no other significant risks besides those presented in this Chapter.

Investors are also advised that the list of risks and uncertainties described below is not exhaustive. Other unknown risks or uncertainties which, at the date of the Document de référence, were not considered likely to have a significant negative impact on the Group, its business, financial position, results or outlook, may exist or become important factors likely to have a significant negative impact on the Group, its business, financial position, results, development or outlook.

In each Section below, the risk factors are presented in decreasing order of importance based on the Company's assessment on the date of the Document de référence. The emergence of new facts, whether internal or external to the Group, is therefore likely to modify this order of importance in the future.

4.1. RISKS LINKED TO THE COMPANY'S BUSINESS AND MARKET

4.1.1. The orthopedic products sector is extremely competitive and Implanet may not be sufficiently competitive on this market

The orthopedic products sector for knee and spinal surgery is a competitive market largely dominated by major international players. Even if this sector is receptive to the launch of new products (such as Jazz, which is in the process of international commercial deployment, see Chapter 6) and new commercial practices, most market-leading products have been sold for several decades, proof that the market is well established. The market features as well as certain competing solutions and technologies identified at this point by the Company are described in Sections 6.4 to 6.9 of the *Document de référence*.

Implanet is in competition with other companies, particularly with regards to:

- technology, reliability, performance and product quality;
- price, taking into account the level of reimbursement authorized by the health insurance bodies and the national and local healthcare systems;
- the scope of the product range;
- financial and human resources;
- intellectual property;
- time frames and marketing methods;
- relationships with surgeons, healthcare establishments and other providers and third party payers of healthcare services;

- services attached to the products and customer service;
- relationships with distributors, sales agents, suppliers and subcontractors; and
- geographic coverage.

The global orthopedic products market is dominated by large international players (such as Medtronic, Depuy/Synthes, Stryker, Biomet/Zimmer or Smith & Nephew), which often grow through acquisitions. Implanet estimates that these companies hold the large majority of the global orthopedic products market. These companies, like many others on the orthopedic products market, are well established and have considerable resources, exceeding those of Implanet, including in particular:

- significant financial resources;
- larger budgets for research and development, clinical trials, product marketing and management of intellectual property disputes;
- larger networks of partner surgeons;
- more products that benefit from long-term clinical data;
- more established distribution networks;
- greater experience and more extensive means in terms of launches, promotion, marketing and product distribution;
- more established infrastructures; and
- greater notoriety.

Moreover, the significant growth of the orthopedic products market and the historical development of this market have attracted other players of varying sizes with innovative technologies and have encouraged those companies already present on this market to become more competitive or to grow through acquisitions.

If these companies continue to develop, Implanet estimates:

- that competition will intensify yet again;
- that the phenomenon of concentrating on one product or one specific segment of the market will increase.

With regard to general orthopedic products marketed by the Company, competition could lead to a fall in prices, which in turn could result in reduced profit margins and thus have a negative impact on the Company's financial position.

With regard to the innovative Jazz product for the spinal surgery market, competition is less intense on the more recent braided implant segment (see Section 6.9). However, the Company is still in competition with major players who develop and market classic solutions (screws, rods and/or hooks) which are currently used in the majority of surgical procedures targeted by the Company. Although Jazz has all the prerequisites to penetrate the spinal surgery market (see Section 6.9) and has strong protection for its intellectual property (see Chapter 11), the Company is not able to predict changes in the intensity of the competition on the market targeted by this implant.

4.1.2. Risks linked to the adoption of the Jazz product by practitioners and opinion leaders

At December 31, 2016, the Company had sold 18,691 Jazz implants since their launch at the start of 2013. The Company is now working on the international rollout of Jazz, in particular in France, Europe, the United States and Brazil.
In order to accelerate the marketing of this product, the Company is continuing its research and development efforts. In addition to the rollout of multi-diameter implants, it intends to create a genuine technological platform (see Chapter 6) enabling it to expand its scope of application to numerous surgical indications.

Within this context, health professionals may be reluctant to adopt Jazz technology in the future, for the following reasons in particular:

- time required for training and to adopt the technology;
- possible resistance to change;
- lack of adherence to the operating technique for positioning the sub-laminar braid;
- fear of liability claims due to using new products;
- difficulty for healthcare establishments to cover the cost of the product, due in particular to the limitations on reimbursement by public or private health insurance systems or collective bodies.

The Company believes that surgeons and other healthcare professionals will only use the Jazz technology platform regularly once they are convinced that it is the appropriate solution to use in addition to or to replace hooks and screws in the different applications envisaged (see Sections 6.4.4, 6.5.4 and 6.5.5 of the *Document de référence*).

In order to increase adoption, Implanet uses clinical and scientific studies on braided implants, as detailed in Sections 6.1.1, 6.2.2 and 6.5.5 of the *Document de référence*. Nevertheless, if the Company fails to convince healthcare professionals of the use and relevance of Jazz, this will result in low market penetration, which could have a significant negative impact on the Company, its business, financial position, results, development and outlook.

A sufficient number of surgeons must be trained and confident in using the Jazz technology in order to ensure that the Company's sales efforts are successful. In particular, the Company cannot ensure that its efforts to convince more spinal surgeons to dedicate the time and energy required for training on the Jazz technology platform will be successful.

4.1.3. The innovations developed by the Company's competitors and technological developments could have a negative impact on Implanet's future growth

The innovation of competitors could affect the future growth of Implanet. The Company cannot guarantee that its competitors will not successfully develop technologies or products that are less expensive and more innovative than those currently marketed or in the process of being developed by the Company. Furthermore, the products developed by Implanet's competitors may be brought to the market before its own products. There is also the possibility that competitors' products may be more successful than the products currently marketed or in the process of being developed by the Company.

The Company's products are intended for implantation as part of complex orthopedic surgery (see Chapter 6). The development of new non-surgical and surgical technologies could result in reduced demand for these products or render them obsolete. For example, the development of medical innovations for preventive treatment of the pathologies for which the surgical procedures are currently performed could reduce or delay the need for surgical implants and eventually constitute a genuine alternative to the use of implants. However, the time required for regulatory approval and scientific validation of the evidence that these new technologies provide benefits for, should allow Implanet to take measures to reduce the impact of such external factors.

4.1.4. Implanet may not be able to successfully develop new products or improvements to existing products

Although the Company aims to develop new products and improve its existing products, it cannot guarantee that it will be able to develop or market these successfully. It is also not able to guarantee that any future products or improvements to existing products will be accepted by surgeons and approved by the regulatory authorities and paying bodies who cover the financial cost of a large number of surgical interventions performed using the Company's products. The success of any new products launched by the Company will therefore depend on several factors, in particular the Company's ability to:

- correctly identify and anticipate the needs of surgeons and patients;
- successfully develop and launch new products or improve existing products;
- not infringe the intellectual property rights of third parties;
- where applicable, demonstrate the safety and efficacy of new products using the results of preclinical studies and clinical trials;
- obtain the regulatory approvals and authorizations required to use and market new products or improvements to existing products;
- provide the necessary training to potential users of Implanet products;
- obtain adequate reimbursement agreements;
- develop a specialist distribution and sales network; and
- obtain the adoption by healthcare professionals.

A number of products are in the process of development in line with a schedule defined by the Company, which includes:

- knee: development of a revision prosthesis (see Section 6.3.2);
- Jazz: development of a more extensive range aimed at simplifying operational management for surgeons and targeting degenerative disorder surgery (see Section 6.2.2).

If the Company does not develop new products or does not make improvements to existing products to meet the needs of the market in a timely manner, or if there is insufficient demand for these products or improvements, the Company's business could be affected.

4.1.5. Risks linked to the extension of indications (including degenerative) and to the future results of clinical studies for Jazz

The Company uses the notoriety of braided implants to market Jazz, as well as clinical and scientific studies on the use of other braided implants for the indications which are currently approved (see Sections 6.1.1, 6.2.2 and 6.5.5). The Company intends to conduct clinical studies with Jazz for the approved indications and other indications (in particular degenerative) to confirm the efficacy of its products and highlight the advantages of Jazz compared with competing solutions or alternatives.

If the results of future studies do not confirm the Company's expectations, there will be less acceptance of the Jazz technology. This would seriously impact the Company's ability to conquer market share and could have a significant negative impact on the Company's business, financial position, results, development or outlook.

4.2. RISKS LINKED TO THIRD PARTIES

4.2.1. Risks linked to Implanet's dependence on its sales network

The products marketed by Implanet are distributed either indirectly (via a distributors' network) or directly by the Group (internal sales force or the use of specialist agents in the US) to healthcare establishments. The Company's strategy consists of marketing these products as follows (see Sections 6.1.3 and 6.2.1.1):

- France: direct sales for Jazz and mainly indirect sales for knee products;
- United States: mainly direct sales via the subsidiary Implanet America Inc., with the exception of some indirect sales through distributors;
- Rest of the world: exclusively indirect sales via a network of distributors.

4.2.1.1. Indirect sales via business partners (distributors)

Implanet has established an indirect sales network by means of distribution agreements with local business partners who, at December 31, 2016, accounted for around 59% of Implanet's annual revenue.

At the date of this *Document de référence*, Implanet has distribution agreements with 22 business partners in 17 countries (see Sections 6.2.1.1 and 6.3.3).

Implanet cannot guarantee that it will be able to retain its business partners nor that they will continue to dedicate the necessary resources to ensure the commercial success of its products, which depend in particular on the marketing efforts of the business partners. The Company's ability to establish itself on its target markets depends to a large extent on the level of customer service provided by the distributors of its products. In general, this indirect sales system means that Implanet is commercially dependent on its business partners, particularly with regard to the *intuitu personae* relationship that these business partners have with surgeons and healthcare establishments.

Regarding in particular the international marketing (outside the US) of Jazz, the Company hopes to extend its current distribution network by means of distributors.

Although the Company uses a rigorous system to select its business partners, particularly through the sharing of common objectives for the ramp up of marketing of Jazz, it cannot be ruled out that one or several business partners will not perform as expected, which would have a negative impact on the Company, its business, financial position, results, development or outlook.

4.2.1.2. Direct sales

Implanet products are only sold through direct channels in France and the United States.

This distribution channel is not favored by the Company abroad (outside the United States). For its international development, the Company wishes to have the flexibility to adjust its sales force to meet its requirements and limit counterparty risk.

More specifically, since its creation, Implanet America Inc. has signed 29 agreements with business partners (agents) and plans to sign others to improve its coverage of this region.

4.2.2. Risks linked to dependency on third parties for product distribution

Implanet distributors may not complete their tasks within the time periods set or may not fulfill their commitments, particularly with regard to regulations and medical device vigilance. If a distributor fails to transmit information relating to incidents or accidents or potential incidents or accidents, this would cause the medical device vigilance procedures implemented by Implanet to fail. The consequences of this could have a negative impact on the distribution of Implanet products and its business in general.

4.2.3. Risks linked to the misuse of the Company's products by practitioners

Although, since its initial creation, the Company has developed and continues to develop a training program and documentation on the use of its products, surgeons may use the Company's products incorrectly. Misuse may damage the Company's image and, in certain cases, result in legal proceedings against the Company. The consequences of this could have a negative impact on the distribution of Implanet products and its business in general.

4.2.4. For the manufacture of its products, Implanet depends on the ability of its suppliers to respect the applicable regulations

The manufacture of Implanet products is exacting, due in particular to the strict regulations that apply. The Company's products are classified as medical devices and are therefore subject to specific regulations in all countries where they are manufactured, tested or marketed. These regulations impose obligations with regards to product design, manufacturing, control and quality assurance and, in certain cases, preclinical tests or clinical trials of the products (see Section 4.4.5).

These regulations apply to the Company and its subcontractors for products for which it is the regulatory manufacturer. The Company also depends on the application of these regulations by third party manufacturers, for products that it distributes only (see Section 6.11 of the *Document de référence*).

The Company has chosen to outsource the majority of activities required to manufacture its products. At the date of this *Document de référence*, the Company works with around 20 subcontractors based on very strict specifications.

The Company has several subcontractors for general orthopedic metal implants and there are many potential supply sources in Europe. The Company has created a list of subcontractors to replace its current subcontractors should any of the latter be at fault. The Company also owns its drawings and molds, thus giving it the necessary flexibility to change subcontractors for the manufacture of its general orthopedic products. However, any change in subcontractor for the molding processes of knee prostheses would require validation studies and the submission of a file to the regulatory authorities before selling activities could resume.

With regards to Jazz, the Company relies on different subcontractors to manufacture the metallic part and the braid (see Section 6.4 for the description of Jazz). The metal part is manufactured by the same subcontractors used by the Company for its general orthopedic products. It is therefore easy to change subcontractor for the manufacture of this part. For the manufacture of the braid, to limit development costs (many strength tests in particular), which are very high for this type of product, the Company has a single subcontractor (see Chapter 22). While Implanet intends to eventually find an additional source of supply for this braid, the Company is currently dependent on the know-how of this subcontractor; should the latter be in default, this could have a negative impact on the Company's business, financial position, results, development or outlook.

The Company also uses subcontractors to clean, package and sterilize its products; these operations are relatively standardized and there are easily identifiable alternative supply sources. The cleaning and packaging operations are performed by a single subcontractor based in Italy for knee implants and by the braid manufacturer for Jazz. A subcontractor based in the south of France is responsible for finally sterilizing all of the products. Failure on the part of one of these subcontractors could result in delays in Implanet's product production chain, which could have a negative impact on the Company's general business.

In order to limit the risk of failure on the part of one of its subcontractors, the Company has put in place a Quality system that is based on procedures to detect any non-compliant product internally or externally, among others. This Quality system has been certified by a third party body in accordance with the regulatory requirements of the applicable European Directive 93/42/EEC and the reference standards ISO 13485. Moreover, the Company requires its subcontractors to sign confidentiality agreements to protect its knowledge, for which multiple patents have been filed.

Implanet's ability to sell its products therefore depends in part on its ability to obtain from its suppliers products that have been manufactured in accordance with the regulatory provisions, in the quantities requested and in a profitable way.

Implanet cannot, however, guarantee that its subcontractors respect or will respect the applicable regulations. The regulatory authorities may, during an inspection of new or existing facilities or as part of any other regulatory process, identify breaches of the applicable standards and look to resolve these by requesting corrective action likely to delay the manufacture and supply of Implanet products. If any of Implanet's subcontractors were to lose or have their approval or certification suspended, or their manufacturing facilities were to be partially or fully closed, this could damage Implanet's reputation and have a negative impact on its business, financial position and net operating income. The Company has already faced this type of situation and considers it part of the risks inherent to its activity.

4.3. RISKS LINKED TO THE COMPANY'S ORGANIZATION

4.3.1. Risks linked to key personnel

The Company's success largely depends on the actions and efforts taken by its executives, executive officers and personnel holding key posts ("**Key Personnel**").

The Key Personnel includes the grand majority of the Group's 50 employees (on the Date of this *Document de référence*). The surgeons, researchers and scientific experts who regularly collaborate with the Company are not Company employees.

Temporary or permanent unavailability of Key Personnel could alter the Company's ability to fulfill its objectives.

The Company has put in place a talent management policy to motivate and retain all of its Key Personnel over the long term. Key Personnel receive variable remuneration amounts based on certain quantitative and qualitative criteria. They are also allocated share subscription warrants (BSAs) and/or founders' warrants (BSPCEs) (see Section 15.1).

The success of this motivation and retention policy is confirmed in the generally low staff turnover rate (see Section 26.3).

The work and management contracts signed between the Company and Key Personnel include confidentiality, loyalty and non-competition clauses. They also contain clauses that allow the Company to own the intellectual property created by its employees.

The Company will without doubt have to recruit additional experienced managers and qualified scientific personnel in the future to develop its business. It is in competition with other companies, research bodies and academic institutions to recruit and retain highly qualified scientific, technical and management personnel. When this competition is strong, the Company may not be able to attract and retain employees under conditions that are economically acceptable.

The Company's inability to retain Key Personnel and/or attract new talent could prevent it overall from achieving its objectives and thus have a significant negative impact on its business, results, financial position and outlook.

4.3.2. Risks linked to the management of IT systems

The Company's IT systems are essential to its business since they ensure the traceability of products and thus compliance with regulatory standards. Any failure of the IT systems could have a significant impact: regulatory non-compliance, activity interruption, mobilization of internal resources, financial impact, etc.

The Company has put in place measures to ensure the reliability and security of its IT data and to anticipate exceptional situations that could suddenly interrupt the functioning of these systems with external service providers for the French and American sites.

However, if in the future, the Company is not able to cope with a failure in its IT systems, this could affect its business, results, financial position, development and outlook.

4.3.3. Risks linked to organic growth

The Company may have to recruit additional personnel and expand its operational capacities in the future, which could be very time-consuming for its internal resources. To allow for this, the Company must in particular:

- train, manage, motivate and retain an increasing number of employees;
- anticipate the expenses linked to this growth as well as the associated financial needs; and
- anticipate the demand for its products and the revenues they are likely to generate.

The Company's inability to manage its growth, or unexpected difficulties faced during expansion, could have a significant negative impact on its business, results, financial position, development and outlook.

4.4. LEGAL RISKS

The Company manages legal aspects internally relating to the compliance of its activity with the corresponding regulatory framework (selling authorizations, insurance, intellectual property, registering brands and domain names, etc.). For this purpose, the Company uses intermediaries, service providers or specialist consultants to complement its expertise, or subcontract certain tasks. Thus, the Company uses the following in particular: consultants, distributors or local regulatory representatives to submit certification files to certain local regulatory authorities, specialist intellectual property firms for filing and instructing on files, or insurance brokers.

4.4.1. Risks linked to the regulations applicable to medical devices developed by the Group and any possible changes

The Group's products are subject to strict regulations which are constantly changing, and which govern their marketing. These regulatory constraints have a significant impact on all of the Group's business: the development, control, manufacture and sale of products.

These regulatory processes may be lengthy and costly and there is no guarantee that the authorizations will be granted, nor as to the time necessary to obtain them or whether such authorizations will be retained. If the certification or authorization to market the Group's products is refused, suspended or retracted, marketing of the products may be delayed or prohibited in the countries concerned.

If such a situation were to arise, it could have a significant negative impact on the Group, its business, financial position, results, development or outlook.

Even if the Group takes into account, in the framework of its activity, potential changes in legislation or changes to standards or the regulations applicable in the States in which the Group markets its products and plans to markets its products, new regulatory constraints could prevent the marketing of Group products should its marketing authorizations be withdrawn, suspended or not renewed or marketing could be delayed, thus making their production or development in particular more expensive.

The subsequent discovery of previously unknown problems relating to a product or a manufacturer could lead to fines, delays or suspensions of regulatory authorizations, product seizures or recalls, notifications to doctors or any other action in this area, restrictions concerning operation and/or criminal proceedings.

If such a situation were to arise, it could have a significant negative impact on the Group, its business, financial position, results, development or outlook.

4.4.2. Risks linked to authorizations already obtained or on-going proceedings

4.4.2.1. Risks linked to the regulatory environment in Europe-CE marking

The Group's products are classified as medical devices and are governed, among others, by the provisions of European Directive 93/42/EEC, amended, which harmonizes the conditions for the sale and free circulation of the Group's products within the European Economic Area.

These products can only be placed on the market when they have been granted certificates allowing them to use the CE marking, which are valid for three years. CE marking confirms that the medical device concerned complies with the essential health and safety requirements fixed by the applicable European Directive and certifies that it has undergone adequate evaluation procedures to determine its compliance.

Although the current products have already obtained CE marking, products under development will be subject to this same regulation and their launch on the market could be delayed if they fail to obtain the certificates permitting CE marking in a timely manner.

If such a situation were to arise, it could have a significant negative impact on the Group, its business, financial position, results, development or outlook.

Requests to renew certificates relating to CE marking require, among other things, continued compliance of the quality system, the taking into account of regulatory developments, update of the risk management and compliance with the essential requirements of the applicable European Directives.

If the Group fails to obtain the necessary certificate renewals for the CE marking of its existing products within the required timeframe, marketing of these products will be suspended until the authorizations are obtained.

If such a situation were to arise, it could have a significant negative impact on the Group, its business, financial position, results, development or outlook.

Finally, in September 2012, the European Commission presented a major review of the European legislation relating to medical devices. In particular, it plans to replace the current Directive with a regulation that would apply directly to all Member States and would leave no room for national particularities. In essence, the new regulations will significantly strengthen provisions relating to clinical evaluation during the lifetime of a product and market vigilance, to ensure patient safety. Such a change in regulations would reduce the Company's operating margin. This regulation was approved by the European Council in June 2015. In September 2015, the Council's position was finalized and discussions commenced with the European Parliament. An agreement was confirmed by the General Affairs Council in September 2016, the new regulation was adopted by the Council on March 8, 2017. It is due to be adopted by the European Parliament in April 2017 and will come into force three years after its publication in the OJEU once it has been adopted by the European Parliament.

4.4.2.2. Risks linked to the regulatory environment in the United States

The American market is governed by federal regulation 21 CFR, which covers the marketing of medical devices by imposing pre- and post-marketing requirements; the controlling body is the Food and Drug Administration (FDA).

The marketing of medical devices, such as those manufactured by the Group, on the American market is subject to notification to the FDA before market launch and requirements relating to the quality system as set out in 21 CFR820. These products are medical devices that present a moderate potential risk (class II for the FDA) and for which a substantial equivalence to a medical device that is already approved on the American market can be shown. The Company can use the "510(k)" procedure to submit the file for examination by the FDA. Once the file is approved, the medical device is registered in a computer database, which is kept up-to-date by the FDA.

The Implanet Spine System was granted the 510(k) authorizations on July 16, 2012, under number K120564 then on April 10, 2015, under number K143731.

Jazz was granted the 510(k) authorization on September 13, 2012, under number K121541, and Jazz lock on February 25, 2016, under the number K153348, Jazz Claw on May 17, 2016, under number K160226 and, lastly, Jazz Frame on January 18, 2017, under number K162764.

The Martillac site underwent FDA audits in February 2014 and October 2016 and no comments were made regarding non-compliance.

Information relating to the American regulations applicable to Implanet appliances is subject to the developments presented in Section 6.11 of the *Document de référence*.

If the FDA authorizations relating to the Group's existing products are called into question or any requests for authorizations relating to new Group products are rejected by the FDA, the Company cannot market its products on the American market or must implement other, longer and more costly procedures to obtain or renew these authorizations. If such a situation were to arise, it could have a significant negative impact on the Group, its business, financial position, results, development or outlook.

4.4.2.3. Risks linked to the regulatory environment in other countries

The marketing of medical products in other countries requires specific measures to obtain the necessary authorizations (particularly in Brazil, India, Iran, etc.).

There is, however, recognition and equivalency in terms of certification in certain countries (particularly in Turkey, South Africa and Australia). This equivalency and recognition plays an important part in the decision to market the Group's products in a new country.

The Group has already obtained marketing authorizations for some of its existing products in certain countries outside the European Union and the United States, notably South Africa, Australia, Brazil, India, Iran, Russia and Turkey. (see Chapter 6)

As part of its development, the Group studies deployment opportunities for its new products and its existing products in new countries.

The Group's inability to obtain or retain the necessary authorizations for its products could have a significant negative impact on the Group, its business, financial position, results, development or outlook.

4.4.3. Risks linked to product liability claims

The Company's activity exposes it to risks of product liability claims, which are inherent to the research and development, preclinical and clinical studies, the manufacture, marketing, promotion, sale and operation of the Company's products. Civil or criminal proceedings may be filed against the Company by users (patients, surgeons and other health professionals), the regulatory authorities, business partners (distributors or agents) and any other third party using or marketing its products. Product liability claims may be costly to defend and negative rulings may be issued against the Company.

As at the date of the *Document de référence*, no material claims had ever been brought against Implanet by patients, surgeons, regulatory authorities or any other third parties due to its products.

The Company has liability insurance for faulty products (see Section 4.9) covering the Group's activities, in particular in the United States. The problem of product liability in the United States is a particularly crucial one since this market is favorable to costly disputes.

4.4.4. Risks linked to reimbursement policies for medical devices

The Company's ability to generate revenue from the products that it develops, the level of success of the Company's products and their performance partly depends on the coverage and reimbursement conditions in the countries where it markets or intends to market its products.

Many patients may not be able to pay for an existing product or a product that the Company may develop in the future. The Company's ability to obtain acceptable levels of reimbursement from governmental authorities, private health insurers and any other body will have an impact on its ability to successfully market these products. Whether implants are reimbursable or not affects customers' decisions about which products to buy and the price they are willing to pay. Reimbursement varies from one country to another and could have a significant impact on the acceptance of new products and services. The Company may not be guaranteed optimum reimbursement in the United States, Europe and elsewhere for products that the Company has developed or could develop, and any reimbursement may be reduced or withdrawn in the future.

In Europe, the United States and other major markets on which the Company may sell its products, there is constant economic, regulatory and political pressure to limit the cost of procedures involving medical devices. Paying third parties are increasingly questioning the price of medical devices and many paying third parties could refuse or reduce the share reimbursed for certain devices.

New legislative or administrative reforms of American reimbursement systems or those of other countries could also significantly reduce the reimbursement of interventions using the Company's medical devices (or even refuse to insure these interventions) by regulating prices or competitive pricing, amongst other tools.

The absence of or insufficient reimbursement or coverage of the Company's products or the adoption of more restrictive measures in terms of reimbursement or coverage, could have a significant negative impact on the Company, its business, financial position, results, development or outlook.

4.4.5. Risks linked to the failure of industrial processes (for example, product traceability, etc.)

The Company's products are classified as medical devices and are therefore subject to specific regulations in all countries where they are manufactured, tested or marketed. These regulations impose obligations relating to the following in particular:

- design;
- preclinical testing and clinical trials for products;
- product manufacture, control and quality assurance;
- product labeling, including instructions for use;
- product storage;
- product identification and traceability;
- data conservation procedures; and
- post-marketing vigilance and notification of incidents linked to product use.

These regulations apply to the Company for products for which it is the regulatory manufacturer. The Company relies on the application of these regulations by third party manufacturers for the products for which it is the distributor.

The Company cannot however guarantee that its suppliers or subcontractors respect or will respect the applicable regulations at all times. The notified body, during a certification or monitoring audit, or the regulatory authorities, during an inspection or any other regulatory process, may identify breaches of the regulations or applicable standards and require that these be resolved by means of corrective action which could interrupt the manufacture and/or supply of the Company's products.

The suspension, complete interruption or complete or partial ban on the activities of the Company's suppliers could have a significant impact on the Group's business, financial position, results and reputation.

The Company has put in place a quality system, which includes, amongst other elements, procedures to detect any non-compliant product internally or externally. This quality system has been certified by a third party body in accordance with the regulatory requirements of the applicable European Directive 93/42/EEC and the reference standards ISO 13485. These procedures have been integrated into a compliance failure management system called CAPA (Corrective Action and Preventive Action), the aim of which is to:

- identify and register compliance failures relating to the products or the quality system;
- register all investigations and analyses linked to the analysis of the causes of these compliance failures and the related risks;

- identify and implement corrections or corrective and preventive actions; and
- measure the efficacy of the actions taken to correct the compliance failures.

The management of any declaration of an incident with consequences on patients and/or users and/or third parties is defined by the regulations relating to medical device vigilance, which describe the methods for notifying the competent authorities of incidents. The Company has an internal procedure to monitor and analyze the incident reports received, and where applicable, their declaration by the medical device vigilance officer to the national regulatory authorities (for example, the ANSM, [*Agence nationale de sécurité du medicament et des produits de santé* (French National Agency for Medicines and Health Product Safety)].

4.4.6. Litigation and exceptional events

There is no governmental, legal or arbitration procedure, including any procedure that the Company is aware of, that remains unresolved or threatened against the Company that is likely to have or have had a significant effect on the Company or Group's financial position or profitability over the last 12 months.

The Company may be involved in judicial, administrative or regulatory proceedings during the ordinary course of its activities. A provision is recognized by the Company where there is a sufficient probability that such disputes may lead to costs for the Company.

4.5. RISKS LINKED TO INTELLECTUAL PROPERTY AND RELATED LITIGATION

4.5.1. Limitations of the protection granted by patents and other intellectual property rights

The commercial success of Implanet and the protection of its inventions depends on its ability to obtain, retain and protect its patents, brands, drawings, models and related applications, as well as any other intellectual property or similar rights (such as commercial secrets and know-how in particular). The Company dedicates significant financial and human efforts to the protection of its technology and implements common industry practices (such as filing additional developments to extend one or several patent claims) to prolong the protection of its technology beyond the initial period; however it cannot guarantee that any such application will be approved. To the Company's knowledge, the inventions incorporated into the Company's implants and/or instruments are protected by its patents and patent applications (see Chapter 11).

However, the Company may not be able to maintain adequate protection for its intellectual property rights and, as a result, lose its technological and competitive advantage.

It should be noted that the Company's intellectual property rights provide protection for a term that may vary from one region to another (for example, in France and Europe the term for patents is 20 years from the date on which the patent application is filed).

Furthermore, when a patent application is filed, another patent may have priority despite not being published yet. Despite the priority research and vigilance that the Company conducts, it cannot be certain that it is the first to create an invention and to file a patent application, given in particular that in the majority of countries, patent applications are published 18 months after applications are filed.

The Company may also file brands, drawings and models. If the Company registers one of its brands in a country where it is not covered, the Company may find that the brand name in question is not available in that country. A new brand must therefore be found for that country.

The Company may therefore encounter difficulties filing and obtaining some of its applications for patents, brands or other intellectual property rights that are currently being examined/registered.

Moreover, the granting of a patent, brand, drawing, model or other intellectual property rights does not guarantee their validity or opposability. The Company's competitors may successfully contest the validity or opposability of its patents, brands, drawings and models or the relating applications at any time before a tribunal or as part of other procedures, which, depending on the result of these claims, could limit their scope, render them invalid or cause them to be sidestepped by competitors.

Finally, developments, changes or different interpretations of the laws governing intellectual property in Europe, the United States or other countries could allow competitors to use the Company's inventions or intellectual property rights to develop or market the Company's products or technologies without any financial compensation. There are also certain countries that do not protect intellectual property in the same way as Europe or the United States and the effective procedures and rules required to defend the Company's rights may not exist in these countries.

As a result, the Company's rights over its patents, brands, drawings and models and the relating applications and other intellectual property rights may not provide the expected protection against the competition. The Company is therefore unable to guarantee that:

- the Company will develop new inventions that can be patented;
- the Company's patent applications that are in the process of examination will result in patents being granted;
- the patents granted to the Company will not be contested, invalidated or sidestepped;
- the scope of protection granted by the Company's patents, brands and intellectual property rights is and will remain sufficient to protect the Company from its competition and the patents, brands and intellectual property rights of third parties covering similar devices;
- third parties will not contest ownership of rights over patents or other intellectual property rights belonging to the Company; and
- the Company's employees will not contest rights or the payment of additional remuneration or a fair price in consideration of the inventions that they helped to create.

4.5.2. Limitations on the protection of the Company's commercial secrets and know-how

It is also important that the Company protect itself against the unauthorized use and disclosure of its confidential information and commercial secrets. The Company may need to supply, in different formats, information, technologies, processes, know-how, data or information that is not patented and/or not patentable, to third parties with whom it collaborates (such as university establishments and other public or private entities, or its subcontractors) concerning the research, development, testing, manufacture and marketing of its products. In this case, the Company requires the signature of confidentiality agreements. The technologies, processes, know-how and data that are not patented and/or not patentable are considered commercial secrets that the Company tries to partially protect with such confidentiality agreements.

The Company also ensures that the collaboration or research agreements that it signs grant it full ownership of the results when it has participated in the creation of the invention. With regards to license agreements, Implanet also looks to retain control of patent management or to enjoy operational exclusivity in its field of activity.

However, the means of protecting these elements only offer limited protection and cannot prevent illegal use of the Company's technologies by third parties. Despite the precautions, particularly contractual, taken by the Company with regard to these entities, the latter could contest ownership of the intellectual property rights resulting from tests performed by their employees, for example. These entities may not be able to grant operational exclusivity to the Company under terms that it deems acceptable.

Such contracts therefore expose the Company to the risk of seeing the third parties concerned (i) contest the intellectual property rights on the Company's inventions, (ii) fail to ensure the confidentiality of the Company's non-patented innovations or developments and know-how, (iii) disclose the Company's commercial secrets to its competitors or develop its commercial secrets independently, and/or (iv) violate such agreements, without the Company having any appropriate solution against such violations.

Consequently, the Company's rights over its commercial secrets and know-how may not grant the required protection against competition and the Company cannot guarantee:

- that its know-how and commercial secrets will not be usurped, sidestepped, transmitted without its authorization or used;
- that the Company's competitors have not already developed technology, products or devices that have a close resemblance or are similar in nature or purpose to those of the Company; and
- that no co-contractor will contest the intellectual property rights over the Company's inventions, know-how or results.

4.5.3. Specific risks linked to the violation of intellectual property rights

To ensure the success of its business, it is important that the Company is able to exploit its products freely without infringing on the patents or other intellectual property rights of third parties and without third parties infringing the intellectual property rights of Implanet.

4.5.3.1. Risks of the Company violating the intellectual property rights of a third party

Implanet therefore continues to conduct, as it has done to date, the preliminary studies that it deems necessary with regard to the above-mentioned risks before investing with a view to marketing its different products. In particular, it continues to monitor the activity (particularly in terms of patent filing) of its competitors.

More particularly, and in relation to Jazz, with the help of its French and American intellectual property consultant agencies, the Company has conducted priority research to study the situation relating to equivalent products and compare it with the specific characteristics of Jazz. The Company has also analyzed the freedom to operate patents filed by Implanet relating to Jazz compared to those of its competitors. The Company thus has particularly relevant elements that will allow it to develop Jazz confidently.

However, monitoring the non-authorized use of products and technology is difficult. The Company is not able to guarantee:

- that it will be able to prevent the misuse or unauthorized use of its products and technology, particularly in foreign countries where its rights may not have the same level of protection due to the territorial scope of its industrial property rights;
- that its products do not infringe upon or violate the patents or other intellectual property rights belonging to third parties;
- that there are no patents that are difficult to interpret or other intellectual property rights that may cover certain Company products, procedures, technologies, results or activities, and that no third parties infringe or act in violation of their rights with respect to the Company with a view to obtaining damages and/or the termination of its manufacturing activities and/or the marketing of the products or procedures incriminated in this way;
- that there are no rights relating to brands, drawings or models or other prior intellectual property rights belong to a third party that could allow for infringement action against the Company; and/or
- that the Company's domain names will not be subject to a UDRP (Uniform Dispute Resolution Policy) or similar procedure or infringement action by a third party who holds prior rights (e.g. trademarks).

Any proceedings brought against the Company could result in substantial costs and compromise its reputation and financial position, regardless of the outcome. If these proceedings were to proceed, the Company may be forced to interrupt (subject to a penalty) or to delay the research, development, manufacture or sale of products or procedures covered by these claims, which would have a significant impact on its business. Certain competitors with greater resources than the Company would be able to better support the costs of a complex proceeding. Any dispute of this type would therefore impact on the Company's ability to perform all or part of its activity to the extent that the Company could be forced to:

- cease selling or using any of these products relying on the intellectual property contested in a given geographic region, which could reduce revenues;
- obtain a license from the holder of the intellectual property rights, a license that may not be possible to obtain or may be obtained under unfavorable conditions;
- review its design or, with regards to claims concerning trademarks, rename its products to avoid infringing on the intellectual property rights of third parties, which may be impossible or involve a long and costly process and could impact de facto on its marketing efforts.

4.5.3.2. Risks of the Company's intellectual property rights being violated by a third party

Other companies may use or try to use elements of the Company's technology protected by an intellectual property right, which would be damaging for the Company. The Company cannot guarantee that it will not file legal or administrative proceedings to enforce the monopoly granted by its intellectual property rights (particularly patents, brands, drawings and models or domain names) by legal means.

Legal action by the Company may be necessary to enforce the respect of its intellectual property rights, to protect its commercial secrets or to determine the validity and scope of its intellectual property rights. A dispute may result in considerable expenses, have a negative impact on the Company's results and financial position and may not even provide the protection or sanction desired.

4.5.3.3. Impact of legal action

If one of the aforementioned scenarios should occur in relation to the Company's intellectual property rights, this could have a significant negative impact on the Company's business, outlook, financial position, results and development. Nevertheless, on the date of the *Document de référence*, the Company neither faced any of these situations nor was involved in any dispute, whether as claimant or defendant, relating to its intellectual property rights or those of a third party.

4.5.4. Risks related to the pledge of goodwill in favor of KREOS CAPITAL IV (UK) LTD

On July 19, 2013, the Company concluded a venture loan agreement with KREOS CAPITAL IV (UK) LTD, as amended by an additional clause on April 16, 2015, which took the place of a master agreement for the subscription of a €5,000,000 bond issue by KREOS CAPITAL IV (UK) LTD, the issue of share subscription warrants (BSAs) by the Company in favor of KREOS CAPITAL IV (Expert Fund) LTD and the pledge of the Company's goodwill (including, in particular, all intellectual property rights held currently and in the future by the Company) in favor of KREOS CAPITAL IV (UK) LTD. (See Section 22.3, in particular, for further details on the commitments given by the Company in relation to the bond issue, as well as on early repayment events).

The purpose of the above-mentioned pledge is to guarantee all the Company's payment obligations relating to reimbursement of the bond, totaling five million euros (€5,000,000), comprising the amount of the bond plus any late interest payments, fees, costs, compensation and incidental expenses.

Any breach by the Company of its commitments under this bond or the occurrence of events (such as failure to pay one of the sums on its due date, breach of the protocol and commitments given in this respect, the Company's insolvency, a change in the Company's field of activity, the transfer of intellectual and industrial property rights held by the Company) could result in this pledge being implemented and the ownership of the Company's goodwill being transferred, including all its intellectual property rights.

The occurrence of such events would have a negative impact on the Company, its business, financial position, results, development and outlook.

4.6. INDUSTRIAL AND ENVIRONMENTAL RISKS

The nature of the Company's activities does not pose any significant risk to the environment.

4.7. FINANCIAL RISKS

4.7.1. Risks linked to operating losses

Since its creation in December 2006, the Company has recorded operating losses and net losses each year, which are explained by:

- research and development costs for the Madison project (full knee prosthesis for first-line treatment and revision) and the Jazz project (posterior attachment and spinal deformity reduction system): involving mechanical and clinical testing, filing of patents, costs associated with the protection of intellectual property, etc.;
- commercial rollout costs (launch of new products, territorial expansion, particularly in the US).

For the fiscal year ended December 31, 2016, the Group recorded a net loss (IFRS) of €7,288 thousand.

Should the Group be unable to sufficiently increase its revenue in the forthcoming years, it could experience new losses due to:

- marketing, commercial and administrative costs;
- expenses relating to new clinical studies;
- the continuation of its research and development policy and the launch of new products;
- increasing regulatory requirements relating to product marketing, the implementation of a clinical trial program in France and abroad;
- and the need to obtain new certifications to market its products in new markets.

An increase in these expenses could have a negative impact on the Group, its business, financial position, results, development and outlook.

4.7.2. Credit risk

Credit risk is linked to deposits with banks and financial establishments. The Company relies on first class financial establishments for its cash balances and therefore carries no significant credit risk on its cash flow.

Internationally, the Company invoices its implants to its distributors. In France and the United States, the Group mainly invoices public and private healthcare establishments.

The customer payment terms comply with the requirements of the Modernization of the Economy Act (*Loi de Modernisation de l'Economie-LME*).

With regard to the concentration of credit risk, two distributors each account for more than 10% of consolidated revenue at December 31, 2016: one France distributor (23%) and one Export distributor (11%).

On January 1, 2016, Implanet took out credit insurance with Atradius to ensure that its clients have appropriate credit ratings and credit risk cover.

4.7.3. Risks linked to the management of working capital

The marketing of orthopedic implants requires the Company to:

- make consignment stocks available to its distribution network in France and the United States;
- market or make available ancillary goods (specific surgical instruments for the positioning of implants) to healthcare establishments.

Consignment stocks comprise a full range of implants (kits, sizes, accessories) available for different surgical procedures and adaptable to the specific characteristics of each patient.

In France and the United States, the invoicing of orthopedic implants to distributors, agents or healthcare establishments takes place as soon as information relating to the placing of implants is received and generates a request for the restocking of consignment stock from Implanet customers for the products used.

A significant increase in the Company's activity (volume and number of customers) as well as the territorial expansion of its distribution network would be likely to significantly increase consignment stock levels, the amount of client receivables and the volume of ancillary products required for implant placements.

Further, although the Company remains vigilant with regard to payment terms, it cannot exclude extension of the average payment term of its distributors and healthcare establishments, which could have a negative impact on changes to its working capital requirements. Likewise, a shortening of the payment terms of the Company's suppliers would also have a negative impact on changes to its working capital requirements.

The Company's inability to manage its working capital requirements and its growth could have a significant negative impact on its business, results, financial position, development and outlook.

4.7.4. Company's financing

Financing through increases in shareholders' equity

Historically, the Company has financed its growth by consolidating its shareholders' equity by means of capital increases (including at the time of its listing on the Euronext Paris stock market in November 2013 and the capital increases with preferential subscription rights for shareholders in March 2015 and November 2016) totaling €72,858 thousand since its creation.

Public funding

The Company has benefited from repayable advances and subsidies under the OSEO Innovation program, an interest-free loan from BPI France, FEDER subsidies from the Aquitaine Regional Council, research tax credits (*Crédit Impôt Recherche* - CIR), and COFACE marketing insurance.
The repayment schedule for the repayable advances and the interest-free loan at December 31, 2016, break down as follows:

MATURITY OF REPAYABLE ADVANCES AND INTEREST-FREE LOANS, IN REDEMPTION VALUE (Amounts in € thousands)	**OSEO Knees**	**BPI - Interest-free innovation loan - Jazz Braid**	**Total**
At December 31, 2016	**90**	**800**	**890**
Part due in less than 1 year	90	-	90
Part due between 1 and 5 years	-	400	400
Part due in more than 5 years	-	400	400

Issue of bonds to KREOS for a total amount of €5,000 thousand.

On July 24, 2013, the Company concluded a venture loan agreement with KREOS CAPITAL IV (UK) LTD, which took the place of a master agreement for the subscription of a €5,000,000 bond issue by KREOS CAPITAL IV (UK) LTD ("**Kreos**"), the issue of share subscription warrants (BSAs) by the Company in favor of KREOS CAPITAL IV (Expert Fund) LTD and the pledge of the Company's goodwill (refer to Section 22.3 of the *Document de référence* for further details on the characteristics of the bond issue) in favor of KREOS CAPITAL IV (UK) LTD.

On April 16, 2015, the Company entered into an additional clause to the venture loan agreement with KREOS CAPITAL IV (UK) LTD dating from July 19, 2013, under which the parties decided to reschedule the aforementioned bond issue (refer to Section 22.3 of the *Document de référence* for more details on the nature of the bond issue following the rescheduling). In consideration for the rescheduling of the bond, on June 24, 2015, the Company's Board of Directors, acting under the authority granted to it on the same day by the Company's Combined General Meeting of Shareholders, resolved to issue 18,473 share subscription warrants in favor of KREOS CAPITAL IV (Expert Fund) LTD.

Non-compliance on the part of the Company with any of its commitments under this bond or events (such as failure to pay one of the sums on its due date, breach of the protocol and commitments given in this respect, the Company's insolvency, a change in the Company's field of activity, the transfer of intellectual and industrial property rights held by the Company) could result in the early repayment of the entire bond.

Early repayment and payment default on the part of the Company in respect of the bond could result in the enforcement of securities granted by the Company to KREOS CAPITAL IV (UK) LTD and the transfer of all of its intellectual and industrial property rights.

The Company may be unable to meet the repayment installments for this loan and may find itself in a situation of insolvency or be deprived of all or part of the assets pledged as a guarantee against repayment (see Sections 22.3 of this *Document de référence*, in particular for the commitments made by the Company for this bond and the conditions under which early repayment would be required).

The bond repayment schedule at December 31, 2016 breaks down as follows:

MATURITY OF BOND ISSUES, IN REDEMPTION VALUE (Amounts in € thousands)	**Non-convertible KREOS bond issue**
At December 31, 2016	**1,119**
Part due in less than 1 year	1,119
Part due between 1 and 5 years	-
Part due in more than 5 years	-

Issue of convertible bonds with share subscription warrants attached ("OCABSA") in favor of L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND

On October 14, 2015, the Company signed an OCABSA agreement with L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND for potential funding of €5 million, at the Company's discretion (refer to Section 21.1.4.5 of the *Document de référence* for further details on the terms of this agreement).

The Board of Directors decided the issue of:

- an initial tranche of 100 OCABSA with a total value of €1.0 million on October 12, 2015;
- a second tranche of 35 OCABSA with a total value of €350 thousand on June 29, 2016;
- a third tranche of 25 OCABSA with a total value of €250 thousand on July 29, 2016.

On the date of the *Document de référence*, one convertible bond was still outstanding.

The Company may issue 340 additional warrants to L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND, which may give rise to a bond issue of a maximum additional amount of €3.4 million subject to the following:

- that direct and indirect investments by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND in the Company's capital do not exceed 3% of the capital and voting rights given the number of potential shares resulting from the conversion of convertible bonds;
- both the closing price and weighted average price over the five trading days preceding the issue request being at least €1.10.

Bank borrowings

The bank borrowing repayment schedule at December 31, 2016 breaks down as follows:

BANK LOANS BY MATURITY (Amounts in € thousands)	**Bank loans**
At December 31, 2016	**254**
Part due in less than 1 year	168
Part due between 1 and 5 years	85
Part due in more than 5 years	-

4.7.5. Liquidity risk

Since its establishment, the Company has made significant investments in research and development, commercial expenses and marketing, all of which contributed to the negative operating cash flow, which amounted to €5,892 thousand in the fiscal year ending December 31, 2016 and €6,811 thousand for the fiscal year ended December 31, 2015.

On the date the annual financial statements were closed, the Board of Directors deemed the Company as going concern, given its financial strength in terms of financial needs over the next 12 months. This analysis is based in particular on the Group's cash and cash equivalents of €6,067 thousand at December 31, 2016 and the cash investments that can be made available during the 2017 fiscal year for €1,006 thousand.

The Company is also examining possible additional financing to fund new developments, which could involve a capital increase, particularly if the Company is no longer able to use the OCABSA credit line, or if it decides not to use it.

On the date of the *Document de référence*, the Company had the required means to meet its financial obligations for the next 12 months without using the convertible bonds with share subscription warrants.

The Company may have additional financial needs in the future to develop and market its products. The Company may find that it is unable to fund its growth itself and may need to look for other sources of funding, consolidating its equity by means of a capital increase and/or by taking out loans.

The Company may find that it is not able to raise additional capital when it needs it, or that the capital is not available under acceptable financial conditions. If the necessary funds are not available, the Company may have to limit the development of new products in particular or delay or suspend marketing on new markets.

Moreover, debt financing, where available, could place restrictive conditions on the Company and its shareholders.

The occurrence of one or more of the aforementioned liquidity risks could have a significant negative impact on the Company, its business, financial position, results, development and outlook.

4.7.6. Risks of dilution

The shareholder's holding in the Company's capital could be significantly reduced.

On the date of the *Document de référence*, the Company had issued and awarded share subscription warrants (BSAs), Founders' warrants (BSPCEs) and share subscription and purchase options; in addition, it had set up an agreement for the issue of convertible bonds coupled with share subscription warrants ("OCABSA").

At the date of this *Document de référence*, the full exercise of all of the instruments giving access to the share capital allocated and outstanding would enable the subscription of 2,977,457 new shares, thus leading to dilution equal to 13.73% based on the capital existing today, and 12.08% based on the fully diluted share capital (excluding conversion of the OCA (and share subscription warrants) to be issued upon the exercise of 340 share issuance warrants (BEA) issued to L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND (refer to Section 21.1.4.5 of the *Document de référence*)).

As part of its policy to motivate its executives and employees and to attract and retain qualified personnel, the Company may, in the future, issue or allocate shares or new financial instruments giving access to the share capital of the Company, which could result in further, potentially significant, dilution for the Company's shareholders.

(Refer to Section 21.1.4 of the *Document de référence* for the description of the terms of the dilutive instruments at the date of this *Document de référence*).

4.7.7. Risks linked to the research tax credit

The Company receives the Research tax credit (CIR), which is a tax credit offered by the French state to companies who make significant investments in research and development.

The amount requested for the 2016 CIR totaled €203 thousand.

It cannot be ruled out that the tax authorities question the methods used by the Company to calculate its research and development expenses or that the CIR is called into question as a result of a change in regulations or claim by the tax authorities even though the Company complies with the document and eligibility requirements for expenses.

If such a situation should occur, it could have a significant negative impact on the Company's results, financial position and outlook.

4.7.8. Risks linked to public advances and financing

Since it was established, the Company was granted the following repayable grants and innovation loans:

At the date of this *Document de référence* (amounts in € thousands)	**Amount granted***	**Amount repaid**	**Amount outstanding**
OSEO Knees	350	282	**68**
OSEO – Beep'n Track	650	650	**-**
COFACE USA – Beep'n Track	194	194	**-**
BPI innovation loan - Jazz Braid	800	-	**800**
Total	**1,994**	**1,126**	**868**

** not including any expenses incurred by the Company*

These advances and innovation loans are shown in Section 10.1.2 of the *Document de référence*.

Should the Company fail to respect the contractual conditions set out in the loan agreements, it could be forced to pay the sums back early.

This could deprive the Company of the necessary financial resources for its research and development projects and it cannot guarantee that it would find the additional finances required.

4.8. MARKET RISKS

4.8.1. Interest rate risks

The Company is not exposed to any interest rate risk in respect of its assets since its excess cash is placed in term accounts and fixed-rate negotiable medium-term notes.

The Company has no variable-rate debt. The loans taken out by the Company are the following:

- Non-convertible bond for the sum of €5,000 thousand to KREOS CAPITAL IV (UK) LTD on July 19, 2013 (which was amended by an additional clause on April 16, 2015), with fixed-rate interest of 11.5%. (See Section 22.3 of the *Document de référence*);

- Convertible bond subscribed for on October 14, 2015, by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND. This bond does not bear any interest. At the date of this *Document de référence*, this loan amounts to €10 thousand;

- Three-year bank loan of €500 thousand taken out on June 10, 2015, with fixed-rate interest of 1.95% per annum.

The lease agreements signed by the Company to finance its ancillary devices and instruments have a fixed interest rate.

Further, at the date of the *Document de référence*, the Company had no overdraft authorizations.

The Company therefore estimates that it is not exposed to any significant risk relating to variations in interest rates.

4.8.2. Foreign exchange risks

The Company's cash is exclusively invested in euro-denominated investment products.

The Company's strategy is to favor the euro as the currency for signing its commercial agreements (except for the agreements signed by the Company's American subsidiary, Implanet America, Inc.).

The Company opened a subsidiary in the United States (in February 2013). Accordingly, this opening generated greater exposure to the foreign exchange risks linked to variations in the euro/US dollar exchange rate. The chief risks in respect of the foreign exchange impact on purchases and sales in foreign currencies relate essentially to transactions conducted with this subsidiary.

In its current state of development, the Company has not made any provisions to hedge against variations in foreign exchange rates. Nevertheless, the Company cannot rule out the possibility of a significant increase in the US subsidiary's business, resulting in greater exposure to foreign exchange risks. The Company will then envisage making use of an appropriate policy for hedging these risks.

If the Company does not take efficient measures in the future to hedge against foreign exchange risks, this could impact its operating income.

4.9. INSURANCE AND COVERAGE OF RISKS

The Company has put in place a policy to cover the main insurable risks with the amount of security suitable for the nature of its activity. The expenses incurred by the Company relating to its insurance policies (France and United States) amounted to €350 thousand for the fiscal year ended December 31, 2016.

Table summarizing the Company's insurance policies:

Type of insurance	Insurance Company or Broker	Coverage	Amounts covered	Deductible per claim
Third party liability for businesses	Cabinet ABC - CHUBB	Worldwide, excluding PERMANENT ESTABLISHMENTS OR ESTABLISHMENTS REQUIRING FACILITIES OR AGENCIES LOCATED OUTSIDE METROPOLITAN FRANCE AND THE PRINCIPALITIES OF MONACO AND ANDORRA, other than the foreign establishments or agencies expressly mentioned in the contract (e.g. Boston office)		
	Operation	All damage taken together, including personal injury, of which:	Per insurance year:	
		- Inexcusable fault	€3,000,000	€5,000 per victim
		- Material and immaterial damage including:	€10,000,000	€2,000
		- Theft committed by agents/employees	€10,000,000	€2,000
		- Damage to entrusted goods	€30,000	€2,000
		- Immaterial non-consecutive damage	€300,000	€2,000
		- Sudden and accidental pollution	€500,000	€2,000
	Products/after Delivery	All damage taken together, including personal injury, of which:	Per insurance year:	
		per claim	€10,000,000	€15,000
		and per period of insurance	€10,000,000	€15,000
			Per insurance year:	
		Immaterial non-consecutive damage	1,500,000 €	€15,000
		Withdrawal expenses	€500,000	€15,000
		USA/Canada guarantee per claim	€10,000,000	€15,000
		USA/Canada guarantee per period of insurance	€10,000,000	€15,000
	Legal expenses	Legal expenses	Per insurance year: €30,000	Disputes exceeding €1,500
Industrial and Commercial Multi-risk Damage to Goods and Operating Losses	AXA	Principal guarantees:		
		Fire, explosions, lightning, falling aircraft, impact by terrestrial vehicle, storms, vandalism, terrorism, water damage	Covered up to the insured amounts	Fire: nil Water damage: €1,774 Storm damage: 10% minimum €1,774 Rioting: 10% minimum €2,661
		Damage to electrical, electronic, computer and office equipment	€49,897	€887
		Breakage of IT and office equipment	Not covered	
		Breakage of Machines	Not covered	
		Breakage of windows	€11,975	€887
		Theft, attempted theft (assets, furniture, goods for resale)	€299,381	
		Cash and valuables in cash registers or safety deposit box	Not covered	
		Transport of funds	Not covered	

Type of insurance	Insurance Company or Broker	Coverage	Amounts covered	Deductible per claim
Industrial and Commercial Multi-risk Damage to Goods and Operating Losses	AXA	Loss of goods for resale subject to controlled temperatures	Not covered	€3,500
		Subsidence	Not covered	
		Other natural events	Not covered	
		All risks except (other material damage)	€1,496,907	
		Goods during transport	Not covered	
		Goods in any place at third parties	€3,727,298	
		Goods entrusted	€3,472,824	
		Assets during construction	Not covered	
		Goods during "Assembly-Trials"	Not covered	
		Automatic insurance	€49,897	
		Difference in conditions, limits and definitions		
Goods for Resale Transport	AXA	Sea transports	€300,000	with no deductible
		River, air and land transport	€300,000	with no deductible
		Own transport	€60,000	with no deductible
		Trade fairs - Exhibitions	€150,000	with no deductible
		Postal	€5,000	with no deductible
Third party liability of executives and corporate officers of listed companies	CHUBB	Third-party liability for corporate officers, legal defense fees, assistance in criminal cases (per period of insurance)	€3,000,000	with no deductible (1)
		(1): Apart from lawsuits regarding publicly traded securities (USD 25,000 in the USA and €25,000 outside of the USA) and claims brought before US courts (US$25,000)		
Automobile fleet	AXA	Damage caused by any kind of accident, damage caused by collisions	Covered	€450 or €650
		Fire, explosions, terrorist attacks, hail and storms	Covered	€450 or €650
		Theft	Covered	€450 or €650
		Breakage of windows	Covered	€80
		Natural disasters	Covered	with no deductible
		Driver cover	€160,000	with no deductible
Subsidiary's Insurance (Boston US)	Federal Insurance Company	Commercial General Liability	$1,000,000	
		Workers Compensation and Employers'Liability	$1,000,000	
		Property	$120,000	

5. INFORMATION ON THE ISSUER

5.1. HISTORY AND DEVELOPMENT OF THE COMPANY

5.1.1. Registered name of the Company

The Company's registered name is: Implanet SA.

5.1.2. Company's place and registration number

The Company is registered in the Bordeaux Trade and Companies Register under identification No. 493 845 341.

The Company's NAF code is 4646Z.

5.1.3. Date of incorporation and duration

The Company was incorporated on 23 January 2007 for a term of 99 years ending on 23 January 2106, excluding the event of early dissolution or extension.

5.1.4. Company's registered office, legal form and applicable legislation

The Company's registered office is located in the Technopole Bordeaux Montesquieu, Allée François Magendie, 33650 Martillac, France. The Company's contact details are:
Telephone: +33 (0)5 57 99 55 55
Fax: +33 (0)5 57 99 57 00
Website: www.implanet.com

The Company is a *Société Anonyme* (French public limited liability company) with a Board of Directors.

The Company is governed by French law; its operations are mostly subject to Articles L. 225-1 *et seq.* of the French Commercial Code.

5.1.5. History of the Company

2006 to 2012	• Rounds of financing totaling €34 million. • CE marking and placement of the first Madison knee prostheses in 2010. • Sale of the Beep N Track business to the American company GHX, global leader in hospital logistics, in 2011. • FDA 510 (k) approvals for Jazz in October 2012.
2013	• Signing of distribution agreements for Jazz in Italy, Australia and New Zealand. • Signing of distribution agreements in Russia and submission of registration filings for the Knee and Spinal ranges. • Registration of Spinal and Knee ranges in India. • Submission of regulatory filings for the Spinal range in Brazil. • Opening of US subsidiary Implanet America in February. • Deployment of Jazz in France and Europe. • Signing by Implanet America of sales agents agreements with Spine specialists

	on the East and West coasts of the United States. • First placements of Jazz in the United States in June. • Issue of bonds redeemable in shares for an amount of €1.5 million in January 2013, and of convertible bonds for a total amount of €2.9 million in May and July 2013, fully converted into shares on the IPO. • Issue of €5 million in bonds in favor of KREOS CAPITAL IV (UK) LTD. • Listing on the Euronext Paris regulated stock market in November.
2014	• Discontinuance of marketing of hip prostheses during the first half of 2014. • Opening of an equity line of credit by Kepler Cheuvreux. • The Company's CEO, Ludovic Lastennet, oversees the operations of the subsidiary Implanet America Inc. in the United States from Boston. • FDA validation of the Martillac site in February 2014. • Signing of several sales agents agreements in the United States, enabling the Company to extend its sales network to 25 partners, covering over 60% of the US market. • White paper published in July 2014 by Professor Ilharreborde's team on the results of a clinical study on the restoration of frontal and sagittal balance in scoliosis surgery in adolescents. • First white paper on the use of Jazz in elderly patients suffering from degenerative diseases, published by Dr. Cavagna in December 2014. First results of the efficacy of surgery for degenerative lumbar scoliosis with an average follow-up period of 16 months.
2015	• Definitive intellectual ownership obtained for the Jazz technology in Europe until 2031 (patent number EP 2521500). • Capital increase with preferential subscription rights for shareholders amounting to €11.2 million, including issue premiums. • Final results of a clinical study demonstrating the efficacy of the Jazz implant in the treatment of idiopathic scoliosis in adolescents. • CE marking and FDA approval (US) obtained for all new Jazz diameters. • FDA 510(k) approval obtained in the US for the use of the Jazz platform with all thoracolumbar fixation systems (screws, rods, hooks) available on the market. • Set up of a financing agreement involving the issue of convertible bonds coupled with share subscription warrants ("OCABSA") for potential funding of €5 million, liable to be matched by an equivalent amount if the attached share subscription warrants are exercised, and drawdown of the first tranche in the amount of €1 million. • Regulatory authorization obtained from the Brazilian health authority (ANVISA) for the marketing of the Jazz Band™ platform.

2016	• Successful outcome of the first Jazz implant in Brazil, the biggest market in Latin America. • Appointment of Brian Ennis as head of the subsidiary Implanet America Inc. • Launch of a prospective, multi-center clinical study with TFS International on the use of Jazz in the treatment of degenerative spinal disorders. • Green light for a new implant: Jazz LOCK® • Issue of the remaining bonds convertible into shares with share subscription warrants attached ("BEOCABSA") as part of the financing implemented in October 2015. Drawdown of a second and third tranche of €350 thousand and €250 thousand, respectively. • €800 thousand interest-free innovation loan obtained for the "development and clinical assessment of the Jazz type braided implant for degenerative spinal surgery (particularly the securing or replacement of pedicle screws)". • Patent for the Jazz® technological platform issued in the United States by the US Patent and Trademark Office (USPTO). • Successful outcome for the first surgeries with the new Jazz Lock® implant in France, Italy and the United States. • Capital increase with preferential subscription rights for shareholders amounting to €6.9 million. • Publication of a new White Paper *"Correction of Adolescent Idiopathic Scoliosis in hypokyphotic patients using Jazz sublaminar bands: preliminary results of a multricentric study using 3D reconstruction",* presenting the results of the clinical analyzes carried out on a group of adolescents suffering from thoracic hypokyphotic scoliosis treated with sub-laminar Jazz implants.
2017	• European Patent granted by the European Patent Office (EPO) for the universal tensioning system for the Jazz® implant. • FDA 510(k) and European (CE) regulatory marketing authorization obtained for the new Jazz Frame® implant. • French patent granted by the French Patent Office (OEB) for the Jazz Lock® implant. • Signing of an exclusive distribution partnership in Australia and New Zealand. • Planned transfer of Implanet SA's listing to Alternext market in Paris

5.2. INVESTMENTS

5.2.1. Key investments over the last two fiscal years

Key investments (in € thousands)	12/31/2016	12/31/2015
Intangible fixed assets	**72**	**309**
of which capitalization of development expenses	*71*	*273*
Property, plant and equipment	**607**	**401**
of which equipment and tooling	*531*	*268*
Total	**679**	**710**

** including under lease-financing*

The Group's investments in intangible fixed assets during the two fiscal years presented mainly relate to the capitalization of development costs (for the “Jazz Claw”, “Jazz Lock” and “Madison Revision” projects).

Property, plant and equipment investments over the last two fiscal years mostly related to acquisitions of ancillary devices or instruments, mainly achieved through finance leases.

5.2.2. Key ongoing investments

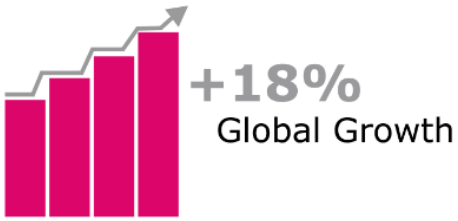
No major investments have been made since January 1, 2017.

5.2.3. Key future investments

At this stage, the Company does not plan to make significant investments in the coming years, which would have required its managing bodies to make firm commitments.

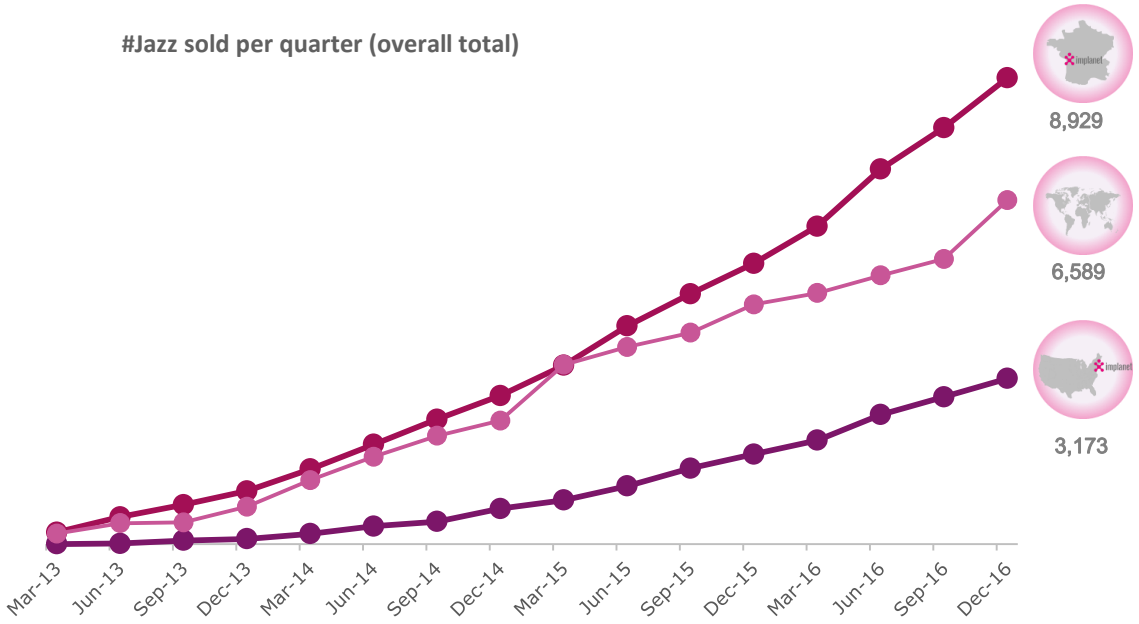
6. OVERVIEW OF ACTIVITIES

Implanet is a company which manufactures implants designed for orthopedic surgery, with the mission of identifying, designing and producing major innovations in the most promising orthopedic segments (knee and spine). The Company markets its products throughout the world and recorded consolidated revenues of €7.8 million in 2016.



Implanet has been marketing its star product, Jazz, since 2013. Its purpose is to improve the treatment of spinal disorders requiring spinal fusion. This product complements the range of products routinely used, such as pedicle screws and hooks, and has already been used in more than 3,500 surgical procedures, representing almost 19,000 Jazz implants.

Number of units sold (overall total)				
	2013	**2014**	**2015**	**2016**
Overall Units sold	1,829	5,889	11,690	**18,691**



In addition, Implanet continued to recruit new surgeons, with 127 surgeons using(1) its Jazz technology at December 31, 2016, on its direct markets which are France and the United States of America.

Number of active surgeons *in France and in the United States*[1]

	2013	2014	2015	2016
	10	21	39	58
	6	17	43	69
Number of active surgeons	16	38	82	**127**

(1) Number of active surgeons in the treatment of spinal disorders with activity over the previous rolling 12 months (source: Company).

+46 %
Global Spine Growth

In 2016, Implanet generated an 18% growth in revenue, driven by Spinal sales (Jazz) which were up 46%, for the first time outperforming Knee sales over a 12-month period. The growth in Spinal sales was reflected in a first rate performance in the United States (+70%) and solid performances across all the Group's other markets:

IFRS data

	France	United States	Rest of the World	WW
	Direct distribution		**Indirect distribution**	
Revenue	€3.9 million	€2.0 million	€1.9 million	€7.8 million
Jazz growth	*+33%*	*+70%*	*+21%*	*+46%*

The main spinal surgical procedures involve fusing vertebrae on one or more levels. For this, metal rods attached to the vertebrae are used to immobilize them while bone fusion takes place. The rods are attached to the vertebrae by pedicle screws implanted into the vertebra body. For more complex assemblies, hooks are also used. These techniques, developed over the past thirty years, were first used in the treatment of deformities (e.g. severe scoliosis) then extended to other spinal pathologies (traumatisms, tumors, degenerations such as degenerative disc disease, stenoses, spondylolisthesis, etc.).

The Implanet Research & Development team designed the Jazz implant to improve on the first generation of braided implants marketed by Zimmer. The Company considers that Jazz represents major innovations which make it easier to use in the operating room and leads to improved surgical efficacy. The Company's ambition is to generalize the use of this third family of implants, alongside screws and hooks.

Indeed, the Company has built a genuine technological platform around the initial Jazz implant, in order to address a market estimated at $2.1 billion[1] (see Section 6.4) through:

- the extension of its range;
- the compatibility with all commercially available fixation systems; and
- possibility of use across all spinal levels.

The Company's strategy is to turn its Jazz technological platform into the global reference on the braided implants market, boosting its adoption by surgeons through its ease of use.

The Company also relies on its historical activity with implants for knee surgery, which is a major area of expertise and enables the Company to benefit from scale effects on its operational activities (commercial, logistics, production, regulatory affairs, etc.), thus covering part of its fixed costs.

6.1. SIGNIFICANT PROGRESS IN 2016

Using the strategy defined in 2013, consisting in focusing on its Jazz technology, the Company has made significant progress in 2015 and 2016 which are described in the paragraphs below.

6.1.1. Maximize the choice of Jazz via a reference study support

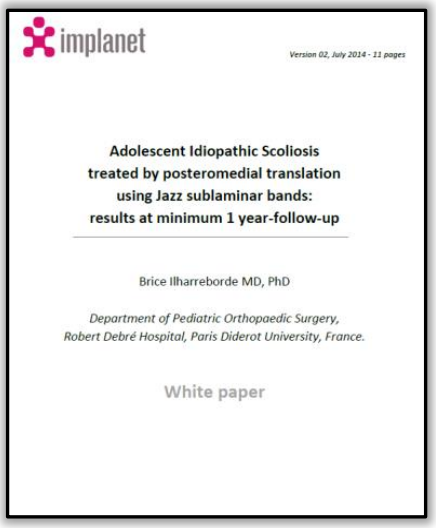
6.1.1.1. Objectives announced

- document the superiority of Jazz in scoliosis;
- demonstrate Jazz's efficacy in degenerative diseases;
- intensify marketing activities and set up a scientific advisory board, i.e. in the US and in Europe.

[1] Company estimate (see Section 6.4).

6.1.1.2. Achievements in 2015 and 2016

White paper published by Professor Ilharreborde (APHP – Hospital Robert Debré) and Professor Choufani (APHM – Hospital de la Timone) demonstrating better restoration of frontal and sagittal balance in scoliosis surgery on adolescents than via conventional techniques (12-month follow-up / 20 patients). This two-part white paper compares the data and results from two prestigious university centers. The continuous quality in results achieved and the absence of correlation between said results and the surgeons performing the operation has now been clearly established.



implanet

Version 02, July 2014 - 11 pages

Adolescent Idiopathic Scoliosis treated by posteromedial translation using Jazz sublaminar bands: results at minimum 1 year-follow-up

Brice Ilharreborde MD, PhD

Department of Pediatric Orthopaedic Surgery, Robert Debré Hospital, Paris Diderot University, France.

White paper

Professor Ilharreborde also demonstrated (in a white paper in 2015 and then in the "Journal of pediatric orthopaedics" in 2016) that there is a limited risk of additional infections using sublaminar bands but that this is lower than the risk using the traditional hook and screw systems.

implanet

Version 02, December 2014 – 21 pages

Hybrid Screw/Jazz Constructs In Degenerative Lumbar Scoliosis Surgery: Preliminary Results

Rémi Cavagna, M.D.
Olivier Goasguen, M.D.

Department of Spine Surgery
Clinique mutualiste de la Porte de l'Orient
Lorient, France

White paper

Publication by Dr. Cavagna and Dr. Goasguen (Clinique mutualiste de Lorient) of the first white paper on the use of Jazz in elderly patients. Their results demonstrate the efficacy of Jazz implants in surgery for degenerative spinal deformities with an average follow-up period of 16 months.

The Company's clinical and scientific management also collaborated with the Mayo Clinic (Rochester, Minnesota) to conduct an ex-vivo study of a cadaveric osteoporotic specimen designed to study the behavior of the anchorage of pedicle screws with and without the protection of a Jazz implant. The study's preliminary results are encouraging and point to a protective effect of the fixation through the use of the Jazz implant. The results obtained by the Mayo Clinic's biomechanical laboratory will be released in a publication.

The Company enhanced the composition of its scientific advisory board with Doctors Brian Kwon, Goeffrey Stewart and Raymond Woo appointed as medical advisers for the US and tasked with the set-up of clinical follow-up and education programs.

Dr. Brian Kwon is a graduate of the Washington School of Medicine, St Louis MO. He practices at the New England Baptist Hospital in Boston and specializes in minimally invasive spine surgery. Dr. Kwon is a member of the North American Spine Society (NASS) and sits on the Editorial Committee of the Journal of Spinal Disorders and Techniques.

Dr. Geoffrey Stewart is a graduate of the Jefferson Medical College of Medicine, Philadelphia PA. He practices at the ORMC Hospital in Orlando and specializes in degenerative spinal disorder surgery on adults. Dr. Stewart is an Associate Professor at the University of Central Florida and trainer for the Orlando Regional Healthcare System. He is a member of the North American Spine Society (NASS).

Dr. Raymond Woo is a graduate of the Wayne State University School of Medicine, Detroit MI. He practices at the Florida Hospital for Children in Orlando FL, where he is Director of the pediatric orthopedic ward. He specializes in spine surgery on children and adolescents. Dr. Woo is a member of the North American Spine Society (NASS) and Scoliosis Research Society (SRS). Moreover, he sits on the Editorial Committee of the Journal of Spinal Disorders and Techniques.

6.1.1.3. Growth plan

As detailed in Section 6.2.2.1, the Company has decided to concentrate its investments on clinical studies and follow-ups, in line with its objectives of commercial expansion and marketing support in the field of degenerative spine disorders and spine deformities in adults.

The Company has, therefore, set up several post-market clinical trials in France and, in addition, has entered into a partnership with TFS International, a prestigious Contract Research Organization (CRO) specializing in clinical trials, in order to conduct a prospective, multi-center study in the United States aimed at documenting the outcomes of Jazz technology in these indications.

6.1.2. Enhance the range of implants

6.1.2.1. Objectives announced

- adapting the versions of Jazz to 3.5 mm and 6.35 mm rods;
- extending the use of Jazz to all spinal levels; and
- adapting the Jazz platform to less invasive surgical procedures.

6.1.2.2. Achievements in 2015 and 2016

- Jazz 3.5 – 4.0 – 4.5 – 4.75 – 6.0 and 6.35 mm validated; awarded the CE marking, approved by the Food and Drug Administration (FDA) in the US and by the Brazilian health authority (ANVISA) for all new diameters;
- new FDA 510(k) approval for the use of the Jazz platform with all thoracolumbar fixation systems (screws, rods, hooks) available on the US market, allowing Implanet to promote the Jazz platform with all American surgeons;
- approval of Jazz 3.5 mm, new predicate for Implanet's future braided implants;
- rationalization of CE and FDA files for the entire range;

- Market launch of Jazz Lock®, attainment of CE marking and 510(k) clearance by the Food and Drug Administration (FDA), thus extending the range of clinical indications offered by the Jazz Band® to cover the cervical spine;

- Launch of the new Jazz Claw® implant, attainment of CE marking and 510(k) clearance by the Food and Drug Administration (FDA) for this upper-level hybrid fixation system for treating major adolescent and adult deformity; and

- instrumentation in less invasive surgery – 1st generation undergoing validation.

6.1.2.3. Growth plan

In addition to the multi-diameter versions planned during the listing on the Stock Exchange, Jazz has become a real technological platform that can extend its field of application to cover many surgical indications. The components of this platform are detailed in Section 6.2.2.2, along with the Company's objectives for Jazz, in order to extend its use to all spinal levels.

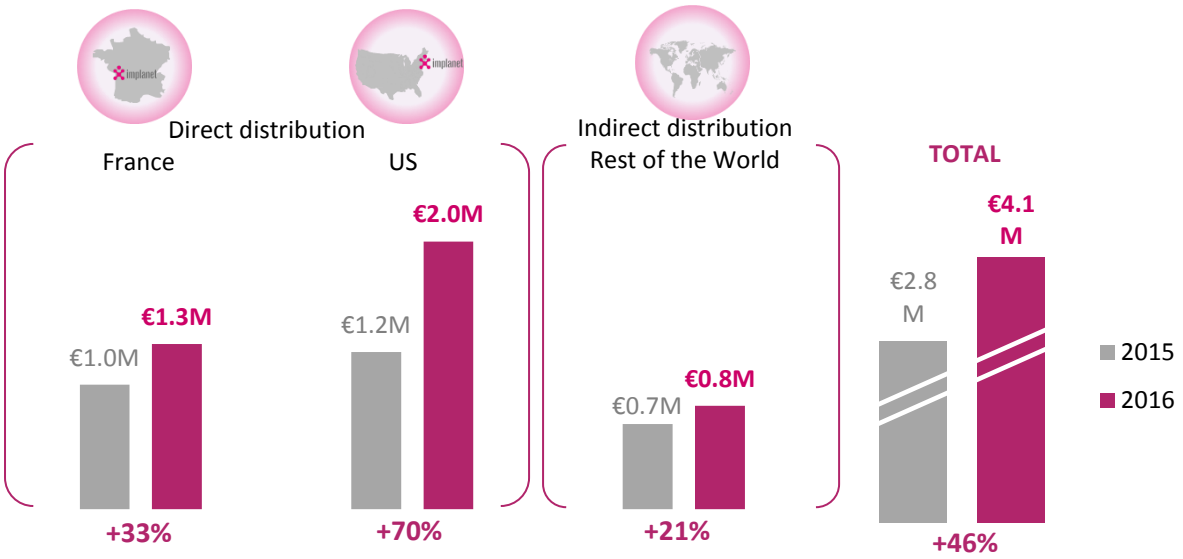
6.1.3. Large-scale deployment of the sales network dedicated to Jazz

6.1.3.1. Objectives announced

- recruiting the best positioned business partners; and
- recruiting to increase exports mainly to the United States.

6.1.3.2. Achievements in 2015 and 2016

In 2016, Jazz revenues accounted for 52% of the Group's total sales, versus 42% in 2015, upheld by sharp growth in the United States (+70%) and solid performances across all of the Company's other markets:



Structure in Europe and in the rest of the world

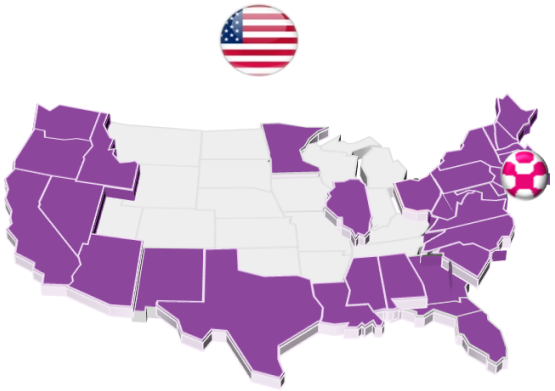
- 1 Sales Director, Europe
- 1 International Product Manager
- 1 Training Manager
- commercial rollout in Europe (Germany – Europe's No. 1 Spine market, Spain and Portugal, Italy, UK)
- commercial rollout underway in Russia
- registration obtained in Brazil (leading Latin American market) and in Israel, commercial rollout underway, with the first jazz surgery conducted in 2016 and early 2017
- contact initiated with distributors in Mexico, Australia and Scandinavia (these discussions are expected to be finalized in H1 2017)

It is specified, however, that in India, major modifications to the government's reimbursement policy have meant that the Company has had to delay its commercial rollout.

Acceleration in the United States

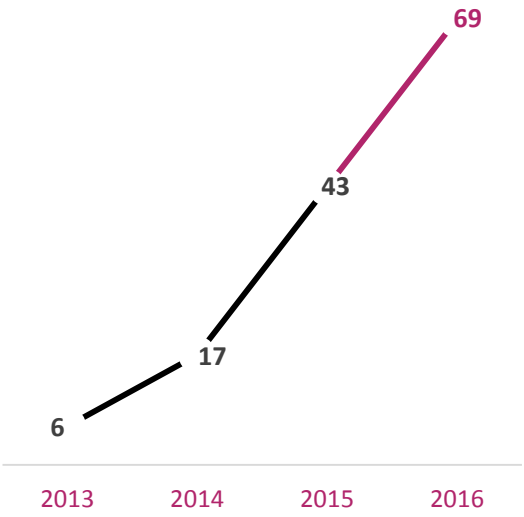
- 29 agency contracts signed,
- Brian T. Ennis recruited to head operations in the US,
- 7 sales & marketing staff.

Sales organization (end of 2016)



Direct distribution:
29 agencies in the US
covering 60% of the country

Number of active surgeons[1]



(1) Number of active surgeons in the treatment of spinal disorders with activity over the previous rolling 12 months.

This growth in sales on the American market confirms the Company's strategic choice in terms of commercial structure, involving a small number of salaried regional managers in charge of regional sales agents who maintain privileged relationships with surgeons.

While invoicing hospitals directly, Implanet maintains, through this organizational structure, a precise vision of its commercial performance by spreading the direct cost of its sales.

In addition, to step up the marketing of Jazz, the Company has included a surgeon training plan in the Jazz Academy program, presented in Section 6.2.2.3 of the *Document de référence*.

6.1.3.3. Growth plan

As set out in Section 6.2.2.3, the Company will continue to step up its sales and marketing efforts:

- United States: rollout of the Jazz Academy education program, as implemented in Europe;
- Concentrating the “rest of the world” sales organization in two regions: Europe and major export;
- Reinforcing clinical and marketing support to boost the use of Jazz in degenerative spine disorder surgery.

6.1.4. Knee-focused orthopedic activity

The Company has completed its strategic change in order to concentrate solely on its two strategic activities: Jazz and implants for knee surgery.

Knee surgery implant activity plateaued in 2016. The French market, accounting for 70% of total revenue, was up 37%, returning to its 2014 level, partially offsetting activity in Brazil, where macro-economic factors continue to weigh on local performance.

The prospects for this activity are set out in Section 6.3.

6.2. IMPLANET'S STRATEGY: BASING ITS GROWTH ON JAZZ

Implanet intends to accelerate its growth with a strategy based on two themes in the coming years:

1) Accelerating worldwide marketing of the Jazz platform for spinal surgery to make it the global benchmark in braided implants;
2) Continuing its knee surgery implant activity and benefiting from the contribution margin generated by this activity.

Each of these themes has its own characteristics but relies on a joint platform for development, quality assurance/regulatory affairs, production and logistics, which is particularly effective thanks to its recent design and the experience of the Company executives.

6.2.1. Jazz, an attractive economic model allowing expectation of rapid growth and with high margins

On an addressable market worth USD 2.1 billion[2], Jazz presents characteristics allowing expectations of (i) rapid sales growth opportunities via specialist business partners, (ii) high margins particularly in the United States, and (iii) limited working capital requirements compared with the usual requirements in the sector.

6.2.1.1. Marketing through specialist agents and distributors for rapid growth

Given that the Jazz platform complements the vast majority of existing product ranges distributed by the actors of the spinal implant sector, Implanet considers that it is able to select the most adequate business partners in each country (national or regional, depending on the countries).

[2] Source: Company, see Section 6.3.1...

These business partners have a sales force specializing in spinal surgery and are searching for new technologies, such as Jazz, allowing them to expand their ranges and offer their customers or prospective customers major innovations. Furthermore, the Company has already found that the simplicity of training surgeons in the operating technique and the high revenue generated by this type of surgery are particularly attractive and motivating factors for the sales force, which can expect a very rapid "return on commercial investment". As an example, for scoliosis surgery in the United States, the average billing expected per procedure being around USD 8,400, a sales agent can generate an immediate commission of over USD 2,000[3] from the first surgical operation, a substantial sum and consequently attractive.

To date, Implanet has signed agreements with the following business partners covering all or part of their country exclusively:

Country	Name of business partners
Germany	ORTHOVATIVE GmbH
Australia	DEVICE TECHNOLOGIES*
Benelux	INSPINE
Brazil	IMPORTEK - TARGMED
Spain	MBA INCORPORADO S.L.*
Greece	ORTHOPRO MEDICAL PRODUCTS
Iran	RADMAN SAMAN IDEH Co
Israel	M FAST Ltd*
Italy	MEDINEXT
Mexico	NOVOVASCULAR TECHNOLOGIES*
Peru	IMPORTEK PERU SAC
Portugal	NEUROWAVE*
UK	LINDARE MEDICAL Ltd

**New business partners recruited in 2016.*

Implanet America, Inc. coordinates the commercial rollout of the Group in the United States, with the support of the business partners listed in the table below, thus covering most of the American territory:

Name of business partners	Territory covered (entirely or partly)
Gulf States Surgical*	Alabama
Operating Room Specialties	Arizona
BayFusion	California
Evolution Pacific	California
Spinal Applications*	California
NuSpine	North Carolina
Paramount Medical	North Carolina
Mountain West Medical	Colorado

[3] Based on payment to agents of a 35% commission as observed by the Company.

Name of business partners	Territory covered (entirely or partly)
Victor Medical	Connecticut
Spine Enthusiast	Florida
SS Fusion	Florida
Crosslink Ortho*	Georgie
Medical Innovations	Indiana
InMotion Medical	Louisiana and Texas
Paradigm Biodevices	Massachusetts
RM St. John	New York
Biosystems New England*	New England
Presidential Medical	Ohio
Rupp & Associates	Ohio
True North Surgical	Oregon
Anthracite Ortho	Pennsylvania
Opus Surgical*	Pennsylvania
S1 Spine	Pennsylvania
Medical Solutions	Texas
Surgicor*	Tennessee
CoreMD*	Texas
Veritex Spine	Texas
Paragon Medical	Virginia
Port Spine	Wisconsin

**New business partners recruited in 2016.*

Business partner selection is based on the recognized competence of these spinal implants market players, on the strength and reputation of their sales network, and especially on the proven ability of these distributors to launch new products relying on their capacity to train users, based in particular on a network of reference centers and selected opinion leaders.

6.2.1.2. Prices ensuring high margins

Jazz is an implant which allows high margins. The Company's strategy is focused on an average unit sales price for its implant to American healthcare establishments (invoiced directly by Implanet America, Inc.) of USD 1,530 and a sales price to importing distributors in other countries of €320 on average. Thus, based on an average price of USD 1,000 per implant, the gross margin generated by the Company should remain above 85% (before commissions paid to sales agents, where applicable).

This high margin level achieved as early as from the product launch phase allows the margin to be distributed between all the business partners involved, whether they have distributor or sales agent status. This financial motivation is essential to ensure that all market players are mobilized in the commercial deployment phase.

6.2.1.3. Potentially significant cash flow generation with limited investments and working capital requirements

The orthopedic sector, and to a lesser extent the spinal surgery sector, are considered as activities with high working capital requirements, given the substantial number of implant references required and the cost of the associated instruments provided free of charge to healthcare establishments. These working capital requirements generate major cash requirements for the vast majority of growing companies in the sector.

From this point of view, the Jazz technological platform is an exception, since insertion of these implants requires simple and relatively inexpensive instruments (see Section 6.5.4.). This simplicity, combined with substantial margins, allows the Company to anticipate a very virtuous economic model from the point of view of cash generation related to the expected growth in sales. The Company believes that, on a market like that of the United States, provision of instruments and implant stocks should allow a return on investment after fewer than 10 surgical procedures per customer.

Spine sales margins and variable contributions:

	 *USA*		 *France & RoW*	
Financial data	**Revenues**	**100%**	**Revenues**	**100%**
	(COGS)	(13%)	(COGS)	(43%)
	Product Margin	**87%**	**Product Margin**	**57%**
	(Inst. & log.)	(9%)	(Inst. & log.)	(15%)
	(Commissions)	(41%)	(Commissions)	(7%)
	(Other)	(6%)	(Autre)	(3%)
	Var. contribution	**32%**	**Var. contribution**	**32%**
Jazz average sales price	**€1.4 thousand**		**€0.3 thousand**	

6.2.2. Clear strategic orientations for the Jazz division

Implanet has defined a strategy comprising three main lines of action for Jazz: (i) publication of clinical studies to boost the Company's marketing efforts, (ii) extension of the range, and (iii) strong presence on the US market. These strategic objectives are consistent with the positioning the Company wishes to take on the braided implants market: capitalize on Jazz's ease of fitting to speed up the adoption of braided implants and become the leading provider of this implant technology for spinal fusion surgery.

6.2.2.1. A clinical program to support marketing

Implanet can rely on a database of clinical studies and regular users of braided implants for the commercial deployment of Jazz (see Sections 6.4.4, 6.5.4 and 6.5.5), as well as the first publications specific to its Jazz product, available since mid-2014, on pediatric applications to severe deformities and the use of Jazz for osteo-degenerative diseases.

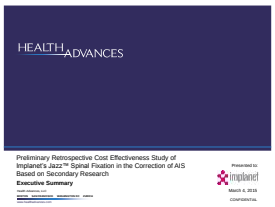
The Company has decided to intensify its investment in clinical studies appropriate to its commercial development objectives and marketing support:

- **OSTEO-DEGENERATIVE (ELDERLY PATIENTS):** following the very encouraging results of the mechanical study of an osteoporotic specimen carried out at the Mayo Clinic and the single-center clinical study carried out in partnership with the University of Ohio in the United States, the Company has decided to intensify its efforts to promote the use of Jazz in elderly patients with poor quality bones.

  Thus, a new multicentric study in the United States, coordinated by TFS and drawing on the results of the biomechanical study conducted at the University of Ohio should confirm the benefit of Jazz to protect pedicle screws in patients operated on degenerative deformities. The Jazz implants will be positioned at the level of the last fused vertebra, at the top of the assembly, with the braid attached to the lamina of the vertebra immediately above it.

  The protocol provides for the enrollment of 100 patients, aged 50 to 80 years old, spread across 5 centers and followed for up to 2 years.

- **MEDICO-ECONOMIC STUDIES:** these studies are conducted to obtain information for the files required by hospital purchasing departments, by documenting the economic advantages of using Jazz, and to allow prescribers to obtain referrals. On this topic, a first study was published in March 2015 by Health-Advances.



Moreover, the Company will continue to support publications on the use of Jazz in pediatric scoliosis and severe deformities. In order to do so, the Company initiated the formation of the International Sub-Laminar Study Group which brings together a significant number of European (France, Italy, Portugal) and American centers around a single protocol and a single clinical database. Its objective, amongst other things, is to enable members of this group to hold regular scientific discussions and share operating data so as to be able to publish their clinical results concerning larger patient cohorts.

The following tables summarize these programs as well as the timetable objectives set by the Company:

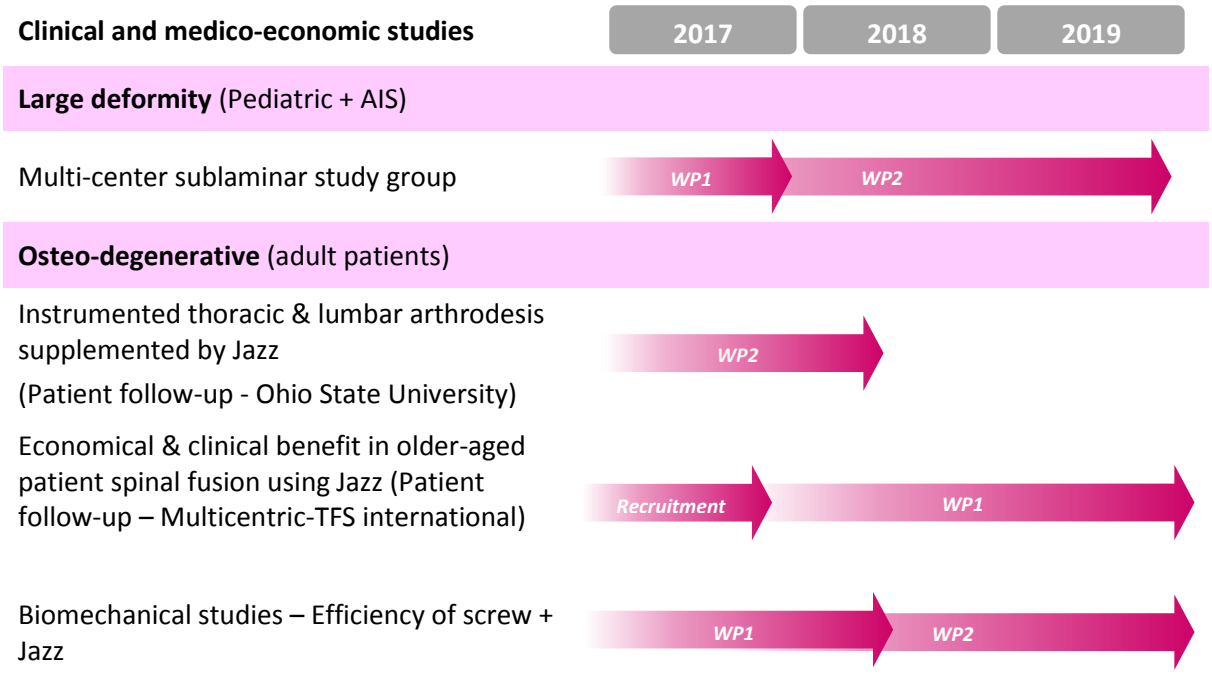
Clinical program

	Criteria	*Purpose*	*Following stages*
Large deformity (Pediatric + AIS)			
Versatility of Jazz in AIS Corrections	▪ Multicenter ▪ Collection of standardized data ▪ Retrospective/prospective	▪ Results over large cohorts ▪ International Group	▪ Protocol validation
International sub-laminar study group	▪ Multicenter ▪ KEOPS computer database & collection of standardized data ▪ Retrospective/prospective	▪ Results over large cohorts ▪ International Group ▪ Sharing of surgical data facilitating publication	▪ Expansion of the Group ▪ Data analysis and first publications
Osteo-degenerative (elderly patients)			
Protective efficacy of pedicle screw on osteoporotic bones MAYO CLINIC	▪ Specimen study	▪ Demonstrate the mechanical qualities for the degeneration market	▪ Publication
Thoracolumbar arthrodesis – case follow-up – protection of pedicle screws using Jazz	▪ Single center (Ohio) ▪ Prospective ▪ Investigator initiated study	▪ Support the use of Jazz for osteo-degenerative bones in the US	▪ Initial results
Use of Jazz in fusion and the treatment of deformities in adults TFS	▪ Multicenter ▪ Prospective ▪ US centers ▪ Coordination by TFS International (Contract Research Organization)	▪ Validation of the protection of pedicle screws in the treatment of degenerative deformities ▪ Demonstrate the benefit of using Jazz for upper level protection	▪ Release from participating centers

Medico-economic studies

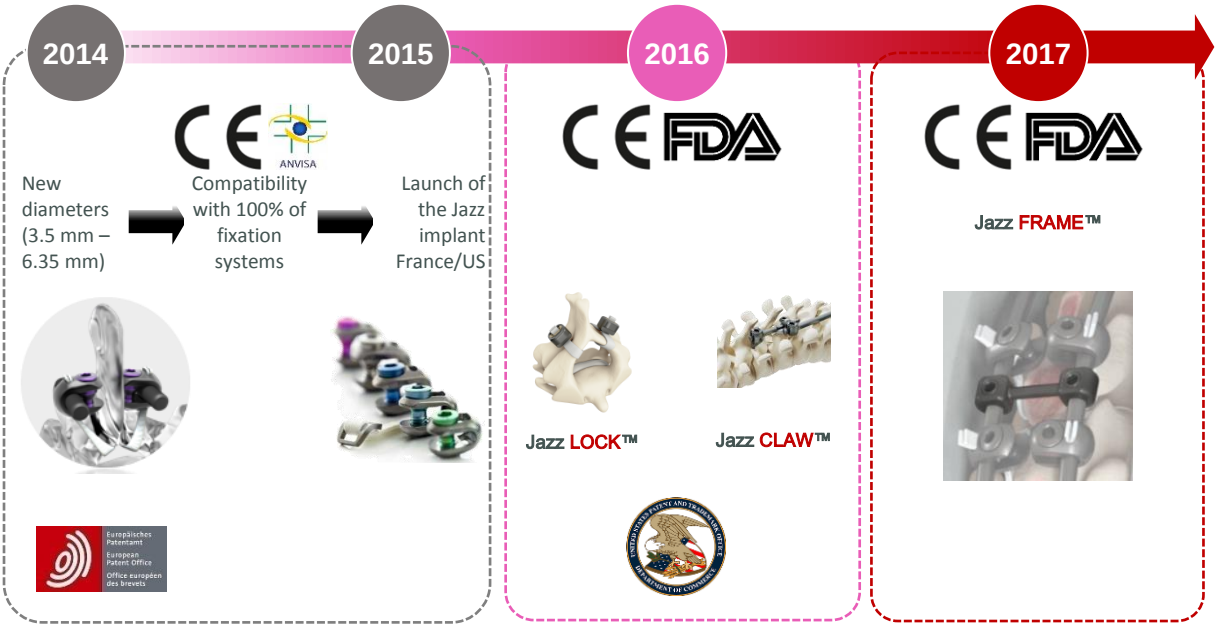
	Criteria	Purpose	Following stages
Medico-economic analysis of using Jazz to correct major pediatric deformities HEALTH ADVANCES Strategy Consultants for the Healthcare Industry	▪ Comparative, multi-criteria analysis ▪ 2 cohorts of 32 patients ▪ Retrospective ▪ Hybrid Jazz construction vs. screw ▪ Conducted by an independent US company	▪ Quantify the medical/economic benefits ▪ Improve listing by healthcare establishments	▪ Publication

Timetable



6.2.2.2. Transforming Jazz into a technological platform

The following diagram details the planned evolution of the Jazz technological platform which, in addition to the multi-diameter versions planned at the time of the listing on the stock market, is becoming a real technological platform which can expand its field of applications to cover many surgical indications.



JAZZ STAND ALONE

Jazz Stand Alone is the result of the natural evolution between Jazz and Jazz Lock. It is a new standalone implant designed for use in degenerative surgery. This vertebral fusion implant is a complementary solution aimed at stabilizing two vertebrae without any connection to the rod when the use of screws is not desirable or possible. The expected benefit for patients is to limit pedicle fixation and thus allow less invasive surgery. This new component of the Jazz platform will be used with existing Jazz instruments.

JAZZ MIS GUIDED BAND

Jazz MIS (new braid & instrument) is a solution aimed at facilitating the various surgical techniques, whether sublaminar or using the transverse processes of the thoracic region, in certain complicated anatomical cases frequently encountered in degenerative spine disorders.

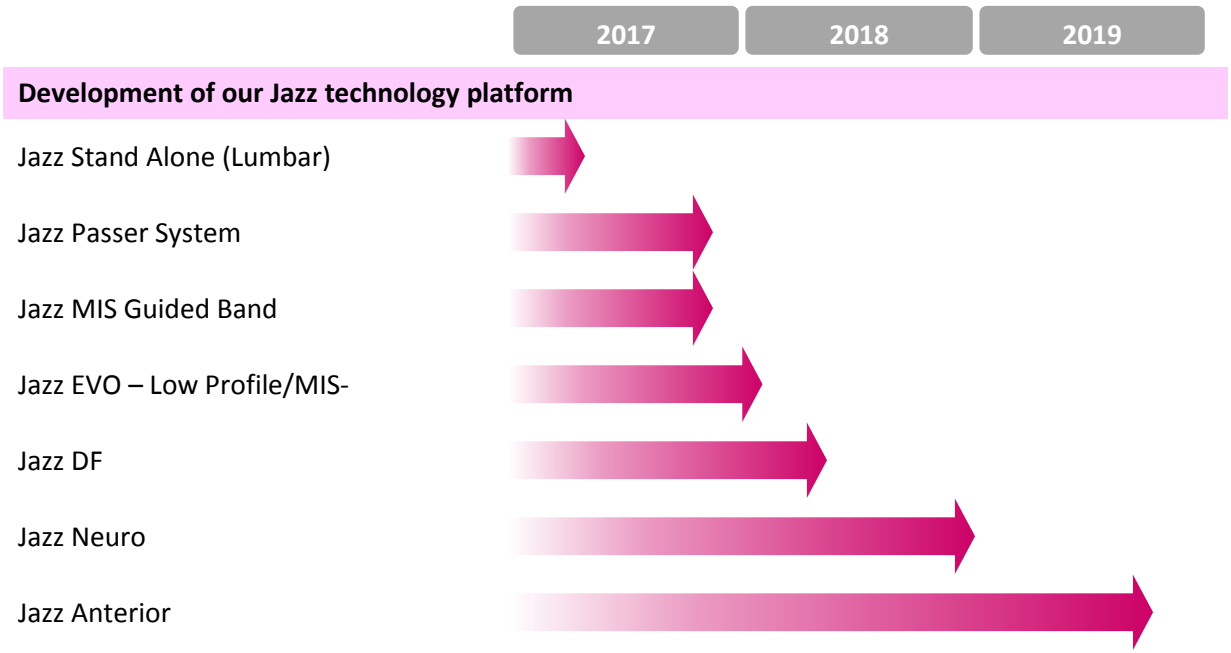
JAZZ EVO

In its constant drive to innovate, the Company works in close collaboration with user surgeons to develop its range and optimize the design of Jazz implants so that they become even easier to use in degenerative spine disorders.

JAZZ DF

The Jazz DF solution reflects Implanet's efforts to investigate all indications that may be compatible with the use of sublaminar braids. This implant will address the demand of surgeons needing, for certain degenerative disorders, a stable fusion solution without the use of pedicle screws.

The Company has set the following objectives for the development or marketing stages for its new products.



6.2.2.3. Increased sales and marketing efforts in line with the strategy implemented in 2013

Backed by its commercial achievements in France, the United States and the rest of the world, the Company is continuing to increase its sales network internationally. In order to support this increase, the Company continues to operate a structure providing constant support for its business partners.

In this context, the Company has set itself the following objectives:

- Sales in the United States. In the United States, the Company will continue to gradually organize its sales team and support staff for business partners (agents) in 2017. The aim is to extend the coverage of the American territory so as to have additional independent business partners who will promote the Jazz technological platform on a daily basis. However, the Company wants to keep its fixed costs down, while continuing to give priority to variable sales-structure costs. Consequently, development through a network of independent agents is particularly suited to the Company's strategy.

- "Rest of the world" sales organization. The creation of a Europe region export department in 2016 confirms the Company's intention to step up its sales efforts on that market. Armed with CE marking for its entire range, rapid progress is expected. Across the main Export region, registration in Brazil (the biggest market in Latin America with 27,000 surgical operations in 2015 and expected annual growth of 7.5% over the upcoming years[4]), the first Jazz operations performed at the end of 2015, and registrations underway in other countries such as Mexico, should enable the Company to take advantage of the growth drivers that these markets represent. The Jazz launch objectives in the main countries are summarized below.

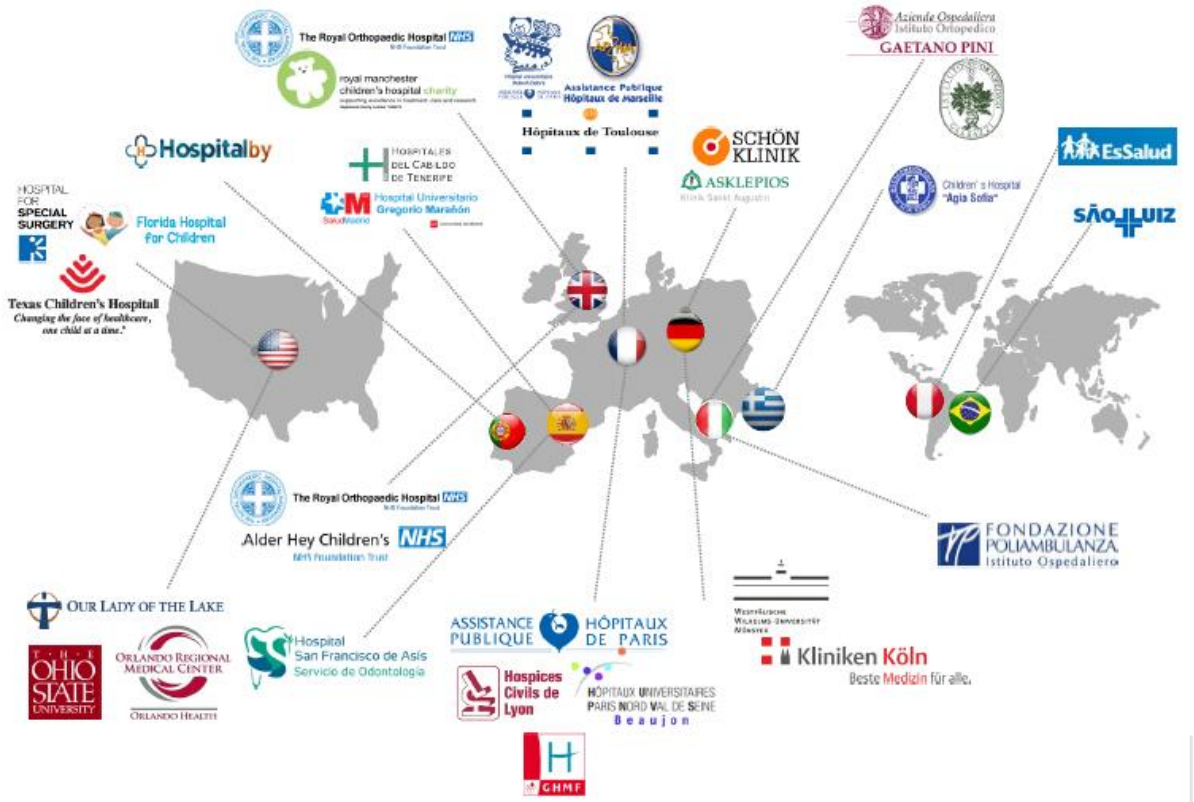
- Increased marketing. The Marketing Department, organized around two Marketing Managers (Europe and the US), one International Product Manager and a Communications Manager, intends to step up the attention drawn to the Jazz technology and the support for sales efforts. This will be done through partnerships with the main scientific companies in the field and through a greater presence at congresses, dedicated workshops and clinical and scientific symposia. In cooperation with the clinical and scientific management, the Marketing Department will take part in scientific boards and attend product development meetings.

- Jazz Academy. In order to facilitate the adoption of the Jazz technological platform and promote its marketing to surgeons, regardless of the applications (deformities or bone degeneration), the Company has recently set up a multi-media education program within the "Jazz Academy". In 2016, the Company organized 14 ad hoc training sessions aiming both to train its world experts and educate future users. This program took various forms, with sessions at the Company headquarters, thus benefiting from the worldwide reputation of the French centers of excellence that are Implanet partners, and sessions organized locally in the reference facilities, both in the United States directly by Implanet and in other countries by the Company's business partners.

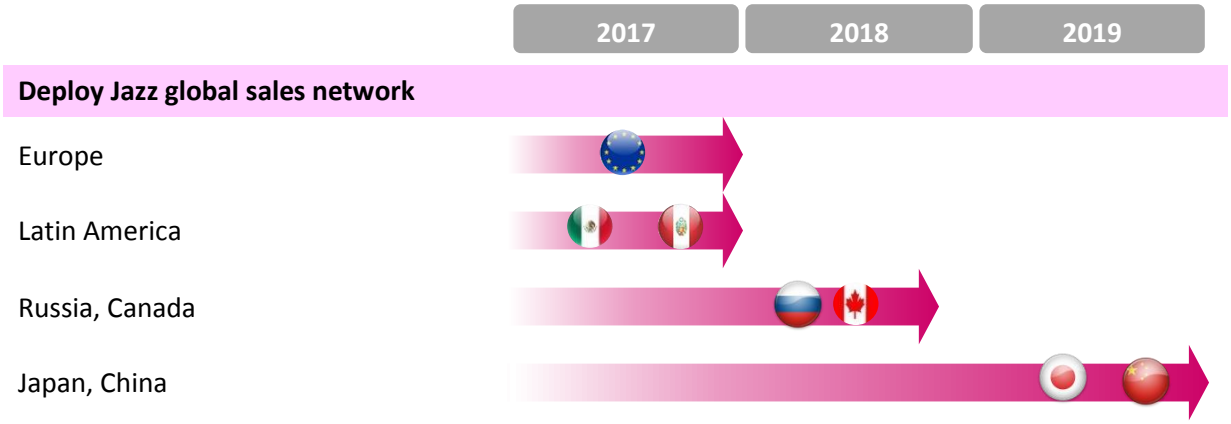
[4] Source: GlobalData, version 2015, "Global Spinal Market 2005-2021".

Jazz ACADEMY	Number
Sessions since the launch in Q2 2015	24
Total number of participants, of which:	177
Surgeons	*57*
Sales staff/agents/distributors	*120*

Implanet has numerous prestigious reference centers throughout the world:



The table below summarizes the Jazz launch objectives in the key countries.



6.2.3. A range of classic spinal implants: screws, rods, hooks and cages

The Company developed this range for tactical and independence reasons, so as to perform all its Jazz implant rod validation tests. This range is marketed with the same partners as those who distribute Jazz.

Consequently, the Company has developed a complete range of spinal implants called "Implanet Spine System", including: monaxial and polyaxial screws, rods, hooks and their associated implantation instruments. The Company considers its Implanet Spine System range to be very competitive, representing the latest developments in terms of spinal implants, notably with the possibility of using 5.5 or 6.0 mm diameter rods with the same range of pedicle screws and hooks.

The Company also has a range of intersomatic cages called Haka-Plif, used for optimal restoration of the intersomatic space.

6.3. THE KNEE RANGE – A SOURCE OF RECURRING REVENUE

6.3.1. A high-end range for knee surgery

The Company wanted to offer national distributors a product range for knee surgery promoting independence from their historic partners, the American multinationals.

Implanet noted that the world leaders in orthopedics were gradually attempting to take control of their sales in countries in which they traditionally worked with distributors. In recent years, these distributors have formed competent sales forces totally separated from the marketing of high-quality orthopedic implants. They are looking for high-quality product ranges for which they can use their marketing abilities to approach surgeons and no longer depend on their previous suppliers.

More than 70,000 surgical procedures have been performed using the Company's products since the commercial launch of lines destined for knee surgery.

The Implanet range for knee surgery meets this need with two product lines designed to meet the requirements of surgeons and health authorities in countries targeted by the Company.

MADISON - THE COMPLETE RANGE OF TOTAL KNEE PROSTHESES

Implanet has designed and marketed a complete range of knee prostheses (cemented and uncemented with a hydroxyapatite coating, fixed and mobile tibial plates, stabilized or ultracongruent posterior inserts). This range can be used for all conventional surgical techniques (ligament retention, ligament balancing, posterior stabilization, CAD-MRI-Scan procedure planning, disposable customized cutting guides, etc.).

Implanet works to ensure that its prostheses are particularly competitive with:

- an anatomical design, which was modified slightly in early 2016 with the Madison EVO femur, and which preserves the patient's bone reserves as much as possible. The 8 mm thick femoral component is one of the thinnest on the market. The pure lines of the trochlea reduce bone cutting to a minimum;
- a single tibial insert which obtained a European patent in 2014 (see Chapter 11);
- simplified instrumentation reducing the learning curve for surgeons to fewer than five surgical procedures, a reduction in the number of surgical stages involving bone cutting, instrument storage in only four boxes, reducing cleaning, sterilization and storage costs; and
- over the past 38 months, 200 patients have undergone annual monitoring in ten reference centers within the framework of a Post-Market follow-up;
- in addition, Post Market monitoring of the Madison Evo range (second generation implants) was introduced in 2016, involving 250 patients in 10 reference centers.

TWIST - THE COMPLETE "TWIST" RANGE FOR LIGAMENT REPAIR

This range, composed of interference screws and external braided attachments is designed for use with all the surgical techniques used by surgeons specializing in the repair of knee ligament ruptures (Mac Intosch, Kennet-Jones or DIDT).

These products do not require specific instruments and are sold individually in sterile packaging.

6.3.2. Continuing the development of knee activity

The Company intends to continue its implant activity for knee surgery. The Company is careful to ensure that this activity is profitable and generates cash, and has developed a strategy that respects these requirements. The Company considers that it has reached a critical size in the field of knee surgery, allowing it to maintain its activity without a significant increase in its working capital requirement or additional investment in ancillary devices.

6.3.2.1. Ongoing development in France

The growth of the activity in France relies on a Knee Sales Manager hired at the end of 2015 and several business partners recognized in general orthopedics and for knee surgery in particular.

6.3.2.2. Giving priority to export distribution of its knee surgery ranges through specialist distributors

In exporting, Implanet gives priority to markets with strong growth. The Company has decided to have the distributors acquire the implant stocks and instruments provided to healthcare establishments, which considerably reduces the Company's investments and working capital requirement, even if this has an impact on its revenue growth.

6.3.2.3. Extending the surgery range with targeted R&D efforts

The Company considers that its knee surgery range covers all the disorders it wishes to address. In accordance with its operational plan, the Company has developed a range of knee prostheses specially designed for "revisions" (surgery for patients requiring a second intervention). This prosthesis and its instruments are currently in production in order to carry out the final tests necessary to obtain CE marking.

6.3.3. Export coverage: main distributors

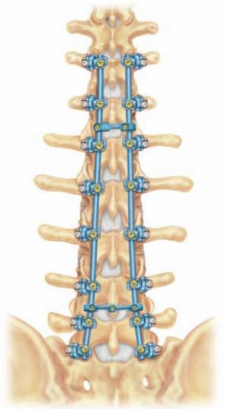
The Company markets its knee range via the specialized importing distributors listed in the table below. These distributors have been selected for their expertise in marketing orthopedic implants. They receive territorial exclusivity and are mainly active on the knee range.

Country	Name of distributor
Brazil	IMPORTEK - TARGMED
Spain	PROTECTRAUMA S.L.
Greece	ORTHOMEDICAL SA
Iran	RADMAN SAMAN IDEH Co.
Peru	IMPORTEK PERU SAC
Switzerland	ADIF MEDICAL SARL
Russia	EQVAL SA

6.4. JAZZ: TECHNOLOGY AIMED AT A MARKET WORTH OVER USD 2 BILLION

Implanet has developed Jazz, a latest generation implant for spinal surgery. Sales began in Europe and the United States in 2013 with wide-scale global rollout to follow.

6.4.1. Introduction to spinal fusion surgery



Spinal surgery covers three main sectors:

1. severe spinal deformities in children and adolescents (mainly evolving scolioses);
2. traumatology (traumatic spinal fractures or those linked to severe osteoporosis) and tumor treatment;
3. degenerative pathologies which lead to most surgical procedures carried out (degenerative deformities, degenerative scolioses, kyphoses, spondylolisthesis, etc.), discal pathologies (hernias) and lumbar canal stenoses.

Patients with degenerative spines often suffer from multiple pathologies. Surgery is mainly intended to treat back pain or sciatica consecutive to pinched nerve roots.

With deformities, whether degenerative or not, the technique involves repositioning the vertebrae in their normal alignment using a system of metal implants fixed to bone segments, then fusing the treated vertebrae. If there is no deformity, the technique involves fusing the operated vertebral segments, a shorter metal system being used to stabilize the spine for as long as needed for fusion.

Vertebral fusion systems are produced with metal rods attached to the vertebrae using metal screws, hooks, wires or cables.

Pedicle screws provide good anchorage in the vertebra if they are properly implanted and the bone is of good quality. The screws are inserted in the pedicles, “tubular” bony bridges connecting the posterior part of the vertebra and the body on either side of the spinal canal which holds thedura mater. Screw insertion is a very delicate operation and several technologies have been developed to reduce positioning errors that can lead to serious complications.

Analysis of the literature reveals a rate of incorrectly positioned screws of around 20% using a traditional technique[5]. To adapt to all anatomical configurations encountered during surgery, the surgeon must have a wide selection of screws of different diameters and lengths available.

Depending on the technique used by the surgeon, hooks can also be used instead of or in addition to screws (hybrid systems). These hooks are attached to different vertebral structures such as the lamina, shown in the right-hand diagram, a bony component of the posterior arch that protects thedura mater. Here again, to adapt to different anatomical situations, the surgeon must have a wide selection of hooks of different sizes and shapes available (up to 50 for some systems currently on the market).

All these instrumentation techniques were first developed in the most complex area of spinal surgery: severe spinal deformities such as severe scolioses. In these applications, in addition to fixing rods to the vertebrae, the system must also facilitate "reduction" of the deformity, i.e. they must enable the spinal column to be repositioned in the desired anatomical conformation. Surgeons working on these severe deformities are always at the forefront of new technologies because they are dealing with extremely complex situations.
Once mastered for these demanding applications, the new techniques are then extended to less complex applications but which can be applied to more cases, such as degenerative spinal pathologies. The same applies to the Jazz implant.

The qualities required for a spinal instrumentation system are as follows:

- Quality and ease of attachment:
  - to the metal rod;
  - to the vertebrae, whether normal or pathological:
    - healthy vertebrae,
    - fragile vertebrae (e.g. for osteoporotic patients),
    - deformed vertebrae (e.g. scoliosis).

- The fastest possible implantation time: scoliosis surgery can last for more than five hours (operating risks increase with time).

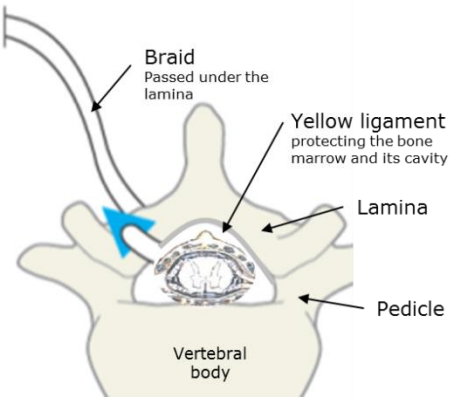
- Reduction capacity in the case of spinal deformities:
  - ease of reduction;
  - frontal reduction quality;
  - lateral reduction quality (profile);
  - stability over time of the correction obtained.

Screws and hooks are not always appropriate for these criteria.

6.4.2. The principle and advantages of Jazz



The principle of Jazz is to unite the rod and the vertebra using a very strong polymer braid which is attached to the rod by the Jazz connector.

Passing under the lamina, the braid conforms perfectly to the anatomy in question, thus providing excellent bone attachment without creating high contact pressure.

This type of implant is used to resolve situations in which screws and hooks are not suitable for the patient's anatomy and/or the quality of bony tissue to which they are attached.

6.4.3. The Jazz implantation system

The Jazz implant, its instrumentation and surgical technique were developed for use in all situations, particularly the most complex surgery which, with screws and hooks, generally lasts for four to six hours.

The Jazz implantation stages are as follows. The following example simulates reduction of an extremely angular spinal scoliosis:

First the rods are attached at the top and base of the spine using traditional implants (screws at the base and double hooks at the top).

The rod is preshaped with the final curve desired by the surgeon in the frontal and sagittal (profile) planes.

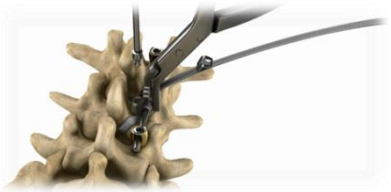
The braid is carried under the vertebral lamina. To facilitate its passage, the end is stiffened over the first few centimeters by a flat metal blade that can be preshaped. Passage is facilitated by the instruments developed by Implanet.

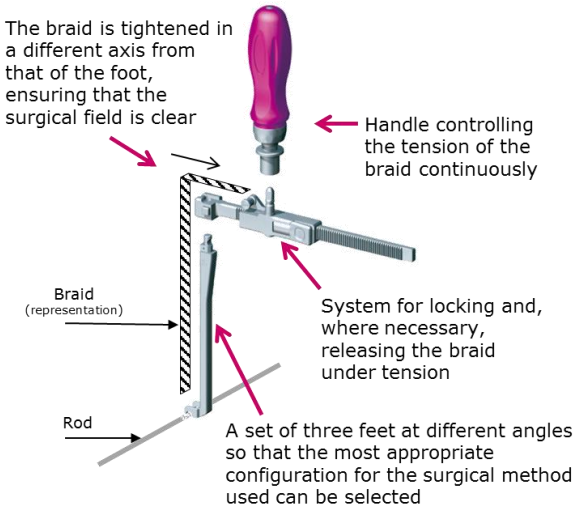
Once the braid has passed under the lamina, it is reinserted into the connector and closed on itself with a titanium part similar to a belt buckle. The braid can then be tightened and controlled as desired.

The Jazz device is then clipped to the rod using pliers provided for the purpose. The implant can easily be moved to position it in the optimal place without having to dismantle it.

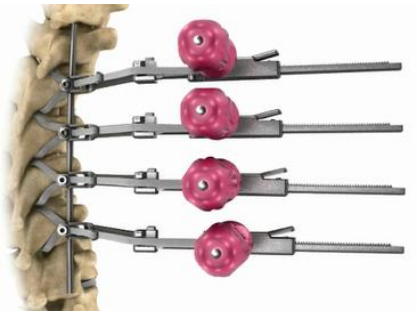
The locking screw is inserted without being tightened so that the implant can be tightened during the reduction phase.

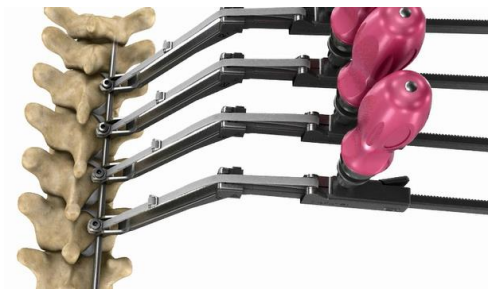
As shown on the right, the implant remains free to ensure correct positioning in all the axes during the tightening phase and movement (reduction) carried out on the spine.





The braid is then tightened using a reusable instrument (see above), the tightener. This is used to control the tension exerted on the braid and ensure that it is correctly positioned anatomically and on the rods. By turning the tightener handle, reduction maneuvers can be performed gradually and gently, thereby bringing the spinal column into position against the preshaped rod.





Once the position required for the vertebral column relative to the rod is reached, the locking screw is tightened. The tightener is then removed and the braid cut with a scalpel.

One important Jazz characteristic is its **patented clippable** stirrup. The fast method for attachment to the rod is used for initial positioning of the implant and, if necessary, repositioning throughout the surgical procedure without having to alter any or part of the system components.

Moreover, **the patented braid lock system** locks the braid by tightening the screw on the rod. The braid is thus compressed evenly between the rod and the base of the implant to ensure optimal locking as shown in the section opposite. This locking method ensures even compression of the strip with no local pinching which could damage it and thus reduce its fatigue strength.

6.4.4. Jazz, a spinal fusion implant to use in addition to or instead of hooks and screws

By providing a different rod attachment from that which is possible with hooks and pedicle screws, braided implant systems can be positioned in addition to or instead of hooks and screws for spinal surgery.

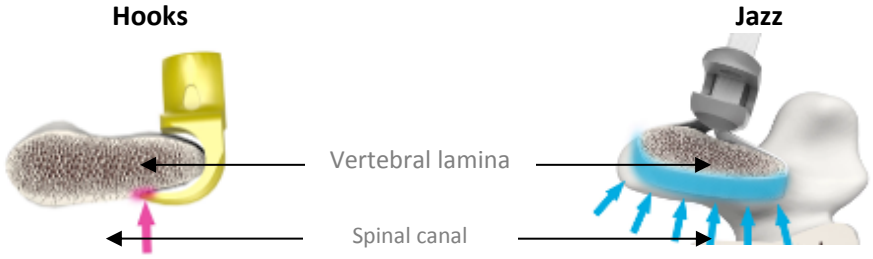
The following table shows Jazz's strong points that the Company judges to be specific relative to hooks and screws.

		 Screws	 Hooks	 Jazz
Quality/ Ease of attachment	To the rod	+++	+++	+++
	To healthy vertebra	+++	+	++
	To fragile vertebra	+	-	++
	To deformed vertebra	-	++	+++
Implantation time		--	--	+++
Ease of reduction		--	--	+++
Quality of reduction frontal plane		+++	+	+++
Quality of reduction lateral plane		-	+	+++

Like screws and hooks, Jazz provides excellent attachment to the rod, but it particularly provides very high quality attachment to the vertebrae in all anatomical configurations.

Unlike screws and hooks, only one model of Jazz is necessary no matter which surgical procedure is envisaged or the pathology treated. Jazz's ability to adapt to complex anatomical situations is the most sought after advantage of any new implant system, from the practitioner's point of view.

Although the adaptability of hooks in many pathologies has led to their popularity relative to pedicle screws, Jazz has many advantages compared with hooks:



The surgeon must have a very wide variety of hooks available so that he can choose the most suitable shape for the anatomy of the patient having surgery, thus providing the best possible anchorage on the vertebra.

Nevertheless, with its geometry, a hook does not provide optimal contact with the instrumented bony element and creates very high stress in the vertebral contact zones.

The Jazz implant braid distributes pressure evenly across the entire contact area with the vertebra, avoiding the creation of pressure peaks that could damage the vertebra.

Furthermore, since the braid adapts to all types of anatomy, a single type of implant is adequate for all needs.

6.4.5. Jazz is aimed at a potential market worth over USD 2 billion

The Jazz implant targets indications for which the product has received registrations in Europe and the United States, which will be set out in detail in Sections 6.5 to 6.7.

The Company expects that its product will be able to penetrate simultaneously the various vertebral fusion segments, which represent a targeted annual global market of over USD 2 billion, according to the world surgical procedure volumes supplied by i-Data.

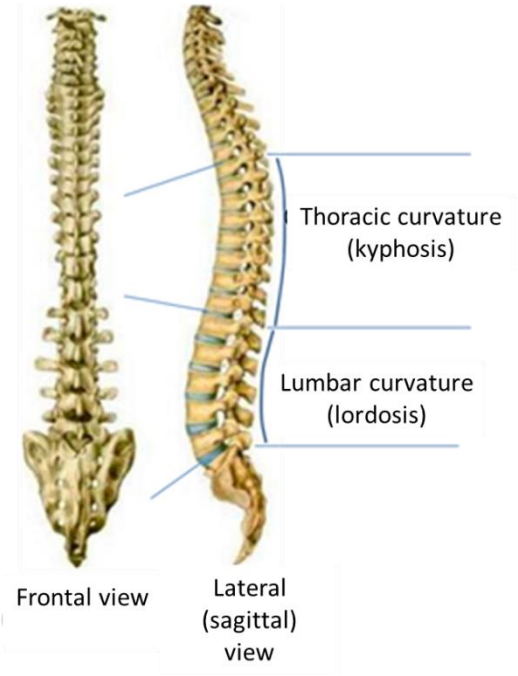
Annual global market potential per segment	No. potential cases	No. units per case	Total no. of units	Average unit price (USD)	Market in USD millions	Sources see Sections
Scoliosis/Adult and pediatric major deformities	80,000	6	480,000	$1,000	$480	6.5.6
Osteoporotic degeneration	231,000	4	924,000	$1,000	$924	6.6.2
Degeneration: replacement of intermediary screw	200,000	2	400,000	$1,000	$400	6.6.3
Trauma/Tumors	80,000	4	320,000	$1,000	$320	6.7
TOTAL			**2,124,000**		**$2,124**	

6.5. USING JAZZ IN CASES OF SEVERE DEFORMITY SUCH AS SCOLIOSIS

Severe deformities, such as scoliosis, account for around 80,000[6] surgical procedures worldwide per year. These operations are long, complex and very difficult for patients. They are performed by highly specialized surgeons. For example, in the United States, this type of surgery costs on average USD 134,529[7].

The following images show the curvature of a normal and a scoliotic spine:

Normal spine



Scoliotic spine

A normal vertebral column is characterized by:

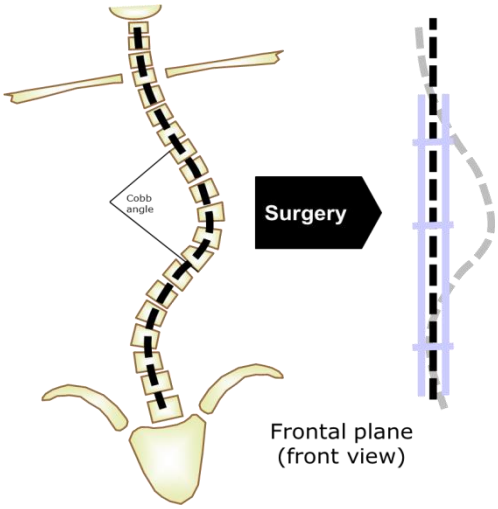
- vertebrae aligned vertically in the frontal plane;
- a large double curve in the sagittal plane. This double curve is necessary for the overall balance of the trunk and correct positioning of the center of gravity.

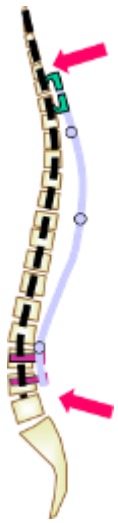
Scoliosis is characterized by a deformity in every plane in the area. Surgical treatment aims to restore the vertebrae to the anatomical position of a normal spine in both the frontal and sagittal planes. Whereas scoliosis affects 2 to 3% of adolescents, only the most severe cases (i.e. 0.2%, of which 80% are adolescents) need surgical treatment when their Cobb angle exceeds 45°.

[6] Source i-Data for 2010: 82,025 procedures worldwide

[7] Average price invoiced for a surgical procedure by American healthcare establishments: Code 81.08 National Inpatient Sample (NIS). Healthcare Cost and Utilization Project (HCUP). 2008. Agency for Healthcare Research and Quality, Rockville, MD.

STRAIGHTENING THE SPINE. The purpose of these operations is to straighten the patient's vertebral column. For this, two long rods are attached at the base of the spine by at least four screws and at the top by hooks or screws. The column is realigned using derotations and reductions. The Cobb angle, shown opposite in the left-hand diagram, is thus reduced. The closer this angle is to zero, the better the correction.





Sagittal plane

BUT the spine must also be realigned in its profile view

The complexity of this surgery is due to the fact that the vertebral column is deformed in all three dimensions. The result is that it is difficult to straighten it in the frontal plane and also obtain the desired curve in the sagittal plane (profile). Indeed, it is essential for this curve to be respected.

A spine that is poorly balanced in the sagittal plane forces the patient to correct his/her posture to maintain balance. This correction risks over-stressing the transition zones between the operated and fused part and the untreated zone. This increase in stress may cause later problems with degeneration.

The two schools: "screw only" system or hybrid "screw and hook" system

There are broadly two major schools for performing these surgical procedures: the "screw only" school, commonly represented in the United States, and the hybrid "screw + hook" school, favored more in Europe.

The two schools coexist because each is imperfect as detailed below.

6.5.1. The "screw only" school

An example of a "screw only" assembly.

The advantages:

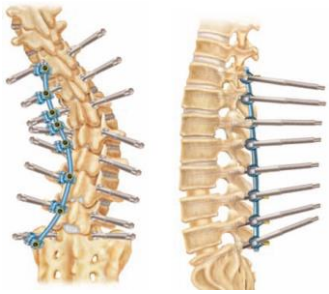
- Very good frontal correction
- A very stable system

The disadvantages:

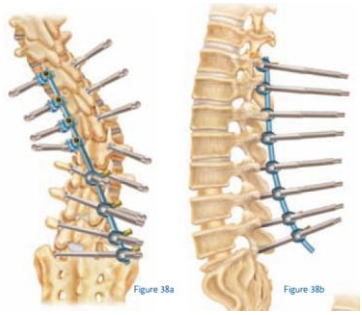
- Poor sagittal correction (flat back)
- A long procedure (5 hours 20 minutes[8] on average)
- A procedure which is difficult to perform (screw implantation very complex and risky in vertebrae deformed by scoliosis)

Example of "screw only" procedure as defined in the operating protocol for TSRH-3D implants from world leader Medtronic; note that the assembly has only eight levels (as opposed to 13 in the above example):

The screws are installed one by one (about ten minutes per screw, a delicate operation because the vertebrae are deformed). Followed by installation of guides.

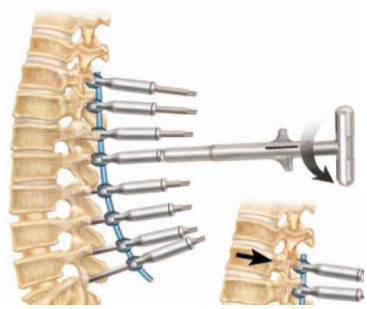


The rods, which have been preshaped, slide into the guides.

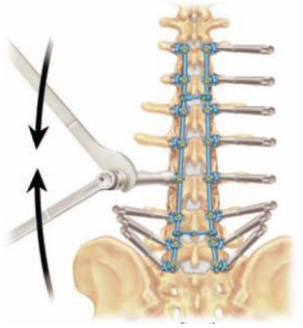


The rod is then lowered against the column one to one of the ends (here, the top).

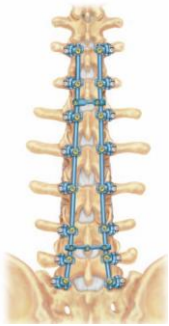
[8] Average over 7 studies and 188 patients: Crawford AH et al, Spine 2013 Epub ahead; Mattila M et al, J Bone Joint Surg Br. 2012; 94(10):1393-8.; Cheng I et al, Spine. 2005;30(18):2104-12.; Liljenqvist U et al, Eur Spine J. 2002;11(4):336-43; Dobbs MB, et al, Spine. 2006;31(20):2400-4.; Mooney JF et al, J Pediatr Orthop B. 2012; 21(6):602-5



Inserts are added to each guide using a tool. "Reduction" is achieved gradually in order to bring the column back against the preshaped rod.



The attachments between the screws and the rod are locked and the guides removed.



The assembly is verified by X-ray.

6.5.2. The hybrid "screw and hook" school

An example of a "screw and hook" assembly plan.

Hook Construct Legend	
NBH	= Narrow Blade Hook
OH	= Offset Hook
PH	= Pedicle Hook
⊗	= Pedicle Screw
WBH	= Wide Blade Hook
	= Up-Going Hook
	= Down-Going Hook
TAPH	= Total Anatomical Pedicle Hook
TATP	= Total Anatomical Transverse Process Hook
EBH	= Extended Body Hook

The advantages:

- sagittal correction is often superior; and
- few screws to implant.

The disadvantages:

- a complex choice among the types of hooks supplied and their instability before being attached to the rod;
- frontal correction is less good;
- a long procedure (5 hours 42 minutes [9] on average); and
- difficult, less stable assembly.

[9] Average over 7 studies and 245 patients: Crawford AH et al, Spine 2013 Epub ahead; Mattila M et al, J Bone Joint Surg Br. 2012; 94(10):1393-8.; Cheng I et al, Spine. 2005;30(18):2104-12.; Liljenqvist U et al, Eur Spine J. 2002;11(4):336-43; Dobbs MB, et al, Spine. 2006;31(20):2400-4.; Ilharreborde, Spine 2010; 25(3):306-14

The following table is taken from an English operating manual for the line of hooks in the new SOLERA range produced by world leader Medtronic. This table can be used to illustrate the following points:

- **The hook/bone interface is not perfect**: the "Wide Blade Hook" illustrates well the problem of preventing the hook from pressing on too small an area and damaging the bone.
- **Hooks are bulky in the spinal canal**: three models of hooks are specially designed to reduce the volume of metal in the spinal canal, which can be a source of pressure on the dura mater which can lead to neurological problems. This metal may also generate artifacts during MRI imaging, thus altering the analysis needed to make sure that nerve tissue has not been damaged.

Hook Type	Vertebral Posterior Element Placement	Blade Direction	Region of Spine	Design Features
Pedicle Hook	Articular Process	↑	T1 – T10	» Bifid blade grasps thoracic pedicle for stability.
Wide Blade Hook	Lamina	↕	T1 – L5	» Wider blade width distributes forces evenly over a wider aspect of bone.
	Transverse Process	↕	T1 – L5	
Narrow Blade Hook	Lamina	↕	T1 – L5	» Narrower blade width minimizes metal volume in the spinal canal.
	Transverse Process	↕	T1 – L5	
Wide Blade Ramped Hook	Lamina	↕	T1 – L5	» Ramp reduces intra-canal intrusion.
	Transverse Process	↕	T1 – L5	
Narrow Blade Ramped Hook	Lamina	↕	T1 – L5	» Ramp reduces intra-canal intrusion.
	Transverse Process	↕	T1 – L5	
Extended Body Hook	Lamina	↕	T1 – L5	» Can correct anatomic misalignment between two laminae in the dorso-ventral plane.
	Transverse Process	↕	T1 – L5	
Offset Hook	Lamina	↕	T1 – L5	» Centralized head for balance. » Anatomic angulation to mimic the posterior spinal elements.
	Transverse Process	↕	T1 – L5	
Total Anatomical Pedicle Hook	Articular Process	↑	T1 – T10	» Centralized head for balance. » Lipped design can improve hook stability. » Anatomic angulation to mimic the posterior spinal elements.
Total Anatomical Transverse Process Hook	Transverse Process	↕	T1 – L5	» Centralized head for balance. » Lipped design can improve hook stability. » Anatomic angulation to mimic the posterior spinal elements.

Color-coding Size Reference

Extra Small	Small	Medium	Large
●	●	●	●

On the left, an example of boxes of implants and tools composed of more than 100 references needed to produce a hybrid "screw and hook" assembly.

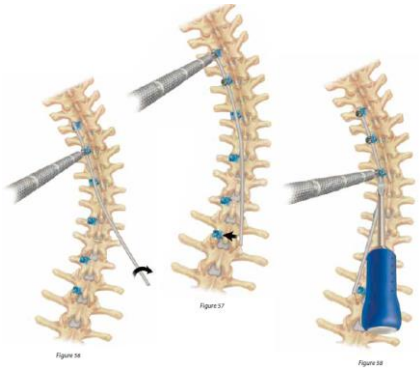
All the parts not implanted have to be cleaned and sterilized for reuse in another surgical procedure.

Moreover, these sets represent an investment of about €50,000 per surgical procedure.

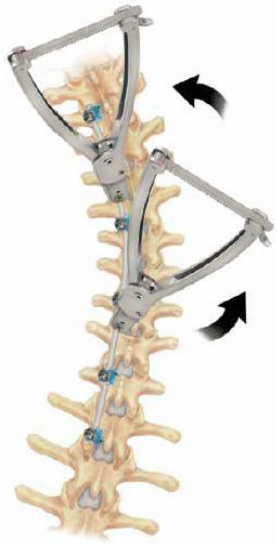
Some key stages in a hook assembly as defined in the procedure using Medtronic Solera implants.

The hooks are inserted in the desired place, which is first prepared by removing parts of the bone that could get in the way.

The rods, which have been preshaped but are not in their final position because they could not be inserted into the hooks.



The rod is inserted into the hooks as optimally as possible. The patient's spine is "translated" to conform to the preshaped rod. This is one of the delicate parts of the procedure.



After inserting screws to lock the hooks in place, the rod is turned so that the column is straightened frontally and curved in the sagittal plane. Stage to be completed gently to avoid dislodging the hooks or damaging the neurological system.

It is often necessary to alter the curvature of the rods in-situ.

Once the assembly has been verified, the screws locking the hooks in place are tightened and locked.

6.5.3. "Screw only" or "screw and hook": the two schools coexist because each is imperfect

Analysis of a reference publication[10] comparing the "screw only" method with the "screw and hook" method as shown below illustrates the advantages and disadvantages of both techniques:

	"Screw only"[11]	"Screw and hook"[12]
Very long surgical procedures in both cases: surgery time	**5 hours 20 minutes**	**5 hours 42 minutes**
Superior frontal correction for the "screw only" method Reduction of the Cobb angle given as a % of the initial Cobb angle relative to the angle measured during follow-up. The higher the value, the better the correction.	**70%**	**42%**
However, the "screw only" gives a flat back Modification of the sagittal angle of curvature. The fact that the data are negative indicates that the patient has lost curvature. The figure of -44% for "screw only" shows that the back is too flat (so-called hypokyphotic).	**-44%**	**-5%**

6.5.4. Advantage of Jazz for severe scoliosis

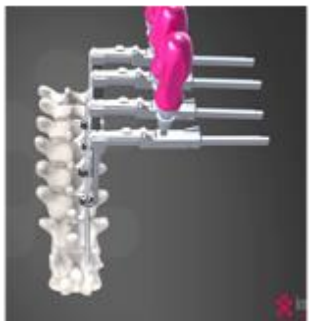
In view of this, Jazz has developed a new technology, basically compatible with both schools, which is used instead of screws or hooks, firstly in locations where screws or hooks are difficult to use, but above all, to take advantage of Jazz's exceptional ability to perform reductions, by using the flexible braid and tensioner.

[10] *Pedicle Screw Versus Hooks* Kim Y.J. et al, SPINE Volume 29, Number 18, pp 2040–2048, 2004.

[11] Average over 7 studies and 188 patients: Crawford AH et al, Spine 2013 Epub ahead; Mattila M et al, J Bone Joint Surg Br. 2012; 94(10):1393-8.; Cheng I et al, Spine. 2005;30(18):2104-12.; Liljenqvist U et al, Eur Spine J. 2002;11(4):336-43; Dobbs MB, et al, Spine. 2006;31(20):2400-4.; Mooney JF et al, J Pediatr Orthop B. 2012; 21(6):602-5.

[12] Average over 7 studies and 245 patients: Crawford AH et al, Spine 2013 Epub ahead; Mattila M et al, J Bone Joint Surg Br. 2012; 94(10):1393-8.; Cheng I et al, Spine. 2005;30(18):2104-12.; Liljenqvist U et al, Eur Spine J. 2002;11(4):336-43; Dobbs MB, et al, Spine. 2006;31(20):2400-4.; Ilharreborde, Spine 2010; 25(3):306-14.

The technique for reducing spinal deformities with Jazz during surgery.



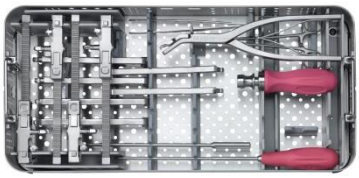
After installing braids at each stage in accordance with the procedure described above, each one is then tightened with its individual tensioners.

In the example shown opposite, the four tensioners are used to produce a gradual reduction at all four levels.

This reduction takes place evenly on all levels.

If, during this reduction, a Jazz implant has to be repositioned along the length of the rod, taking angle variations into account, this is very easy to carry out.

Reduction of curvature



Compared with the complex instrumentation required to fit a hybrid "screw and hook" system, fitting Jazz implants requires simple, relatively cheap instrumentation (compared with the €50,000 cited above) costing between €4,500 and €5,500.

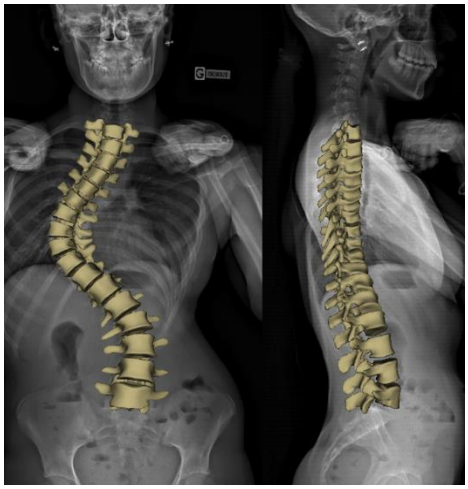
An example of scoliosis correction performed using Jazz.

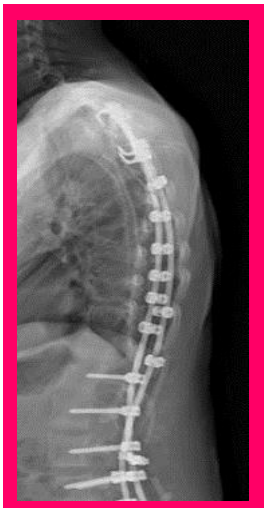
Pre-surgical image showing severe thoracic scoliosis.

As is the case for a screw and hook system, the rod is held by screws at the base and four hooks at the top. The reduction then takes place.

6.5.5. Jazz compared to conventional techniques: proven benefits for patients and 13% less costly[13]

Jazz is particularly pertinent and effective in performing "reductions" in all severe deformity assemblies, particularly severe scoliosis.

	Patient suffering from scoliosis	Screw + hook + **braided implant**[14]	"Screw only"[15]	"Screw + hook"[16]
				




Surgery time reduced		**3 hours 20 minutes**	5 hours 20 minutes	5 hours 42 minutes
Frontal correction similar to that obtained with "screw only" systems Reduction of the Cobb angle given as a % of the initial Cobb angle relative to the angle measured during follow-up.		**70%**[17]	70%	42%
A natural sagittal position with Jazz Modification of the sagittal angle of curvature, the higher and more positive the figure, the more the back has adequate curvature.		**+27%**[18] **Sagittal balance**	-44% Flat back	-5% Very limited correction

[13] Sources Health Advances: retrospective medico-economic study on the use of Jazz braided implants for the correction of major deformities and scoliosis.

[14] 3 studies on Universal Clamp totaling 188 patients: Ilharreborde, Spine 2010; 25(3):306-14; Sales de Gauzy, J Child Orthop. 2011;5(4):273-82; La Rosa, Eur Spine J. 2011; 20 Suppl 1:S90-4

[15] Average over 7 studies and 188 patients: Crawford AH et al, Spine 2013 Epub ahead; Mattila M et al, J Bone Joint Surg Br. 2012; 94(10):1393-8.; Cheng I et al, Spine. 2005;30(18):2104-12. ; Liljenqvist U et al, Eur Spine J. 2002 ;11(4):336-43; Dobbs MB, et al, Spine. 2006;31(20):2400-4.; Mooney JF et al, J Pediatr Orthop B. 2012; 21(6):602-5

[16] Average over 7 studies and 245 patients: Crawford AH et al, Spine 2013 Epub ahead; Mattila M et al, J Bone Joint Surg Br. 2012; 94(10):1393-8.; Cheng I et al, Spine. 2005;30(18):2104-12.; Liljenqvist U et al, Eur Spine J. 2002;11(4):336-43; Dobbs MB, et al, Spine. 2006;31(20):2400-4.; Ilharreborde, Spine 2010; 25(3):306-14.

[17] Study of 2x75 patients carried out with the Universal Clamp: Sales de Gauzy Idiopathic J Child Orthop (2011)

[18] Study of 2x75 patients carried out with the Universal Clamp: Ilharreborde, Spine 2010; 25(3):306-14

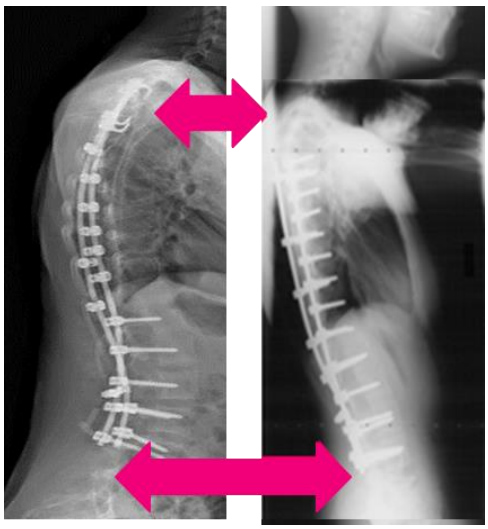
The above results demonstrate the proven **benefits**[19] **for patients with the use of braided implants** in the treatment of major deformities and scoliosis:

- **Surgery time reduced by more than 2 hours**, thereby:
  - reducing blood loss and avoiding the need for transfusions[20]; and
  - reducing the length of hospital stays (2-3 days instead of 4-5 days).

- Similar corrections in the frontal plane and **much better restoration of natural sagittal curvature** than with conventional correction techniques.

  The transition zones above and below the assembly (see arrows in images) will not be under the same amount of stress. In the "screw only" assembly, the flat back will over-stress the transition zones and potentially create degeneration problems in these zones.
  In the Jazz type braided assembly, the curvatures at the top and base of the back have been restored. The system is aligned well with the patient's natural position.

Jazz type braided implant "Screw only" system



13 implants 20 implants

- **Fewer implants used**, as shown in the diagram above, thereby:
  - reducing complications due to incorrect screw positions, particularly in the thoracic region; and
  - reducing patient exposure (from around 3 minutes to less than 10 seconds) to radiation from screw verification X-rays during operations[21].

[19] Sources Health Advances: retrospective medico-economic study on the use of Jazz braided implants for the correction of major deformities and scoliosis.

[20] Source Health Advances analysis, Mayo clinic, Mao et al 2014 PLOSOne: during operations to correct major deformities or scoliosis using "screw only" systems, nearly 30% of patients require blood transfusions, while none of the 32 patients in whom the Jazz implant was used required a blood transfusion during surgery.

[21] Sources Health Advances: retrospective medico-economic study on the use of Jazz braided implants for the correction of major deformities and scoliosis.

A study published by the American consultancy firm Health Advances specializing in economic studies in the field of healthcare demonstrated that the **financial benefit of the use of Jazz**[22] compared with conventional techniques is **considerable**, as simulations comparing the cost of the implants, combined with operating-room costs, revealed an overall cost reduction of 13% for an assembly using Jazz.

Compared costs of the Jazz and "screw only" methods for scoliosis surgery in the United States

	Screw + hook + **braided implant**	**Conventional technique**
Cost of implants	$21,823	$21,811
Of which Jazz	*$10,150*	$-
Transfusion cost	$-	$252
Operating cost	$5,160	$7,891
Cost of post-op stay	$4,200	$6,000
Total cost	**$31,183**	**$35,954**

In addition to the savings made in surgical procedures, Health Advances' medico-economic analysis showed that, given the shorter operating time, the hospital could optimize the use of its operating room by performing additional operations, generating additional revenue estimated at $6,966.

6.5.6. The potential global market for Jazz in severe deformity

The Company estimates that an average of six Jazz implants will be used in assemblies designed for cases of severe deformity, i.e. for a global market of around 80,000[23] surgical procedures for this pathology, a potential of 480,000 implants per year.

Potential annual global market for Jazz for severe deformities: USD 480 million

No. of surgical procedures worldwide per year	% of surgical procedures concerned	No. of implants per surgical procedure	Potential no. of implants per year
80,000	**100%**	**6**	**480,000**

This potential market amounts to USD 480 million for manufacturers and distributors of braided implants, based on an average sale price of USD 1,000 per implant.

[22] Sources Health Advances: retrospective medico-economic study on the use of Jazz braided implants for the correction of major deformities and scoliosis.

[23] Source i-Data for 2010: 82,025 procedures worldwide.

6.6. USING JAZZ IN DEGENERATIVE SPINAL DISORDER SURGERY

Annually, around 700,000[24] procedures are carried out worldwide on degenerative spines. With its Jazz implant, the Company is targeting three opportunities in particular.

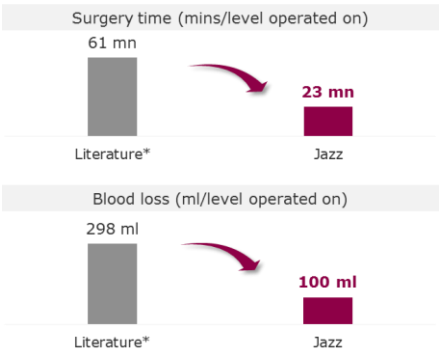
6.6.1. Degenerative spinal deformity (scoliosis-kyphosis)

The treatment of degenerative deformity emerges naturally from the pediatric application detailed previously. However, the populations treated are very different: the patients are elderly, fragile, often osteoporotic, with multiple comorbidities. The rate of complications for this surgery is high. The incidence of idiopathic scoliosis in children is around 3%, whilst studies estimate that the incidence of idiopathic and degenerative scoliosis in adults is between 30% and 60%[25]. With an aging population, adult degenerative scoliosis is a real public health issue.

A series of prospective monocentric hybrid screw/Jazz assemblies carried out on 21 patients (average age 68 years) with an average follow-up period of 16 months was assessed by Dr. Cavagna (Clinique de la Porte de l'Orient, Lorient, France). This study was recently the subject of a white paper that was made public.

The hybrid screw/Jazz assemblies used by Dr. Cavagna gave clinical results equivalent to the data in the literature in terms of reducing deformity and improving patients' quality of life.

The reduction obtained is safe, fast and easy to achieve. Compared with data from published literature on groups of similar patients, the use of Jazz and its reduction system provides a significant reduction in surgery time, blood loss and the number of implants required. The graph opposite shows the key data from the study, comparing them with data from the literature referenced in the study.[26] In addition to its economic benefit, this reduction has a certain advantage because the duration of surgery and preoperative blood loss are, in fact, known to be the sources of a significant rate of later complications.



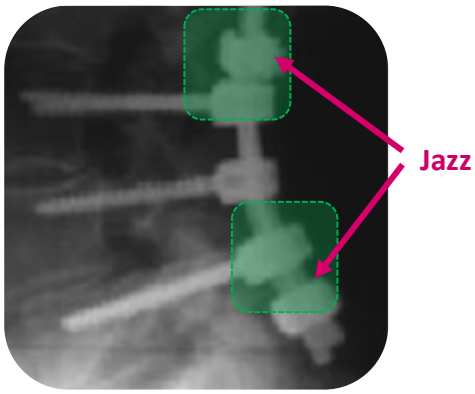
[24] Source i-Data for 2010: 702,761 procedures worldwide.

[25] *Adult scoliosis: prevalence, SF-36, and nutritional parameters in an elderly volunteer population*. Schwab F, Dubey A, Gamez L, El Fegoun AB, Hwang K, Pagala M, Farcy JP. Spine (Phila Pa 1976). 2005 May 1;30(9):1082-5.

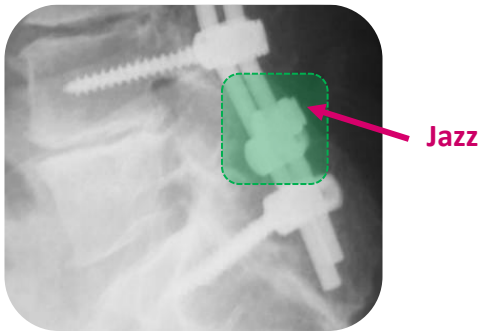
[26] Comparative studies: Cho K-J et al, Spine. 2007/Daubs MD et al, Spine. 2007 Sep 15/Wu C-H et al, J Spinal Disord Tech. 2008 Jul/Tang H et al, J Orthop Surg Res. 2014 (patients with complications)/Tang H et al, J Orthop Surg Res. 2014 (patients without complications)/Pellisé F et al, European Spine Journal. 2014 Sep/Lonergan T et al, J Spinal Disord Tech. 2012 Oct 10; [published ahead of print].

Over and above this clear indication for the treatment of degenerative spine disorders, Jazz has two additional applications in short lumbar assemblies:

Use of Jazz to secure screws



Use of Jazz to replace screws



6.6.2. Securing a screw in a fragile, osteoporotic type bone

More than 33% of patients undergoing spinal surgery have osteoporotic bones[27]. The bones' fragility means that the assemblies are not very reliable and lead to a failure rate of more than 40%[28]. In this case, the rate of repeat surgery can rise as far as 60%[29]. This is, for example, the case when the desired fusion is not achieved (pseudarthrosis). Under these conditions, the system continues to support all the mechanical loads applied to the operated vertebrae, which leads, in most cases, to a mechanical rupture of the assembly (screw or rod broken, screw escaping from the pedicle, etc.) and a new operation is needed.

In osteoporosis, several techniques have been suggested to avoid these problems:

- lengthen the assembly to distribute the load over several screws, to reduce mechanical stress on the bone anchorages;
- use hollow screws and cement injection;
- use conical screws;
- use screws covered with hydroxyapatite; and
- develop expansion screws.

For the moment, none of these techniques are completely satisfactory.

The Biomechanical Laboratory of the Mayo Clinic (Rochester, Minnesota, USA) conducted a study on the Jazz technology in 2014 to validate and quantify the potential benefits of its use on osteoporotic patients having undergone spine surgery.

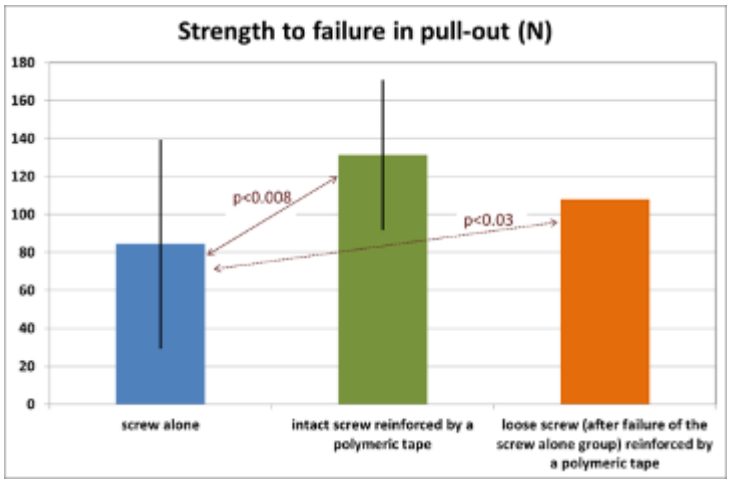
[27] D. K. Chin *et al*. Osteoporos Int (2007) 18:1219–1224.

[28] Yadla S, Maltenfort MG, Ratliff JK, Harrop JS. Adult scoliosis surgery outcomes: a systematic review. Neurosurg Focus. 2010 Mar;28(3):E3.

[29] Burneikiene S, Nelson EL, Mason A, Rajpal S, Serxner B, Villavicencio AT. Complications in patients undergoing combined transforaminal lumbar interbody fusion and posterior instrumentation with deformity correction for degenerative scoliosis and spinal stenosis. Surg Neurol Int. 2012;3:25.

The study, which was conducted under highly stringent conditions by the world's best biomechanical research teams, demonstrated that:

- Jazz has a proven protective effect on screws implanted in osteoporotic vertebrae;
- adding Jazz prevents the complete deterioration of the assembly and subsequent migration of the screws;
- a totally loose screw subsequently protected by a Jazz implant retrieves a rupture value similar to that of an intact screw; and
- the energy required to rupture the assembly is considerably increased when a Jazz implant is added.



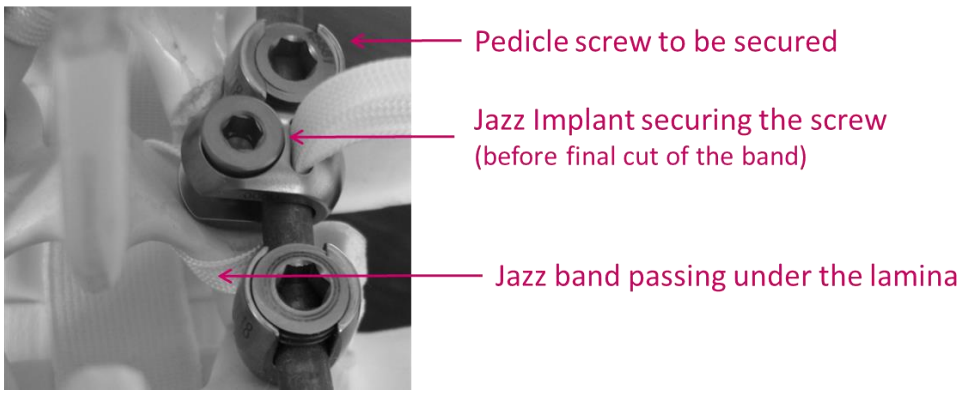
On the graph opposite, the left-hand column shows the force needed to pull out a screw. The center column shows that a force more than 60% greater is needed to pull out a screw secured by a knotted braid.

The right-hand column shows that a screw that has been pulled out and then held in place with a braid has greater holding strength (+30%) than the screw initially fixed into the vertebral bone.

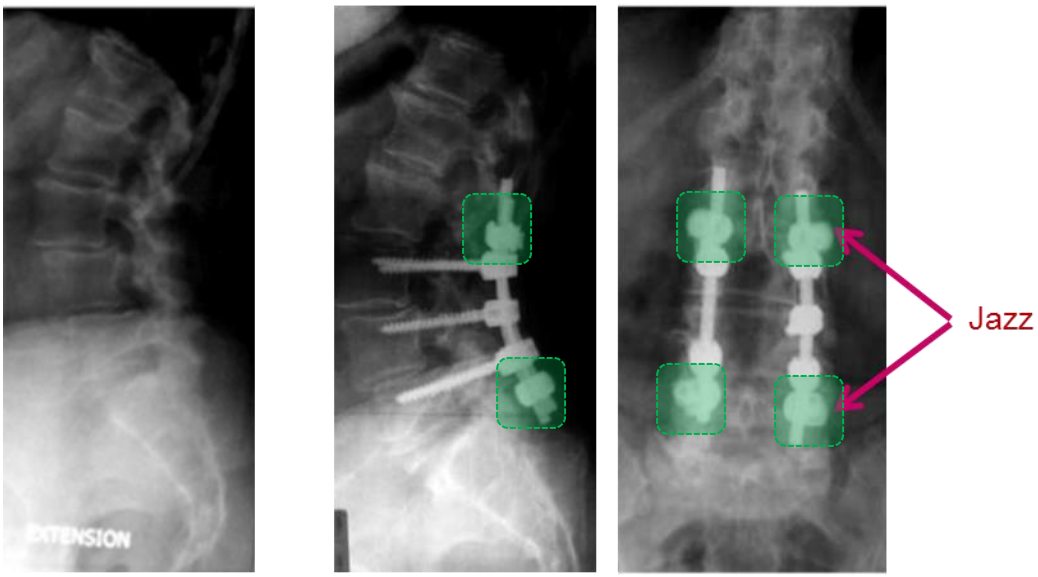
These results are consistent with and corroborate the results of other studies, in particular the study published in 2010 by the Hamasaki[30] team after similar tests involving the addition of knotted braids to a conventional assembly.

This major study thus demonstrated the product's advantages in conferring stability to an assembly implanted in vertebrae of only moderate mechanical quality.

Positioning a Jazz implant to secure a pedicle screw in a fragile bone:



[30] Hamasaki, T., Tanaka, N., Kim, J., Okada, M., Ochi, M. & Hutton, W. C. (2010) Pedicle screw augmentation with polyethylene tape: a biomechanical study in the osteoporotic thoracolumbar spine, J Spinal Disord Tech. 23, 127-32.



Preoperative **Postoperative**

The X-ray images above show the lumbar vertebrae of an osteoporotic patient suffering from spondylolisthesis. Given the weakness of the vertebrae, the four screws at the ends have been secured by the installation of four Jazz braids.

Moreover, an observational clinical study conducted on a group of 14 osteoporotic patients operated between 2011 and 2012 by Dr. Rémi Cavagna (Clinique mutualiste de la Porte de L'Orient, Lorient, France) produced extremely satisfactory preliminary results. However, these results cannot be considered as highly significant due to the small number of patients involved and the relatively short follow-up period. The preliminary conclusions were published in a white paper in mid-2014, while the patients are still being followed up by this center.

To supplement and enhance this follow-up data, the Company has just set up a prospective, multicenter clinical trial. The Jazz implants will be positioned at the level of the last fused vertebra, at the top of the assembly, with the braid attached to the lamina of the vertebra immediately above it. The protocol, adopted by ten centers in France by the end of 2016, provides for the enrollment of 250 patients, aged over 40 and suffering from osteoporosis. Enrollment will continue until December 2018 and each patient will be monitored for at least two years.

Potential annual global market for Jazz in securing screws in degenerative assemblies with fragile, osteoporotic type bones: USD 924 million

No. of surgical procedures worldwide per year	Of which accessible surgical procedures	No. of implants per surgical procedure	Potential no. of implants per year
700,000[31]	**231,000** (33%[32])	**4**	**924,000**

[31] Source i-Data for 2010: 702,761 procedures worldwide.

[32] D. K. Chin *et al*. Osteoporos Int (2007) 18:1219–1224.

This potential market amounts to USD 924 million for manufacturers and distributors of braided implants, based on an average sale price of USD 1,000 per implant.

The Jazz implant is now registered for all degenerative indications for which screws are approved, in the United States and Europe.

6.6.3. Replace intermediate screws with Jazz

Since the Jazz implant is, above all, an implant approved for any type of system, the Company judges that many surgeons would also like to use its products instead of intermediate screws during certain surgical procedures involving more than two levels (six screws implanted).

In this application, Jazz makes surgery easier, faster and provides a very stable system. The Company estimates that an average of two screws could be replaced in all systems including more than four screws. The Company estimates that these account for about 200,000 surgical procedures worldwide. This gives the following market potential:

Potential annual global market for Jazz as a replacement for intermediate screws in degenerative systems: USD 400 million

No. of surgical procedures worldwide per year	Of which accessible surgical procedures	No. of implants per surgical procedure	Potential no. of implants per year
700,000[33]	**200,000** (29%[34])	**2**	**400,000**

This potential market amounts to USD 400 million for manufacturers and distributors of braided implants, based on an average sale price of USD 1,000 per implant.

The Jazz implant is now registered for all degenerative indications for which screws are approved in the United States and Europe, and surgeons may want to replace them with a Jazz braided implant.

6.7. USING JAZZ IN CASES OF TRAUMA/TUMOR

Spinal surgical procedures in traumatology and tumoral pathology applications are generally grouped together because they are applications that are linked to similar situations. An accident (traumatology) or a tumor creates problems in the vertebral column. Since every problem is different from one patient to the next, the type of surgery varies considerably with each case. Surgery consists of restoring spinal balance as far as possible and relieving pain and neurological problems induced by the accident or tumor.

For this type of surgery, surgeons must have as many available tools as possible so that they can treat each case. Current tools: rods held by screws or hooks, each of which has major limitations.

[33] Source i-Data for 2010: 702,761 procedures worldwide.

[34] Company estimate of the number of procedures using more than four screws and including intermediate screws.

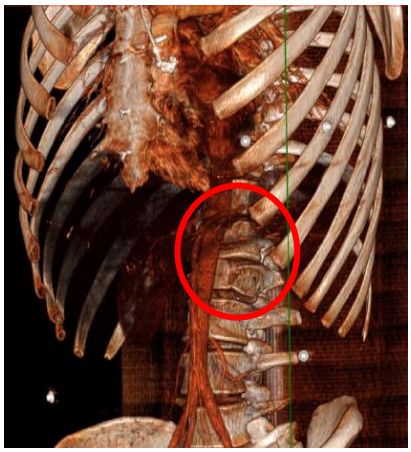
In this type of situation, braided implants and in particular the Jazz technology, have the following advantages:

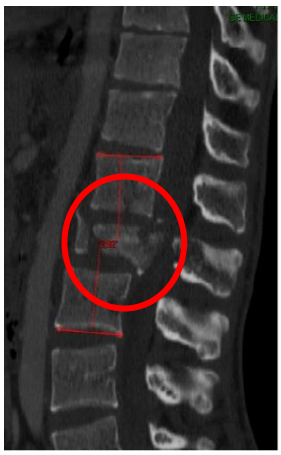
- a multipurpose implant which:
  - can be adapted to a very wide range of situations while always preserving optimal vertebral bone/braid contact and reducing volume in the medullary canal,
  - avoids the need for a complete set of implants to cope with different situations;
- adding Jazz to rod/screw assemblies reduces the length of these assemblies and thus minimizes the number of vertebrae permanently fused. This is particularly important for patients who are often young and for whom retaining intact vertebral segments reduces the risk of later degeneration of levels adjacent to the fused zone[35].
- for patients who commonly have to undergo MRI or CT scan imaging of their bone marrow and/or the medullary canal after surgery, using Jazz instead of screws or hooks significantly reduces imaging artifacts linked to the presence of these implants close to the zones being studied. These artifacts may sometimes prevent correct interpretation of the fused clinical situation[36].

The use of the Jazz Band in these situations has a significant clinical advantage for patients, as it reduces the length of the assembly by two levels, thereby preserving two vertebrae and two discs. The preliminary post-operative results are positive and confirm Jazz's interest and the potential it may represent for the treatment of this type of disorder.

Illustration of a complex case of spinal injury treated with a Jazz Band reducing the length of the posterior assembly by two levels in a 25 year-old patient having fallen from a height of 15 meters and suffered sensorimotor neurological damage.

Pre-op imagery (3D reconstruction)

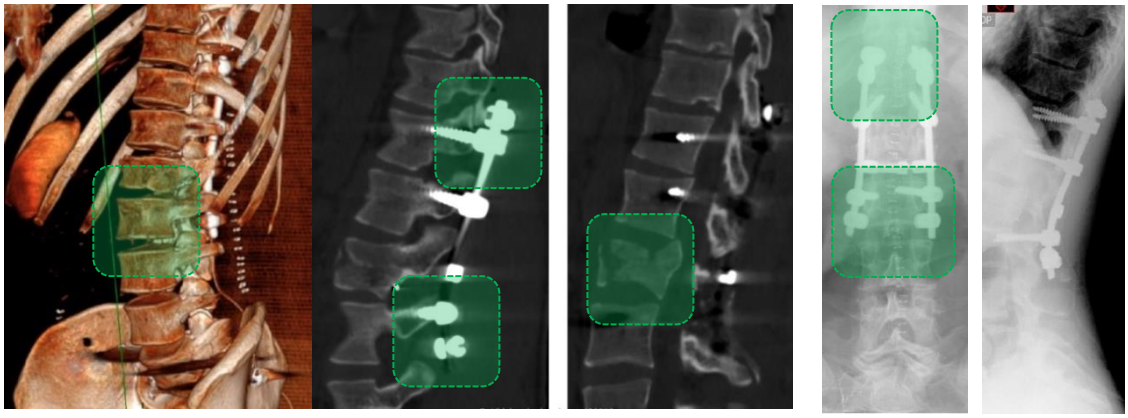




[35] Ilharreborde B *et al*, J Pediatr Orthop. 2012;32(5):440-4.

[36] Gazzeri R *et al*. Acta Neurochir (2009) 151:1673–1680.

Post-op imagery (3D reconstruction)



Potential annual global market for Jazz in traumatology and tumors: USD 320 million

No. of surgical procedures worldwide per year	Of which accessible surgical procedures	No. of implants per surgical procedure	Potential no. of implants per year
80,000[37]	**80,000** (100%)[38]	**4**	**320,000**

This potential market amounts to USD 320 million for manufacturers and distributors of braided implants, based on an average sale price of USD 1,000 per implant.

6.8. OPPORTUNITIES FOR JAZZ IN NON-FUSION APPLICATIONS: PRESERVATION OF MOBILITY

Non-fusion is a vast subject and represents a very significant market opportunity.

The idea is to treat spinal pathologies before they reach the stage of requiring fusion. Although fusion is an effective way of treating these pathologies at a certain stage, the idea of treating them earlier and preserving vertebral mobility function relative to the other vertebrae is clearly very attractive. By preventing vertebral mobility, fusion eventually leads to the degradation of other spinal segments, which are under greater stress.

Approaches to maintaining mobility have created a great deal of enthusiasm for more than ten years but have often proved disappointing (flexible rods, artificial discs, etc.). Proving the benefit of approaches intended to preserve mobility requires very long follow-up in clinical trials, which is extremely costly.

[37] Source i-Data for 2010: 80,617 procedures worldwide.

[38] Company estimate of the number of procedures.

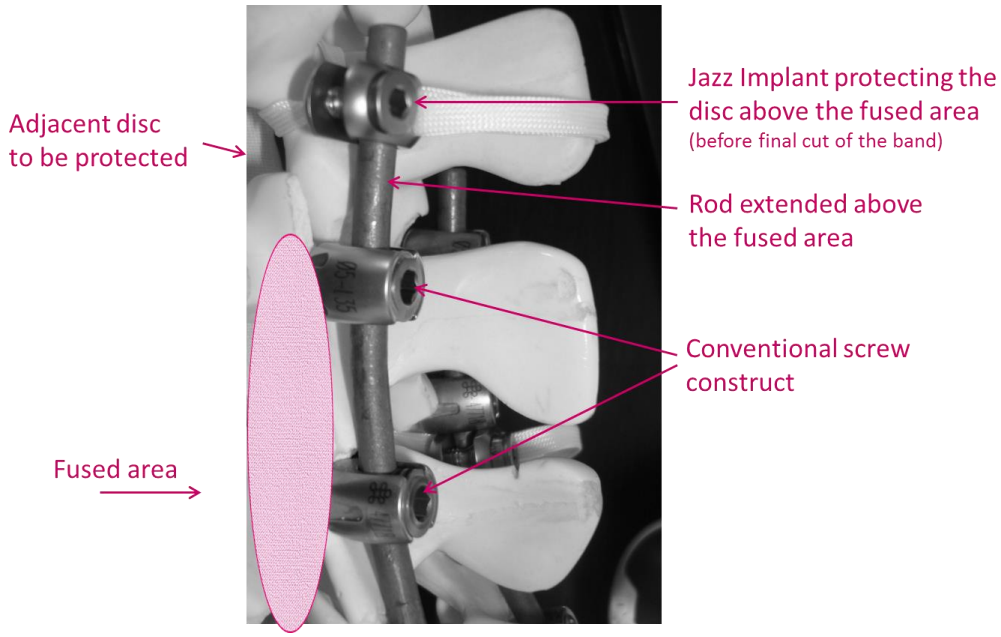
Implanet is therefore very cautious regarding the possibility and speed of development of these markets. However, since market potential is very high and its Jazz product can be used in certain applications without new technical developments, the Company expects to position itself in these applications opportunistically and to commence clinical investigations in 2016.

6.8.1. Protect adjacent discs by adding Jazz to the ends of the assemblies

Vertebral fusion leads to spinal rigidity in the fused levels. It has been shown that the vertebral discs above and below the assembly (called adjacent discs) are more stressed during body movements. In patients with a tendency to spinal degeneration, the adjacent discs therefore risk being damaged and in turn have to be fused during further surgery (25%[39] of cases involve complications associated with kyphosis or proximal junctional level following a spine fusion). Several products have also been developed to relieve adjacent discs, such as the DTO flexible systems developed by Zimmer. These products were not approved for the main market in the United States, but the principle of protecting adjacent discs still represents an opportunity for an appropriate technology.

Jazz is a product that is easy to use in this type of application. Indeed, by extending the two rods as far as the vertebra above the adjacent disc and inserting Jazz implants, an assembly is obtained which maintains the disc's mobility while reducing the mechanical stresses applied.

Example of a Jazz implant assembly
to protect the adjacent disc on a demonstrator



Jazz's potential in this segment is thought to be very high because, in practice, it would involve adding up to four Jazz implants for each of the 700,000 degenerative surgical procedures (two above and two below the classic assembly), i.e. a potential 1,400,000 additional implants per year.

[39] Source: Health Advances 2015 study

The Jazz implant is not registered for this indication in the United States or in Europe. The Company feels that development of this application for Jazz would require large clinical trials prior to commercialization, particularly in the United States, which represents the main market. These clinical trials required in order to obtain sales authorization from the FDA in the United States would probably take several years (carried out under Investigational Device Exemption) as was the case for other "mobility preservation" products such as flexible rods or artificial discs.

6.8.2. Jazz flexible assemblies to protect a weakened disc

Many companies have developed implants for preserving mobility, so-called "dynamic stabilization" systems. These implants are designed to treat a degenerative spine without fusing operated vertebrae and helping preserve a certain vertebral mobility, which is completely limited when vertebrae are fused. The indications are mainly lumbar stenoses, spinal stabilization after discectomy (treatment of the intervertebral disc following a discal hernia) and protection of moderately degenerative intervertebral discs.

There are two main product families on the market:

- inter-spinal implants which are positioned between the dorsal spines of two vertebrae, limiting vertebral movements in flexion-extension; and
- implants with rigid screws and flexible rods. These implants are attached like conventional fusion assemblies with metal pedicle screws, mobility in flexion-extension between two vertebrae being limited by more or less flexible systems attached to these pedicle screws.

The Jazz system may provide a third solution based on a flexible vertebral attachment (the braid) combined with more or less rigid rods that partly limit mobility. Under these conditions, vertical movements and compression forces applied to the vertebrae are limited by the rod, whereas rotation movements remain possible through the flexibility of the linking braid. This original approach is an extension of the concept of protecting adjacent levels presented above, but extended to pure fusion assemblies.

6.9. BRAIDED IMPLANT COMPETITION

Given the limitations of screws and hooks, some companies have developed flexible braided implants. There are currently four implants competing with Jazz on the market:

The Universal Clamp (Zimmer) was the first successful flexible braided implant. It was developed by Spine Next, acquired in 2004 by Abbott Laboratories. The latter wished to penetrate the spinal surgery sector, but decided in 2008 to sell their Abbott Spine division to Zimmer[40]. The initial development manager for the Universal Clamp ("UC"), Régis Le Couëdic, is now Research and Development Director at Implanet. With his R&D team, Régis Le Couëdic developed Jazz by making the improvements requested by the first users of the implant and its instruments (ease of insertion, a more effective braid blocking system), all while ensuring that Jazz did not infringe the patent portfolio held by Zimmer following acquisition of the Universal Clamp.

[40] http://www.mddionline.com/article/zimmer-acquires-abbott-spine

Since this product was taken over by Zimmer as part of the acquisition of the Abbott Spine division in 2008, the Company has found that the Universal Clamp has not been subject to increased clinical studies as should have been the case in the first years of launching a new implant technology. Furthermore, Zimmer Spine appears to have decided not to destabilize its historic leading product, the Dynesys, to the detriment of the economic expansion of the Universal Clamp.

The Ligapass (Medicrea): the development of this product by Medicrea confirms the potential of braided implants. Approved in the United States and in Europe, an initial launch seems to have taken place in 2010.

In 2014, the American company **Globus Medical** launched a braided implant called SILC, which also uses a polyester braid. It seems, however, that its designers did not find a solution for blocking the braid and implant with a single tensioning instrument, as is the case on the Jazz implant and on Zimmer Spine's UC.

In 2015, **K2M**, a company specializing in the treatment of spinal deformity, launched a braided implant called NILE which also uses a polyester braid. However, its designers did not manage to find a solution for blocking the braid and implant with a single tensioning instrument, as is the case on Jazz and on Zimmer Spine's UC.

These developments reinforce the Company's strategic choices, through the importance of design activity in this segment, which provides evidence of the acceptance and preference of the surgical community for this technology in which the Research & Development team is a pioneer.

	JAZZ	UC ZIMMER	BENEFITS
1/ Implant Concept – Connector	• Open • Auto-stable • Profile : 10mm wide + ML	• Hinge design • No primary stability • Profile : 12mm wide + ML	**JAZZ:** Stability + User friendly + Time saving + Profile
2/ Braid Tightening Mode	2-in-1 (Braid + Connector)	2-in-1 (Braid + Connector)	
3/ Connector Tightening Mode	2-in-1	2-in-1	
4/ Braid Failure Mode during Traction	Buckle level	Buckle level	
5/ Failure Mode during Final Tightening	NONE	NONE	
6/ Passage of the Braid around Anatomical Structures	• Single • Sub-laminar	• Single • Sub-laminar • Stopped the double, «8» type Sub-laminar + transverse process	
7/ Tensioner	• Strong proven solution • No wear debris • Angulation choice • Can be disassembled	• Weak design • Cannot be disassembled • Generate wear debris • No angulation choice	**JAZZ:** Stronger + No wear debris + Surgeon choice + Easy to clean
8/ Mechanical Performance	Based on parallel mechanical testing with the UC Zimmer predicate device	Based on parallel mechanical testing with the UC Zimmer predicate device	**JAZZ:** Stronger – 20% mean increased performances

	JAZZ	LIGAPASS MEDICREA	BENEFITS
1/ Connector Concept	• Open • Auto-stable • Low profile – run on the rod and ML	• Closed • Auto-stable • Low profile – run on the rod	**JAZZ:** Stability + User friendly + Time saving **Ligapass:** Stability
2/ Braid Tightening Mode	• 2-in-1 (Braid + Connector)	• Independent, resulting in 2 tightening steps • Traumatic for the Braid - Tightening of the closer screw directly on the Braid	**JAZZ :** Atraumatic for the Braid - Compression between smooth surfaces with optimal constraint repartition + Time saving
3/ Connector Tightening Mode	2-in-1	Independent = 2 tightening steps	**JAZZ:** Time saving + Powerful
4/ Braid Failure Mode during Traction	Buckle level	Unpredictable	**JAZZ:** Reproducible – no need to change the implant even in case of Braid breakage
5/ Failure Mode during Final Tightening	NONE	YES – Connector level	**JAZZ:** Powerful + Atraumatic + Reproducible tightening
6/ Passage of the Braid around Anatomical Structures	• Single • Sub-laminar	• Double, «8» type • Sub-laminar + transverse process	**JAZZ:** Time saving + Powerful + Optimal connection to the anatomy
7/ Tensioner	• Strong proven solution • Can be disassembled • No wear debris • Angulation choice	• Powerful design ? • Cannot be disassembled ? • Generate wear debris ? • No angulation choice	**JAZZ:** User friendly and more usable especially in acute scoliosis

6.10. COMPANY ORGANIZATION

6.10.1. An experienced management team

The Company is made up of managers who all have strong experience in the medical technology and orthopedics sector. Furthermore, most of the executives have worked together in one way or another in previous companies, which gives the management team very strong cohesion.

Ludovic Lastennet – *Chief Executive Officer and Director*

Ludovic has 25 years' experience in the medical field: equipment, reconstructive orthopedics and dental implantology.

He spent five years as General Manager of the French subsidiary of the KaVo Dental company, member of the Danaher Corp group, after six years as sales manager in France/Germany/Austria/Switzerland and Eastern countries for Stryker Corporation.

He is a graduate of the Paris ISG International Business School, 1988.

David Dieumegard – *Chief Financial Officer*

David has 23 years' experience in Finance in a variety of industries. In particular, he was Chief Financial Officer of the KOT laboratory (adult dieting) and of Musiwave (a company dedicated to the download of musical content on mobiles, sold to Microsoft e-live), and Corporate Controller at ActivIdentity (a Nasdaq-listed company focused on Internet security and authentication).

David is a graduate of the University of Poitiers (1993) with a master's degree in Business Administration (MSG) and a post-graduate diploma in Accounting and Finance (DESS).

Régis Le Couëdic – *Research & Development (R&D) and Regulatory Affairs and Quality Assurance (RAQA) Director*

Régis has 26 years' experience in orthopedic and spinal implants in market leader companies (Zimmer, Stryker, Abbott Spine).

He was one of the founders and the R&D Director of Spine Next.

He has a degree in Mechanical Engineering from the Lille Polytech school, 1990.

Brian Ennis – *Executive Manager Implanet Inc.*

Brian has over 31 years' experience in the development and growth of medical technology companies. After 11 years at Stryker Corporation in a variety of roles as Executive and Chairman in Europe and the United States, he is currently International Chairman of Wright Medical Group, which specializes in biotechnology and orthopedic devices; Chairman at Empi, a company specializing in electrotherapeutic medical solutions; Chairman and CEO at Etex Corporation for seven years, successfully managing the transformation of this start-up specializing in the Research & Development of biomaterials into a profitable and viable high-growth company.

Laurent Penisson - *Sales Director Out of US (OUS)*

Laurent has 22 years' experience in regional sales management in the medical field and 17 years' experience in the sale of orthopedic equipment and implants (J&J, Stryker, Arthrex).

Nicolas Marin – *Marketing Director*

Nicolas has 18 years' experience in marketing and international product development in spinal, orthopedic and arthroscopic surgery.

He was International Product Manager then Marketing Manager Europe/Middle East/Africa for seven years at Stryker.

Nicolas holds a Maîtrise (master's degree) in AES [administration économique et sociale (Economic and Social Administration)] from the University of Bordeaux IV and in Political Science from University College Dublin, as well as an MSc in International Business from MIB-MACI, Bordeaux Business School, obtained in 1997.

Franck Laporte - *Operations Director*

Franck has 17 years' experience in operations management in orthopedics, including 11 years with market leader companies: Spine Next, Abbott Spine, Zimmer Spine.

He obtained a DUT [diplôme universitaire de technologie (university technology diploma)] in Logistics.

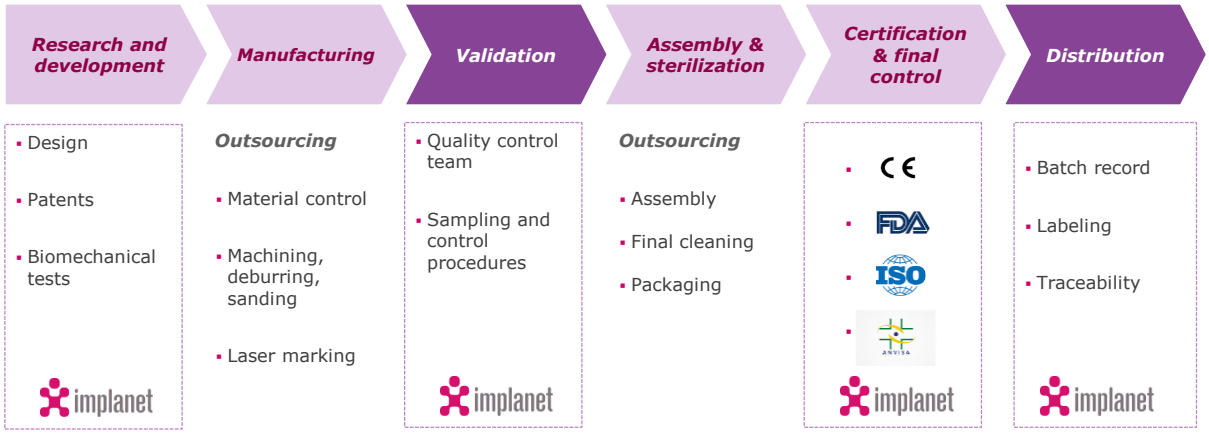
6.10.2. A first-rate operational organization

Implanet designed its operational infrastructure according to quality and excellence criteria complying with the strictest regulatory standards, positioning itself from the start to be able to serve the most competitive and demanding markets. This platform allows growth in activity to be absorbed in the medium term without significant investment.

Implanet is located in Martillac, France, 20 minutes from Bordeaux and its international airport, in a Technopole housing about 50 companies in activity sectors such as biotechnology, environmental technology and wine production.

In 2016, the Company decided to extend the logistics building in order to bring its activities together under one roof. These new, more functional and more cost-effective premises were built in accordance with French HEQ (High Environmental Quality) standards, i.e. by taking the location, orientation and proportions of the project into consideration so as to optimize natural resources, views and all-season use. Choosing the HEQ approach saved on costs (design and organization of spaces into functional areas) and site facilities (waste, deadlines, etc).

6.10.2.1. Comprehensive production outline



This outline summarizes the main stages in the manufacturing of medical devices developed by Implanet, using the Jazz production process as an example. The Company does not carry out all these stages in-house, but is nonetheless considered the manufacturer of this implant by the regulatory authorities. With the intention of controlling the entire process, it has set up a network of specialized partners who are involved in the production line under its liability and according to its specifications and requirements.

The Company has kept certain key stages of the process in-house, in particular the quality control stages. Furthermore, the Company may decide to bring the assembly stages in-house, in order to reduce lead times and its production costs, and thus allow it greater flexibility in managing the supply chain.

This organization allows Implanet to benefit from the expertise, economies of scale and expansion capacities of its industrial partners without having to invest directly. It also allows the Company to retain greater flexibility in selecting technologies to be used in the manufacture of new products, as it is not forced to use its own plant and equipment to the detriment of innovation. Thus, the Research & Development Department can design implants and instruments with no constraints in terms of raw materials or forms, other than those imposed by the functionality of the device and the patient's wellbeing.

The range of technologies used in manufacturing the medical devices designed by Implanet is extremely broad and varied, as it encompasses heavy industry resources (foundry, forge, heat treatments), biotextile weaving, pulverization of calcium phosphate ceramics, wire or water-jet cutting and also more conventional machining facilities such as five or six axis machining centers, as well as digitally controlled lathes. Starting from this premise, the Company has chosen to prioritize its reactivity, by using resources produced externally.

6.10.2.2. State of the art control, measurement and washing tools

With outsourced production involving uncompromising strictness as regards supplier control, Implanet has invested in first-rate technical and human resources, enabling it to carry out all the metrology stages according to best practice and the latest applicable regulations.

The facilities combine the mechanical, traditional or digital control equipment appropriate to each implant or instrument. All Control Department activities are carried out in the framework of a quality system including well-established procedures involving routine and extremely rigorous documentary review of the production batch records (set of traceability documents for the product in question, including the identifiers for the raw materials, machines and tools used, etc.).

The picture opposite shows checking of the minimum thickness of tibial inserts for the knee prosthesis using a measurement column. Given the extreme sensitivity of certain materials to variations in temperature and moisture level, this check is performed in a room with a controlled atmosphere.

Check using a three-dimensional measurement machine, the feeler head of which can be seen in the picture opposite. This machine allows the assembly dimensions in particular to be checked (here a tibial baseplate in chrome-cobalt belonging to the Madison knee prosthesis). These dimensions, specified to one hundredth of a millimeter, must be measured with extreme precision as they guarantee the lifespan of the implant after it is assembled by the surgeon.

Dimension and appearance check of the Jazz metal components. In addition, a careful inspection is performed using a binocular magnifier (magnification x20) to ensure that all features of the design have been properly machined, according to the specifications in the drawings produced by the Implanet Research & Development Department. This stage guarantees that all areas in contact with the polyester braid are free of faults that may damage it.

After the control stages, the implants are released by the Quality Department for the final production phases to be carried out: cleaning, packaging and sterilization.

Implanet also has a washer-disinfector allowing it to perform cleaning operations on surgical instruments in-house. This equipment is used to:

- clean all new instruments delivered by Implanet subcontractors. This stage, which has been specifically validated, makes it possible to ensure that all manufacturing residues, including residues of the cutting oil that is essential during the machining stages, have been completely removed. In this way, the instruments are ready to be sterilized by the health facility before use by the surgeon;

- clean loaned instruments. After each surgical procedure, the instruments are cleaned and sterilized by the health facility. Nevertheless, when they are returned to Implanet, they are systematically cleaned. Each instrument is checked according to precise functional criteria so that it can be used again in the operating theatre for another surgical procedure.

6.10.2.3. A logistics tool that is fully automated and integrated into the computer information system

In order to manage its stocks of finished or semi-finished products, Implanet has 20 computerized rotary cabinets. The location of each batch of parts or each finished product is systematically listed in the Implanet production management computer system in order to ensure complete traceability.

In addition to the safety aspect, this system has been designed for excellent operational efficiency and for a ramp-up of volumes with low marginal costs.

6.11. REGULATORY ENVIRONMENT

6.11.1. Regulatory context

As a manufacturer of medical devices, Implanet must satisfy the regulatory requirements in each country where its products are marketed.

The regulations for the “key” markets of Europe, the United States and Brazil are noted below:

- In Europe, the keystone regulation is European Directive 93/42/EEC. This directive defines in particular a classification of devices based on their risk for the patient. The level of control applied by the authorities depends on this classification. Before being placed on the European market, the products must have obtained the CE marking which guarantees conformity with these regulations. Notified bodies are responsible for control of CE marking and are initially selected by the manufacturer from the various bodies appointed by the member states. Manufacturers and notified bodies are also under the control of the country’s competent authority, having the power to enforce health policies and attached to the Ministry of Health.

Since its creation in 2007, Implanet has selected the French notified body, LNE-GMED, with respect to the sale of its products in Europe. In addition, as a French manufacturer, Implanet is also under the control of the ANSM [Agence nationale de sécurité du medicament et des produits de santé (French National Agency for Medicines and Health Product Safety)], the competent French authority.

- In the United States, the applicable regulations to medical devices are defined by the Code of Federal Regulations, Title 21. A product classification is also applicable based on patient risk. Control of registration of products and manufacturers is exercised directly by the competent authority, in this case the Food & Drug Administration (FDA).

- In Brazil, marketing authorizations are delivered by the national health authority ANVISA, based on the product registration files submitted and production site audits.

It should be noted that these regulations apply to manufacturers who are responsible for marketing these products. Implanet is a manufacturer in strategic product ranges such as knee prosthesis and spinal implants including Jazz. Implanet also carries out an activity as a distributor, to which these regulations do not apply. This activity involves a certain number of standard products in its arthroscopy range.

In the “key” countries for selling medical devices, a substantial and rapid increase has been noted in regulatory requirements aiming at increasing patient safety. Taking these requirements into account is imperative, given the risks engendered and illustrated by recent scandals (Médiator, PIP, hip prosthesis with metal-on-metal bearing surfaces, etc.). During audits by the notified bodies or inspections by the competent authorities, any critical deviation from a regulatory requirement may lead to the product being immediately taken off the market, with a significant impact on the activity and the brand image, even on the sustainability of the business.

In any event, whatever the regulations raised previously, the provisions that ensure the safety of a device are structured around the following two points:

- implementation of a relevant, appropriate and effective quality system; and
- prior registration of products based on a technical file that may include design and manufacturing data.

6.11.2. Quality system organization and control

Since its creation, Implanet has implemented a quality system covering all its activities, from the design to the distribution of its devices. This quality system applies equally to all products and is audited annually by the notified body, LNE-GMED, in order to ensure that it remains effective.

Implanet has ISO 13485 certification for its activities: This is an essential quality system certificate for manufacturers of medical devices, making it possible to meet a certain number of requirements under the European Directive.

In addition to these general quality system audits, the notified body also audits the CE-marking technical files for the products and the application of the quality system for each type of product.

Every three years, a quality system renewal audit and its application to the products is conducted by the notified body. In November 2016, IMPLANET was successfully audited by LNE-GMED, enabling it to renew its certifications.

Since it entered the market in 2007, Implanet has been audited ten times by LNE-GMED. In 2012, as part of a regulatory compliance control of the orthopedics sector, Implanet was also inspected by the competent French authority (ANSM). These audits have always had satisfactory results, none of them having raised critical remarks that could have an impact on patient safety and/or requiring immediate regulatory action. The deviations noted have all been settled in the earliest delays with the authorities, Implanet having the intention to respond in the most satisfactory way.

Concerning the American market, the Implanet Jazz and Implanet Spine System (ISS) products were first marketed in 2013. There is no quality certification system in the United States similar to the one used in Europe. Manufacturers must, however, apply the Quality System Regulations (QSR) described in the Code of Federal Regulations, 21 CFR PART 820. Verification of prosper compliance with these provisions is assessed by the FDA, which, when it so desires, initiates an inspection of the manufacturer. The power of the FDA is particularly substantial in the United States; failure to comply with a QSR requirement is considered as fraud. The power of the FDA may go as far as immediately blocking exports of products onto American soil.
In order to market Jazz and the ISS in the United States, Implanet therefore implemented within its quality system in order to meet the specific American requirements. In February 2014 and October 2016, Implanet was also audited by the FDA without any remark or non-conformity being noted.

Implanet complies with the requirements of RDC 16, referred to by ANVISA (Brazil) to conduct its quality audits, in parallel with the review of the registration files submitted. In 2015, the Brazilian organization, ANVISA, audited the Company's facilities and procedures, with no non-compliance raised to date.

6.11.3. Product registration and control

Within the European market, Implanet markets class IIb and class III products, corresponding respectively to spinal implants such as Jazz and joint prosthesis. Class III constitutes the most critical classification; marketing these products requires prior review of the technical file by the notified body. As long as the remarks by the notified body have not been cleared, the product cannot be released for sale.

Implanet thus has strong experience in the design, production and submission of class III files, acquired as part of marketing its hip and knee prosthesis. This experience may prove useful in a context of revision of the European Directive in which spinal implants will very probably be raised to class III.

On the American market, the Jazz and ISS products are subject to the Premarket Notification 510(k) registration procedure. This procedure relies on the submission of a technical file in which it must be demonstrated that the product submitted is substantially equivalent to a product already present on the American market (predicate device). The FDA has 90 days to review a file. However, as long as all the responses provided do not satisfy the FDA, the review period is suspended and may thus become extremely long, and even result in failure of the submission. Given the innovative character of Jazz and the presence of a single predicate device, obtaining the 510(k) for the Jazz product was a major challenge in a context of increased FDA requirements and, in particular, in the context of the 510(k) registration process. The fact of having defined an appropriate registration strategy for Jazz, crowned with quick registration, constitutes an important asset that is used for extensions of this product range (new dimensions, new materials, changes in indications, for example). It should be

noted that, depending on their degree of complexity, further file submissions may very well be classified as "Special 510(k) Submission", for which the review period is reduced to 30 days (excluding questions).

Obtaining registration in the United States requires knowledge of the numerous American particularities in a complex regulatory system, and this being true of the FDA, recognized as a particularly rigorous, independent and demanding competent authority. For all its regulatory actions on American territory, Implanet relies on the expertise of a top-rank specialist firm.

When innovative class III products, with no predicate device, fall under the Premarket approval (PMA) registration procedure, the process is then significantly more complex and longer, leading to extremely substantial investments over several years.

Implanet also carries out registration of its products in a number of other countries. Thus, in addition to Europe and the United States, Jazz is registered in the following countries: Australia, South Africa, India, Iran and Turkey.

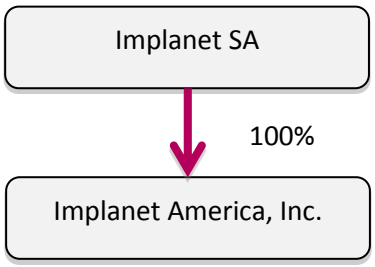
	Registered countries	Countries in the process of registration
Spinal ranges: Jazz and traditional range	Australia, South Africa, Brazil, Europe, United States, India, Iran, Turkey, Israel	Mexico, Russia
Madison knee prosthesis	Brazil, Europe, Iran, Russia, Turkey	

It should be noted that in the United States, the 510(k) registration obtained in October 2012 only covered treatment of mature bones. The Company extended its registration to pediatric indications (non-mature bones) with a new file lodged with the FDA on July 24, 2013. The Company received approval from the FDA on September 25, 2013, even before the deadline for the FDA's response. The Jazz product is thus registered in the United States for the same indications as the other approved braided implant, as well as the standard fusion implants (screw and hook).

7. ORGANIZATIONAL CHART

7.1. LEGAL STRUCTURE

At the date of the *Document de référence* the legal structure of the Implanet Group was as follows:



7.2. GROUP COMPANIES

- **Implanet SA:** parent company of the Group, based in Martillac, France.
- **Implanet America Inc.:** incorporated in February 2013 in New York State. The Company commenced operations at the end of the first half of 2013. Ludovic Lastennet and David Dieumegard are, respectively, Chairman and Treasurer of Implanet America Inc. At the date of the *Document de référence*, this subsidiary had its offices in Boston.

7.3. GROUP FINANCIAL FLOWS

As part of the operational launch of Implanet America Inc., the Company arranged a **distribution agreement** setting the commercial terms and conditions under which Implanet America Inc. would distribute Implanet's products in the United States.

The Company supports all risks arising from the sale of its products in the United States and guarantees its subsidiary a fixed operating margin once the business is up and running (allowing the subsidiary to cover its fixed costs).

The margin (based on the transactional method of net margin, which estimates a fair operating margin in a competitive environment) will be maintained by adjusting the transfer prices at the end of each year.

This agreement was signed on January 2, 2014 with immediate effect. It is valid until December 31, 2016 and is tacitly renewable for periods of one year.

Other agreements are being drawn up concerning:

- **Rebilling of services**

- **Financial flows**: a cash flow agreement will be signed to set the terms and conditions for cash advances made by the Company to its subsidiary.

The transactions realized during 2016 between Implanet SA and Implanet America are as follows:

- product sales from Implanet SA to Implanet America: €636 thousand;
- management fees from Implanet SA to Implanet America: €60 thousand;
- other charges invoiced by Implanet SA: €129 thousand.

The Implanet America related trade receivables and intercompany current account are amounting, in Implanet SA social accounts, to €2,451 thousand and €4,478 thousand (impaired to €2,918 thousand) respectively, as of December 31, 2016.

8. PROPERTY, PLANT AND EQUIPMENT

8.1. PROPERTY AND EQUIPMENT

8.1.1. Leased property

The Company wanted to group together its administrative and logistics activities and entered into a lease in February 2016 for this real estate complex:

Address	Technopole Montesquieu, allée François Magendie, 33650 Martillac
Surface	1,587 sq.m. exclusive space including 34 fitted offices, storage space, sanitary facilities, and a 72 sq.m. terrace
Term	October 1st, 2016 – September 30, 2026
Annual rent excl. VAT and charges	€212,000

The rents paid under these leases increase in accordance with the national index of construction costs published by INSEE, automatically, as of right and with no formalities required, at each anniversary of the start of the lease.

Implanet America Inc works from an office building rented under a short-term lease:

Address	8 Faneuil Hall Market Place, 3rd Floor, Boston, Massachusetts, 02109, United States
Surface area	Variable depending on the number of offices used
2016 Annual rent (excl. VAT and charges)	€66,997

Rent varies depending on how much floor space the Company uses.

8.1.2. Other property, plant and equipment

The main property, plant and equipment owned by the Company are described in Note 3 to the IFRS financial statements shown in Section 20.1 of the *Document de référence*.

8.1.3. Encumbrances on the Company's intangible fixed assets

At the date of the *Document de référence*, the Company had pledged its goodwill and intellectual property to KREOS CAPITAL IV (UK) LTD as collateral for a €5,000,000 bond issued on July 19, 2013 (see Section 22.3 "Borrowings via bond issued to KREOS CAPITAL IV (UK) LTD" in the *Document de référence*).

8.2. ENVIRONMENTAL ISSUES

The nature of the Company's activities does not pose any significant risk to the environment. See Section 4.6 "Industrial and environmental risks".

See the "Corporate social report" in Section 26.3 of this *Document de référence*.

9. REVIEW OF THE FINANCIAL POSITION AND RESULTS

The following information on the financial position and results of the Company and its subsidiary should be read in conjunction with the complete *Document de référence*, and in particular with the consolidated financial statements prepared in accordance with IFRS for the fiscal year ending on December 31, 2016. Readers may also consult the notes to the financial statements in Section 20.1 of the *Document de référence*.

The comments on the financial statements in Chapters 9 and 10 of the *Document de référence* are made solely on the basis of the consolidated financial statements prepared in accordance with IFRS included in Section 20.1 of the *Document de référence*.

9.1. COMPANY OVERVIEW

9.1.1. Company overview

Incorporated on January 23, 2007, the Company's purpose is to design, manufacture and market all types of surgical implants and equipment.

The Company's mission is to design and manufacture innovative implants with uncompromisingly high standards of quality and meeting the most stringent clinical performance requirements, for the most lucrative orthopedic surgery markets (knee and spine). The Company intends to turn its technological platform, aimed at improving the treatment of spinal pathologies requiring vertebral fusion, into the global reference in the braided implants market, for which it will help improve the selection by surgeons through its ease of use.

Implanet dedicates a significant part of its resources, in both its R&D and sales and marketing activities, to the development of new markets.

A US subsidiary, Implanet America Inc., was formed in February 2013 to extend Implanet's international reach.

Since the foundation of the Company, the sources of funding are:

- capital increases; notably, within the context of its listing on the Paris Euronext stock market in 2013 and fund raising in 2015 and 2016;
- bond issues redeemable, or convertible, in shares;
- OSEO innovation grants in the form of repayable advances and an interest-free innovation loan;
- COFACE market prospection insurance covering the United States geographical region;
- a FEDER grant from the Aquitaine Regional Council; and
- the French research tax credit.

9.1.2. Research and development - Subcontracting

Implanet conducts research and development to design innovative orthopedic implant devices.

The Company estimates that in 2016, it devoted almost €4,658 thousand to the development, promotion and regulatory affairs of the Jazz range. Jazz is the system for posterior fixation and reduction of spinal deformation by means of a polymer sub-laminar band and a metal connector (see Section 6.4 of the *Document de référence* for more information).

The Company also commits substantial resources to filing international patents and patent applications to protect its intellectual property rights (see Chapter 11 of the *Document de référence*).

The Company develops implants and ancillary devices, which are manufactured by specialized subcontractors that are required to meet its demanding regulatory standards.

The assembly of kits and quality control at different stages of production are primarily carried out by Implanet at its Martillac facility.

Relations with critical subcontractors (involved in the manufacture of a finished product) are determined according to the following main points, in line with the Company's internal procedures:

- Selection is based on the subcontractor's experience, quality certifications, production capacities and technologies. The selection phase may include site visits, audits and the production of pilot runs or prototypes. The selection decision is approved by the R&D, Operations and Quality Department.
- An agreement is drawn up between the parties to specify the terms and conditions for supply, protection of intellectual property, responsibilities, undertakings in respect of quality assurance and traceability, payment terms, systems for updating quantities, pricing, etc.
- Precise manufacturing specifications are drawn up for each product type. They define Implanet's exact requirements for control of the manufacturing process by the subcontractor.
- Product input inspection is carried out on all batches by Implanet's Quality Control Department before products are released on the market.
- Subcontractor audits are conducted at least every three years and the audit findings are presented in a report.

9.1.3. Principaux facteurs ayant une incidence sur l'activité

Since its creation, Implanet's has aimed to develop an innovative range of orthopedic products. It has reported operating losses for the fiscal years from 2007 to 2016. Capital expenditure has been concentrated on:

- research and development for the design and registration of its product range (mainly Madison: full knee prosthesis for first-line treatment and revision; and Jazz: posterior fixation and spinal deformity reduction system);
- marketing expenses;
- the establishment of industrial, logistics and sales infrastructures; and
- the development of the Beep N Track business (disposed in December 2011).

In view of the Group's current stage of development, the main factors that could have an impact on Implanet's business, financial position, results, development and outlook are:

- commercial and marketing deployment in Europe and the United States;
- the continuation of its research and development policy;
- the need to obtain new certifications to market its products in new markets;
- securing subsidies and repayable advances;
- the existence of tax incentives, such as the research tax credit in France, for which the Company is eligible;
- the protection and maintenance of its intellectual property rights for its portfolio of patents and brands.

9.2. COMPARISON OF THE FINANCIAL STATEMENTS FOR THE LAST TWO FISCAL YEARS

9.2.1. Composition of the net operating income and net income

9.2.1.1. Revenue

The Group's revenue is primarily generated by the sale of orthopedic implants (spine, knee and arthroscopy) and breaks down as follows:

REVENUE (Amounts in € thousands)	**12/31/2016**	**12/31/2015**
Spinal	4,102	2,806
Knee + Arthroscopy	3,723	3,847
Total revenue	**7,825**	**6,653**

In 2016, Implanet recorded revenue of €7,825 thousand, up 18% on the previous year (€6,653 thousand). This growth was driven by Spinal sales, up 46% on the previous fiscal year, for the first time outperforming Knee sales over a 12-month period.

Revenue by geographic region for the two years presented:

REVENUE (Amounts in € thousands)	**12/31/2016**	**12/31/2015**
France	3,871	2,853
Brazil	865	1,756
United States	2,048	1,203
Rest of the World	1,042	842
Total revenue	**7,825**	**6,653**

In Spine activity, the United States, France and the rest of the world recorded sales growth of +70% to €2,048 thousand, +33% to €1,264 thousand and +21% to €790 thousand, respectively. In Implanet's direct markets – France and the United States – the Company continued its acceleration in the degenerative bone disorder segment with sales increasing by +142% to €1,161 thousand, while recording growth of +36% to €1,998 thousand in the pediatric scoliosis surgery segment.

In 2016, Implanet sold 1,450 Jazz implants in the United States, 3,552 in France and 1,999 in the rest of the world, giving a total of 7,001 implants (vs. 5,601 in 2015) or volume growth of +25%, representing approximately 1,400 operations. As of December 31, 2016, in its direct markets, 127 surgeons were users of Implanet's Jazz technology (vs. 82 surgeons as of December 31, 2015), 69 of them in the United States (vs. 43) and 58 in France (vs. 39).

Knee activity saw 2016 revenue slipped 3% to €3,723 thousand in 2016. The French market, accounting for 70% of the total, recorded growth of +37% to €2,607 thousand, partially offsetting activity in Brazil, where macroeconomic difficulties are continuing to weigh on local activity.

In accordance with the provisions of IAS 18, the Company recognizes revenue when the amount can be measured reliably, it is probable that future economic benefits will flow to the Company, and specific criteria are met for the Company's business.

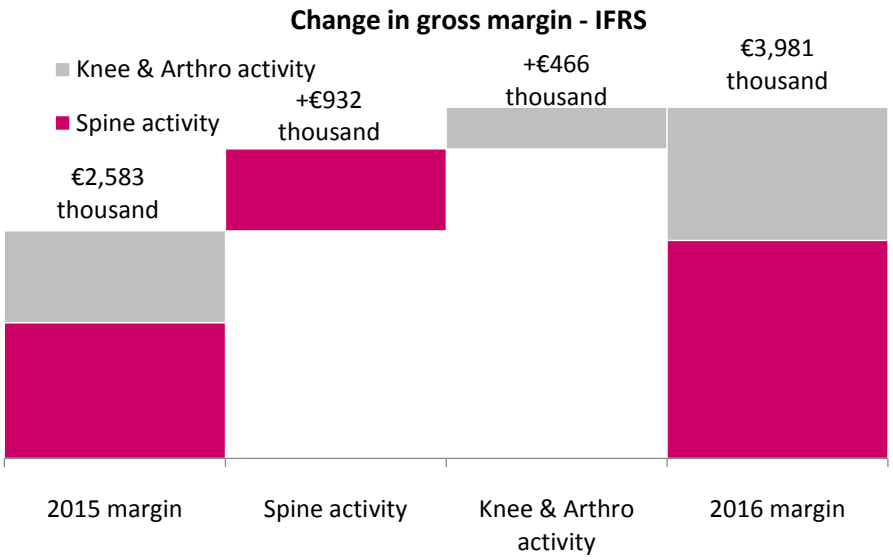
9.2.1.2. Operating expenses by intended use

Cost of sales

COST OF SALES (Amounts in € thousands)	12/31/2016	12/31/2015
Purchases of raw materials and goods	(3,197)	(3,314)
Depreciation and amortization of ancillary devices	(647)	(756)
Cost of sales	**(3,844)**	**(4,070)**

The Group's gross margin was 51% at December 31, 2016, up from 39% at December 31, 2015. This 12 percentage point increase was due to a combination of the following:

- overall growth in revenue with positive developments in terms of product mix and regions;
- decrease in the effect of depreciation and amortization of ancillary devices with a positive impact on the gross margin in the order of 3 percentage points between 2015 and 2016.



Operating expenses

Operating expenses were up €646 thousand in 2016, 6.3% higher than in 2015.

This increase was primarily due to the increase in "variable" distribution costs, particularly in the United States, the Company having chosen to prioritize direct distribution via a sales structure comprising a network of independent agents (see Section 6.2.1.1). These variable distribution costs, correlated with the growth in revenue, only include commissions paid to sales agents (+€464 thousand on 2015) and royalties (+€86 thousand on 2015).

Other operating expenses were up €96 thousand on 2015, and are likely to remain stable. In fact, the Company believes that its structure is adequate to cope with its medium-term growth.

Research and Development expenses

Implanet conducts Research & Development to design innovative orthopedic implant devices. During the years under review, the Company committed a substantial portion of its resources to new product development.

Research costs are systematically recognized as expenses unless the Company believes that projects fulfill capitalization criteria under IAS 38. The Company has, therefore, decided to recognize the development costs under intangible fixed assets.
The development costs included in assets are depreciated on a straight-line basis over a period of five years.

Research and Development costs for the fiscal years presented here break down are as follows:

RESEARCH AND DEVELOPMENT (Amounts in € thousands)	**12/31/2016**	**12/31/2015**
Studies and research	(102)	(167)
Intellectual property fees	(290)	(161)
Payroll expenses (including share-based payments)	(603)	(650)
Capitalization of R&D expenses	52	233
Depreciation and amortization of capitalized R&D expense	(125)	(101)
Miscellaneous	(88)	(101)
Research and Development costs	**(1,156)**	**(947)**
Research tax credit	199	215
Advances and OSEO loan	88	-
Subsidies	**287**	**215**
Research and Development costs, net	**(870)**	**(732)**

Research and Development expenses essentially comprise:

- payroll expense of engineers and the R&D Director (down slightly on 2015, given the departure of the Clinical Director the previous year);
- study, test and prototype costs (down €65 thousand compared to 2015 due to the completion of the Jazz Lock and Jazz Claw projects in early 2016);
- patent and brand protection costs (up €129 thousand with the finalization of the industrial property portfolio including, in particular, patents filed in the United States and worldwide);
- the impact of the capitalization of R&D expenses (down on 2015 due to the completion of the Jazz Lock and Jazz Claw projects in the 1st half of 2016) and related amortization of capitalized costs.

Close to half of its Research and Development expenses (incurred and/or capitalized) were accounted for by Jazz (approximately €433 thousand in 2016 and €420 thousand in 2015, according to its estimates).

The French research tax credit amounted to €199 thousand in 2016, compared with €215 thousand in 2015.

In addition, pursuant to IAS 20, the Group recognized an €88 thousand subsidy over the course of 2016 in the form of an interest-free loan for innovation obtained for the “development and clinical assessment of the Jazz type braided implant for degenerative spinal surgery (particularly the securing or replacement of pedicle screws)”.

Cost of Regulatory Affairs and Quality Assurance

Regulatory affairs and quality assurance costs for the fiscal years presented here break down as follows:

COST OF REGULATORY AFFAIRS AND QUALITY ASSURANCE (Amounts in € thousands)	12/31/2016	12/31/2015
Studies and research	(144)	(190)
Intermediary compensation Fees	(127)	(200)
Payroll expenses (including share-based payments)	(508)	(399)
Capitalization of R&D expenses	19	40
Depreciation and amortization of capitalized R&D expense	(68)	(64)
Miscellaneous	(92)	(138)
Cost of Regulatory Affairs and Quality Assurance	**(920)**	**(951)**
Research tax credit	4	10
Subsidies	**4**	**10**
Cost of Regulatory Affairs and Quality Assurance, net	**(916)**	**(940)**

Regulatory affairs and quality assurance costs primarily comprise:

- payroll expenses for quality control officers (dimension inspection) up €109 thousand on 2015 due to expansion of the quality team;
- product accreditation costs in different countries (€73 thousand increase in fees paid compared with the previous fiscal year due to specific consulting fees incurred in 2015 for the Food and Drug Administration (FDA) extension in the United States);
- quality system costs in the Company (procedures, quality audit, etc.);
- the impact of the capitalization of R&D expenses and amortization related to capitalized expenses.

Jazz accounted for almost €201 thousand of the Company's total expenditure on regulatory affairs and quality assurance in 2016 (incurred and capitalized expenses), compared with €329 thousand in 2015.

Sales and marketing expenses

Sales and Marketing costs for the fiscal years presented here break down are as follows:

SALES, DISTRIBUTION AND MARKETING (Amounts in € thousands)	12/31/2016	12/31/2015
Materials and supplies not for stock	(86)	(182)
Insurance premiums	(123)	(79)
Intermediary compensation Fees	(318)	(381)
Advertising	(139)	(223)
Travel, assignments and entertaining	(786)	(580)
Payroll expenses (including share-based payments)	(2,117)	(1,749)
Royalties	(202)	(116)
Sales commission	(1,143)	(679)
Allocations/reversals of provisions for impairment of trade receivables	440	(276)
Loss on bad debts	(517)	-
Miscellaneous	(114)	(215)
Sales, Distribution and Marketing expenses	**(5,105)**	**(4,480)**

Sales and marketing expenses primarily comprise:

- sales force costs (up €368 thousand compared to the previous year due to the build-up of the sales team, particularly in the US, and the appointment of an Executive Manager for the subsidiary);
- commissions paid to sales agents (the increase on 2015 corresponding to the rise in sales);
- travel costs (up €206 thousand on 2015 in line with the expansion of the sales team);
- fees (particularly relating to the cost of seminars and national and international conferences);
- marketing and communication expenses: advertising inserts, brochures, demonstration kits, website, etc.
- despite a campaign to recover bad debts initiated with an external provider, the Company was obliged to recognize bad debts amounting to €517 thousand gross. These were mainly trade receivables that were written off. In contrast, a reversal of provisions for impairment amounting to €509 thousand was recognized.

Total sales and marketing expenditure for Jazz in 2016 amounted to €3,619 thousand, compared with €2,678 thousand during the previous fiscal year.

Operating costs

Operating costs for the fiscal years presented here break down are as follows:

OPERATING COSTS **(Amounts in € thousands)**	**12/31/2016**	**12/31/2015**
Equipment and real estate leases	(135)	(136)
Transport	(50)	(35)
Payroll expenses (including share-based payments)	(499)	(617)
Depreciation and amortization of fixed assets	(75)	(117)
Allocation/reversal of provision for impairment of inventories	27	205
Scrapping campaign	(268)	-
Miscellaneous	(89)	(92)
Operating costs	**(1,089)**	**(792)**

Operating costs primarily comprise:

- lease and maintenance of the logistics building (unchanged from the previous year);
- sales administration and logistics personnel (down €188 thousand on 2015 following departmental restructuring);
- depreciation of dedicated assets (stackers, etc.);
- management of procurement, logistics and inventories;
- impairment of inventories and costs associated with the annual scrapping campaign. Scrapping campaigns were recorded in the cost of sales up to December 31, 2015and amounted to €143 thousands in 2015. As of 2016, these were classed as operating costs and were offset against reversals of provisions for inventories generated by said operations.

Operating costs for Jazz in 2016 totaled €133 thousand.

General and administrative expenses

GENERAL AND ADMINISTRATIVE EXPENSES (Amounts in € thousands)	12/31/2016	12/31/2015
Real estate leases	(198)	(201)
Other leases	(28)	(108)
Hardware, equipment and works	(135)	(225)
Insurance policies	(227)	(228)
Intermediary compensation Fees	(819)	(988)
Travel, assignments and entertaining	(150)	(286)
Banking services	(98)	(33)
Payroll expenses (including share-based payments)	(965)	(1,000)
Depreciation and amortization of fixed assets	(34)	(72)
Gain on lapsed trade payable	-	201
Miscellaneous	(229)	(331)
General and administrative expenses	**(2,883)**	**(3,271)**

General and administrative expenses primarily comprise:

- payroll expenses for general management, Finance Department and IT personnel;
- lease and maintenance of the administrative building;
- insurance;
- legal and other external consultancy fees (down €169 thousand on 2015 primarily due to the discontinuation, in late 2015, of consulting fees paid to Mr. Ennis (totaling €105 thousand), who was appointed Executive Manager of the US subsidiary on January 1, 2016);
- travel costs (down €136 thousand on the previous fiscal year due to a drop in US travel following the recruitment of an Executive Manager for the US subsidiary);
- depreciation of office and computer equipment, furniture, software, fixtures and fittings;
- bank fees and commission.

9.2.1.3. Net financial income

FINANCIAL INCOME AND EXPENSES (Amounts in € thousands)	12/31/2016	12/31/2015
Amortized cost of the loan	(653)	(641)
Changes in the fair value of derivative liabilities	211	36
Other financial expenses	(29)	(29)
Financial income	15	58
Foreign exchange gains and (losses)	48	202
Total financial income and expenses	**(407)**	**(375)**

Net financial income mainly breaks down as follows:

- the cost of the KREOS bond issue (amortized cost and change in the fair value of derivative liabilities) amounting to -€252 thousand compared with -€397 thousand at December 31, 2015.
- the cost of the convertible bonds coupled with share subscription warrants issued in 2016 in favor of L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND amounting to -€189 thousand (amortized cost of the bond and change in the fair value of derivative liabilities) compared with -€209 thousand in 2015.
- Foreign exchange gains mainly due to a favorable euro/dollar exchange rate.

9.2.1.4. Corporate tax

The Group has not recognized any corporate tax expense.

At December 31, 2016, the Group had tax losses amounting to:

- €57,139 thousand in France:
  Allocation of fiscal deficits in France is capped at 50% of the taxable income for the period. This limit is applicable to the fraction of profit that exceeds €1 million. The unused portion of the deficit may be carried forward to subsequent fiscal years and allocated under the same conditions for an indefinite period.
  The current corporation tax rate applicable to the Company is the current rate in force in France, namely 33.33%. The 2017 tax law revised this rate at 28%, which will be applicable in 2019.

- USD 5,927 thousand for the US subsidiary, including:
  - USD 1,901 thousand constituted in 2016, with expiry in 2036;
  - USD 2,293 thousand constituted in 2015, expiring in 2035;
  - USD 1,631 thousand constituted in 2014, with expiry in 2034;
  - USD 102 thousand constituted in 2013, expiring in 2033.

  The corporation tax applicable to Implanet America Inc. is the current rate in force in the United States, namely 44%.

Deferred tax assets are recognized in respect of tax losses that may be carried forward when it is probable that the Company will have future taxable profits to which these unused fiscal losses can be allocated. According to this principle, no deferred tax assets have been recognized in the Company's financial statements apart from deferred tax credits.

9.2.1.5. Basic earnings per share

Basic earnings per share are calculated by dividing the net profit or loss attributable to the Company's shareholders by the weighted average number of shares in circulation during the fiscal year.
Instruments giving deferred access to capital (warrants (BSAs), founders' warrants (BSPCEs) and stock options) are deemed anti-dilutive, since they lead to an increase in earnings per share. Accordingly, the diluted earnings per share are identical to the basic earnings per share.

BASIC EARNINGS PER SHARE	**12/31/2016**	**12/31/2015**
Net income for the year	(7,288)	(8,008)
Weighted average number of shares in circulation	18,542,024	9,692,216
Basic earnings per share (€/share)	**(0.39)**	**(0.83)**
Diluted earnings per share (€/share)	**(0.39)**	**(0.83)**

An analysis of the net operating income and net income shows:

- the growth of the "Spine" and "Orthopedic implants" activities;
- the business development in the United States via the US subsidiary;
- the Company's efforts to develop and launch Jazz;
- the bolstering of the sales force, particularly in the United States;
- the existence of an administrative and logistics platform that does not require a short-term increase in capacity.

9.2.2. Balance sheet

9.2.2.1. Non-current assets

NON-CURRENT ASSETS (Amounts in € thousands)	12/31/2016	12/31/2015
Intangible fixed assets	494	635
Property, plant and equipment	1,233	1,426
Other non-current financial assets	1,443	986
Total non-current assets	**3,169**	**3,047**

Intangible fixed assets consist of the capitalization of development costs for a net value of €494 thousand at December 31, 2016, compared with €615 thousand at December 31, 2015. They related to the "Jazz", "Jazz Lock", "Jazz Claw" and "Madison Revision" projects.

Property, plant and equipment chiefly consist of ancillary devices commissioned when delivered to healthcare facilities.

Non-current financial assets mainly comprise term deposits and negotiable medium-term notes totaling €1,356 thousand. On the reporting date, €656 thousand was pledged to banks under lease-back agreements or bank loans.

9.2.2.2. Current assets

CURRENT ASSETS (Amounts in euros)	12/31/2016	12/31/2015
Inventories	3,555	3,469
Trade receivables and related accounts	2,507	2,539
Other receivables	968	777
Current financial assets	191	5,309
Cash and cash equivalents	6,067	1,150
Total current assets	**13,288**	**13,243**

Inventories mainly consist of the various categories of spinal, arthroscopy and knee implants, as well as new ancillary devices available for sale and not provided to healthcare facilities.

Other receivables mainly include:

- the research tax credits recognized for the reference fiscal years (€203 thousand in 2016 and €225 thousand in 2015), which have been repaid or will be repaid during the following fiscal year;
- deductible VAT and VAT credits for a total of €478 thousand in 2016 compared with €349 thousand in 2015;
- prepaid expenses relating to current expenditure.

Current financial assets comprise the €191 thousand Kreos guarantee deposit as part of the implementation of the bond issue which will be repaid following the last instalment in 2017.

Cash and cash equivalents solely consist of bank accounts and term deposits with an initial maturity of less than three months.

9.2.2.3. Shareholders' equity

SHAREHOLDERS' EQUITY (Amounts in € thousands)	12/31/2016	12/31/2015
Capital	14,914	15,887
Paid-in capital	387	15,056
Translation reserve	(398)	(339)
Other comprehensive income	(28)	(23)
Reserves - Group share	2,073	(12,848)
Profit/(loss) - Group share	(7,288)	(8,008)
Shareholders' equity - Group share	**9,660**	**9,726**
Minority interests	-	-
Total shareholders' equity	**9,660**	**9,726**

Share capital as at December, 31, 2016 stood at €14,913,542.70 divided into 21,305,061 fully subscribed and paid up shares with a nominal value of €0.70 each.

The General Shareholders' Meeting of May 24, 2016 decided to carry out:

- the allocation of retained earnings on issue premiums for €15,074 thousand;
- a capital decrease justified by losses, in the amount of €8,589 thousand, by reducing the nominal value of the shares to €0.70;
- the constitution of an unavailable special reserve resulting from the capital decrease for €4,593 thousand.

In November 2016, the Company carried out a capital increase with preferential subscription rights, through the issue of 9,833,105 new shares with a nominal value of €0.70 giving a total increase of €6,883 thousand.

During the 2016 fiscal year, 113 bonds held by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND were converted into shares generating the issue of 144,853 shares with a nominal value of €1.5 and 735,504 shares with a nominal value of €0.70, i.e. a capital increase of €732 thousand and an issue premium of €398 thousand.

9.2.2.4. Non-current liabilities

NON-CURRENT LIABILITIES (Amounts in € thousands)	12/31/2016	12/31/2015
Amounts due to personnel	101	83
Non-current financial debts	866	1,721
Derivatives liabilities	-	0
Non-current liabilities	**967**	**1,804**

Amounts due to personnel consist of provision for retirement benefits.

Non-current financial liabilities include:

- the non-current portion of repayable advances and interest-free loans amounting to €696 thousand at December 31, 2016 (€85 thousand at December 31, 2015);
- financial debts due in > one year under finance leases amounting to €86 thousand at December 31, 2016 (compared with €298 thousand at December 31, 2015);
- the non-current portion of a loan taken out with a credit institution amounting to €85 thousand at December 31, 2016 (€254 thousand at December 31, 2015).

See Section 10.1 for further information on sources of Company financing.

9.2.2.5. Liabilities related to assets held for sale

CURRENT LIABILITIES (Amounts in € thousands)	**12/31/2016**	**12/31/2015**
Current financial liabilities	2,836	1,873
Derivatives liabilities	2	120
Provisions	55	55
Trade and other accounts payable	2,166	2,135
Tax and social security liabilities	751	560
Other payables and miscellaneous debt	22	18
Current liabilities	**5,831**	**4,761**

Current financial liabilities mainly include:

- The debt linked to the KREOS bond issue and the L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND (excluding derivative instruments) amounting, respectively, to €1,100 thousand and €6 thousand at December 31, 2016 (€901 thousand and 368 thousand at December 31, 2015).
- Financial debts associated with factoring contracts amounting to €1,181 thousand at December 31, 2016 (€65 thousand at December 31, 2015). This change was due to the extension of the factoring agreement to cover exports.

They also include the current portion of liabilities under finance leases, loans from financial institutions and repayable advances.

See Section 10.1 for further information on sources of Company financing.

9.3. ACTIVITY OF THE GROUP COMPANIES OVER THE LAST TWO FISCAL YEARS

9.3.1. Implanet SA's Earnings

IMPLANET SA (Amounts in € thousands)	12/31/2016	12/31/2015
Operating income	7,845	7,166
of which revenue	*6,602*	*6,618*
Operating expenses	12,965	12,754
Operating net income	(5,119)	(5,588)
Net financial income	(1,879)	(1,464)
Non-recurring net income	(998)	50
Corporate tax	(203)	(225)
Total net income/(loss)	**(7,793)**	**(6,777)**

Operating income was up €679 thousand in 2016 to €7,845 thousand from €7,166 thousand in 2015, primarily due to:

- Stable revenue. Restated for rebilling of services and costs to the Implanet America subsidiary, revenue stood at €6,413 thousand, up 4% on the previous fiscal year.
- Transfers of expenses were up €362 million compared to 2015, due to the increase in ancillary devices provided to healthcare institutions during the year.
- A €508 thousand reversal of provisions for impairment for doubtful receivables in 2016.

Operating expenses stood at €12,965 thousand in 2016 compared with €12,754 thousand in 2015, a slight increase of 2%.
Other purchases and external expenses amounted to €4,193 thousand at December 31, 2016 compared with €4,403 thousand at December 31, 2015, down €210 thousand. Restated for rebilling of services and costs in euros to the Implanet America subsidiary, other purchases and external expenses were unchanged from 2015.
Payroll expenses amounted to €3,432 thousand at December 31, 2016 compared with €3,314 thousand at December 31, 2015, up €118 thousand in line with growth in the Company's average headcount.
Net operating income stood at –€5,119 thousand at December 31, 2016 compared with –€5,588 thousand at December 31, 2015, showing a 9% improvement.

Net financial income stood at –€1,879 thousand at December 31, 2016 compared with –€1,464 thousand at December 31, 2015 and mainly comprised the provision for impairment of the Implanet America subsidiary's current account of €1,631 thousand in 2016 against €1,287 thousand in 2015. This takes into account expected cash flows over the next five years (based on the subsidiary's growth prospects, in particular the expected development of the Jazz range).

Non-recurring net income stood at –€998 thousand at December 31, 2016, and mainly comprised charges incurred within the context of the €6.9 million capital increase in November 2016.

After recognition of a €203 thousand research tax credit, the Group posted a net loss of -€7,793 thousand at December 31, 2016 compared with a net loss of -€6,777 thousand at December 31, 2015.

9.3.2. Activity of the Subsidiaries

Implanet America was the group's only subsidiary at December 31, 2016, and its summary accounts are as follows:

IMPLANET AMERICA INC. (Amounts in € thousand)*	**12/31/2016**	**12/31/2015**
Operating income	2,048	1,203
of which revenue	*2,048*	*1,203*
Operating expenses	(3,854)	(3,391)
Operating net income	(1,806)	(2,187)
Net financial income	-	0
Non-recurring net income	-	-
Corporate tax	721	878
Total net income/(loss)	**(1,085)**	**(1,309)**

** converted using the average EUR/USD exchange rate for the period*

Operating income stood at €2,048 thousand in 2016 compared with €1,203 thousand in 2015, up 70%. On a constant currency basis, revenue increased 69% compared with 2015. This significant increase was due to the increased volumes of Jazz implants.

Operating expenses stood at -€3,854 thousand at December 31, 2016 compared with €3,391 thousand at December 31, 2015, or an increase of €463 thousand (+14%). This rise was mainly due to:

- the sharp growth in business in 2016;
- an increase in payroll expenses of €247 thousand compared with 2015 in line with the increase in average headcount and the recruitment of an Executive Manager for the subsidiary in 2016;
- a drop in fees of €518 thousand compared with 2015. In 2015, the Company had incurred significant costs for strategic consulting, in particular for the deployment of operations in the United States. In addition, management fees billed by the parent company were down due to the recruitment of an Executive Manager for the subsidiary in 2016.

After recognition of a deferred tax credit of €721 thousand from the utilization of the tax loss which can be carried forward for a period of 20 years, the net loss stood at -€1,085 thousand at December 31, 2016, compared with a net loss of -€1,309 thousand at December 31, 2015.

10. NET CASH AND SHAREHOLDERS' EQUITY

See Notes 8 and 10 to the IFRS annual financial statements which can be found in Section 20.1 of the *Document de référence*.

10.1. SHAREHOLDER EQUITY, CASH AND FINANCING SOLUTIONS

As at December, 31, 2016, the Company held net cash and cash equivalents (cash and cash equivalents less bank overdrafts) of €6,067 thousand compared to €1,150 thousand as at December, 31, 2015.

10.1.1. Equity financing

The Company received a total of €72,858 thousand (before fees relating to capital increases and the subscription price of warrants (BSAs)) from the founders' contributions and capital increases carried out between 2007 and 2017.

The table below summarizes the largest capital increases by value to the date of this *Document de référence*:

Period	Gross amounts raised in € thousands	Operations
2006-2012	34,380	Founders' contribution and rounds of financing
November 2013	(1) 4,458	Conversion of convertible bonds and redemption of bonds redeemable in shares upon the Company's listing on the Euronext Paris stock market
November 2013	(2) 14,107	Listing on the Paris Euronext stock market through a capital increase.
March 2015	(3) 11,177	Capital increase with preferential subscription rights for shareholders
October 2015–September 2016	1,590	Conversion of 1,590 convertible bonds by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND
November 2016	6,883	Capital increase with preferential subscription rights for shareholders
January–March 2017	263	Exercise of 105,012 share subscription warrants
Total	**72,858**	

(1) Total amount corresponding to the subscription of (i) bonds redeemable in shares issued on February 1, 2013, and (ii) bonds convertible into shares issued on May 21, 2013 and July 19, 2013.
(2) The listing on the Paris Euronext stock market incurred fees of €2.4 million.
(3) The capital increase in February 2015 entailed costs of €1.3 million.
(4) The capital increase in November 2016 entailed costs of €0.9 million.

10.1.2. Repayable advances, subsidies and innovation loan

Over the course of its life, the Company has arranged:

- three conditional advances (two repayable innovation loans from French innovation financing agency OSEO; one "prospecting insurance" reimbursable advance from COFACE to support sales prospecting in the United States region);
- and an interest-free innovation loan from Bpifrance.

The first reimbursable advance was granted by OSEO on January 28, 2008. This was a €650 thousand interest-free, repayable innovation loan to "develop a new service for the computerized management of implants intended for healthcare facilities (I-SMART)". A first installment of €325 thousand was received on February 4, 2008, followed by a second €195 thousand installment on April 28, 2008 and the balance paid upon completion of the work on April 28, 2009. Following the project's technical and commercial success, between 2011 and 2013 the Company repaid a total of €400 thousand. The final repayment was made in March 2014 in the amount of €250 thousand.

The second reimbursable advance was granted by OSEO on February 25, 2010. This was a €350 thousand interest-free, reimbursable innovation loan "to develop a three-compartment knee prosthesis for first-line treatment and the related instruments". A first installment of €280 thousand was received on March 1, 2010, followed by the balance paid upon completion of the work on May 9, 2011. Following the project's technical and commercial success, this advance is being repaid through quarterly installments from 2013 to 2017.

The third reimbursable advance was agreed with COFACE on December 28, 2009 under what is known as a "market prospection insurance policy" covering the United States region. Implanet benefits from a coverage period of four years, during which its prospecting expenditure is guaranteed within the limit of a defined budget. At the end of this phase, there begins an amortization phase of five years, during which Implanet reimburses the advance obtained on the basis of a percentage of the sales revenues earned in the regions concerned. On February 10, 2011, Implanet received a €194,268 advance for the first fiscal year of cover of these expenses. Following the disposal of its Beep N Track business, COFACE requested cancellation of the market prospection insurance policy and the repayment of the advances received in 2013.

The interest-free loan for innovation was arranged with Bpifrance in June 2016. The €800 thousand loan was obtained for the "development and clinical assessment of the Jazz-type braided implant for degenerative spinal surgery (particularly the securing or replacement of pedicle screws)". The funds were received by the Company on August 19, 2016, after deduction of the processing costs of €24 thousand. The loan will be repaid through quarterly installments of €40 thousand from 2019 to 2024.

CHANGES IN REPAYABLE ADVANCES AND INTEREST-FREE LOANS (Amounts in € thousands)	**OSEO Knees**	**BPI - Interest-free innovation loan - Jazz Braid**	**Total**
At December 31, 2014	**227**	**-**	**227**
(+) Subscription	-	-	-
(-) Redemption	(70)	-	(70)

10.1.3. Research tax credits

RESEARCH TAX CREDIT (Amounts in € thousands)	12/31/2016	12/31/2015
Research tax credit	203	225

The Company has received research tax credits since it was first created. The Research tax credit (CIR) for 2015 was repaid in 2016.

Repayment of the 2016 CIR is expected in 2017.

10.1.4. Borrowings

10.1.4.1. Non-convertible bond issued by KREOS CAPITAL IV (UK) LTD

On July 19, 2013, the Company concluded a venture loan agreement with KREOS CAPITAL IV (UK) LTD ("KREOS"), which took the place of a master agreement organizing the subscription by KREOS of a bond issue of €5,000 thousand, the issue of 65,000 Company share subscription warrants in favor of KREOS and the pledge of the Company's goodwill in favor of KREOS.

These transactions were implemented as follows:

- the €5,000,000 bond, by issuing 5,000,000 non-convertible bonds with a nominal value of €1 each to KREOS was approved at the Company's Board of Directors meeting of July 19, 2013 and wholly subscribed by KREOS on July 24, 2013;

- the free issue of 65,000 share subscription warrants (BSAs) for shares in the Company to KREOS was resolved by the extraordinary General Shareholders' Meeting of July 19, 2013;

- the Company's business (i.e. fonds de commerce) was pledged on July 19, 2013.

This contract provided for fixed monthly installments of €190,735.43 from January 1, 2014 until June 1, 2016. The bond issue bears interest at the rate of 11.5%.

On April 16, 2015, the Company and KREOS CAPITAL IV (UK) LTD concluded an amendment to the venture loan agreement dated July 19, 2013, by which the parties decided to reschedule the abovementioned bond issue as follows:

- the term of the bond is increased from 36 to 54 months;
- the fixed monthly installment (capital and interest) is reduced from €190,735.43 to €94,160.22;
- the annual interest rate remains at 11.5%.

In consideration for the rescheduling of the bond, on June 24, 2015, the Company's Board of Directors, acting under the authority granted to it on the same day by the Company's Combined General Meeting of Shareholders, resolved to issue 18,473 share subscription warrants in favor of KREOS CAPITAL IV (Expert Fund) LTD.

(see Section 22.3.3 of the *Document de référence* for further information on the features of the bond issue following said rescheduling).

This loan gave rise to the payment of fixed monthly installments of €191 thousand from January 2015 to March 2015, then €94 thousand from April 2015 to December 2015, for a total of €1,419 thousand in 2015. The total of the monthly installment totalized €1,130 thousand in 2016

10.1.4.2. Convertible bond coupled with share subscription warrants ("OCABSA") issued in favor of L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND

On October 14, 2015, the Company entered into a financing agreement with L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND allowing potential funding of €5 million, at the Company's discretion, through the issue of OCABSA.

The OCA have the following characteristics:

- Nominal value: €10,000
- Subscription price: 99% of par value
- No interest
- Conversion terms: N = Vn/P where
    - N is the number of shares that can be subscribed;
    - Vn is the value of the bond receivable;
    - P is 92% of the lowest of the ten average daily prices quoted weighted by the volumes of the Company's share immediately preceding the conversion application date, and as a minimum equal to the nominal value of the share (€0.70).

The bonds thus issued are convertible at any time and have a maturity of 12 months. The Company is required to redeem any bonds which have not been converted into shares by their maturity date.

The Board of Directors decided the issue of:

- an initial tranche of 100 OCABSA with a total value of €1.0 million on October 12, 2015;
- a second tranche of 35 OCABSA with a total value of €350 thousand on June 29, 2016;
- a third tranche of 25 OCABSA with a total value of €250 thousand on July 29, 2016.

The Company may issue 340 additional warrants to L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND, which may give rise to a bond issue of a maximum additional amount of €3.4 million subject to the following:

- that direct and indirect investments by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND in the Company's capital do not exceed 3% of the capital and voting rights given the number of potential shares resulting from the conversion of convertible bonds;
- both the closing price and weighted average price over the five trading days preceding the issue request being at least €1.10.

(refer to Section 21.1.4.5 of the *Document de référence* for further details on the characteristics of this instrument).

10.1.4.3. Financial debts under lease-financing contracts

Over the course of its life, the Company has arranged finance leases on software, fixtures, furnishings, equipment and tools.

Items held under finance leases as defined by IAS 17, which transfer to the Company substantially all the risks and benefits of ownership, are shown as balance sheet assets. The corresponding liability is reported under "Financial debts".

Changes in financial debt relating to finance leases break down as follows:

CHANGES IN FINANCIAL DEBTS - LEASE-FINANCING (Amounts in € thousands)	**Financial debts - lease-financing contracts**
At December 31, 2014	**801**
(+) Subscription	139
(-) Redemption	(347)
At December 31, 2015	**593**
(+) Subscription	95
(-) Redemption	(310)
At December 31, 2016	**378**

10.1.4.4. Approved overdraft facility

As of the date of the *Document de référence*, the Company has no overdraft facility.

10.1.5. Off-balance sheet commitments

10.1.5.1. Vehicle leases

The Company leased a number of vehicles on terms that qualify them as operating leases under IAS 17.

Repayments outstanding at December 31, 2016 were as follows:

VEHICLE LEASES (Amounts in euros)	**Due in less than 1 year**	**From 1 to 5 years**	**Due in more than 5 years**
Off-balance sheet commitments at 12/31/2016	57,858	41,321	-

10.1.5.2. Real estate leases

Future rents payable on leases for the administrative and logistics buildings at Martillac, France, and the Boston, USA, offices until the next termination period are as follows:

REAL ESTATE LEASING CONTRACTS Commitments at 12/31/2016 (Amounts in euros)		Effective start date of lease	Expiry date of lease	Leasing expenses excluding rental charges at 12/31/2016	Commitment until the next termination date		
					Due in less than 1 year	From 1 to 5 years	Due in more than 5 years
Martillac	Real estate complex (administrative & logistics buildings)	10/01/2016	09/30/2026	53,000	212,000	848,000	159,003
Boston	Administration building	12/01/2014	05/31/2017	66,997	30,904	-	-

10.2. CASH FLOW

10.2.1. Cash flows from operating activities

Cash burn related to operating activities for the fiscal years ended December 31, 2016 and December 31, 2015 was €5.9 million and €6.8 million respectively, a drop of €0.9 million due to a €0.3 million increase in free cash flow and a €0.6 million improvement in the working capital requirement.

The improvement in the working capital requirement in 2016 was mainly due to:

- a significant drop in trade receivables, primarily in Brazil (down €0.5 million on December 31, 2015); and
- rationalization of inventory of Jazz and Madison implants and improved inventory turnover (down €0.2 million on December 31, 2015).

10.2.2. Cash flows from investing activities

Cash flows from investing activities amounted to a positive €4.1 million at December 31, 2016, versus a negative €3.2 million at December 31, 2015.

Cash generated in 2016 by investing activities came mainly from a combination of the following:

- withdrawals, net of subscriptions, +€4.6 million;
- acquisition of property, plant and equipment and intangible fixed assets -€0.5 million. Production is largely subcontracted and therefore requires no significant capex. Nevertheless, the Company invests in instruments or ancillary goods made available to health facilities for placement of implants and specific storage machines.

Cash burn from investing activities in 2015 relates to the following:

- financial placement of the cash generated by the capital increase of March 2015 amounting to €2.9 million, net of withdrawals;
- acquisition of property, plant and equipment and intangible fixed assets €0.3 million;
- recognition of development expenses €0.3 million.

10.2.3. Cash flows from financing activities

Cash flows from financing activities were as follows for the fiscal years shown:

CASH FLOW FROM FINANCING ACTIVITIES (Amounts in € thousands)	**12/31/2016**	**12/31/2015**
Capital increase, net of conversion of bonds into shares	6,883	11,177
Expenses relating to capital increase	(812)	(1,301)
Share subscription warrants (BSA)	14	13
Repayment of the KREOS bonds	(948)	(1,129)
Issue of convertible bonds, net of expenses	564	908
Bank borrowings	-	500
Receipt of advances and innovations loans, net of costs	776	-
Repayment of conditional advances	(80)	(70)
Repayment of finance leases	(310)	(347)
Repayment of bank loans	(165)	(81)
Gross financial interest paid	(223)	(310)
Other financing flows (factoring)	1,116	(86)
Cash flows related to financing activities	**6,815**	**9,272**

Cash generated by financing activities was primarily from funds raised in the fiscal years shown, as well as from the issue of convertible bonds with warrants attached (OCABSA) under the contract with L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND. The Company also extended its factoring agreement in 2016.

10.3. LOAN TERMS AND FINANCING STRUCTURE

Details of the Group's financing activities are given in Section 10.1 "Shareholder equity, cash and financing sources" of the *Document de référence*.

10.4. RESTRICTIONS ON THE USE OF SHAREHOLDERS' EQUITY

The Company is obliged to use the proceeds of the €5,000 thousand bond issued to KREOS to finance its working capital requirements. (see Section 22.3.3 of the *Document de référence* for further information on the characteristics of these obligations).

10.5. EXPECTED SOURCES OF FINANCING FOR FUTURE INVESTMENTS

To finance its development and future capital expenditures, the Company may resort to equity financing and/or borrowing.

11. RESEARCH AND DEVELOPMENT, PATENTS, LICENSES AND OTHER INTELLECTUAL PROPERTY RIGHTS

11.1. RESEARCH AND DEVELOPMENT

Implanet's R&D Department consists of five people, some with more than 20 years' experience in developing implants and instruments for the main sectors of orthopedic surgery: spine, hip, knee, shoulder, etc. All are trained engineers or university graduates who have built up their expertise either in the R&D Departments of international groups (Zimmer, Stryker Osteonics, Stryker Spine, Abbot Spine and Smith & Nephew), or in start-ups (Spine Next). Every development project is carried out in collaboration with consultant surgeons selected for their scientific and surgical experience in the specific areas of study and in the target countries. These joint development groups remain involved throughout the life of the project, from the drafting of specifications through commercial launch stages.

Every action taken by the Implanet R&D Department is compliant with the ISO 13485 quality standard, in which the Company is certified: projects aim to:

- create new products;
- improve existing products to keep pace with changing techniques and markets.

Before launching any project, an investigation phase in cooperation with the Company's Marketing Department assesses:

- how the new product fits into the Implanet range;
- feasibility;
- the competitive environment;
- existing technology and IP;
- health insurance reimbursement rates in each country and the margins on offer.

Based on the conclusions of this preliminary study, Implanet's Management Board decides whether or not to approve a project and whether or not to move it on to the development phase.

If approved, all development phases are planned out and the plan is monitored and updated in light of project progress. The process begins with specifications and ends with the award of regulatory certifications (510(k), CE marking, ANVISA), having gone through design, prototyping, mechanical trials, anatomical studies and in-vitro surgical simulations, etc. All Company departments are involved throughout the project stages (Production, Quality, Logistics) to assess all aspects of the new product, not only as a healthcare product but also in its industrial and regulatory dimensions. Similarly, Implanet works with organizations and laboratories known for their skills and expertise in each field:

- Biocompatibility tests : NAMSA (United States, France)
- Biomechanical tests : CRITT Champagne-Ardennes (France)
  Mayo Clinic College of Medicine (United States)
  Nebraska's Health Science Center (United States)
  Empirical Testing Corporation (United States)

In the last two years, the Company's R&D costs and the amounts capitalized were as follows:

	2015	2016
R&D costs (€ thousands)	947	1,156
Gross capitalized R&D costs (€ thousands)	233	52

This approach owes its success to an innovation policy that allows new ideas to emerge, to develop and to be transformed into healthcare products. The innovation policy is sustained by scientific and technological monitoring mainly focused on developments in the spine and knee fields.

Employees working in R&D all have individual employment contracts with the Company specifying that the Company owns all inventions they have made or may make in the future and the associated terms of remuneration will follow the rules set out in Article L. 611-7 of the French Intellectual Property Code.

11.2. INDUSTRIAL PROPERTY

11.2.1. Protection of industrial property rights

The Company's success depends, at least in part, on its ability to protect its inventions. This means obtaining and maintaining patents in Europe and other key markets for the Company's implants (notably Jazz in the United States). Implanet therefore attaches special importance to the protection and maintenance of its intellectual property rights, particularly its portfolio of patents, one of the key elements of its commercial development strategy. It has an extremely proactive and rigorous policy of protecting its inventions through patent filings. Implanet has entrusted the management of its entire patent and brand portfolio with the firm Benech (Paris), which is supported by a strong network of correspondents abroad, including the firm Banner & Witcoff in the United States.

The Company follows an active policy of simultaneously protecting products under development and trying to protect itself against any potential entry of alternative products. This active policy of filing industrial property titles has two objectives: (i) protect its new technologies and (ii) maintain its competitive advantage vis-à-vis companies in the same sector.

Implanet usually files an initial patent application in France, followed by a PCT extension and the subsequent national and regional phases, which always include the United States and Europe. Other countries may be added on a case by case basis, such as Australia, Japan, South Korea or others that are considered relevant for the invention being patented. All patent applications are filed at a very early stage of product development to maximize protection in an extremely competitive market.

Patents are valid for 20 years from their filing date (initial date or date of international extension where required).

To date, Implanet patent applications have been filed for inventions covering 14 distinct product families. Implanet's portfolio is thus made up of 60 patents and patent applications belonging to the Company, half of which have been issued.

11.2.2. Type and extent of the Company's patents

The patents and patent applications held and exploited by Implanet are designed to cover very specifically the different aspects of the four product ranges that it has developed:

- the "Madison knee prosthesis" range;
- the "Jazz" range;
- the "Other spinal implants" range; and
- the "Arthroscopy" range.

11.2.2.1. The "Madison knee prosthesis" range

The "Madison knee prosthesis range" includes a family of implants that allow surgeons to carry out total knee arthroplasties. It includes femoral, tibial and patellar implants in cemented or cementless bearing as well as infixed or mobile bearing. Polyethylene tibial inserts allow doctors to preserve the cruciate ligaments or to apply more or less restrictive degrees of stabilization. The protected invention allows the Company to use the same insert in mobile or fixed bearing, which not only reduces the need for inventory by half, but also eliminates any possibility of error in the operating room or when selecting implants for insertion.

The patent filings covering this product range are as follows:

Product range	Filing date[41]	Title	Patent holder	Extensions			
				Country	Filing No.	Publication[42]	Grant of patent[43]
MADISON knee prosthesis	03/16/2010	Knee prosthesis having a mixed meniscal plate	IMPLANET	France	FR 10/01056	FR 2957518	FR 2 957 518
				PCT	PCT/FR2011/000148	WO 2011/114024 A1	
				Europe	11716284.2	EP 2547291	2547291
				South Africa	2012/06423		2012/06423

11.2.2.2. The "Jazz" range

Jazz is a spinal surgery implant. It is designed to enable the fusion of vertebrae to help the treatment of the following pathologies: scoliosis, trauma, degenerative diseases and disorders resulting from tumors. Consisting of a metal component and of a polyester braid, it allows for a single diameter of implant to be used for all anatomical configurations and all surgical strategies. Competing products may include up to 50 different types of implant.

The Company's patent protects the implant, its method of operation and the main instrument used to insert it. Patent applications have also been filed on two potential alternatives.

The Jazz range includes seven filings in France, which have since been managed according to the procedure explained above. The filings resulted in the issue of six French invention patents (10/00040, 10/04786, 11/02072, 11/03319, 13/60195 and 15/50441). Patents and patent applications covering this product range are as follows:

[41] The "*filing date*" of the patent is the date when the first application was filed. Subject to their acceptance, patents are granted for 20 years from their filing date i.e. the date on which the corresponding national, European or international filing was made. Note, however, that (i) international (PCT) and/or national (Europe, United States, etc.) patent applications must be filed within 12 months of the original national filing date to benefit from this filing, and (ii) when the products have been registered (i.e. authorized for sale) and meet certain criteria that vary from country to country, the period of protection conferred by the patent can be extended by periods ranging from six months to five years.

[42] *"Publication"* refers to a patent application that has been filed and published by the competent authority, with the corresponding reference (this generally happens 18 months after the filing date). This publication prevents any subsequent filing for the same invention on the grounds of lack of novelty.

[43] *"Grant"* means that the patent has been accepted in the country concerned and that the Company can make use of it without restriction to protect an invention.

Product range	Priority date	Title	Patent holder	Extensions

11.2.2.3. The "Other spinal implants" range

The Company has also developed a range of spinal stabilization implants based on a more classic concept which uses pedicle screws and hooks. In the course of this project, the Company also invented a transverse connection device for connecting rods together to form a rigid frame.

The Company has also protected an innovative intersomatic implant that fits between two vertebrae to improve spinal stabilization and aid fusion. The shapes and tools developed make it easier to achieve anchoring than the process used by competing implants.

Patents and patent applications covering this product range are as follows:

Product range	Priority date	Title	Patent holder	Extensions			
				Country	Filing No.	Publication	Grant of patent
Other Spinal implants	04/08/2010	Transverse connection system and device for spinal column	IMPLANET	France	FR 10/01489	FR 2 958 532	FR 10 01489
				PCT	PCT/FR2011/000200	WO 2011/124789

				India	8615/DELNP/2012		
				Japan	2013-503151	2013-523300	5837042
	02/08/2012	Intersomatic implant and tool for installing such an implant (TLIF cage)	IMPLANET	France	FR 12/00385	FR 2 986 416	FR 12 00385
				PCT	PCT/FR2013/050254	WO 2013/117861	
				Europe	13706645.2		
				USA	14/377198	US 20150012099 A1	

11.2.2.4. The "Arthroscopy" range

The two families in the table below relate to shoulder arthroscopy.

The first protects a positioning device for a stabilization anchor for the repair of rotator cuffs. The invention describes a device that protects the suture linked to the anchor during implantation.

The second family describes a "second tier" stabilization anchor that allows direct tendon suturing when being screwed in and the automatic tensioning of the sutures.

Patents and patent applications covering this product range are as follows:

Product range	Priority date	Title	Patent holder	Extensions			
				Country	Filing No.	Publication	Grant of patent
Arthroscopy	12/21/2007	Ancillary device for anchoring tissue	IMPLANET	France	FR 07/09089	FR 2 925 286	FR 07 09089
	12/21/2007	Device for anchoring tissue in a bone	IMPLANET	France	FR 07/09090	FR 2 925 287	FR 07 09090
				PCT	PCT/FR2008/001814	WO 2009/106741	

11.2.3. Patents currently being exploited

The Company directly exploits all its patents and patent filings except the (i) "*Device for anchoring tissue in a bone*", (ii) "*Disc tensioner*", and (iii) "*Intersomatic implant and tool for installing such an implant*" (see table above), which are not commercially exploited by the Company.

11.2.4. Protected territories

Since 2007, all patent applications have been initially filed in France. They are subsequently extended abroad if necessary, using the PCT procedure within 12 months of the filing date.

The selection of territories for national/regional phases varies depending on Implanet's strategy.

The territories covered by the patent application always include Europe and the United States. Generally, they also include Australia, Japan and, when necessary, any other countries considered relevant to the invention being patented.

The tables in Section 11.2.2 above display the territories covered by each of the Company's patent families.

11.2.5. Litigation

To date, the Company has not been involved in any litigation for intellectual property rights either as plaintiff or defendant.

11.2.6. Licences

Implanet has protected an industrial property portfolio to safeguard its innovations. It is the sole owner of all of its rights and no license has been granted on the Company's industrial property rights.

11.3. BRANDS, DRAWINGS AND MODELS

As part of its strategy, Implanet registers its brands, drawings and models either nationally or internationally. Brand registrations are generally granted for ten years, renewable indefinitely on payment of the corresponding fees and, in some countries, on condition that they are genuinely exploited. Registration of drawings and models is generally granted for five years, renewable for five-year periods up to a maximum of 25 years, on payment of the corresponding fees.

There is no litigation under way relating to brands and no legal claims by the Company (against a third party filing a conflicting brand) or by a third party (challenging one of the Company's brands).

Implanet owns the following brands:

Filing date	Title	Initial filing	Classes	Certificate	Extensions
11/14/2007	Implanet PARTNERS (verbal)	France	9, 10, 42	07/3537411	Italy, Germany, Spain, United Kingdom
11/14/2007	Implanet (Logo)	France	9, 10, 42	07/3537412	Italy, Germany, Spain, United Kingdom, United States
11/14/2007	Implanet (verbal)	France	9, 10, 42	07/3537413	Italy, Germany, Spain, United Kingdom, United States
11/14/2007	Implanet SMART SYSTEM	France	9, 10, 42	07/3543997	Italy, Germany, Spain, United Kingdom
02/05/2009	IMPLANET + Logo + "Gold Standards For Everybody"	France	9, 10, 42	09/3627623	Italy, Germany, Spain, United Kingdom, United States
02/05/2009	Combination of colors: Pink 5rubine Rouge C) + Gray	France	10, 35, 42	09/3627625	
05/11/2009	IMPLANET + Logo + "Smarter Medical Device Company"	France	9, 10, 42	09/3649719	Italy, Germany, Spain, United Kingdom, United States, Japan

Implanet owns the following drawings and models:

Priority date	Title	Patent holder	Country	Filing No.	Registration date	Status
05/26/2009	Digital Assistant	IMPLANET	United States	D626550	11/02/2010	Granted
			United States	D626558	11/02/2010	Granted
			United States	D626551	11/02/2010	Granted

11.4. DOMAIN NAMES

Implanet owns the following domain names:

11.5. PLEDGE OF INTELLECTUAL PROPERTY RIGHTS

To guarantee repayment of the Company's €5,000,000 bond issue subscribed by KREOS CAPITAL IV (UK) LTD, the Company granted the lender a pledge on its goodwill on July 19, 2013, including all present and future intellectual property rights (patents, drawings and models, domain names, brands) as described in this Chapter 11 (see Section 22.3.3 the *Document de référence* for the terms of said bond issue).

12. INFORMATION ON TRENDS

12.1. MAIN TRENDS SINCE THE END OF THE PREVIOUS FISCAL YEAR

12.1.1. Press release dated January 5, 2017: Implanet announces new patent further strengthening Jazz platform intellectual property

European patent grant follows the recently obtained US patent, completing a portfolio of 21 patents protecting the Jazz technological platform

The Company announces that the European Patent Office (EPO) has granted it a European patent for its Jazz® implant's universal tensioning system.

This latest European patent concerns the Jazz® implant's tensioning system, which is the principal element of its instrumentation. It follows the patent granted in August 2016 by the US Patent and Trademark Office (USPTO), and completes an exhaustive portfolio of intellectual property protecting Implanet's technology in its priority markets.

Régis Le Couedic, Implanet's Research & Development Director, says: *"The intellectual protection of the instrumentation used to insert Jazz® implants represents a strategic issue in itself for its adoption by the most-demanding spine surgeons. The decision to use an implant greatly depends on the quality and performance of the associated instrumentation. It is the combined use of the Jazz® implant and instruments that enables the surgeon to obtain optimal clinical results for the patient, as well as the lowest possible level of surgical shock, by reducing the length of the surgery and the amount of blood lost."*

Ludovic Lastennet, CEO of Implanet, adds: *"Obtaining this latest patent represents a key new milestone in value creation for the Company. It is yet another hurdle for potential competitors hoping for market access, notably following the patent recently granted in the United States for this same instrumentation. We have compiled a comprehensive intellectual property portfolio with regard to both the components of our technology and the markets that place a strong emphasis on intellectual property rights on which we operate."*

12.1.2. Press release dated January 16, 2017: Implanet reports 2016 revenue growth of +18% to €7.8 million

46% increase in Spine activity (Jazz) in 2016, with revenue of €4.1 million
36% growth in Q4 2016 with total revenue of €2.2 million and +121% jump in Spine activity (Jazz)

The Company announces its revenue for the fourth quarter and for the year ending December 31, 2016.

Ludovic Lastennet, CEO of Implanet, says: *"The fourth quarter, with 2,437 Jazz® implants sold, enabled us to end the 2016 fiscal year with solid growth in our priority markets, notably the United States. The Jazz® technological platform continues to attract a growing number of the most discerning spine surgeons, thanks to its ease of use and clinical benefits for patients The combination of positive post-operative clinical results, accelerated technology adoption, substantial intellectual property protection and the launch of new products enable us to be confident in our 2017 prospects and the pursuance of growth in all markets."*

Genou + Arthroscopie	**3 723**	3 847	**-3%**
Chiffre d'affaires annuel total	**7 825**	6 653	**+18%**

Over the fourth quarter of 2016, Implanet recorded a 36% increase in revenue to €2,249 thousand, with a solid performance in Spine activity: 121% to €1,241 thousand. In the United States, France and the rest of the world, Jazz® sales grew by 163% to €497 thousand, 55% to €339 thousand and 164% to €405 thousand, respectively. The Company continued to ramp up its activity in the high-potential degenerative bone disorder segment, with growth of 149% to €387 thousand.

Over 2016 as a whole, Implanet generated growth of 18%, driven by the 46% increase in Spine activity (Jazz) to €4,102 thousand, which exceeded annual Knee sales (€3,723 thousand) for the first time. In Spine activity, the United States, France and the rest of the world recorded sales growth of 70% to €2,048 thousand, 33% to €1,264 thousand and 21% to €790 thousand, respectively. In Implanet's direct markets – France and the United States – the Company continued its acceleration in the degenerative bone disorder segment with sales increasing by 142% to €1,161 thousand, while recording growth of 36% to €1,998 thousand in the pediatric scoliosis surgery segment.

In 2016, Implanet sold 1,450 Jazz implants in the United States, 3,552 in France and 1,999 in the rest of the world, giving a total of 7,001 implants (vs. 5,601 in 2015) and volume growth of 25%, representing approximately 1,400 operations. As of December 31, 2016, in its direct markets, 127 surgeons were users of Implanet's Jazz technology (vs. 82 surgeons as of December 31, 2015), 69 of them in the United States (vs. 43) and 58 in France (vs. 39).

Knee activity saw 2016 revenue slip 3% to €3,723 thousand in 2016. The French market, accounting for 70% of the total, recorded growth of 37% to €2,607 thousand, partially offsetting activity in Brazil, where macroeconomic difficulties are continuing to weigh on local activity.

12.1.3. Press release dated January 25, 2017: Implanet announces global marketing clearance of the new Jazz FRAME®

Implanet granted US FDA 510(k) and European (CE) marketing clearance for its new Jazz Frame® implant

The Company announces that it has been given the green light by the American and European authorities, through FDA 510k clearance and CE marking, to market its new Jazz Frame® implant.

Jazz Frame® is a system of connectors, the final link in the Jazz Band® technological platform which is now positioned as a surgical technique in itself. Implanet now offers surgeons the possibility of defining and optimizing a global strategy to reduce major deformities, thus maximizing long-term clinical outcomes.

"Since we have been using sublaminar braid implants to reduce and stabilize scoliotic deformities, we have been able to show significantly greater reductions than we previously obtained with our all-screw or hook-and-screw assemblies", says Professor Keyvan Mazda, MD, Ph.D, Robert Debré Hospital, APHP, adding: *"Using the Jazz Frame® facilitates the restoration of both frontal and sagittal balance, thanks to the simultaneous reduction of both thoracic curves. This is most notable in the case of the most complex deformities where shoulder imbalance is common. The result of years of clinical experience and of close collaboration with Implanet, Jazz Frame® allows us to be even more efficient and quick for the sole benefit of patients."*

Ludovic Lastennet, CEO of Implanet, adds: *"We continue to strictly adhere to, and execute our business plan. The rapid marketing clearance in Europe and the United States is a real source of satisfaction, innovation that maximizes the clinical value of our technology. Optimized for implementation of the "frame" technique, we expect this implant to be rapidly adopted by our partner surgeons, pediatric and adult deformity specialists alike. The marketing release of Jazz Frame® in our various markets is scheduled for the first quarter of 2017."*

12.1.4. Press release dated March 1, 2017: Implanet announces grant of the French patent for Jazz Lock®

Jazz Lock®, a novel spinal implant, now protected in France
Additional international patent requests are currently under review, including the US patent office

A major component of an innovative range of band products for spine surgery, Jazz Lock® is an implant designed to treat degenerative spine disorders, whose global market potential is estimated at over $200 million.

An unrivaled implant, thanks to its locking system requiring no rod fixation, Jazz Lock® allows surgeons to shorten and simplify the surgical procedure by removing multiple steps and implants used in traditional system: locking screws and connecting rods.

Régis Le Couedic, Implanet's Research & Development Director, says: *"Obtaining this patent from the French patent office is the first step in fully protecting our Jazz Lock®, and more particularly, its locking mechanism that is the first of its kind in the market. The protection of this latter element is pivotal, insofar as the majority of our future developments will incorporate this technology. We continue to be extremely rigorous regarding the protection of our current and future innovations."*

Ludovic Lastennet, CEO of Implanet, adds: "*We are continuing the strict execution of our development strategy, of which the comprehensive protection of our products is a major component. We have submitted the dossier to various global intellectual property authorities, notably the United States. The feedback from surgeons regarding the clinical benefits of Jazz Lock® for patients has been excellent, including important practical aspects such as ease of use and speed of implementation. Since its limited launch last autumn in the United States and Europe, Implanet has sold more than 300 Jazz Lock® implants to treat degenerative spine disorders.*"

12.1.5. Press release dated March 14, 2017: Implanet strengthens its presence in Australia and New Zealand by signing an exclusive distribution partnership

Device Technologies will be Implanet's exclusive Australian distributor
Extended Jazz product range, including Jazz Claw®, in the ARTG Register

The Company announces the integration of Jazz Claw® into the Australian Register of Therapeutic Goods (ARTG) register. This integration is completing the Jazz® Range for the treatment of pediatric and adult scoliosis. In conjunction, Implanet has signed an exclusive distribution partnership with Device Technologies for Australia and New Zealand. Implanet now markets in 17 countries across the globe, with this partnership significantly enhancing its sales potential in the Asia-Pacific region.

The entire range of Jazz® products will enable Implanet to address a vertebral fusion market estimated to be worth USD 120 million in Australia. Dr. John Choi, from Melbourne's Spine Ortho Clinic, says: "The clinical benefit Jazz® provides compared with all-screw or screw-and-hook assemblies in the sagittal realignment of patients, as well as in their postoperative recovery, is undeniable. I am delighted to have access to the entire Jazz product range at the Spine Orthopedic Clinic and, more generally, across Australia."

Implanet has signed an exclusive distribution partnership with Device Technologies, a company with more than 600 employees specializing in medical device distribution. Founded 25 years ago, the company is a pioneer in this sector in Australia, and covers the entire distribution chain from the sale of equipment to associated services. This agreement significantly strengthens Implanet's geographical coverage through its partners' various offices and sales agents across Australia and in New Zealand.

Michael Trevaskis, CEO of Device Technologies, concludes: *"Jazz® represents a truly innovative technology in the field of spine surgery. We are delighted and enthusiastic about the idea of making it available to all hospitals and patients throughout this country, notably for younger and older patients suffering from particularly debilitating deformities. Australian medical facilities are used to being among the world's best equipped, and we are confident in our ability to provide them with one of the very best spine technologies."*

Ludovic Lastennet, CEO of Implanet, says: *"The exclusive partnership with Device Technologies, a major player in Australia and New Zealand, represents a key milestone that opens the way for promising sales prospects for Implanet in the region. This milestone is fully in line with our expansion strategy in partnership with respected business partners."*

12.1.6. Press release dated March 28, 2017: the Company announces 2016 annual results

46% growth in Jazz sales (+70% in the United States)
Robust growth of gross margin, controlled operating costs
Cash position as of December 31, 2016: €7.4m

The Company announces its annual results for the financial year to December 31, 2016, as approved by the Board on March 24, 2017.

Ludovic Lastennet, CEO of Implanet, says: "*2016 sales growth, notably with +70% in the U.S. market, combined with diligent cost control enabled us to improve our gross margin and operating results. We are confident in our ability to record further strong growth in Jazz sales in 2017 by continuing to focus on clinical benefits for the patient, making Jazz technology a benchmark in spine surgery. The Company's structure is optimized for future growth, we should continue to realize a significant reduction in our cash requirements.*"

NB: Consolidated accounts have been audited, and the auditor's report is pending.

Revenue: significant Jazz growth

The Company's revenue, up +18% in 2016 vs. 2015, totaled €7,825 thousand, driven by the +46% increase in Jazz activity. This segment's solid growth was a result of the growing adoption of Jazz technology in markets in which the Company operates directly (+70% in the United States and +33% in France), with growth of +142% in the high-potential degenerative bone disorder segment (surgical treatment of elderly patients).

Strong gross margin increase, operating cost control

The strong growth in Jazz activity in France and the U.S., where spinal implant pricing is higher, had a positive impact on Implanet's gross margin. It improved by 12.1 percentage points to 50.9% of sales in 2016 (vs. 38.8% in 2015).

The Company chose to focus on direct distribution in its priority markets via a network of independent sales agents, resulting in a variable cost increase of +€550 thousand (including +€464 thousand in commissions), in line with the growth in Jazz revenue.

The Company held the remaining operating expenses at a stable level (+0.9%), despite a +19% increase in R&D, mainly due to the cost of protecting its IP. These costs should remain stable, as the Company believes it has an adequate structure to cope with its medium-term growth.

Implanet thus recorded a 10% improvement in its operating loss to -€6,881 thousand as of December 31, 2016 (vs. -€7,632 thousand in 2015), and a 9% improvement in its net loss to -€7,288 thousand (vs. -€8,008 thousand in 2015).

Cash position and financial investments

2016 cash burn (free cash flow minus loan repayments) improved by 28%, to -€6.3 million versus -€8.8 million in 2015.

As of December 31, 2016, Implanet had cash and financial placements of €7.4 million (vs. €7.1 million as of December 31, 2015).

Implanet also has the option of exercising, under certain conditions, 340 convertible bonds coupled with equity warrants (*OCABSA*) with L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND for €3.4 million.

Significant milestones and events

Throughout 2016 and early 2017, Implanet experienced substantial growth in its primary development focus, the Jazz technology platform. This continued growth was driven by conclusive results, notably in the U.S. and France.

Commercial development:

- 127 surgeons are users of Jazz technology in France and the U.S. (vs. 82 as of December 31, 2015);
- success of the first surgical procedures in France, Italy and the U.S. with the new Jazz Lock® implant, a major innovation and the first component of a product range devoted to degenerative bone disorder surgery;
- success of a first idiopathic scoliosis surgical procedure in Brazil;
- signature with Device Technologies of distribution partnership in Australia and New Zealand.

Innovation and regulatory:

- U.S. (510k) and European (CE) regulatory clearance granted for the new Jazz Lock®, Jazz Claw® and Jazz Frame® implants;
- additional key patents granted in the US and Europe for the Jazz® tensioning system;
- patent granted for the Jazz Lock® in France.

Clinical development

- launch of a multicenter clinical study designed to document the outcomes of Jazz technology in adult degenerative and adult deformity indications;
- White Paper publication documenting clinical results of Jazz technology in hypokyphotic idiopathic scoliosis surgery.

Financing

- listing on the OTCQX® International market in the U.S.;
- issuance of the remaining bonds convertible into stock and stock warrants within the framework of the financing put in place in October 2015;
- zero-interest innovation loan of €800 thousand agreed with Bpifrance;
- success of Implanet's capital increase with preferential subscription rights for €6.9 million.

Appointments

- appointment of Brian T. Ennis as President of Implanet America;
- appointment of Mary E. Shaughnessy, Senior VP Finance & Planning, Partners Continuing Care, as an independent Board member.

12.1.7. Press release dated April 3rd, 2017: the Company announces the planned transfer of Implanet SA's listing to Alternext market in Paris

The Company announces that the planned transfer of the listing of its shares from the Euronext regulated market in Paris (compartment C) to the Alternext Paris multilateral trading facility will be submitted to the Shareholders' Meeting of May 5, 2017 for approval.

The project will allow Implanet to be listed on a more appropriate market for the Group's size, offering a better regulatory framework and suited to small and midcaps, the market capitalization of the company being approximately € 18 million with a free float of 90%. This planned transfer to Alternext Paris should simplify its administrative burden and reduce its listing costs while providing continued financial market access.

Subject to this project's approval by shareholders at the upcoming Shareholders' Meeting, and the consent of Euronext Paris SA, this listing will be carried out via the fast-track admission to trading of the Company's existing shares without any new shares being issued.

Within the framework of its transfer to Alternext Paris, SwissLife Banque Privée will be Implanet listing sponsor.

In accordance with current regulatory requirements, Implanet would like to inform its shareholders of the possible consequences of a transfer:

In terms of protecting minority shareholders (non exhaustive list):

- the protection of minority shareholders, should control change hands, will be ensured by Alternext Paris through the public offering mechanism, if the 50% threshold is exceeded in terms of capital or voting rights, either directly or indirectly and by one party or jointly;
- furthermore, companies listed on Alternext Paris are only duty bound to inform the market, in terms of changes in the shareholding structure, of shareholdings moving above or below 50% and 95% of the company's capital or voting rights;
- however, in accordance with regulatory provisions and for a period of 3 months after its listing is removed from the Euronext regulated market in Paris, Implanet will remain subject to the mandatory public offering system and the continuance of information duties regarding the crossing of thresholds and stated intentions applicable to companies listed on the Euronext regulated market in Paris.

Regarding periodic financial information, less restrictive requirements in terms of financial information, including, and again without claiming to be exhaustive, the following:

- extension of the timeframe for publishing half-year results – comprising a balance sheet, a P&L statement and comments regarding this period – to 4 months after the half-year ends;
- a chairman's report on the internal audit and corporate governance is no longer mandatory;
- the company can choose which accounting system (French or IFRS) it uses when drawing up its consolidated accounts. However, as the Company's accounts are already drawn up in IFRS, and in order to ensure transparency vis-à-vis its investors and shareholders, Implanet will continue to apply IFRS.

Being a non-regulated market, the transfer to Alternext Paris could lead to a change in the share's liquidity versus when it was listed on the Euronext regulated market in Paris. The transfer could also lead certain investors, who prefer issuer shares listed on a regulated market, to divest their Implanet shares.

Lastly, Implanet intends to continue publishing accurate, detailed and honest information, making public any news or information liable to have a significant impact on its share price.

Indicative timetable of the transfer

March 27, 2017	The Board decides to submit the planned transfer of Implanet SA's listing to Alternext to the Shareholders' Meeting
April 3, 2017	Information published regarding the planned request for admission (1st press release)
May 5, 2017	Shareholders' Meeting to approve the transfer to Alternext Paris
May 9, 2017	Information published regarding the definitive transfer decision (2nd press release)
July 10, 2017 shares at the earliest	Decision from Euronext Paris SA to admit shares for trading on Alternext Paris, removed from the Euronext regulated market and first listing on Alternext Paris

12.2. KNOWN TRENDS, UNCERTAINTY, REQUEST FOR COMMITMENT OR EVENT REASONABLY LIKELY TO IMPACT THE COMPANY'S OUTLOOK

None.

13. FORECASTS OR PROFIT ESTIMATES

The Company does not provide forecasts or profit estimates.

14. ADMINISTRATIVE, MANAGEMENT AND SUPERVISORY BODIES AND GENERAL MANAGEMENT

14.1. EXECUTIVES AND DIRECTORS

The Company is a *Société Anonyme* (French public limited liability company) with a Board of Directors whose rules are defined in the Bylaws and summarized in Section 21.2.2 of the *Document de référence*.

Ludovic Lastennet heads the Company as Chief Executive Officer.

Ludovic Lastennet was first appointed CEO on November 27, 2012 for an unlimited term. He is also Sales and Marketing Director and is an employee of the Company.

14.1.1. Composition of the Board of Directors

At the date of the *Document de référence*, the Board of Directors is composed of the following six members:

Biographies of the Chairman of the Board of Directors, Chief Executive Officer and Directors:

Jean-Gérard Galvez – *Chairman of the Board of Directors*

Jean-Gérard Galvez has more than 30 years' experience managing High Tech and Life Sciences companies, with much of his career spent in the United States. After several years as an engineer at Dupont de Nemours and a dozen years in leading US IT groups (Control Data, Banctec), including stints as head of subsidiaries and International VP, Jean-Gérard joined French start-up ActivCard in 1995 as Chairman and CEO. The Company designs and sells web-based security and authentication solutions. The Company moved to Silicon Valley and was listed on the Nasdaq in 2000, raising USD 300 million with a USD 2 billion market capitalization.

Jean-Gérard Galvez was also a director of French start-up OKYZ, which specializes in 3D technologies. The Company was sold to Adobe in 2005.

Since returning to France in 2006, Jean-Gérard has sat on the boards of directors of several companies and regularly advises on corporate finance and restructuring transactions.

Jean-Gérard Galvez is a chemical engineering graduate of the Institut National Polytechnique, Nancy, he holds a DEA in management (also from the INP Nancy) and he holds an MBA from the Stanford Executive Program (California).

Ludovic Lastennet – *Chief Executive Officer and Director*

Ludovic has 19 years' experience in the medical field: equipment, reconstructive orthopedics and dental implantology.

He spent five years as General Manager of the French subsidiary of the KaVo Dental company, member of the Danaher Corp group, after six years as sales manager in France/Germany/Austria/Switzerland and Eastern countries for Stryker Corporation.

He is a graduate of the Paris ISG International Business School, 1990.

Brian Ennis - *Member of the Board of Directors*

Brian brings to Implanet with more than 30 years of success in developing and growing medical technology companies. After 11 years at Stryker Corporation in a variety of roles as Executive and Chairman in Europe and the United States, he is currently International Chairman of Wright Medical Group, which specializes in biotechnology and orthopedic devices; Chairman at Empi, a company specializing in electrotherapeutic medical solutions; Chairman and CEO at Etex Corporation for seven years, successfully managing the transformation of this start-up specializing in the Research & Development of biomaterials into a profitable and viable high-growth company.

Jan Egberts – *Independent Director*

Jan Egberts has spent most of his career in the United States. He began at McKinsey (Mergers & Acquisitions) and then worked in Merck's marketing unit. Subsequently, he was VP Global Business Development at Johnson & Johnson Medical. He is one of the founders of US company GHX. In 2000, he oversaw the LBO of Johnson & Johnson's surgical non-wovens business and its subsequent merger with Mölnlycke Health Care. The merged business was subsequently sold to Regent Medical for USD 1.25 billion. He then served as CEO of NovaDel, and returning to Europe, joined venture capital firm 3i as Partner and Senior Consultant Industry. In 2009, he became CEO of Dutch-based company OctoPlus (NYSE: OctoPlus), which was recently bought by Dr. Reddy's Laboratories in a takeover bid. Dr. Egberts was non-executive Chairman of Acertys (Belgium) and Skyline Diagnostics (Netherlands) as well as a non-executive Director of EndoSense (Geneva). He was also a non-executive Director of Bmeye (sold to Edwards) and a number of other US companies specializing in healthcare.

Jan Egberts holds an MBA from the Stanford Graduate School of Business. He holds an MD in Medicine from the Erasmus University, Rotterdam, and did his clinical internship at Harvard Medical School.

Paula Ness Speers – *Independent Director*

With more than 30 years' experience in the United States providing strategy development for global companies, Paula Ness Speers has a wealth of expertise in the healthcare sector. During seven years at Bain & Company, Boston, Paula worked on strategy consulting projects for some of the leading innovative technology companies in the United States. While at Bain, she set up and managed the R&D consulting division, which supports the most innovative growth companies in the healthcare sector with their marketing, operational and financial development strategies.

Drawing on her ample experience, in 1992 Paula Ness Speers co-founded Health Advances, a healthcare strategy consultancy whose nearly 100 employees are based in Boston, San Francisco, Washington and Zurich. Health Advances' clients range from heads of entrepreneurial start-ups to major listed groups. Over her 23-year career, Paula has built up a significant network of medical technology, biotech companies, and specialist investors. She has built up special expertise in the fields of orthopedics and spinal surgery with industrial companies working in the sector. She has also run many cost-optimization studies and devised many strategies for penetrating healthcare markets. Paula holds an MBA from Columbia University.

Mary Shaughnessy – *Independent Director*
Drawing on 20 years of experience working for Partners Healthcare System in Boston, Mary brings a wealth of specific expertise in the healthcare finance and reimbursement sector. In her capacity as Senior Vice President of Finance, Partners Continuing Care (PCC), Mary Shaughnessy has played an integral role in the strategic planning process and in optimizing financial performance. She has also helped to maximize revenue and has improved payment rates from public and private sector organizations across all of the Group's Partner hospitals.

14.1.3. Declarations regarding executives and directors

To the best of the Company's knowledge, there are no family relationships between the people listed above.

To the best of the Company's knowledge, none of these people has in the last five years:

- been convicted of fraud;
- been involved as executive or director in any bankruptcy, receivership or liquidation;
- been banned from management;
- been convicted or be subject to official public sanctions handed down by statutory or by regulatory authorities (including by designated professional organisms).

14.2. CONFLICTS OF INTEREST IN ADMINISTRATIVE AND MANAGEMENT BODIES AND GENERAL MANAGEMENT

The Chairman of the Board of Directors, the Chief Executive Officer and the Executive Directors are directly or indirectly shareholders of the Company and/or hold securities giving access to the Company's share capital. (see Section 21.1.4).

Related-parties transactions are described in Section 19 of the *Document de référence*.

To the best of the Group's knowledge, there is no actual or potential conflict of interest in the Group's administrative bodies and management between members' duties to the Group and their private interests and/or other duties, as set out in Section 14.1 above.

To the best of the Company's knowledge, there is no agreement of any kind with shareholders, customers, suppliers or other parties that has led to the appointment of any of the executives or directors.

To the best of the Company's knowledge, at the Date of the *Document de référence*, there are no restrictions on the ability of the people listed in Section 14.1 "Executives and Directors" of the *Document de référence* to sell their stake in the Company's capital.

15. COMPENSATION AND BENEFITS

15.1. COMPENSATION OF CORPORATE OFFICERS

Table 1: Summary of compensation and share subscription warrants (BSAs) and founders' warrants (BSPCEs) allocated to each executive corporate officer

Summary table of the compensation, options and shares granted to each executive corporate officer		
	2015 fiscal year	**2016 fiscal year**
Ludovic Lastennet – CEO(1)

Table 10: Past free share allocations

None.

Table 11:

The table below shows details of the terms and conditions of compensation and other benefits received by executive corporate officers:

Executive corporate officers	Employment contract		Supplementary pension scheme		Compensation or benefits payable or likely to be payable for termination or change of function		Compensation under a non-compete clause	
	Yes	No	Yes	No	Yes	No	Yes	No
Ludovic Lastennet – Chief Executive Officer	X			X	X(1)		X(2)	
Appointment start date: *Appointment end date:*	First appointment: November 27, 2012, reappointment: March 24, 2016 At the end of the General Shareholders' Meeting convened to approve the financial statements for the year ended December 31, 2018							
Jean-Gérard Galvez - Chairman of the Board of Directors		X		X		X		X
Appointment start date: *Appointment end date:*	First appointment: April 6, 2011, reappointment: March 24, 2016 At the end of the General Shareholders' Meeting convened to approve the financial statements for the year ended December 31, 2018							

(1) The Company took out a GSC unemployment insurance policy for the Company's senior members beginning on October 1, 2014. This contract include a daily compensation indemnity of 70% of tranches A and B of the net fiscal income and 55% of the tranche C of the net fiscal income. Based on the 2016 net fiscal income and a maximum duration of 24 months, the amount of this compensation indemnity is estimated at approximately €249,698.
(2) Non-compete compensation is 60% of total compensation earned in the 12 months preceding departure. The Company's commitments were assessed on December 31, 2016 at €129,668.

Ludovic Lastennet entered into an employment contract with the Company on April 2, 2007. He was appointed Chief Executive Officer during the Board meeting of November 27, 2012. The Board of Directors decided to retain him in his position as salaried sales director, as his employment contract relates to technical functions that are distinct from the functions exercised under his corporate office.

15.2. SUMS SET ASIDE OR RECORDED BY THE COMPANY OR ITS SUBSIDIARIES FOR PAYMENT OF PENSIONS, RETIREMENT BENEFITS OR OTHER BENEFITS TO EXECUTIVES AND DIRECTORS

Except for the mandatory legal retirement obligations set out in Note 11 to the IFRS financial statements on December 31, 2016 in Section 20.1 of the *Document de référence*, the Company has made no provision for pensions, retirement benefits or other benefits payable to its corporate officers.

The Company paid no arrival or departure bonuses to any of its corporate officers.

15.3. SHARE SUBSCRIPTION AND PURCHASE OPTIONS, SHARE SUBSCRIPTION WARRANTS AND FOUNDER'S WARRANTS

The table below shows a summary of all unlapsed securities or rights giving access to the Company's share capital at the date of the *Document de référence*, of whatever type, issued by the Company to its corporate officers.

	$BSA_{09/2012}$*	$BSA_{01/2013}$*	$BSA_{01/2014}$	$BSA_{07/2015}$	$BSA_{07/2016\text{-}T1}$	$BSPCE_{03/2016}$	$BSPCE_{07/2016\text{-}T1}$	$BSPCE_{07/2016\text{-}T2}$	$Options_{03/2016}$	Number of potential shares issuable as a result of these rights**
Jean-Gérard Galvez	50,000	25,000	-	-	-	-	32,719	50,000	-	95,990
Ludovic Lastennet	-	-	-	-	-	140,000	112,601	-	-	265,231
Brian Ennis	-	-	16,199	-	-	-	-	-	60,000	82,730
Jan Egberts	50,000	-	-	-	10,000	-	-	-	-	16,590
Paula Ness Speers	-	-	-	16,199		-	-	-	-	17,009
Mary Shaughnessy					16,000					16,800

Details of the terms and conditions of the plans shown above can be found in Section 21.1.4 "Convertible or exchangeable securities or securities with warrants" of the Document de référence.

** Following the reverse share split approved by the extraordinary General Shareholders' Meeting of July 19, 2013, ten warrants entitle the holder to subscribe for one share with a nominal value of €0.70.*
*** Taking into account the reverse share split and after adjusting the number of shares that may be subscribed upon exercise of share subscription warrants (BSAs) and founders' warrants (BSPCEs) following the capital increase while maintaining the shareholders' preferential subscription right in March 2015 and November 2016, in accordance with Article L. 228-99 of the French Commercial Code.*

15.4. SUMMARY OF TRANSACTIONS BY EXECUTIVES AND PERSONS REFERRED TO IN ARTICLE L. 621-18-2 OF THE FRENCH MONETARY AND FINANCIAL CODE ON COMPANY SECURITIES IN THE PAST FISCAL YEAR

None.

15.5. ELEMENTS OF COMPENSATION SUBJECT TO SHAREHOLDERS' VOTE IN ACCORDANCE WITH THE PROVISIONS OF ARTICLE L. 225-37-2 OF THE FRENCH COMMERCIAL CODE

In application of the provisions of Article L. 225-37-2 of the French Commercial Code, the Board of Directors submitted for the approval of the General Shareholders' Meeting called to approve the financial statements for 2016, the principles and criteria used to calculate, distribute and allocate the fixed, variable and extraordinary elements comprising the overall compensation and benefits of any kind attributable to the Chairman of the Board of Directors and the Chief Executive Officer by virtue of the corporate offices held by them in 2017 and constituting the wage policy applicable to them.

The principles and criteria approved by the Board of Directors on the recommendation of the Compensation Committee are shown below:

For Jean-Gérard Galvez - Chairman of the Board of Directors:

The Chairman of the Board of Directors does not receive any cash compensation for his duties as Chairman of the Board of Directors.

The Chairman of the Board of Directors may be awarded founders' warrants (BSPCEs) subject to a condition of attendance. He may also, like the other Directors, receive attendance fees determined by the Board of Directors (within the limits of the aggregate award voted by the General Shareholders' Meeting) and by the principles approved by the Board of Directors based on his rate of attendance and the amount of time that he devotes to his role, including where applicable, time spent serving on a committee or committees set up by the Board of Directors.

Please note that the Company entered into a service agreement with HM Conseils, whose General Manager is Jean-Gérard Galvez (see Section 19.2 of this *Document de référence*).

For Ludovic Lastennet, Chief Executive Officer:

Elements of compensation	Principles	Determination criteria
Fixed compensation	The Chairman and Chief Executive Officer receives fixed compensation paid under his employment contract	His gross annual fixed compensation was set at €213,300
Variable compensation	The Chairman and Chief Executive Officer may receive variable compensation of up to €50,000	This variable compensation is payable according to the attainment of a specific set of objectives (quantitative and qualitative criteria such as cash balances, revenue, EBITDA, creation of an advisory board etc.). These objectives are included in an additional clause to his employment contract. The size of the bonus is validated by the Compensation Committee on a proposal of the CEO
GSC unemployment insurance	The Chief Executive Officer has GSC unemployment insurance	This contract includes a daily compensation indemnity of 70% of tranches A and B of the net fiscal income and 55% of the tranche C of the net fiscal income. Based on the 2016 net fiscal income and a maximum duration of 24 months, the amount of this compensation indemnity is estimated at approximately €249,698
Non-compete compensation	Non-compete compensation is 60% of total compensation earned in the 12 months preceding departure	N/A
Other benefits in kind	Company car	N/A
Supplementary pension scheme	As an employee, the Chief Executive Officer is a member of a supplementary pension scheme set up by the Company for its executives and employees	None

In addition, the Chief Executive Officer may be awarded BSCPEs, stock options and/or free shares dependent on attendance and/or performance conditions.

In accordance with Article L. 225-100 of the French Commercial Code, the amounts arising from the application of these principles and criteria will be submitted for the approval of the shareholders at the General Shareholders' Meeting called to approve the financial statements for 2017.

16. OPERATION OF THE ADMINISTRATIVE AND MANAGEMENT BODIES

16.1. COMPANY MANAGEMENT

The Company is a *Société Anonyme* (French public limited liability company) with a Board of Directors.

By a decision dated April 6, 2011, the Board of Directors decided to separate the offices of Chairman of the Board of Directors and Chief Executive Officer. As a result, the Board of Directors is chaired by Jean-Gérard Galvez, Chairman of the Board of Directors, and Ludovic Lastennet, as Chief Executive Officer, is responsible for the Company's general management. The Chief Executive Officer represents the Company with regard to third parties.

16.2. INFORMATION ON THE CONTRACTS BETWEEN THE GROUP AND ITS CORPORATE OFFICERS

With the exception of the employment contracts and service provider contracts listed in this Section, there are no other contracts in force between the Group and a corporate officer of the Company.

16.2.1. Employment contracts entered into between Corporate Officers and the Group

Ludovic Lastennet entered into a permanent employment contract with the Company on April 2, 2007.

Brian Ennis entered into an employment contract with Implanet America Inc. from January 1, 2016.

16.2.2. Services agreements entered into between corporate officers and the Group

16.2.2.1. Service provider agreement between the Company and HM Conseils

The Company has entered into an unwritten and undetermined service provider agreement with HM Conseils, a limited liability company with Jean-Gérard Galvez as its Managing Director. This agreement was ratified by the Company's General Shareholders' Meetings on July 19, 2013 and May 24, 2016 and was subject to a special report by the Company's Statutory auditors (see Section 19.3 of the *Document de référence*).

Under this agreement, HM Conseils provides the Company with support and consulting services including, for example, the preparation and the definition of the Company's various budgets, definition and implementation of the Company's development strategy in preparation for its operations in the United States, the identification and selection of investment banks in preparation of the Company's stock market listing and its capital increases carried out in March 2015 and November 2016 and the preparation of documentation relating to these plans.

HM Conseils provides these services for a flat rate of €9,000 per day excl. VAT. since October 2015. This rate was previously €5,000 excl. VAT.

As of the date of the *Document de référence* and since January 1, 2015 the Company paid HM Conseils under this contract:

- €72,000 excl. VAT in fees for the year 2015;
- €108,000 excl. VAT in fees for the year 2016;
- €27,000 excl. VAT for fees for the period January 1 to March 31, 2017.

16.2.2.2. Services agreement entered into between the Company and Health-Advances LLC

The Company has entered into an unwritten services agreement with Health-Advances LLC, a US company of which Paula Ness Speers is a partner. This agreement underwent the procedure for controlling regulated agreements and was approved by the Board of Directors meeting on April 8, 2015, prior to its conclusion. This agreement was approved by the Company's General Shareholders' Meeting on May 24, 2016 and was subject to a special report by the Company's Statutory auditors (see Section 19.3 of the *Document de référence*).

Under this agreement, Health-Advances LLC will provide the Company with support and consultancy services including, for instance, the study of the economic model to be used by the Company and its subsidiary Implanet America with respect to the sale of the Company's products in the United States.

The services are provided by Health-Advances LLC on the basis of estimates previously accepted by the Company, it being specified that each estimate must correspond to a specific and one-time mission.

As of the date of the *Document de référence*, the Company had paid USD 237,450 in fees under this agreement for the period from January 1, 2015 to December 31, 2015. No services have been carried out under this contract since January 1, 2016.

16.2.2.3. Services agreement between Implanet America Inc. and EnniTech LLC

Implanet America Inc., a fully-owned subsidiary of your Company, entered into a service agreement with the US company EnniTech LLC, whose Chief Executive Officer is Brian Ennis. As the services provided constitute regulated agreements, they were ratified by the Company's General Shareholders' Meeting on June 24, 2015 and were subject to a special report by the Company's statutory auditors (see Section 19.3 du *Document de référence*).

Under this agreement, EnniTech LLC will provide the Company with support and consultancy services including, for example, the drafting of a two-year strategic plan aimed at developing the Company's sales in the American market, identifying business partners in the United States, identifying opinion leaders who could sit on the Company's scientific board, helping with the selection of reference centers in order to offer them surgeon training programs.

EnniTech provides these services for a fixed monthly fee of USD 12,000 excl. VAT. As of the date of the *Document de référence*, the Company had paid EnniTech LLC for services rendered under this agreement:

- USD 99,995.93 excl. VAT for fees for the period February 1, 2014 to December 31, 2014 (including reimbursement of costs incurred by Ennitech LLC within the framework of the services mentioned above); and

- USD 117,986.10 excl. VAT for fees for the period January 1, 2015 to December 31, 2015 (including reimbursement of costs incurred by Ennitech LLC within the framework of the services rendered under the terms of the agreement).

The corresponding amounts were subsequently reimbursed by Implanet America Inc. to Implanet SA.

The above agreement ended on December 31, 2015.

16.3. BOARD OF DIRECTORS AND SPECIAL COMMITTEES – CORPORATE GOVERNANCE

16.3.1. Board of Directors

The number of Board of Directors meetings takes into account the different events over the Company's life. Thus, the Board of Directors meets as frequently as required in the Company's interests.

For the fiscal year ended December 31, 2015, the Company's Board of Directors met 11 times with an average attendance rate of 90.1%. For the fiscal year ended December 31, 2016, the Company's Board of Directors also met 11 times with an average attendance rate of 95.5%.

Director	Attendance rate to the 2016 Board meetings
Jean-Gérard Galvez	100.0%
Ludovic Lastennet	100.0%
Paula Ness Speers	90.9%
Brian Ennis	81.8%
Jan Egberts	100.0%
Edmond de Rothschild Investment Partners represented by Raphaël Wisniewski	100.0%*
Rainer Strohmenger	100.0%*
Mary Shaughnessy	100.0%**

** It being specified that this rate has been calculated on the period from January 1, 2016 to March 25, 2016, corresponding to the resignation of Edmond de Rothschild Investment Partners and Mr. Rainer Strohmenger from their respective terms of office as Company Directors.*

*** It being specified that this rate has been calculated on the period from May 24, 2016, corresponding to the date of appointment of Ms. Mary Shaughnessy as Company Director, to December 31, 2016.*

The composition of the Board of Directors and the information about its Members can be found in the developments described14 in Chapters 14 "Administrative, Management, Supervisory and Executive Bodies" and 21.2 "Articles of incorporation and Bylaws" of the *Document de référence*.

Directors may be recompensed by attendance fees, which are allocated between the Directors according to their attendance at the Board meetings and their contribution to the Special Committees.

Rules of procedure were adopted on April 11, 2013 and amended on June 7, 2013 and on January 31, 2017 to define the role and composition of the Board of Directors, the rules of conduct and the obligations of the members of the Company's Board of Directors. All members of the Board of Directors commit to maintaining independence of reasoning, judgment and action and to actively participate in the Board's work. They will inform the Board should they come up against any conflicts of interest. All Board members must declare all direct or indirect transactions on the Company's shares transacted to the Company and the French Financial Markets Authority (AMF).

The Company believes that Paula Ness Speers, Jan Egberts and Mary Shaughnessy meet the criteria for 3 Independent Directors as defined by the MiddleNext Code published in September 2016 inasmuch as Paula Ness Speers, Jan Egberts and Mary Shaughnessy:

- are not, and over the last five years have not been, employees or Executive Directors of the Company or of a Group company;
- do not have and have not had over the last two years significant business relations with the Company or the Group (clients, suppliers, competitors, service providers, creditors, banker, etc.);
- are not reference shareholders of the Company or hold a significant percentage of voting rights;
- do not have any close relationship or close family relationship with a Corporate Officer or reference shareholder; and
- have not been Company auditors in the course of the last six years.

16.3.2. Special Committees

16.3.2.1. Audit committee

COMPOSITION

On January 8, 2014, the Board of Directors decided to set up a permanent Audit Committee and to cease fulfilling the role of audit committee itself, in accordance with the French Commercial Code.

The main terms of the Audit Committee's rules of procedure are set out below.

According to these rules of procedure, the Audit Committee is composed of at least two members appointed by the Board of Directors, based on a recommendation of the Compensation Committee. The members of the Audit Committee are selected from among the members of the Board of Directors and, if possible, two of them are independent members, one of which having particular financial or accounting expertise, it being specified that they cannot be Directors who hold management positions.

As of the date of the *Document de référence*, the members of the Audit Committee are:

- Jean-Gérard Galvez, Chairman of the Board of Directors;
- Mary Shaughnessy, Director; and
- Jan Egberts, Director.

16.3.2.1.1. Responsibilities

The Audit Committee's responsibility is to assist the Board of Directors and to ensure that the financial statements are accurate, the internal audit is properly conducted, the information provided is relevant and that the Statutory auditors correctly fulfill their mission vis-à-vis the Company, independently of the Group's management.

The main responsibilities of the Audit Committee include:

- to monitor the preparation and treatment of the financial information;
- to monitor the effectiveness of the internal audit and risk management systems;
- to monitor the audit of the annual accounts and consolidated accounts by the Statutory auditors;
- to recommend Statutory auditors to be put forward for appointment at the General Shareholders' Meeting and to review the terms of their compensation;
- monitoring the independence of the Statutory auditors;
- checking the progress of any major disputes on a regular basis; and
- in general, offering any relevant advice and recommendations on the points listed above.

16.3.2.1.2. Operating procedures

The Audit Committee meets at least twice a year, according to a schedule fixed by its Chairman, to examine the consolidated annual and half-yearly financial statements and, where appropriate, quarterly accounts, following an agenda decided by its Chairman and sent to the Audit Committee members at least seven days in advance of the meeting. A meeting can also be called by its Chairman, or two of its members, or by the Chairman of the Company's Board of Directors.

The Audit Committee can hear any member of the Company's Board of Directors and carry out any internal or external audits on any topic it deems to be part of its remit. The Chairman of the Audit Committee will notify the Board of Directors in advance. Specifically, the Audit Committee has the power to hear any person who is involved in preparing or auditing the accounts (Chief Financial Officer or the main Finance Division managers).

The Audit Committee hears the Statutory auditors. No Company representatives are required to be present at the auditors' hearing.

16.3.2.1.3. Report

The Chairman of the Audit Committee ensures that its operating reports provide the committee submits to the Board of Directors with complete information to facilitate its deliberations.

The annual report will include a summary on the Committee's work over the year.

If, during its work, the Audit Committee should detect a major risk which it believes has not been properly managed, the Chairman will immediately notify the Chairman of the Board of Directors.

16.3.2.2. Compensation Committee

16.3.2.2.1. Composition

The members of the Compensation Committee have adopted rules of procedure, amended by a decision of the Board of Directors on June 7, 2013, as described below. Where possible, this committee is composed of at least two members of the Board of Directors appointed by the Board of Directors.

It is hereby stated, for whatever purpose it may serve, that no Member of the Board of Directors exercising a management function within the Company can be a member of the Compensation Committee.

As of the date of the *Document de référence*, the members of the Compensation Committee are:

- Jean-Gérard Galvez, Chairman of the Board of Directors;
- Mary Shaughnessy, Director; and
- Paula Ness Speers, Director.

16.3.2.2.2. Responsibilities

The main duties of the Compensation Committee are:

- to examine the main objectives put forward by general management for the compensation of the Company's executives that are not members of the Board of Directors, including free share plans and share subscription and purchase options;
- to examine the compensation of executives that are not members of the Board of Directors, including free share plans and share subscription and purchase options, retirement and benefit plans, and benefits in kind;

- to make recommendations and proposals to the Board of Directors concerning:
  - the compensation, retirement and benefit scheme, benefits in kind, and the other cash entitlements of the corporate officers, including those leaving their position. The Committee proposes compensation structures and amounts, specifically, the rules for determining variable compensation that take into account the Company's strategy, objectives and results and earning as well as market practices, and
  - the free shares plans, share subscription or purchase options and all other similar profit-sharing mechanisms, and in particular, personal allocations to qualifying corporate officers;

- to examine the total value of the attendance fees and their allocation system among Members of the Board of Directors, and also the terms and conditions of reimbursement of any expenses incurred by members of the Board of Directors;
- to prepare and submit any reports required under the Board of Directors' rules of procedure;
- to prepare any other compensation-based recommendations requested by the Board of Directors; and
- in general, the Compensation Committee provides advice and makes appropriate recommendations in any of the above areas.

16.3.2.2.3. Operations of the Committee

The Compensation Committee meets at dates set by its Chairman to discuss an agenda decided by its Chairman, which is sent to the Compensation Committee members at least seven days ahead of the meeting. A meeting can also be called by its Chairman, or two of its members, or by the Board of Directors.

The non-executive Directors who are not members of the Compensation Committee are free to attend any of these meetings.

The Chairman of the Company's Board of Directors, if he/she is not a committee member, can be invited to attend the committee meetings. The Committee invites him/her to put forward proposals. He/she has no vote and does not attend deliberations about his/her own situation.

The Compensation Committee can ask the Chairman of the Board of Directors for permission to invite to the meeting any Executive Officer with the expertise required to handle a specific agenda item. The Chairman of the Compensation Committee or of the meeting will highlight the confidentiality obligations incumbent on all attendees.

The Compensation Committee met once during fiscal year 2015 and once during fiscal year 2016.

16.3.2.2.4. Reports

The Chairman of the Compensation Committee ensures that its operating reports provide the Board of Directors with complete information to facilitate its deliberations.

The annual report will include a summary on the Committee's work over the year.

One of the duties of the Compensation Committee is to examine the Company's draft report on directors' compensation.

16.4. CORPORATE GOVERNANCE DECLARATION

In the interests of transparency and public information and in order to comply with the requirements of Article L. 225-37 of the French Commercial Code, the Company has adopted the MiddleNext Code as its reference for governance guidelines.

The table below lists the different recommendations of the Corporate Government Code for Small and Midcapitalizations companies and indicates whether or not the Company complies with them as of the date of the *Document de référence*:

MiddleNext Code recommendations	Compliance	Non-compliant
I. Supervisory Power		
R 1: Director ethics	X	
R 2: Conflicts of Interest	X	
R 3: Composition of the Board – Presence of Independent Directors	X	
R 4: Board member information	X	
R 5: Organization of Board and committee meetings	X	
R 6: Creation of committees	X	
R 7: Introduction of Board Rules of Procedure	X	
R 8: Choice of each Director	X	
R 9: Term of office of Board members	X	
R 10: Directors' compensation	X	
R 11: Introduction of Board evaluation	X	
R12: "Shareholder" Relations	X	
I. Executive Power		
R 13: Definition and transparency of the compensation of executive corporate officers	X	
R 14: Preparation of "Executives" succession	X	
R 15: Combination of an employment contract with a Director position	X(1)	
R 16: Golden handshakes	X	
R 17: Supplementary pension schemes	X	
R 18: Stock options and free shares		X(2)
R 19: Review of vigilance points	X	

(1) The Board of Directors has authorized the Chief Executive Officer to hold both an employment contract and a Director position, in view of the size of the Company and the distinct technical functions exercised by this individual in accordance with his employment contract.

(2) To date, the Company has not attached any performance conditions to the exercise of the Founders' warrants (BSPCE) granted to some of its executives since its stock market listing.

16.5. INTERNAL CONTROL

In accordance with Article 222-9 of the General Regulation of the French Financial Markets Authority (AMF) and pursuant to Article L. 225-37 of the French Commercial Code (see Section 26.1 of this *Document de référence*), the Chairman of the Board of Directors delivered a report on the composition of the Board, including application of the principle of balanced representation of men and women on the Board, the preparation and organization of the Board of Directors' work and the Company's internal control and risk management procedures.

The Company has internal control procedures in place as of the date of the *Document de référence*.

Organization of the Finance and Accounting Department

The Finance and Accounting Department is made up of four people, including the Chief Financial Officer.

This team is responsible for all accounting, fiscal and corporate matters (production and filing of the various declarations). The payroll is subcontracted to an external service provider.

The Company maintains internal separation between the preparation and oversight of the financial statements and calls on independent experts to evaluate complex accounting entries or which involve subjective hypotheses.

The accounts are produced internally and then submitted to the Company's Statutory auditors for review.

The accounting operations of the subsidiary Implanet America Inc. are entrusted to a firm of chartered accountants.

The Finance Division reports directly to the Chief Executive Officer (see the organizational chart in Section 17.1.1 of the *Document de référence*).

The budget and "monthly reporting" procedure

The Company draws up an annual budget, which is reviewed quarterly in the form of projections, based on actual figures and any adjustments required for revenue and expenditure still to be incurred. These figures are sent to each revenue or cost center manager.

The Company's accounting system is based on French accounting standards, with sales broken down by product line and costs broken down by center and type, which allows it to monitor the budget very closely.

The Company draws up "monthly reports" including an operating account and cash forecasts. These reports are submitted to the Management Committee comprising Ludovic Lastennet (Chief Executive Officer), David Dieumegard (Chief Financial Officer), Régis Le Couedic (Research and Development Director and Clinical & Scientific Affairs Director), Nicolas Marin (Marketing Director), Laurent Penisson (Sales Director, OUS) and Franck Laporte (Operations Director).

Delegation of powers

Each cost center manager has a capped expenditure authorization, which must be approved by the Company's general management as soon as the threshold is reached. These purchase requests are then checked off against the invoices and delivery notes for the goods before payment is approved.

16.6. INFORMATION REQUIRED BY ARTICLE L. 225-100-3 OF THE FRENCH COMMERCIAL CODE

16.6.1. Structure of the Company's share capital

Refer to Chapter 18 of this *Document de référence*.

16.6.2. Legal Restrictions on the exercise of voting rights and share transfers or clauses of which the Company is aware pursuant to Article L. 233-11 of the French Commercial Code

None.

16.6.3. Direct or indirect shareholdings in the Company's capital of which it is aware by virtue of Articles L. 233-7 and L. 233-12 of the French Commercial Code

Refer to Chapter 18 of this *Document de référence*.

16.6.4. List of holders of all securities bearing special control rights and description

The Company is not aware of any special control rights.

16.6.5. Control mechanisms planned in potential personnel shareholding arrangements, when the control rights are not exercised by the latter

The Company has not implemented any personnel shareholding arrangements likely to contain control mechanisms when control rights are not exercised by the personnel.

16.6.6. Agreements between shareholders of which the Company is aware and which may lead to restrictions on share transfers and the exercise of voting rights

The Company is not aware of any such agreements.

16.6.7. Rules on the appointment and replacement of members of the Board of Directors and modification of the Bylaws

See Section 21.2. "Articles of incorporation and Bylaws" of this *Document de référence*.

16.6.8. Powers of the Board of Directors, particularly the issuing or purchase of shares

Powers granted by the Company's General Shareholders' Meeting to the Board of Directors in these areas are shown in Sections 21.1.3 "Number, book value and nominal value of shares held by the Company or on its behalf" and 21.1.5 "Acquisition rights and/or obligations connected to share capital issued but unpaid, and commitment to capital increase".

16.6.9. Agreements signed by the Company which change or end in the event of a change in Control of the Company

The Company may have to enter into agreements containing clauses which, under certain conditions, could lead to their being terminated early or changing in the event of a change in the Company's control.
Refer to the description of the contract in Section 22.3 of this *Document de référence*.

16.6.10. Agreements providing for indemnities for members of the Board of Directors or employees, if they resign or are unfairly dismissed, or if their employment ends due to a takeover bid

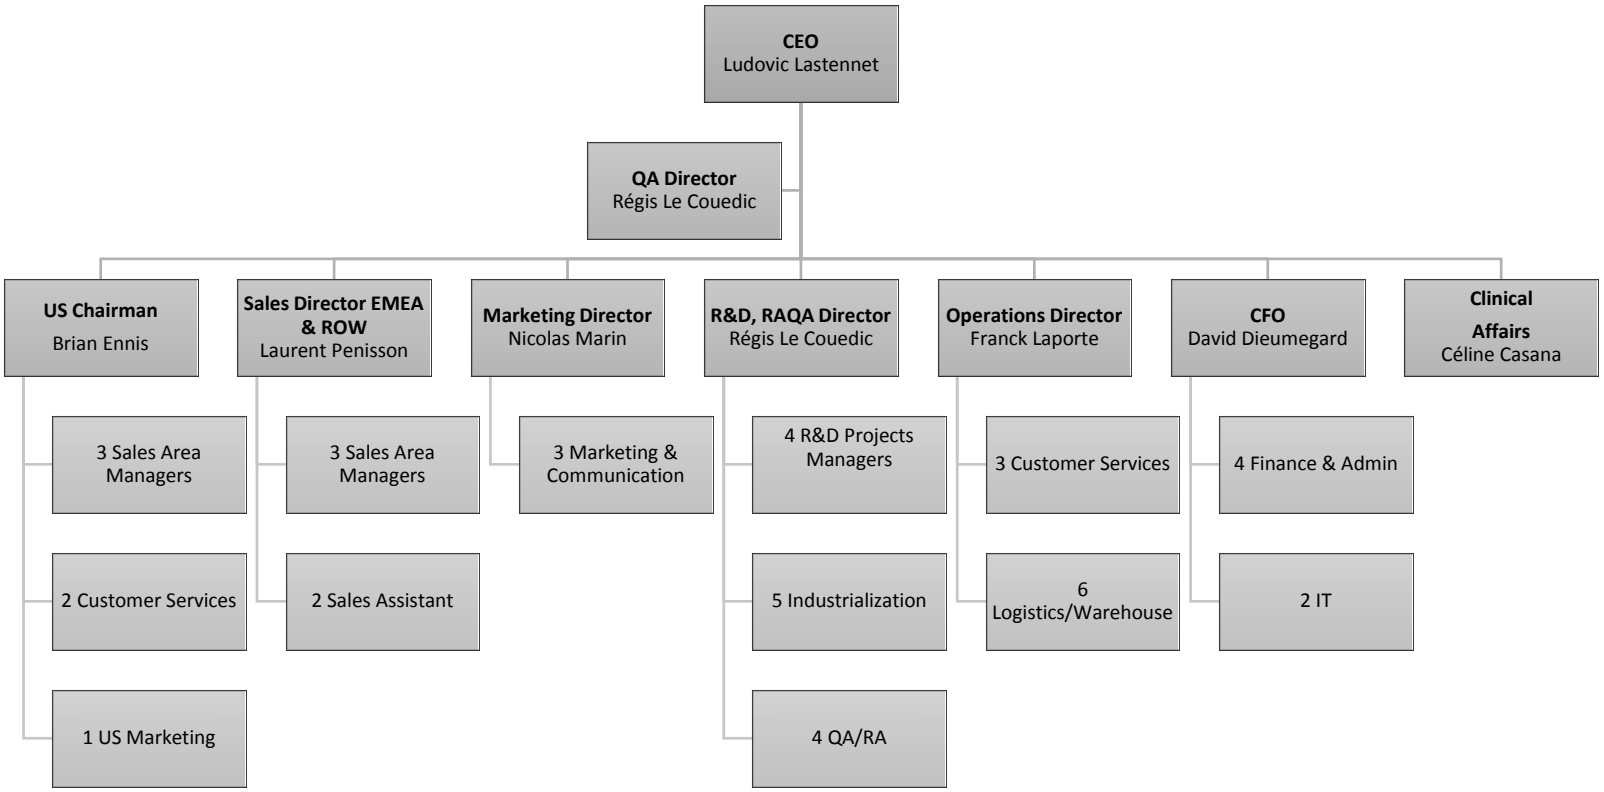
Except for the information set out in table 11 of Section 15.1 of this Document de référence, the Company has signed no agreement on severance pay for Board members or employees in the event of resignation without due cause or dismissal or if their employment were to be terminated following a takeover.

17. EMPLOYEES

17.1. NUMBER OF EMPLOYEES AND EMPLOYEES BY FUNCTION

17.1.1. Organizational chart

At the date of the *Document de référence* the operational structure of the Company was as follows:



The Group's principal managers all have long experience in their fields. (see Section 6.10.1 of the *Document de référence*).

17.1.2. Number and breakdown of employees

As at the end of the periods shown, the Group's employees by category were as follows:

Breakdown of headcount	12/31/2016	12/31/2015
Administrative	8	8
Sales & Marketing "General orthopedics"	3	5
Sales & Marketing "Jazz"	16	10
Operational	8	11
Regulatory & Quality	9	9
Research & Development	6	5
TOTAL	**50**	**48**

As at December 31, 2016, Implanet had 41 employees in France and 9 in the United States.

17.2. MANAGEMENT SHAREHOLDINGS AND STOCK OPTIONS

See Chapter 14 – Administrative management and supervisory bodies and general management of the *Document de référence*.

17.3. EMPLOYEE SHAREHOLDINGS

On the date of the *Document de référence*, no employee shareholding agreement was in place. However, the Company carried out several warrant (BSA), share subscription and purchase option and founders' warrant (BSPCE) allocations, from which some Group employees benefited (see Section 21.1.4 of the *Document de référence*).

At December 31, 2016, there were no shareholdings by employees of the Company, calculated in accordance with Article L. 225-102 of the French Commercial Code (i.e. shares held as part of a company savings plan as provided for by Articles L. 3332-1 et seq. of the French Labor Code).

17.4. PERSONNEL SHAREHOLDING ARRANGEMENTS

None.

18. MAIN SHAREHOLDERS

18.1. DISTRIBUTION OF THE SHARE CAPITAL AND VOTING RIGHTS

The shareholder structure table below shows the breakdown of the Company's share capital and voting rights as of the date of the *Document de référence*.

	Position on the Date of the *Document de référence* on a non-diluted basis		**Position on the date of the *Document de référence* on a fully diluted basis**					
	Number of shares	**% of capital and voting rights***	Number of shares likely to result from exercise of BSAs[(1)]	Number of shares likely to result from exercise of BSPCEs[(1)]	Number of shares likely to result from exercise of options[(1)]	Number of shares likely to result from exercise of OCA	**Number of shares after exercise of BSAs, BSPCEs, options and OCAs[(1)]**	**% of the share capital and voting rights after exercise of BSAs, BSPCEs, options and OCAs***
Founders and historical investors	**251,867**	**1.16%**	**787**				**252,654**	**1.02%**

Free Float***	**19,630,805**	**90.55%**					**19,630,805**	**79,62%**
Treasury shares	123,491	0.57%					123,491	0.50%
Total	**21,680,061**	**100%**	**2,194,709**	**681,837**	**86,625**	**14,286**	**24,657,518**	**100%**

** The percentage of voting rights is equal to the percentage of share capital held.*
*** Investments held as bearer shares.*
**** Without taking into account the Edrip and Wellington bearer investments listed above.*
(1) After adjusting the number of shares that may be subscribed upon exercise of share subscription warrants (BSAs) and founders' warrants (BSPCEs) following the increase in capital while maintaining the shareholders' preferential subscription rights, in accordance with Article L. 228-99 of the French Commercial Code.

In a letter received on September 9, 2016, the company Edmond de Rothschild Investment Partners, acting on behalf of funds under its management, declared that on September 8, 2016 its shareholding dropped below the thresholds of 5% of the Company's share capital and voting rights, and that it held, on account of said mutual funds, 556,004 IMPLANET shares representing as many voting rights, or 4.85% of the Company's share capital and voting rights. The crossing of these thresholds followed the disposal of Implanet shares on the market.

18.2. MAIN SHAREHOLDERS NOT REPRESENTED ON THE BOARD OF DIRECTORS

None.

18.3. VOTING RIGHTS OF THE MAIN SHAREHOLDERS

As of the date of the *Document de référence*, the voting rights of each shareholder were equal to the number of shares held by each of them. The Combined General Shareholders' Meeting of June 24, 2015 decided not to institute double voting rights and confirmed the rule whereby one Company share entitles the holder to one vote at the General Shareholders' Meeting.

18.4. CONTROL OF THE COMPANY

As of the date of the *Document de référence*, there was no controlling shareholder as defined by Article L. 233-3 of the French Commercial Code.

The Company has not implemented any measures to ensure that any controlling party cannot abuse its power.

To the best of the Company's knowledge, no shareholders are acting in concert.

18.5. AGREEMENTS THAT MAY LEAD TO A CHANGE IN CONTROL

To the best of the Company's knowledge, there are no agreements whose implementation could lead to a change in the control of the Company.

18.6. STATUS OF COMPANY SHARES PLEDGED AS COLLATERAL

None.

19. RELATED-PARTIES TRANSACTIONS

19.1. INTRA-GROUP OPERATIONS

Implanet America Inc., the Company's only subsidiary, was incorporated in New York State in February 2013. It began operations at the end of the first half of 2013.

See 7.3 "Group financial flows" of the *Document de référence* for details of the agreements currently in force between the Company and its US subsidiary Implanet America Inc.

19.2. SIGNIFICANT AGREEMENTS WITH RELATED PARTIES

19.2.1. Service provider agreement between the Company and HM Conseils

The Company has entered into an unwritten and undetermined service provider agreement with HM Conseils, a limited liability company with Jean-Gérard Galvez as its Managing Director. This agreement was ratified by the Company's General Shareholders' Meetings on July 19, 2013 and May 24, 2016 and was subject to a special report by the Company's Statutory auditors (see Section 19.3 of the *Document de référence*).

Under this agreement, HM Conseils provides the Company with support and consulting services including, for example, the preparation and the definition of the Company's various budgets, definition and implementation of the Company's development strategy in preparation for its operations in the United States, the identification and selection of investment banks in preparation of the Company's stock market listing and its capital increases carried out in March 2015 and November 2016 and the preparation of documentation relating to these plans.

HM Conseils provides these services for a flat rate of €9,000 per day excl. VAT. since October 2015. This rate was previously €5,000 excl. VAT.

As of the date of the *Document de référence* and since January 1, 2015, the Company paid HM Conseils under this contract:

- €72,000 excl. VAT in fees for the year 2015;
- €108,000 excl. VAT in fees for the year 2016;
- €27,000 excl. VAT for fees for the period January 1 to March 31, 2017.

This agreement was subject to an annual review by the Board of Directors which, with regard to its terms and conditions, particularly financial, maintained the previously granted authorization. This agreement will continue during the 2017 fiscal year. This agreement does not provide for financial condition adjustments or indexation rules.

19.2.2. Services agreement entered into between the Company and Health-Advances LLC

The Company has entered into an unwritten services agreement with Health-Advances LLC, a US company of which Paula Ness Speers is a partner. This agreement underwent the procedure for controlling regulated agreements and was approved by the Board of Directors meeting on April 8, 2015, prior to its conclusion. This agreement was approved by the Company's General Shareholders' Meeting on May 24, 2016 and was subject to a special report by the Company's Statutory auditors (see Section 19.3 of the *Document de référence*).

Under this agreement, Health-Advances LLC will provide the Company with support and consultancy services including, for instance, the study of the economic model to be used by the Company and its subsidiary Implanet America with respect to the sale of the Company's products in the United States.

The services are provided by Health-Advances LLC on the basis of estimates previously accepted by the Company, it being specified that each estimate must correspond to a specific and one-time mission.

As of the date of the *Document de référence*, the Company had paid USD 237,450 in fees under this agreement for the period from January 1, 2015 to December 31, 2015.

The above agreement ended on December 31, 2015.

19.2.3. Services agreement between Implanet America Inc. and EnniTech LLC

Implanet America Inc., a fully-owned subsidiary of your Company, entered into a service agreement with the US company EnniTech LLC, whose Chief Executive Officer is Brian Ennis. As the services provided constitute regulated agreements, they were ratified by the Company's General Shareholders' Meeting on June 24, 2015 and were subject to a special report by the Company's Statutory auditors (see Section 19.3 of the *Document de référence*).

Under this agreement, EnniTech LLC will provide the Company with support and consultancy services including, for example, the drafting of a two-year strategic plan aimed at developing the Company's sales in the American market, identifying business partners in the United States, identifying opinion leaders who could sit on the Company's scientific board, helping with the selection of reference centers in order to offer them surgeon training programs.

EnniTech provides these services for a fixed monthly fee of USD 12,000 excl. VAT. As of the date of the *Document de référence*, the Company had paid EnniTech LLC for services rendered under this agreement:

- USD 99,995.93 excl. VAT for fees for the period February 1, 2014 to December 31, 2014 (including reimbursement of costs incurred by Ennitech LLC within the framework of the services mentioned above);

- USD 117,986.10 excl. VAT for fees for the period January 1, 2015 to December 31, 2015 (including reimbursement of costs incurred by Ennitech LLC within the framework of the services rendered under the terms of the agreement).

The corresponding amounts were subsequently reimbursed by Implanet America Inc. to Implanet SA.

The above agreement ended on December 31, 2015.

19.3. STATUTORY AUDITORS' SPECIAL REPORTS ON REGULATED AGREEMENTS

19.3.1. Statutory auditors' special report on regulated agreements for the fiscal year ended December 31, 2016

"To the shareholders,

In our capacity as statutory auditors of your Company, we hereby report to you on related party agreements and commitments.

We are required to inform you, on the basis of the information provided to us, of the key terms and conditions of those agreements and commitments, as well as the grounds for the Company's interest therein, as indicated to us or that we have identified in the course of our work. We are not required to comment as to whether they are beneficial or appropriate or to establish whether any other agreements and commitments exist. It is your responsibility under Article R. 225-31 of the French Commercial Code (Code commercial), to assess the benefits resulting from these agreements and commitments and decide whether to approve them.

In addition, we are required by Article R. 225-31 of the French Commercial Code to inform you, where applicable, of the implementation during the fiscal year of any agreements and commitments already approved by the General Shareholders' Meeting.

We carried out the procedures that we considered necessary for this engagement to comply with the applicable professional guidance issued by the French Institute of Statutory Auditors (Compagnie Nationale des Commissaires aux Comptes). This consisted in verifying that the information provided to us is consistent with the documentation from which it was taken.

Agreements and commitments submitted for approval by the General Shareholders' Meeting

We hereby inform you that we have not been notified of any agreements or commitments authorized during the year ended December 31, 2016 to be submitted to the General Shareholders' Meeting for approval in accordance with Article L.225-38 of the French Commercial Code.

Agreements and commitments already approved by the General Shareholders' Meeting

Agreements and commitments approved during previous fiscal years and in effect during the year ended December 31, 2016

In accordance with Article R. 225-30 of the French Commercial Code, we were informed that the following agreements and commitments, already approved by the General Shareholders' Meeting in previous fiscal years, remained in force during the year ended December 31, 2016.

Agreement with HM Conseils

Person concerned

Mr. Jean-Gérard Galvez, Chairman of the Board of Directors of Implanet and Managing Director of HM Conseils.

Nature and purpose

Amendment to the consultancy agreement entered into on March 31, 2010 between Implanet and HM Conseils. The monthly flat-rate fee was raised to €9,000 excl. VAT as from October 1, 2015 (compared to €5,000 excl. VAT until September 30, 2015) given the increase in the number of days dedicated to Implanet.

Terms and conditions

For consulting services during the fiscal year ended December 31, 2016, Implanet incurred fees of €108,000 excl. VAT.

Lyon and Bordeaux, March 31st, 2017

The Statutory Auditors

INKIPIO AUDIT	ERNST & YOUNG Audit	
Clément Albrieux	Laurent Chapoulaud	Jean-Pierre Caton

"

19.3.2. Statutory auditors' special report on regulated agreements for the fiscal year ended December 31, 2015

"

To the shareholders,

In our capacity as Statutory auditors of your Company, we hereby report on the regulated agreements and commitments with related parties.

We are required to inform you, on the basis of the information provided to us, of the key terms and conditions of those agreements and commitments as well as the grounds for the Company's interest therein as indicated to us or that we have identified in the course of our work. We are not required to comment as to whether they are beneficial or appropriate or to establish whether any other agreements and commitments exist. It is your responsibility under Article R. 225-31 of the French Commercial Code, to assess the benefits resulting from these agreements and commitments and decide whether to approve them.

In addition, we are required by Article R. 225-31 of the French Commercial Code to inform you, where applicable, of the implementation during the fiscal year of any agreements and commitments previously approved at the General Shareholders' Meeting.

We carried out the procedures that we considered necessary for this mission to comply with the applicable professional guidance issued by the French auditors' association (*Compagnie Nationale des Commissaires aux Comptes*). This consisted of verifying that the information provided to us is consistent with the documentation from which it has been taken.

AGREEMENTS AND COMMITMENTS SUBMITTED FOR APPROVAL AT THE GENERAL SHAREHOLDERS' MEETING

Agreements and commitments authorized during the past fiscal year

In accordance with Article R. 225-40 of the French Commercial Code, we were informed of the following agreements and commitments, which have been previously approved by your Board Of Directors.

- Agreement with Health Advances LLC

Person concerned: Ms. Paula Ness Spears, Director of Implanet and shareholder of Health Advances LLC.

Prior authorization: by the Board of Directors' Meeting of April 8, 2015.

Nature and purpose: agreement between your Company and US company Health-Advances LLC relating to support and consultancy services including, for instance, the study of the economic model to be used by the Company and its subsidiary Implanet America with respect to the sale of the Company's products in the United States.

Terms and conditions: for support and consulting services rendered under this agreement, Implanet paid fees of USD 237,450 excl. VAT for the fiscal year ended December 31, 2015.

Interest for the Company: The services are provided by Health-Advances LLC on the basis of estimates previously accepted by the Company, it being specified that each estimate must correspond to a specific and one-time mission.

- Agreement with HM Conseils

Person concerned: Mr. Jean-Gérard Galvez, Chairman of the Board of Directors of Implanet and Managing Director of HM Conseils.

Prior authorization: by the Board of Directors' Meeting of September 15, 2015.

Nature and purpose: amendment to the consultancy agreement made on March 31, 2010 between Implanet and HM Conseils. The monthly flat-rate fee was raised to €9,000 excl. VAT from October 1, 2015 (compared to €5,000 excl. VAT to September 30, 2015) given the increase in the number of days dedicated to Implanet.

Conditions: For consulting services during the fiscal year ended December 31, 2015, Implanet incurred fees of €72,000 excl. VAT.

Interest for the Company: The services rendered by the company HM Conseils fall within the framework of proper Company governance and notably include preparing and defining the Company's various budgets, defining and implementing the Company's development strategy, looking for additional funding, identifying and selecting investment banks in preparation for a new capital increase and preparing documentation relating to these plans.

AGREEMENTS AND COMMITMENTS PREVIOUSLY APPROVED AT THE GENERAL SHAREHOLDERS' MEETING

Agreements and commitments approved during previous fiscal years and in effect during the past fiscal year

In accordance with Article R. 225-30 of the French Commercial Code, we were informed that the following agreements and commitments, previously approved at the General Shareholders' Meeting in previous fiscal years, remained in force during the past fiscal year.

- Agreement with EnniTech LLC

Person concerned: Mr. Brian Ennis, Director of Implanet and Chief Executive Officer of EnniTech LLC.

Nature and purpose: agreement between your Company and US company EnniTech LLC relating to support and consultancy services including, for instance, the drafting of a two-year strategic plan aimed at developing the Company's sales in the American market, identifying business partners in the United States, identifying opinion leaders who could sit on the Company's scientific board, helping with the selection of reference centers in order to offer them surgeon training programs.

Conditions: For support and consulting services rendered under this agreement, your Company has paid to the company EnniTech LLC fees of USD 117,986.10 excl. VAT during the fiscal year ended December 31, 2015.

NOTES TO THE ANNUAL CONSOLIDATED FINANCIAL STATEMENTS

(Unless indicated otherwise, the amounts shown in these notes are in euros.)

Note 1: Presentation of the business and significant events

The information set out below constitutes the Notes to the consolidated IFRS financial statements which form an integral part of the financial statements presented for the fiscal year ended December 31, 2016.

The consolidated financial statements of Implanet were approved by the Board of Directors on March 24, 2017 and authorized for publication.

1.1 Information relating to the Company and its business

Created in December 2006, Implanet's business is the technical, clinical, marketing and commercial development of high-quality implants and surgical instruments by introducing innovative technological solutions.

Implanet's range currently covers spinal, arthroscopy and knee products.

The Company has decided to outsource the majority of the operations necessary for the manufacture of its products and works with a network of about 20 subcontractors, on the basis of very precise technical specifications.

Implanet has been listed on the regulated Euronext market in Paris since November 25, 2013.

Address of the registered office:

Technopole Bordeaux Montesquieu - Allées François Magendie - 33650 Martillac, France

Registry number: RCS 493 845 341 - Bordeaux, France

The Implanet company and its subsidiary are hereafter referred to as the “Company” or the “Group”.

1.2 Significant events

Fiscal year ended December 31, 2016

January 2016:

- Successful outcome of the first idiopathic scoliosis surgery performed in Brazil using the Jazz platform.

February 2016:

- Appointment of Brian T. Ennis as Executive Manager of the Implanet America subsidiary.

March 2016:

- Launch of a prospective, multicenter clinical study to document the outcomes of Jazz technology in adult degenerative and adult deformity indications.

April 2016:

- Entry onto the OTCQX® International market in the United States.

- Regulatory clearance in the U.S. 510(k) and Europe (CE) obtained for the new Jazz Lock® implant.

May 2016:

- Regulatory clearance in the U.S. 510(k) and Europe (CE) obtained for the new Jazz Claw® implant.

June 2016:

- Appointment of Mary E. Shaughnessy, Senior VP Finance & Planning of the Partners CC Group, a specialist in financing and repayment of healthcare in the United States, as a new Director.

- Issue of the remaining bonds convertible into shares with share subscription warrants attached ("BEOCABSA") as part of the financing implemented in October 2015 to fund the development of the Jazz BAND technological platform and the commercial roll-out of Jazz worldwide. This second tranche of 400 BEOCABSA will raise a potential maximum of €4 million, at the Company's discretion under certain usual conditions, which may be revised upwards by an equivalent amount if the share subscription warrants attached to the bonds issued under this operation are exercised.
  The Board of Directors also asked L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND to immediately exercise 35 BEOCABSA out of the 400 already issued, giving rise to the issue of a tranche of OCABSA (convertible bonds with warrants attached) for a nominal amount of €350,000.

July 2016:

- Issue of an additional tranche of OCABSAs for a nominal amount of €250,000.

- Interest-free loan for innovation of €800 thousand obtained for the "development and clinical assessment of the Jazz type braided implant for degenerative spinal surgery (particularly the securing or replacement of pedicle screws)".

August 2016:

- Patent for the Jazz® technological platform issued in the United States by the US Patent and Trademark Office (USPTO).

September 2016:

- Successful outcome for the first surgeries with the new Jazz Lock® implant in France, Italy and the United States.

November 2016:

- Capital increase of €6.9 million with preferential subscription rights through the issue of 9,833,105 new shares at a subscription price of €0.70 per share.

December 2016:

- Publication of a new White Paper *"Correction of Adolescent Idiopathic Scoliosis in hypokyphotic patients using Jazz sublaminar bands: preliminary results of a multricentric study using 3D reconstruction "*, presenting the results of the clinical analyses carried out on a group of adolescents suffering from thoracic hypokyphotic scoliosis treated with sub-laminar Jazz implants.

1.3 Post balance sheet events

January 2017:

- European Patent granted by the European Patent Office (EPO) for the universal tensioning system for the Jazz implant®.

- FDA 510(k) and European (CE) regulatory marketing authorization obtained for the new Jazz Frame® implant.

March 2017:

- Patent for Jazz Lock® obtained in France

- Signature of an exclusive distribution partnership in Australia and New Zealand

The Company also carried out a capital increase of €262,500 after December 31, 2016 following the exercise of 105,012 BSAs held by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND.

2.1 Principle for preparation of the financial statements

Declaration of compliance

Implanet has prepared its consolidated financial statements in accordance with the standards and interpretations published by the International Accounting Standards Boards (IASB) and adopted by the European Union as at the date of preparation of the financial statements, and this for all the periods presented.

This referential, available on the website of the European Commission (http://ec.europa.eu/internal_market/accounting/ias_fr.htm), incorporates the international accounting standards (IAS and IFRS), and the interpretations issued by the Standing Interpretations Committee (SIC) and the International Financial Interpretations Committee (IFRIC).

The accounting principles and methods and the options used by the Company are described below. In certain cases, IFRS allow a choice between the application of a reference treatment and another authorized treatment.

Change in the presentation of the financial statements

The presentation of the notes to the consolidated financial statements under IFRS was modified compared to that used for the fiscal years up to December 31, 2015.

The main modifications are on the organization and hierarchy of the notes by reference theme. They aim to increase legibility and relevance for the financial statements prepared under IFRS and to promote understanding, in accordance with AMF recommendations and work undertaken by the international accounting standard setter.

Most of the accounting principles, previously grouped in Note 2, are now indicated within each reference note, so that the reader can easily understand the financial data presented. The principles for preparation of the financial statements, the changes in accounting methods and the use of judgments and estimates can still be found in Note 2: Accounting principles, rules and methods.

Principle for the preparation of the financial statements

The consolidated financial statements of the Company have been prepared in accordance with the historical cost principle, with the exception of certain categories of assets and liabilities in accordance with the provisions set out in the IFRS. The categories concerned are listed in the relevant notes.

Going concern principle

The going concern assumption was used by the Board of Directors, in view notably of the Group's cash and cash equivalents of €6.1 million at December 31, 2016 and the cash investments that can be made available during the 2017 fiscal year for €1 million.

Moreover, the Company is examining the possibility of obtaining additional funding for its new developments, which may involve a capital increase, especially if the Company was no longer able to use OCABSA financing line, up to €3.4 million, signed with L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND, or if it decided not to use it.

The loss-making situation of the Group during the periods presented arises from:

- its stage of development: research and development costs for projects in progress: mechanical testing, filing of patents, protection of intellectual property, etc.;
- commercial roll-out costs: launch of new products, territorial expansion, particularly in the US, etc.

Accounting methods

The accounting principles used are identical to those used for the preparation of the annual IFRS consolidated financial statements for the fiscal year ended December 31, 2015, with the exception of the application of the following new standards, amendments to standards and interpretations adopted by the European Union, for which application is mandatory for the Group with effect from January 1, 2016:

Standards, amendments to standards and interpretations applicable with effect from the fiscal year commencing on January 1, 2016

- Amendment to IAS 1 - Presentation of financial statements: “Disclosure initiative”
- Amendment to IAS 19 - Employee contributions to defined benefit plans
- Amendments to IAS 16 and IAS 38 - Clarification of acceptable methods of depreciation and amortization
- Amendments to IAS 27 - Equity method in separate financial statements
- Amendments to IFRS 11 - Acquisition of an interest in a joint operation
- Amendments to IAS 16 and IAS 41 - Bearer plants
- Amendments to IFRS 10, IFRS 12 and IAS 28 - Investment entities: applying the consolidation exception
- Improvements to IFRS (2012 - 2014 cycle)
- Improvements to IFRS (2010 - 2012 cycle)

These new texts published by the European Union have not had any significant impact on the Group's financial statements.

Standards, amendments to standards, and interpretations not yet adopted by the Group

Standards, amendments to standards and interpretations adopted by the European Union but not yet mandatory for the 2016 financial statements

- IFRS 9 - Financial instruments
- IFRS 15 - Revenue from contracts with customers

Standards and interpretations published by the IAB and not yet adopted by the European Union as at December 31, 2016

- IFRS 14 - Regulatory deferral accounts
- IFRS 16 - Leases
- Amendments to IFRS 10 and IAS 28 - Sale or contribution of assets between an investor and its associate or joint venture
- Amendments to IAS 12 - Recognition of deferred tax assets for unrealized losses
- Amendments to IAS 7 - Disclosures: Transfer of financial assets
- Amendments to IFRS 2 - Classification and measurement of share-based payment transactions
- Amendments to IFRS 4 - Applying IFRS 9 with IFRS 4
- Amendments to IAS 40 - Transfers of investment property
- Clarifications to IFRS 15
- IFRIC 22 - Foreign currency transactions and advance consideration

The Group is currently in the process of assessing the impacts resulting from the first application of these new texts and does not anticipate that they will have a significant impact on its financial statements, with the exception of IFRS 16.

Application of IFRS 16 will be mandatory from January 1, 2019 or with early application from January 1, 2018 along with IFRS 15. The Group does not intend to apply the standard in advance. IFRS 16 removes the distinction between operating leases and finance leases and stipulates that all lease contracts will be recognized in the lessee's balance sheet, as an asset (representing the right of use of the asset leased during the contract period) and a liability (in respect of the lease payment obligation). The standard will also affect the presentation of the income statement (net operating income and financial expenses) and the cash flow statement (flows from operating activities and flows from financing activities).

Therefore, real estate leasing contracts (see Note 23.3) and operating leases (see Note 23.4) will be subject to restatement in respect of the application of IFRS 16.

2.2 Change of accounting method

With the exception of the new texts identified above, Implanet has not made any changes to its accounting methods in respect of the fiscal year ended December 31, 2016.

2.3 Use of judgments and estimates

In order to prepare the financial statements in accordance with IFRS, estimates, judgments and assumptions were made by the Company's management. These may have had an effect on the amounts presented under assets and liabilities, the contingent liabilities at the date of preparation of the financial statements and the amounts presented in respect of income and expenditure for the fiscal year.

These estimates are based on the going concern principle and were prepared based on the information available at the time of their preparation. They are continuously evaluated on the basis of past experience and other factors considered reasonable, which constitute the basis of the assessments of the carrying amount of the assets and liabilities. The estimates may be revised if the circumstances on which they were based change, or as a result of new information. The actual

results may differ significantly from these estimates, depending on different assumptions or conditions.

The principal significant estimates or judgments made by the management of the Company relate in particular to the following items:

- Award of share subscription, founders' warrants or stock options to the employees, executives and external service providers
    - The determination of the fair value of share-based payment is based on the Black & Scholes option valuation model, which takes into account assumptions about complex and subjective variables. In particular, these variables include the value of the Company's shares, the expected volatility of the share price over the lifetime of the instrument as well as the current and future behavior of the holders of these instruments. There exists a high inherent subjectivity risk arising from the use of an option valuation model for the determination of the fair value of payments based on shares in accordance with IFRS 2.
    - The valuation assumptions used are presented in Note 9.

- Determination of the fair value of the derivative liability:
    - The determination of the fair value of the derivative liability is based on the Black & Scholes option valuation model, which takes into account assumptions about complex and subjective variables. In particular, these variables include the value of the Company's shares and the expected volatility of the share price over the lifetime of the instrument. There exists a high inherent subjectivity risk arising from the use of an option valuation model for the determination of the fair value of the derivative liability in accordance with IAS 39.
    - The valuation assumptions used are presented in Note 10.3.

- Recognition of development expenses in assets
    - The Company dedicates significant effort to Research and Development. In this respect, the Company has to make judgments and interpretations to determine the Research and Development expenses to be capitalized as soon as all the six criteria defined by IAS 38 are fulfilled.
    - The accounting principles and the amount of the capitalized costs are presented in Note 3.1.

- Impairment of inventories
    - The Company recognizes a provision for the impairment of stocks based on an analysis of the probable net realizable value of its stocks, which is calculated based on historical and forecast data. In this respect, the Company may be called upon to make use of assumptions (particularly in terms of the future consumption of products up until the expiry date of the said products) and to make interpretations.
    - The accounting principles and the amount of the provisions are presented in Note 5.

- Impairment of trade receivables
    - the Company makes an analysis of its trade receivables in order to establish on a case-by-case basis the level of provision for impairment, based on the risk of non-recovery. In this respect, the Company may be called upon to make use of subjective assumptions and to make judgments for the determination of the receivables which need to be provisioned, and the level of such provision.
    - The accounting principles and the amount of the provisions are presented in Note 6.1.

- Recognition of revenue
  - The Company recognizes income when the amount can be estimated reliably, when it is probable that the future economic benefits will accrue to the Company and when the specific criteria are fulfilled for the Company's business. The Company must make use of its judgment and its interpretation in order to determine whether the criteria for the recognition of income, defined by IAS 18, are fulfilled.
  - The accounting principles applied by the Company in terms of recognition of income are specified in Note 15.

- Provisions for liabilities and expenses
  - the Company may be involved in judicial, administrative or regulatory proceedings during the ordinary course of its activities. A provision is recognized by the Company where there is a sufficient probability that such disputes may lead to costs for the Company. The Company uses judgments and interpretations in order to make its best estimate of the risk incurred and to establish the level of provisioning for risk.
  - The provisions for liabilities and expenses are presented in Note 12.

2.4 Consolidation scope and methods

Subsidiaries

The subsidiaries are all the entities for which the Company has the power to direct the financial and operating policies, a power generally accompanied by the holding of more than one half of the voting rights. The subsidiaries are fully consolidated with effect from the date on which the Company acquires control of them. They are de-consolidated with effect from the date on which control ceases to be exercised.

Intra-group transactions and balances are eliminated. The financial statements for the subsidiary are prepared for the same reference period as those of the parent company, on the basis of similar accounting methods.

On the date of publication of the annual consolidated financial statements, the Company only has one wholly-owned subsidiary, Implanet America Inc., which it created at the end of February 2013.

Implanet America Inc.	12/31/2016	12/31/2015
Percentage of control	100%	100%
Percentage of interest	100%	100%

2.5 Functional reporting currency

The Company's financial statements have been prepared in euros, which is the reporting currency and functional currency of Implanet SA.

2.6 Conversion method

2.6.1 Recognition of transactions in foreign currencies

Transactions in foreign currencies are converted into the Company's functional currency by applying the rate of exchange in effect on the date of the transactions. The monetary assets and liabilities denominated in foreign currencies at the closing date are converted into the functional currency using the rate of exchange on that date.

Foreign exchange gains and losses resulting from the conversion of monetary items correspond to the difference between the amortized cost denominated in the functional currency at the start of the period, adjusted for the impact of the effective interest rate and payments over the period, and the amortized cost denominated in the foreign currency converted at the exchange rate on the closing date.

The non-monetary assets and liabilities denominated in foreign currencies, which are valued at fair value, are converted into the functional currency using the rate of exchange on the date on which the fair value was determined. The translation differences resulting from these conversions are recognized in profit and loss, with the exception of the differences resulting from the conversion of equity instruments available for sale, of a financial liability designated as a hedge for a net investment in a business abroad, or of instruments qualified as cash flow hedges which are recognized directly in shareholders' equity.

The translation differences relating to the loan granted to the subsidiary Implanet America Inc. are recognized directly in equity for the loan portion considered as long-term net investment (the oldest elements).

2.6.2 Conversion of the financial statements of foreign subsidiaries

The assets and liabilities of foreign subsidiaries are converted at the exchange rate in effect at closing. The income statement items are converted using the average exchange rates for the period.

The resulting exchange gains and losses are directly recognized in shareholders' equity under “Foreign currency translation reserve”.

The following exchange rates were used during the 2016 and 2015 fiscal years:

USD – US Dollar	12/31/2016	12/31/2015
Closing rate	1.0541	1.0887
Average rate	1.1116	1.1166

Note 3: Intangible fixed assets, property, plant and equipment

3.1 Intangible fixed assets

Accounting principles

The intangible fixed assets mainly comprise licenses, software development and development expenditure.

Research and Development expenses

Research costs are charged to expenses.

In accordance with IAS 38, development expenses are recognized in intangible fixed assets only if all the following criteria are fulfilled:

a) necessary technical feasibility for the completion of the development project;

b) intent by the Company to complete the project;

c) ability of the Company to use this intangible asset;

d) demonstration of the probability of future economic benefits attached to the asset;

e) availability of technical, financial and other resources for the completion of the project; and

f) reliable evaluation of the development expenses.

Costs that are directly attributable to the production of the fixed asset can be capitalized, and they include:

- the costs of services used or consumed in order to generate the intangible fixed asset;
- the salaries and charges for the staff engaged in generating the asset.

The expenses are only capitalized with effect from the date on which the conditions for capitalization of the intangible fixed assets are fulfilled. The expenses cease to be recognized as assets when the intangible fixed asset is ready to be used. This end of development date is deemed to be that on which the regulatory registration (CE label or FDA approval) is achieved. The part of the research tax credit relating to these expenses is recognized as a deduction from assets.

Software

The costs related to the acquisition of software licenses are recognized as assets on the basis of the costs incurred to acquire and implement the software packages concerned.

Other intangible fixed assets

In application of the criteria of IAS 38, intangible fixed assets acquired are recognized as assets in the balance sheet at their acquisition cost.

Software (lease-financing)

Items held under finance leases as defined by IAS 17, which transfer to the Company substantially all the risks and benefits of ownership, are shown as balance sheet assets. The corresponding liability is reported under “Financial debts”.

Depreciation term and expense

Where the assets have a finite useful life, depreciation is calculated on a straight-line basis in order to spread the cost over the estimated useful life, namely:

Items	Amortization terms
Development expenses	5 years - Straight-line
Software licenses and development	1 to 3 years - Straight-line
Management and accounting software packages (SAP)	3 to 5 years - Straight-line

The depreciation and amortization charge for intangible fixed assets is recognized in profit and loss in the category:

- "general and administrative expenses" for software and accounting software packages;
- "research and development costs" and "cost of regulatory affairs and quality assurance" for the depreciation of capitalized development expenses (depending on the origin of the capitalized expense).

At December 31, 2016	**(0)**	**539**	**493,541**	**-**	**494,081**

Capitalized development costs relate mainly to the "Jazz" project.
Capitalized costs over the periods presented relate to the "Jazz Claw", "Jazz Lock" and "Madison Upgrade".
There has not been any indication of loss of value in application of IAS 36.

3.2 Property, plant and equipment

Accounting principles

Property, plant and equipment are valued at their cost of acquisition (purchase price and incidental expenses) or their cost of production by the Company.

Ancillary devices

Ancillary devices refers to specific surgical instruments for the fitting of implants. The latter are recognized under technical installations, equipment and tooling when they are delivered to healthcare facilities.

Where this is not the case, they are presented under inventories and are considered to be available for sale.

Software (lease-financing)

Items held under finance leases as defined by IAS 17, which transfer to the Company substantially all the risks and benefits of ownership, are shown as balance sheet assets. The corresponding liability is reported under "Financial debts".

Depreciation term and expense

Asset items are the subject of depreciation schedules determined according to the actual useful life of the asset.

The depreciation terms and methods used are principally the following:

Items	Amortization terms
Ancillary devices	3 years - Straight-line
Technical installations, equipment and tooling	5 to 10 years - Straight-line
General installations, fixtures & fittings	5 years - Straight-line
Transport equipment	5 years - Straight-line
Office and IT equipment	3 years - Straight-line
Furniture	4 to 7 years - Straight-line

The depreciation and amortization charge for property, plant and equipment is recognized in the income statement in the category:

- "general and administrative expenses" for the depreciation of installations, fixtures and miscellaneous improvements, office and IT equipment, furniture;
- "costs of operations" for the depreciation of storage machines (included in "technical installations, equipment and tooling");
- "cost of sales" for the depreciation of ancillary devices (or surgical instruments).

There has not been any indication of loss of value in application of IAS 36.

3.3 Impairment of intangible fixed assets and property, plant and equipment

Accounting principles

Assets with an indefinite useful life are not depreciated and are subject to an annual impairment test.

The depreciated assets are subject to an impairment test every time that there is any internal or external indication that an asset may have lost some of its value.

The impairment test consists of comparing the carrying amount of the tested asset with its recoverable value. The test is carried out at the level of the Cash Generating Unit (CGU), which is the smallest group of assets that includes the asset and whose continued use generates cash inflows largely independent of those generated by other assets or groups of assets.

A loss of value is recognized in respect of the excess of the carrying amount over the recoverable value of the asset. The recoverable value of an asset corresponds to its fair value less the costs of disposal or its value in use, if the latter is greater.

The fair value less the disposal costs is the amount that can be obtained from the sale of an asset via a transaction under normal market conditions between well-informed and consenting parties, less the disposal costs.

The value in use is the discounted value of the estimated future cash flows expected from the continued use of an asset and from its disposal at the end of its useful life. The value in use is determined using the estimated cash flows on the basis of five-year plans or budgets, the flows beyond this period being extrapolated using a constant or declining growth rate, and discounted using long-term market rates after tax, which reflect market estimates for the time value of money and the specific risks of the assets. The terminal value is determined based on the discounting to infinity of the last cash flow in the test.

Note 4: Other financial assets

Accounting principles

The Group's financial assets comprise:

- loans and receivables initially recognized at fair value, then assessed at the amortized cost using the effective interest rate method. Guarantee deposits are non-derivative financial assets with determined or determinable payments, which are not listed on an active market;
- financial assets at fair value through the income statement. They represent assets held for trading purposes. They are valued at their fair value and variations in fair value are recognized in profit or loss. Certain assets may also be the subject of voluntary classification in this category. This category includes medium-term marketable warrants and term deposits. This assets come under category 1 defined by IFRS 7.

Financial assets with maturity over one year are classified in "non-current financial assets" in accordance with IAS 1.

OTHER FINANCIAL ASSETS (Amounts in euros)	**12/31/2016**	**12/31/2015**
Term accounts	1,050,000	350,005
Medium-term notes (MTN)	306,374	305,128
Deposit - Kreos loan	-	190,735
Liquidity contract	40,004	91,615
Guarantees	46,269	48,466
Total other non-current financial assets	**1,442,647**	**985,949**
Medium-term notes (MTN)	-	5,309,067
Deposit - Kreos loan	190,735	
Total other current financial assets	**190,735**	**5,309,067**

Non-current financial assets comprise:

- Four term deposits with a total value of €1,050 thousand including:
  - One €200 thousand term deposit maturing in 2018, pledged in favor of Banque Courtois as security for the €500 thousand loan taken out in 2015 (see Note 10.4),
  - One €150 thousand term deposit, renewed every six months and pledged in favor of HSBC as security for the lease-back agreements in force with this bank,
  - One €700 thousand term deposit maturing in 2021 with early redemption possible;
- one negotiable medium-term note amounting to €306 thousand maturing in 2019, pledged as security for a lease-back agreement signed with Banque Courtois ending in 2017;
- the cash reserve related to the liquidity contract;
- sureties in respect of the commercial leases for its French and US premises.

The current financial assets comprise a guarantee deposit in favor of Kreos for €191 thousand as part of the implementation of the €5.0 million bond issue (see Note 10.3.1) with redemption expected in 2017.

Note 5: Inventories

Accounting principles

Inventories are measured using the weighted average unit cost method.

Inventories are recognized at the lower of their purchase cost or net realizable value. In the latter case, the loss in value is recognized in profit or loss.

Impairment

A provision for the impairment of inventories is determined based on the probable net realizable value of its inventories, which is calculated based on historical and forecast data: average consumption period for products in inventories and its potential impact on the term remaining until the expiry date of the said products. Impairment of inventories is recognized under the "operating expenses" category in the income statement.

INVENTORIES (Amounts in euros)	**12/31/2016**	**12/31/2015**
Inventories of raw materials	65,188	79,937
Inventories of goods for resale	3,480,120	3,268,146
Inventories of semi-finished products	9,172	15,372
Inventories of ancillary devices and instruments	530,673	660,218
Gross total inventories	**4,085,153**	**4,023,673**
Impairment of inventories of goods for resale	(468,814)	(488,019)
Impairment of stocks of ancillary devices and instruments	(61,192)	(67,124)
Total impairment of inventories	**(530,006)**	**(555,143)**
Net total inventories	**3,555,147**	**3,468,530**

This inventory of raw materials essentially comprises polymer components, reels of wire (manufacture of the Jazz braid), product manuals, RFID chips (Radio-frequency identification) and packaging.

The inventory of goods for sale principally comprises the various categories of implants for arthroscopy, spines and knees.

The inventory of ancillary devices and instruments comprises new equipment available for sale and not made available to healthcare facilities.

Accounting principles

Receivables are valued at their fair value, which corresponds to their nominal value. Where applicable, they are depreciated on a case-by-case basis by means of a provision to take account of difficulties in recovery to which they may be subject.

6.1 Trade receivables

Accounting principles

Factoring

Trade receivables are partially the subject of transfers under the terms of factoring contracts. In accordance with the provisions of IAS 39, this transfer does not give rise to derecognition since the Company retains substantially all the risks and benefits of the transferred assets. Consequently, the entirety of the transferred asset appears at the level of trade receivables and a current financial liability is recognized for the amount of the cash received.

Impairment

The Company's products are sold to public and private hospitals and to distributors.

The provision for impairment of customer receivables has been established on a case-by-case basis based on the estimated risk of non-recovery. It is presented under the "Sales, distribution and marketing" category in the income statement.

TRADE RECEIVABLES AND RELATED ACCOUNTS (Amounts in euros)	**12/31/2016**	**12/31/2015**
Trade receivables and related accounts	2,927,020	3,395,674
Impairment of trade receivables and related accounts	(419,689)	(857,042)
Net total of trade receivables and related accounts	**2,507,331**	**2,538,631**

The aging of the trade receivables is broken down as follows:

TRADE RECEIVABLES AND RELATED ACCOUNTS (Amounts in euros)	**12/31/2016**	**12/31/2015**
Not yet due	1,547,619	1,455,925
Due for less than 90 days	821,235	588,726
Due for between 90 days and 6 months	22,179	238,688
Due for between 6 and 12 months	36,517	165,927
Due for more than 12 months	499,470	946,408
Gross total trade receivables and related accounts	**2,927,020**	**3,395,674**

6.2 Other receivables

Accounting principles

Research tax credit

Research tax credits are granted to businesses by the French government to encourage them to carry out technical and scientific research. Businesses which can justify expenses which fulfill the required criteria benefit from a tax credit which can be used for the payment of corporation tax due in respect of the fiscal year in which the expenses were incurred and the following three fiscal years or, where applicable, the excess can be reimbursed.

Where there is no taxable net income and considering the Company's European Union SME status, the receivables due from the Government in respect of the research tax credit ("CIR") are payable in the year following that of their recognition.

The French research tax credit is recognized under assets in the year of acquisition corresponding to the fiscal year during which eligible expenses giving rise to the tax credit were incurred.

The research tax credit is presented in the income statement as a subsidy at the level of "Research and Development costs" or the "costs of regulatory affairs and quality assurance", depending on the origin of the expense.

Business competitiveness tax credit

The Business competitiveness tax credit ("CICE") is a French tax scheme. The Company used this tax credit in Research and Development.

Considering the Company's European Union SME status, the CICE may be repaid in the year following that of its recognition.

The CICE is recorded in the income statement as a deduction of payroll expenses.

OTHER RECEIVABLES (Amounts in euros)	**12/31/2016**	**12/31/2015**
Research tax credit (1)	202,970	225,193
Value added tax (2)	478,257	349,176
Employees and related accounts	19,516	18,282
Trade payable debit balances	15,324	24,679
Business competitiveness tax credit (4)	41,577	37,019
Prepaid expenses (3)	197,979	106,311
Miscellaneous	12,236	16,049
Total other receivables	**967,859**	**776,710**

(1) Research tax credit ("CIR")

- CIR 2016: €202,970 repayment expected in 2017
- CIR 2015: €225,193, repaid in November 2016

(2) VAT receivables relate mainly to deductible VAT and the refund of VAT claimed.

(3) Prepaid expenses relate to current expenditure and break down as follows:

PREPAID EXPENSES (Amounts in euros)	**12/31/2016**	**12/31/2015**
Leases	73,703	37,408
Insurance policies	17,227	6,437
IT Maintenance	8,021	12,387
Fees	69,382	-
Conferences	18,189	17,320
Miscellaneous	11,457	32,759
Total prepaid expenses	**197,979**	**106,311**

(4) Business competitiveness tax credit ("CICE")

- CICE 2016: €41,577 repayment expected in 2017
- CICE 2015: €37,019, repaid in July 2016

Note 7: Cash and cash equivalents

Accounting principles

The cash and cash equivalents recognized in the balance sheet include bank balances, cash on hand and short-term deposits with an initial maturity of less than three months.

Cash equivalents are made up of term deposits. Cash equivalents are held for transactional purposes, are easily convertible into a known cash amount and are subject to negligible risk of change in value. They are valued at fair value and any variations in value are recognized in financial net income. This assets come under category 1 defined by IFRS 7.

For the requirements of the cash flow statement, the net cash balances include cash and cash equivalents as defined above as well as bank overdrafts.

CASH AND CASH EQUIVALENTS (Amounts in euros)	**12/31/2016**	**12/31/2015**
Bank accounts	5,767,399	1,150,232
Term accounts	300,000	-
Total cash and cash equivalents	**6,067,399**	**1,150,232**

Note 8: Capital

Accounting principles

The incidental costs directly attributable to the issue of shares or share options are recognized as a deduction from shareholder's equity.

Liquidity contract

The part of the contract that is invested in the Company's treasury shares by this service provider is recognized as a deduction from the Group's consolidated shareholders' equity for their acquisition cost. Income from the disposal of these treasury shares is also recognized directly in shareholders' equity. The cash reserve related to the liquidity contract is presented under "Other non-current financial assets".

8.1 Issued capital

COMPOSITION OF THE SHARE CAPITAL	12/31/2016	12/31/2015
Capital (in euros)	14,913,542.70	15,887,398.50
Number of shares	21,305,061	10,591,599
of which ordinary shares	21,305,061	10,591,599
Nominal value (in euros)	€ 0.70	€ 1.50

The share capital is fixed at the sum of €14,913,542.70. It is divided into 21,305,061 ordinary shares which are fully subscribed and paid up with a nominal value of €0.70.

This number is stated exclusive of share subscription warrants (BSAs), Founders' warrants (BSPCEs) and stock options granted to certain investors and individuals, whether employees or not of the Company, and which have not yet been exercised.

The General Shareholders' Meeting of May 24, 2016 decided to carry out:

- The allocation of retained earnings on issue premiums for €15,074 thousand;
- A capital decrease by an amount of €8,589 thousand as a result of losses by reducing the nominal value of the shares to €0.70;
- The constitution of an unavailable special reserve resulting from the capital decrease for €4,593 thousand.

In November 2016, the Company carried out a capital increase with preferential subscription rights, through the issue of 9,833,105 new shares with a nominal value of €0.70 giving a total increase of €6,883 thousand.

In accordance with the provisions of IAS 32, the costs relating to this share issue, amounting to €943 thousand, were charged against the equity.

During the 2016 fiscal year, 113 bonds held by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND (see Note 10.3.2) were converted into shares generating the issue of 144,853 shares with a nominal value of €1.50 and 735,504 shares with a nominal value of €0.70, i.e. a capital increase of €732 thousand and an issue premium of €398 thousand.

8.2 Management of capital

The Company's policy consists of maintaining a solid capital base, in order to maintain the confidence of investors and creditors and to support the future development of the business.

Following its listing on the Paris Euronext stock market, the Company signed a liquidity contract on November 20, 2013 with Banque Oddo et Cie in order to limit the intra-day volatility of Implanet shares. For this purpose, the Company entrusted €400,000 to this institution in order that the latter can take long or short positions in the Company's shares.

At December 31, 2016, 136,500 treasury shares were recognized as a deduction from shareholders' equity.

8.3 Equity line of credit with Kepler Cheuvreux

The Company opened an optional equity line of credit with Kepler Cheuvreux on July 9, 2014. Implanet had the option to ask Kepler to subscribe for new shares, within the overall limit of 530,000 shares. Kepler Cheuvreux had made a firm subscription undertaking at the exclusive request of Implanet.

The Company did not use this line of credit during the fiscal years presented and it expired in July 2016.

8.4 Distribution of dividends

The Company did not distribute any dividends during the fiscal years presented.

Note 9: Share-based payments

Accounting principles

Since its creation, the Company has put in place several equity-settled remuneration plans in the form of share subscription warrants (BSAs), founders' warrants (BSPCEs) and stock options.

In application of IFRS 2, the cost of equity-settled transactions is recognized as an expense over the period during which the rights to benefit from the equity instruments are acquired, and offset against an increase in shareholders' equity.

Since the creation of the Company, it has applied IFRS 2 to all equity instruments granted to employees, executives, members of the Board of Directors or to individuals supplying services to it, such as consultants.

The fair value of the share subscription warrants granted to employees is determined using the Black & Scholes option valuation model. The same is true for options granted to other individuals supplying similar services, the market value of the latter not being determinable.

Share subscription warrants (BSAs)

The table below summarizes the data related to the plans issued, as well as the assumptions used for the valuation in accordance with IFRS 2:

Type	Award date	Features of the plans				Assumptions used		
		Total number of options awarded	Exercise period	Initial exercise price	Adjusted exercise price (1) (2) (3)	Volatility	Risk-free rate	Total initial valuation, IFRS2 (Black&Scholes)
BSA 09/11	AGM of 09/26/2011	**60,000**	10 years	€1.00	€8.21	37.90%	1.69%	**€17,413**

(1) Following the reverse share split decided on by the extraordinary General Shareholders' Meeting of July 19, 2013, ten warrants awarded prior to this date give the right to subscribe to one share.

(2) Following the capital increase with preferential subscription rights in March 2015, the warrants were adjusted to parity at 1.16 (Board of Directors' decision of March 18, 2015).

(3) Following the capital increase with preferential subscription rights in November 2016, the warrants were adjusted to parity at 1.05 (Board of Directors' decision of November 17, 2016).

The vesting period for the plans issued is as follows:

Type	Vesting period			12/31/2016	
				Number of exercisable warrants	Number of warrants in the process of being vested
BSA 09/11				60,000	-
BSA 05/12				10,245	-
BSA 2012	All options on award date			40,000	-
BSA 09/2012				100,000	-
BSA 01/2013				25,000	-

Note 10: Loans and financial debts

Accounting principles

Unless otherwise indicated, loans and financial debts are recognized at amortized cost, calculated using the effective interest rate in accordance with IAS 39.

The fraction which are due in more than one year is recognized in “non-current financial debts” whilst the share due in less than one year is recognized in “current financial liabilities”.

CURRENT AND NON-CURRENT FINANCIAL LIABILITIES (Amounts in euros)	**12/31/2016**	**12/31/2015**
Financial debts - finance leases (1)	85,952	297,853
Reimbursable advances and interest-free loans	695,134	84,944
Bond issue (2)	-	1,084,240
Derivatives liabilities, Kréos	-	154
Loans from financial institutions (3)	85,373	253,647
Non-current financial debts	**866,459**	**1,720,839**
Financial debts - finance leases (1)	292,438	295,433
Reimbursable advances and interest-free loans	87,625	78,309

10.2 Repayable advances and interest-free loans

Accounting principles

The Company benefits from a certain amount of government aid, in the form of subsidies, conditional advances or interest-free loans.

It is recognized in accordance with IAS 20. Since it consists of financial aid granted at interest rates lower than those of the market, they are valued at amortized cost in accordance with IAS 39:

- The rate advantage is determined by using a discount rate corresponding to a market rate at the date of the grant. The amount resulting from the rate advantage obtained at the time these aids are granted is considered to be a subsidy recognized in income in the statement of comprehensive income;
- The financial cost of the repayable advances/interest-free loans calculated at market rates is subsequently recognized in financial expenses.

In the event of a bad debt, the waiver of the receivable is recognized as a subsidy in the income statement.

Reimbursable OSEO Innovation advance – Knee

On February 25, 2010, OSEO granted Implanet an interest-free repayable innovation loan of €350,000 to "develop a three-compartment knee prosthesis for first-line treatment and the related instruments".

The payments from OSEO were made in stages between the signature of the contract and the end of the project, the principal stages being:

- first payment of €280,000 following the signature of the contract (received on March 1, 2010);
- the balance on completion of the work on May 9, 2011.

Following the technical and commercial success of the project, the reimbursement of this innovation subsidy has begun in accordance with the following schedule:

- €12,500 per quarter in 2013 on the last day of the quarter;
- €15,000 per quarter in 2014 on the last day of the quarter;
- €17,500 per quarter in 2015 on the last day of the quarter;
- €20,000 per quarter in 2016 on the last day of the quarter;
- €22,500 per quarter in 2017 on the last day of the quarter.

Under IFRS, the fact that the Group benefited from an interest-free loan means it is treated as a subsidy. The difference between the amount of the loan at the historic cost and that of the advance discounted at a market rate (3-month Euribor + 2.5 points = 3.16%) is considered to be a subsidy received from the Government.

BPI France interest-free loan for innovation – Jazz braid implant

In June 2016, the Company obtained Bpifrance's agreement for an interest-free loan for innovation of €800 thousand for the "development and clinical assessment of the Jazz braid implant for degenerative spinal surgery (particularly the securing or replacement of pedicle screws)". The funds were received by the Company on August 19, 2016, after deduction of the processing costs of €24 thousand.

This loan has the following characteristics:

- Deferred redemption of 3 years;
- Redemption of €40,000 per quarter from July 31, 2019 until April 30, 2024.

Under IFRS, the fact that the interest-free loan is more favorable than market conditions means that it is treated as a subsidy for the Group. The difference between the amount of the advance at the historic cost and that of the advance discounted at a market rate (3-month Euribor + 2.5 points = 2.20%) is considered to be a subsidy received from the Government.

10.3 Convertible bond issues

Accounting principles

Financial instruments (BSA and bond conversion options) are subject to specific analysis.

Where these financial instruments provide for the exchange of a fixed number of shares against a fixed number of treasury shares, they are classified as equity instruments under IAS 32.

Where the analysis carried out led to the conclusion that it is impossible to classify these instruments as equity instruments and that the variable is financial, these were classified as derivative liabilities coming under the scope of IAS 39. They are recognized under derivative liabilities at fair value on the issue date, with the fair value being determined using the Black & Scholes valuation model. The variations in this fair value are recognized in financial net income. This liabilities come under category 3 defined by IFRS 7.

10.3.1 Issue of bonds to KREOS for a total amount of €5,000 thousand

Initial agreement

On July 19, 2013, the Company concluded a venture loan agreement with KREOS CAPITAL IV (UK) LTD ("KREOS"), which took the place of a master agreement organizing the subscription by KREOS of a bond issue of €5.0 million, the issue of 65,000 Company warrants in favor of KREOS and the pledge of the Company's goodwill in favor of KREOS.

These transactions were implemented as follows:

- the €5,000,000 bond, by issuing 5,000,000 non-convertible bonds with a nominal value of €1 each to KREOS was approved at the Company's Board of Directors' Meeting of July 19, 2013 and wholly subscribed by KREOS on July 24, 2013;

- the free issue of 65,000 share subscription warrants (BSAs) for shares in the Company to KREOS was resolved by the extraordinary General Shareholders' Meeting of July 19, 2013. These share subscription warrants (BSAs) have the following characteristics:
    - number of shares to be issued: 65,000
    - subscription price: €7.20
    - terms and conditions of exercise: the BSAs will be exercisable (and shall expire concomitantly) until the earlier of the following two events occurring:
        - the exercise of one or more transfers of Company shares which would cause any person to hold at least ninety-five percent (on a fully diluted basis) of the Company's share capital; or
        - the end of a period of five (5) years from the date of initial listing of all or part of the Company's shares on a regulated market or a French or foreign stock exchange.

- the Company's goodwill and intellectual property was pledged on July 19, 2013.

The Company incurred €112,500 in lawyers' and consultants' fees at the time the bond contract was arranged. €72,500 of the costs are payable on the maturity date.

Amendment to the venture loan agreement

On April 16, 2015, the Company and KREOS CAPITAL IV (UK) LTD concluded an amendment to the venture loan agreement dated July 19, 2013, by which the parties decided to reschedule the abovementioned bond issue as follows:

- the term of the contract is increased from 36 to 54 months;
- the fixed monthly installment (capital and interest) is reduced from €190,735.43 to €94,160.22;
- the annual interest rate remains at 11.5%.

On April 24, 2015, the Company also entered into an agreement to issue 18,473 share subscription warrants to KREOS, validated by the General Shareholders' Meeting of June 24, 2015. These share subscription warrants (BSAs) have the following characteristics:

- number of shares to be issued: 18,473
- subscription price: €2.91
- terms and conditions identical to those for the 2013 KREOS share subscription warrants

The Company incurred €5,130 in lawyers' fees when the amendment was signed.

Valuation

Debt is valued using the amortized cost method. Costs incurred and discounts relating to the 2013 and 2015 warrants were taken into account in the effective interest rate of the bond issue. The effective interest rate of the bond issue thus amounts to 14.87%.

The 2013 warrants (BSAs) are recognized in derivative liabilities at fair value, with variations in this fair value recognized in profit or loss in accordance with IAS 39.

The fair value was determined using the Black & Scholes valuation model under the following assumptions:

BSA 2013 - Valuation assumptions	**12/31/2016**	**12/31/2015**
Number of BSA outstanding	65,000	65,000
Number of subscribable shares	79,170 (1) (2)	75,400 (1)
Exercise price	€5.90	€6.20
Anticipated term	1 year	2 years
Volatility	38.31%	28.77%
Risk-free rate	-0.82%	-0.35%
Value of derivative (in euros)	**-**	**154**

(1) Following the capital increase with preferential subscription rights in March 2015, the warrants were adjusted to parity at 1.16 (Board of Directors' decision of March 18, 2015).

(2) Following the capital increase with preferential subscription rights in November 2016, the warrants were adjusted to parity at 1.05 (Board of Directors' decision of November 17, 2016).

After analysis with regard to IAS 32, the 2015 warrants were recognized as equity instruments at fair value on the issue date.

The fair value was determined using the Black & Scholes valuation model under the following assumptions:

BSA 2015 - valuation assumptions	**On issue**
Number of BSA	18,473
Exercise price	€2.91
Anticipated term	2.5 years
Volatility	30.58%
Risk-free rate	-0.16%
Value of equity instrument (in euros)	**11,299**

10.3.2 Issue of Convertible bonds with warrants attached ("OCABSAs") in favor of L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND

On October 12, 2015, the Company entered into an OCABSA contract with L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND, enabling the Company potentially raise €5 million at its discretion.

The OCAs have the following characteristics:

- Nominal value: €10,000
- Subscription price: 99% of par value
- Maturity: 12 months
- No interest

- Conversion terms: N = Vn/P where
  - N is the number of shares that can be subscribed;
  - Vn is the value of the bond receivable;
  - P is 92% of the lowest of the 10 average daily prices quoted weighted by the volumes of the Company's share immediately preceding the conversion application date, and as a minimum equal to the nominal value of the share (€0.70).

The Board of Directors decided the issue of:

- an initial tranche of 100 OCABSAs with a total value of €1.0 million on October 12, 2015,
- a second tranche of 35 OCABSAs with a total value of €350 thousand on June 29, 2016,
- a third tranche of 25 OCABSAs with a total value of €250 thousand on July 29, 2016.

The Company may issue 340 additional warrants to L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND, which may give rise to a bond issue of a maximum additional amount of €3.4 million subject to the following:

- That direct and indirect investments by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND in the Company's capital do not exceed 3% of the capital and voting rights given the number of potential shares resulting from the conversion of convertible bonds,
- That both the closing price and weighted average price over the five trading days preceding the issue request are at least €1.10.

In accordance with IAS 39, debt is valued using the amortized cost method.

The conversion option is recognized in derivative liabilities at fair value, with variations in this fair value recognized in profit or loss.

On June 10, 2015, the Company took out a loan with Banque Courtois.

The main characteristics of the loan are as follows:

- Nominal value: €500,000
- Term: 3 years
- Interest rate: 1.95% per year
- Interest paid quarterly in arrears.

Breakdown of loans with financial institutions by maturity date, in redemption value

BANK LOANS BY MATURITY (Amounts in euros)	Bank loans
At December 31, 2016	**253,647**
Part due in less than one year	168,274
Part due between 1 and 5 years	85,373
Part due in more than 5 years	-

Note 11: Commitments to employees

Accounting principles

The French employees of the Company are entitled to retirement benefits provided for under French law:

- a retirement benefit, paid by the Company at the time of their retirement (defined benefit plan);
- payment of retirement pensions by the Social Security bodies, which are financed by contributions from businesses and employees (defined contribution plan).

Retirement plans, related payments and other company benefits which are classified as defined benefit plans (plans in which the Company undertakes to guarantee a defined amount or level of benefit) are recognized in the balance sheet on the basis of an actuarial valuation of the commitments at the year-end date, after deduction of the fair value of the related plan assets dedicated to them.

This valuation is based on the projected unit credit method, taking into account the staff turnover and mortality rates. Any actuarial variances are recognized in shareholders' equity, under "Other comprehensive income".

The Company's payments for defined contribution plans are recognized as expenditure in the income statement for the period to which they relate.

The provisions for retirement benefits are valued on the basis of the provisions set out in the applicable collective agreement, namely the collective agreement for the metallurgy industry, and only concern employees that come under French law.

The main actuarial assumptions used for evaluation of the retirement benefits are the following:

ACTUARIAL ASSUMPTIONS	12/31/2016		12/31/2015	
	Managers	Non managers	Managers	Non managers
Retirement age	Voluntary departure between ages 65 and 67			
Collective agreements	Metallurgy Engineers and Managers	Metallurgy Gironde Landes	Metallurgy Engineers and Managers	Metallurgy Gironde Landes
Discount rate (IBOXX Corporates AA)	1.31%		2.03%	
Mortality table	INSEE 2015		INSEE 2015	
Rate of revaluation of salaries	2.00%		2.00%	
Rate of turnover	Average (AG2R table)		Average (AG2R table)	
Rate of Social Security charges	52%	47%	53%	47%

The provision for retirement commitments has changed as follows:

AMOUNTS DUE TO PERSONNEL (Amounts in euros)	**Retirement benefits**
At December 31, 2014	**74,628**
Past service costs	13,102
Financial costs	1,112
Actuarial differences	(5,938)
At December 31, 2015	**82,905**
Past service costs	11,467
Financial costs	1,493
Actuarial differences	4,760
At December 31, 2016	**100,626**

Note 12: Provisions

Accounting principles

Provisions correspond to commitments resulting from various disputes and liabilities, for which the due date and the amount are uncertain, with which the Company may be confronted during the course of its business.

A provision is recognized where the Company has an obligation to a third party arising from a past event which is likely to result in an outflow of resources in favor of this third party, without a consideration which is at least equivalent expected from latter, and where future outflows of liquidity can be reliably estimated. The amount recognized as a provision is the estimate of the expenses necessary for the settlement of the obligation, discounted if necessary at the year-end date.

Disputes and liabilities

the Company may be involved in judicial, administrative or regulatory proceedings during the ordinary course of its activities. A provision is recognized by the Company where there is a sufficient probability that such disputes may lead to costs for the Company.

Employment tribunal disputes

The amounts provisioned are estimated on a case-by-case basis based on the risks incurred to date by the Company, on the basis of claims, legal obligations and lawyers' opinions.

PROVISIONS (Amounts in euros)	12/31/2016				
	Amount at start of year	Allocations	Reversals	Release of surplus provisions	Amount at year end
Provisions for legal disputes	55,000				55,000
Total provisions for liabilities and expenses	**55,000**	-	-	-	**55,000**

PROVISIONS (Amounts in euros)	12/31/2015				
	Amount at start of year	Allocations	Reversals	Release of surplus provisions	Amount at year end
Provisions for legal disputes	-	55,000			55,000
Total provisions for liabilities and expenses	-	**55,000**	-	-	**55,000**

Note 13: Current liabilities

Accounting principles

The fair value of current liabilities is deemed to be their balance sheet value, in view of the very short payment maturities.

13.1 Tax and social security liabilities

TAX AND SOCIAL SECURITY LIABILITIES (Amounts in euros)	12/31/2016	12/31/2015
Employees and related accounts	344,921	163,385
Social Security and other social bodies	363,681	353,295
Other taxes, duties and similar payments	42,429	43,767
Total tax and social security liabilities	**751,031**	**560,447**

13.2 Other current liabilities

OTHER CURRENT LIABILITIES (Amounts in euros)	12/31/2016	12/31/2015
Directors' fees due to members of the Board of Directors	20,360	7,500
Miscellaneous	1,697	10,225
Total other current liabilities	**22,057**	**17,725**

Note 14: Financial assets and liabilities and effects on net income

Accounting principles

The Company has distinguished three categories of financial instruments based on the consequences which their characteristics have on their method of valuation and uses this classification to set out certain information required under IFRS 7:

- level 1 category: financial instruments which are listed on an active market;
- level 2 category: financial instruments for which valuation uses valuation techniques based on observable parameters;
- level 3 category: financial instruments for which valuation uses valuation techniques based in full or in part on non-observable parameters; a non-observable parameter is defined as a parameter from which the value results from assumptions or correlations which are not based on the price of observable market transactions, on the same instrument on the date of valuation, nor on observable market data available on the same date.

The Company's assets and liabilities are valued as follows at the end of the fiscal years presented:

BALANCE SHEET HEADINGS (Amounts in euros)	**12/31/2016**		**Value - statement of financial position in accordance with IAS 39**		
	Value Statement of financial position	**Fair Value**	**Fair value through the income statement**	**Loans and receivables**	**Liabilities at amortized cost**
Non-current financial assets	1,442,647	1,442,647	1,356,374	86,273	
Trade receivables and related accounts	2,507,331	2,507,331		2,507,331	
Other receivables	967,859	967,859		967,859	
Current financial assets	190,735	190,735		190,735	
Cash and cash equivalents	6,067,399	6,067,399	300,000	5,767,399

Total liabilities	**5,865,961**	**5,865,961**	**120,418**	**-**	**5,745,543**

IMPACTS ON THE INCOME STATEMENT (Amounts in euros)	12/31/2016		12/31/2015	
	Interest	Changes in fair value	Interest	Changes in fair value
Assets				
Assets at fair value through the income statement		6,374		14,200
Loans and receivables	23,134		52,818	
Cash and cash equivalents				-
Liabilities				
Derivative liabilities		(118,893)		(35,774)
Liabilities valued at amortized cost: bond issues	652,532		641,175	
Liabilities valued at amortized cost: advances	11,327		6,474	

Note 15: Revenues

Accounting principles

Income from ordinary activities corresponds to the fair value of the consideration received or to be received in respect of the goods sold during the ordinary course of the Company's business. The income from ordinary activities is shown net of value added tax, product returns, rebates and discounts.

The Company recognizes income when the amount can be estimated reliably, when it is probable that the future economic benefits will accrue to the Company and when the specific criteria are fulfilled for the Company's business.

The Company's income results from the sale of orthopedic implants.

The recognition of income depends on the nature of the sales made by the Company:

- **Export sales to distributors:** the transfer of title and the recognition of income occur at the time of collection of the merchandise from Implanet (Incoterms: EXWORKS). Contracts do not include specific clauses for returns;

- **Sales in France to hospitals and clinics:** the invoicing and recognition of income take place at the time of the effective fitting of the implant to a patient, based on information provided by the healthcare facilities.

- **Sales in France to distributors:**
  - instruments and a set of implants are provided to healthcare facilities (instruments in Implanet's fixed assets and implants in consigned inventory);
  - invoicing to distributors and the recognition of income take place on the date of the fitting of the implants, generating restocking from consignment stock.

- **Sales in France and USA via sales agents:**
  - invoicing of healthcare facilities and the recognition of income are carried out directly by Implanet on receipt of the information related to the fitting of implants;
  - agents' commission is recognized under "Sales, distribution and marketing expenses", at the same time as in the income statement.

Revenues by region and type of products is as follows:

REVENUES BY REGION (Amounts in euros)	**12/31/2016**	**12/31/2015**
France	3,871,226	2,852,681
Brazil	864,624	1,755,699
United States	2,047,514	1,203,200
Rest of the World	1,041,573	841,795
Total revenue	**7,824,938**	**6,653,374**

REVENUES BY TYPE OF PRODUCTS (Amounts in thousands of euros)	**12/31/2016**	**12/31/2015**
Spinal	4,102	2,806
Knee + Arthroscopy	3,723	3,847
Total revenue	**7,825**	**6,653**

With regard to the concentration of credit risk, two distributors each account for more than 10% of consolidated revenue at December 31, 2016: one France distributor (23%)and one Export distributor (11%).

Note 16: Operating expenses

Accounting principles

The Company presents its income statement by intended use.

16.1 Cost of sales

COST OF SALES (Amounts in euros)	**12/31/2016**	**12/31/2015**
Purchases of raw materials and goods	(3,196,912)	(3,314,474)
Depreciation and amortization of ancillary devices	(647,171)	(755,590)
Cost of sales	**(3,844,083)**	**(4,070,063)**

16.2 Sales, distribution & marketing

SALES, DISTRIBUTION AND MARKETING (Amounts in euros)	12/31/2016	12/31/2015
Materials and supplies not for stock	(86,249)	(181,813)
Vehicle leases	(50,706)	(68,590)
Miscellaneous rentals	(5,097)	(8,517)
Hardware, equipment and works	(6,246)	(17,534)
Insurance policies	(122,674)	(79,104)
Intermediary compensation Fees	(318,102)	(381,108)
Advertising	(139,347)	(222,927)
Transport	(7,234)	(3,067)
Travel, assignments and entertaining	(785,641)	(579,559)
Duties and taxes	(2,673)	(3,167)
Payroll expenses	(2,019,078)	(1,623,799)
Depreciation and amortization of fixed assets	(28,221)	(44,039)
Share-based payments	(97,861)	(124,624)
Provisions for legal disputes/reversal	-	(45,000)
Royalties	(201,824)	(115,596)
Sales commission	(1,142,897)	(678,871)
Allocations/reversals of provisions for impairment of trade rece	440,248	(276,488)
Loss on bad debts	(517,065)	-
Miscellaneous	(13,853)	(26,535)
Sales, distribution and marketing expenses	**(5,104,520)**	**(4,480,338)**

16.3 Research and Development

RESEARCH AND DEVELOPMENT (Amounts in euros)	12/31/2016	12/31/2015
Vehicle leases	(27,954)	(42,812)
Hardware, equipment and works	(16,160)	(11,961)
Studies and research	(102,353)	(167,342)
Intellectual property fees	(289,930)	(160,704)
Travel, assignments and entertaining	(31,666)	(37,227)
Duties and taxes	(4,628)	(633)
Payroll expenses	(587,542)	(631,151)
Capitalization of R&D expenses	51,924	233,211
Depreciation and amortization of capitalized R&D expense	(124,607)	(100,796)
Depreciation and amortization of fixed assets	(2,306)	(2,260)
Share-based payments	(14,860)	(19,197)
Miscellaneous	(6,153)	(5,703)
Research and Development expenses	**(1,156,235)**	**(946,574)**
Research tax credit	198,742	215,057
Advances and OSEO loan	87,821	-
Subsidies	**286,563**	**215,057**
Research and development costs, net	**(869,671)**	**(731,517)**

The research and development expenses relate to innovative new applications for Jazz, particularly for the treatment of other pathologies.

16.4 Regulatory affairs and quality assurance

REGULATORY AFFAIRS AND QUALITY ASSURANCE (Amounts in euros)	12/31/2016	12/31/2015
Materials and supplies not for stock	(59,275)	(79,819)
Miscellaneous rentals	(775)	(1,015)
Studies and research	(143,776)	(190,364)
Intermediary compensation Fees	(127,376)	(200,315)
Travel, assignments and entertaining	(4,351)	(8,104)
Payroll expenses	(506,682)	(395,696)
Capitalization of R&D expenses	19,000	39,739
Depreciation and amortization of capitalized R&D expense	(67,873)	(63,963)
Depreciation and amortization of fixed assets	(21,186)	(15,763)
Share-based payments	(865)	(3,238)
Miscellaneous	(7,134)	(32,064)
Regulatory affairs and quality assurance costs	**(920,293)**	**(950,602)**
Research tax credit	4,228	10,136
Subsidies	**4,228**	**10,136**
Regulatory affairs and quality assurance costs, net	**(916,065)**	**(940,466)**

16.5 Operations

OPERATING COSTS (Amounts in euros)	12/31/2016	12/31/2015
Materials and supplies not for stock	(13,088)	(16,241)
Real estate leases	(134,868)	(135,893)
Vehicle leases	(12,898)	(12,297)
Miscellaneous rentals	(4,631)	(1,877)
Hardware, equipment and works	(40,278)	(37,943)
Transport	(50,429)	(34,811)
Travel, assignments and entertaining	(2,379)	(6,977)
Payroll expenses	(490,684)	(609,606)
Depreciation and amortization of fixed assets	(75,057)	(117,497)
Share-based payments	(8,617)	(7,893)
Allocation/reversal of provision for impairment of inventories	27,278	204,914
Scrapping campaign	(267,594)	-
Miscellaneous	(15,400)	(15,574)
Operating costs	**(1,088,644)**	**(791,697)**

The cost of "operations" includes:

- management of procurement, logistics and inventories;
- lease and maintenance of the logistics building;
- sales administration.

Scrapping campaigns were recorded in the cost of sales up to December 31, 2015 and represented €143 thousand in 2015. From the 2016 fiscal year, they are recorded in operating costs, consistent with the recording of the variations in the impairment of inventories and represented €268 thousand in 2016. Scrapping carried out in 2016 concerned products that had been partly impaired at December 31, 2015.

16.6 General and administrative expenses

GENERAL AND ADMINISTRATIVE EXPENSES (Amounts in euros)	12/31/2016	12/31/2015
Materials and supplies not for stock	(67,488)	(60,452)
Real estate leases	(197,874)	(201,233)
Vehicle leases	(16,083)	(34,769)
Miscellaneous rentals	(12,283)	(72,879)
Hardware, equipment and works	(135,050)	(225,252)
Insurance policies	(226,645)	(227,921)
Intermediary compensation Fees	(818,803)	(988,393)
Advertising	(9,797)	(29,709)
Travel, assignments and entertaining	(150,236)	(286,101)
Postal and telecommunication expenses	(64,513)	(66,904)
Banking services	(97,823)	(33,037)
Duties and taxes	(49,960)	(98,802)
Payroll expenses	(931,507)	(984,195)
Attendance fees	(16,500)	(18,000)
Depreciation and amortization of fixed assets	(39,387)	(71,723)
Share-based payments	(33,985)	(16,203)
Gain on lapsed trade payable	-	201,388
Provisions for legal disputes/reversal	-	(10,000)
Miscellaneous	(14,715)	(47,261)
General and administrative expenses	**(2,882,649)**	**(3,271,443)**

Note 17: Headcount

The table below indicates the structure as well as the changes in headcount within the Group during the periods presented:

AVERAGE HEADCOUNT	12/31/2016	12/31/2015
Managers	33.3	29.6
Employees	19.7	16.8
Total average headcount	**53.0**	**46.4**

In addition, the breakdown of the headcount by geographic region during the periods presented is as follows:

AVERAGE HEADCOUNT BY GEOGRAPHIC REGION	12/31/2016	12/31/2015
France	43.7	40.3
United States	9.4	6.1
Total average headcount	**53.0**	**46.4**

Note 18: Financial income and expenses, net

Accounting principles

Financial net income includes all:

- Expenses related to the financing of the Company: amortized cost of debts, changes in the fair value of derivatives, interest on finance leases and accretion of repayable advances and loans for innovation;
- Income related to interest received on financial investments.

Any foreign exchange gains or losses are also recognized in financial net income.

FINANCIAL INCOME AND EXPENSES (Amounts in euros)	**12/31/2016**	**12/31/2015**
Amortized cost of loans	(652,532)	(641,175)
Changes in the fair value of derivative liabilities	210,834	35,774
Other financial expenses	(29,180)	(29,468)
Financial income	15,308	57,630
Foreign exchange gains and (losses)	48,361	201,828
Total financial income and expenses	**(407,210)**	**(375,411)**

Note 19: Corporate income tax

Accounting principles

The tax assets and liabilities payable for the fiscal year and the previous fiscal years are valued at the amount which the Company expects to recover from or pay to the tax authorities.

The tax rates and the tax regulations used for determining these amounts are those which have been adopted or are in the course of adoption at the year-end date.

Deferred taxes are recognized, using the balance sheet liability method, for all temporary differences existing at the year-end date between the tax base of assets and liabilities and their carrying amount on the balance sheet, as well as on tax losses carried forward.

The principal temporary differences are related to the tax losses carried forward.

Deferred tax assets are recognized in respect of tax losses that may be carried forward when it is probable that the Company will have future taxable profits to which these unused fiscal losses can be allocated. The determination of the amount of the deferred tax assets which can be recognized requires the management to make estimations both concerning the period during which the tax losses will be used and the level of future taxable profits, with regard to its tax management strategies.

The total amount of the tax losses at December 31, 2016 is estimated at €62,762 thousand comprising:

- French tax losses which can be carried forward indefinitely, for €57,139 thousand.
- Tax losses of the US subsidiary for USD 5,927 thousand of which:
  - USD 1,901 thousand constituted in 2016, with expiry in 2036;
  - USD 2,293 thousand constituted in 2015, expiring in 2035;
  - USD 1,631 thousand constituted in 2014, with expiry in 2034;
  - USD 102 thousand constituted in 2013, expiring in 2033.

The tax rate applicable to:

- Implanet SA is the current rate in force in France, namely 33.33%;
- Implanet America Inc. is 40.6%.

Reconciliation between the theoretical and effective tax charges

TAX PROOF (Amounts in euros)	**12/31/2016**	**12/31/2015**
Total net income/(loss)	(7,287,904)	(8,007,562)
Consolidated tax expense	-	-
Net income before taxes	**(7,287,904)**	**(8,007,562)**
Current tax rate in France	33.33%	33.33%
Theoretical tax expense at the current rate in France	**2,429,058**	**2,668,920**
Permanent differences	60,620	493,440
Share-based payments	(52,063)	(57,051)
Non-activated tax loss adjusted for deferred taxation	(2,567,220)	(3,363,493)
Differences due to tax rates	129,605	258,184
Tax expense/income for the Group	**-**	**-**
Effective tax rate	**0%**	**0%**

The permanent differences include the impact of the research tax credit (operating income which is not taxable).

Nature of the deferred taxes

NATURE OF DEFERRED TAXES (Amounts in euros)	**12/31/2016**	**12/31/2015**
Timing differences	766,693	546,506
Losses carried forward	21,327,029	18,953,568
Total of the items treated as deferred tax assets	**22,093,722**	**19,500,073**
Timing differences	501,080	480,289
Total of the items treated as deferred tax liabilities	**501,080**	**480,289**
Net total of the items treated as deferred taxes	**21,592,641**	**19,019,784**
Unrecognized deferred taxes	**(21,592,641)**	**(19,019,784)**
Net total of deferred taxes	**-**	**-**

Note 20: Net earnings per share

Accounting principles

Basic earnings per share are calculated by dividing the net income attributable to holders of the Company's shares by the weighted average number of ordinary shares in circulation during the period.

Diluted earnings per share are determined by adjusting the net income attributable to holders of ordinary shares and the weighted average number of ordinary shares in circulation for the impact of all potentially dilutive ordinary shares.

If the inclusion of instruments giving a deferred right to the capital (BSAs, BSPCEs, stock options, etc.) within the calculation of diluted earnings per share generates an anti-dilutive effect, these instruments are not taken into account. Accordingly, the diluted earnings per share are identical to the basic earnings per share.

BASIC EARNINGS PER SHARE (Amounts in euros)	**12/31/2016**	**12/31/2015**
Net income for the year	(7,287,904)	(8,007,562)
Weighted average number of shares in circulation	18,542,024	9,692,216
Basic earnings per share (€/share)	**(0.39)**	**(0.83)**
Diluted earnings per share (€/share)	**(0.39)**	**(0.83)**

Note 21: Segment information

Accounting principles

The Company operates in a single segment - the commercialization of orthopedic implants.

The Research and Development expenses, and the majority of administrative expenses are incurred in France. At this stage, these costs are not allocated to the geographic regions in which these products are commercialized.

Consequently, the Company's performance is currently analyzed at Group level.

Note 22: Related parties

22.1 Transactions with related parties

As part of the ordinary management of the Company, it maintains arm's length relations with its subsidiary.

22.2 Executives' compensation (excluding awards of capital instruments)

No post-employment benefits are granted to members of the Board of Directors.

The compensation of the executive officers is broken down as follows (in euros):

COMPENSATION OF CORPORATE OFFICERS (Amounts in euros)	12/31/2016	12/31/2015
Fixed compensation due	471,172	294,401
Variable compensation due	35,000	-
Benefits in kind	14,814	13,421
Share-based payments	83,424	175,208
Advisers' fees	108,000	431,529
Attendance fees	16,500	18,000
TOTAL	**728,910**	**932,559**

The terms for the allocation of the variable part of compensation are based on performance criteria.

Note 23: Off-balance sheet commitments

23.1 Obligation under the terms of the KREOS contract

Within the framework of the KREOS bond contract signed on July 19, 2013 (see Note 10.3.1), the Company granted to KREOS the following sureties and commitments:

- Pledge of the business goodwill in favor of KREOS;
- Commitment by the Company not to contract, without prior authorization from KREOS, debt of more than €2,500,000 other than (a) the KREOS bond, (b) borrowings to cover working capital requirement, (c) advances from OSEO (or any other support or advance from public bodies), (d) the issue of convertible bonds or bonds redeemable in shares, or (e) current account advances from shareholders,
- Commitment by the Company not to proceed with any pledge or cede any assets, except in the normal course of its business.

23.2 Obligation under the terms of the L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND contract

Within the framework of the OCABSA contract signed on October 12, 2015 (see Note 10.3.2), the Company granted the following sureties and commitments to L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND:

- Commitment (a) not to participate in any floating-rate financing, (b) not to pay dividends in the form of Company assets or shares, (c) not to issue transferable securities conferring a right to acquire equity without preferential subscription rights as part of an offer to qualified investors or a restricted group of investors without the prior agreement of L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND.
- Company commitment not to enter into any mortgage, physical collateral, pledge of goodwill or guarantee against debt securities conferring a right to acquire equity without granting the same guarantees to L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND.

23.3 Commercial leases

Real estate leases

The Company has decided to group its administrative and logistics activities and entered into a new lease in February 2016 for this real estate complex.

Real estate complex (administrative and logistics buildings):
Address Technopole Bordeaux Montesquieu, allée François Magendie, 33650 Martillac, France
Term: October 1, 2016 – September 30, 2026
Early departure: Possible at the end of the second three-year period
Annual rent excl. VAT and charges €212,000

Implanet America Inc. occupies administrative buildings under a short-term lease to which the Company is bound up to May 31, 2017:
Address 8 Faneuil Hall Market Place, 3rd Floor, Boston, Massachusetts, 02109, United States

Charges and commitments

The commitments up until the next termination periods are broken down as follows:

REAL ESTATE LEASING CONTRACTS Commitments at 12/31/2016 (Amounts in euros)		Effective start date of lease	Expiry date of lease	Leasing expenses excluding charges at 12/31/2016	Commitment until the next termination date		
					Due in less than 1 year	From one to five years	Due in more than 5 years
Martillac	Real estate complex (administrative & logistics buildings)	10/01/2016	09/30/2026	53,000	212,000	848,000	159,003
Boston	Administration building	12/01/2014	05/31/2017	66,997	30,904	-	-

23.4 Commitments in respect of operating leases

The Company has concluded contracts for the leasing of vehicles. Following analysis, they have been deemed operating leases with respect to the provisions of IAS 17.

The following table sets out the amount of the minimum payments and their breakdown:

VEHICLE LEASES (Amounts in euros)	Due in less than one year	From 1 to 5 years	Due in more than five years
Off-balance sheet commitments at 12/31/2016	57,858	41,321	-

23.5 Obligations in respect of other contracts

Having subcontracted several important functions (production), the Company has concluded, in the ordinary course of its operations, subcontracting contracts with various third parties, in France and abroad, which include various obligations that are customary in these circumstances.

Furthermore, the contracts or technical specifications fix the terms for validation of the manufacturing processes, the quality control procedures, the handling of non-compliant products and the intellectual property rights.

No reciprocal commitments bind the Company and its subcontractors in terms of quantity or production capacity.

23.6 Other financial commitments

Documentary credits and remittances

The Company may put in place documentary credits or remittances on certain markets.

No documentary credits or remittances were in progress at the close of the fiscal years presented.

Pledge of term accounts and medium-term notes

- Renewable pledge of a €150 thousand term deposit account maturing in July 2018 under lease financing agreements with HSBC Bank;
- Negotiable pledge of a €300 thousand medium-term note maturing in 2019 under a lease-back agreement with Banque Courtois;
- Pledge of a term deposit of €200 thousand under a bank loan taken out with Banque Courtois in the first half of 2015, maturing in 2018.

Earn-out clause – divestiture of BEEP'n TRACK to GHX

The contract for the divestiture of the BEEP'n TRACK business to GHX includes an earn-out clause on the basis of an agreement for the sharing of revenues exceeding the current business plan of GHX for the 2013-2015 fiscal years. Under the terms of this clause, the Company could receive a maximum earn-out of USD 4 million.

No accrued income was recognized at December 31, 2016, given the uncertainty concerning the receipt and assessment of this earn-out.

Bank sureties

- Bank surety of €28,630 from the Banque Courtois on behalf of Implanet in favor of the lessor of its administrative building,
- Bank surety of €10,000 from the Banque Courtois on behalf of Implanet in favor of TOTAL.

Note 24: Management and measurement of financial risks

Implanet may find itself exposed to various types of financial risks: market risk, credit risk and liquidity risk. Where applicable, Implanet puts in place simple means proportionate to its size in order to minimize the potentially unfavorable effects of these risks on its financial performance. Implanet's policy is not to subscribe for financial instruments for the purposes of speculation.

Interest rate risk

Implanet does not have significant exposure to interest rate risks, inasmuch as:

- cash investments include term accounts and medium-term marketable warrants;
- the Company has no variable-rate debt.

Credit risk

Credit risk is linked to deposits with banks and financial establishments. Implanet relies on first class financial establishments for its cash balances and therefore carries no significant credit risk on its cash flow.

The Company distributes its implants to distributors and to public and private hospitals.

The credit risk on these healthcare facilities and distributors is low. Furthermore, the customer payment terms comply with the requirements of the Modernization of the Economy Act (LME).

It has implemented policies that allow it to ensure that its customers have a suitable credit history.

With regard to the concentration of credit risk, two distributors each account for more than 10% of consolidated revenue at December 31, 2016: one France distributor (23%) and one Export distributor (11%).

Foreign exchange risks

The chief risks in respect of the foreign exchange impact on purchases and sales in foreign currencies relate essentially to transactions conducted by the US subsidiary and intra-group exchanges in dollars.

At this stage of its development, the Group has not made use of any hedging in order to protect its business against exchange rate fluctuations. However, the Group cannot ignore the possibility that a significant increase in its activity or the presence of a subsidiary in the United States would result in greater exposure to exchange rate risk. The Group will then envisage making use of an appropriate policy for hedging these risks

Equity risk

The Company does not hold any participating investments or investment securities that are traded on a regulated market.

Note 25: Fees of the Statutory auditors

FEES PAID TO STATUTORY AUDITORS	2016 fiscal year				2015 fiscal year			
	Ernst & Young		INKIPIO AUDIT		Ernst & Young		INKIPIO AUDIT

NOTES TO THE ANNUAL FINANCIAL STATEMENTS

(Unless indicated otherwise, the amounts shown in these notes are in euros.)

Note 1: Presentation of the business and significant events

The information set out below constitutes the Notes to the annual financial statements which form an integral part of the financial statements presented for the fiscal year ended December 31, 2016.

Each of the fiscal years presented covers a period of 12 months from January 1 to December 31.

The financial statements at December 31, 2016 were approved by the Board of Directors on March 14, 2017.

1.1 Information relating to the Company and its business

Created in December 2006, Implanet's business is the technical, clinical, marketing and commercial development of high-quality implants and surgical instruments by introducing innovative technological solutions.

Implanet's range covers spinal, arthroscopy and knee products.

The Implanet SA Company, hereafter referred to as the "Company" prepares consolidated financial statements as parent company.

Address of the registered office:
Technopole Bordeaux Montesquieu - Allées François Magendie - 33650 Martillac, France
Registry number: RCS 493 845 341 - Bordeaux, France

1.2 Significant events

Fiscal year ended December 31, 2016

January 2016:

- Successful outcome of the first idiopathic scoliosis surgery performed in Brazil using the Jazz platform.

March 2016:

- Launch of a prospective, multicenter clinical study to document the outcomes of Jazz technology in adult degenerative and adult deformity indications.

April 2016:

- Entry onto the OTCQX® International market in the United States.
- Regulatory clearance in the U.S. 510(k) and Europe (CE) obtained for the new Jazz Lock® implant.

May 2016:

- Regulatory clearance in the U.S. 510(k) and Europe (CE) obtained for the new Jazz Claw® implant.

June 2016:

- Appointment of Mary E. Shaughnessy, Senior VP Finance & Planning of the Partners CC Group, a specialist in financing and repayment of health care in the United States, as a new Director.
- Issue of the remaining bonds convertible into shares with share subscription warrants attached ("BEOCABSA") as part of the financing implemented in October 2015 to fund the development of the Jazz BAND technological platform and the commercial roll-out of Jazz worldwide. This second tranche of 400 BEOCABSA will raise a potential maximum of €4 million, at the Company's discretion under certain usual conditions, which may be revised upwards by an equivalent amount if the share subscription warrants attached to the bonds issued under this operation are exercised.
  The Board of Directors also asked L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND to immediately exercise 35 BEOCABSA out of the 400 already issued, giving rise to the issue of a tranche of OCABSA (convertible bonds with warrants attached) for a nominal amount of €350,000.

July 2016:

- Issue of an additional tranche of OCABSAs for a nominal amount of €250,000.
- Interest-free loan for innovation of €800,000 obtained for the "development and clinical assessment of the Jazz type braided implant for degenerative spinal surgery (particularly the securing or replacement of pedicle screws)".

August 2016:

- Patent for the Jazz® technological platform issued in the United States by the US Patent and Trademark Office (USPTO).

September 2016:

- Successful outcome for the first surgeries with the new Jazz Lock® implant in France, Italy and the United States.

November 2016:

- Capital increase of €6.9 million with preferential subscription rights through the issue of 9,833,105 new shares at a subscription price of €0.70 per share.

December 2016:

- Publication of a new White Paper "Correction of Adolescent Idiopathic Scoliosis in hypokyphotic patients using Jazz sublaminar bands: preliminary results of a multricentric study using 3D reconstruction ", presenting the results of the clinical analyses carried out on a group of adolescents suffering from thoracic hypokyphotic scoliosis treated with sub-laminar Jazz implants.

2.1 Principle for preparation of the financial statements

The financial statements of the Company have been prepared in accordance with the provisions of the French Commercial Code (Articles L. 123-12 to L. 123-28) and the general rules for the preparation and presentation of annual financial statements (General Accounting Plan 2016-07 of November 4, 2016 modifying the General Accounting Plan 2014-03 of June 5, 2014 and modified by the regulations issued subsequently by the Accounting Regulation Committee (CRG)).

The basic method used for the evaluation of the items included in the accounting records is the historical cost method.

General accounting conventions have been applied in compliance with the principle of prudence, in accordance with the following principles:

- going concern;
- consistency of accounting methods from one year to the next;
- independence of fiscal years.

The going concern assumption was used by the Board of Directors, in view of the financial capacity of the Company with regard to its financial needs for the next 12 months.

This analysis is based on the following information:

- the Company's cash flow (€7.0 million),
- its cash balances (€0.3 million),

Moreover, the Company is examining the possibility of obtaining additional funding for its new developments, which may involve a capital increase, especially if the Company was no longer able to use the OCABSA financing line (€3.4 million), signed with L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND, or if it decided not to use it.

The loss-making situation of the Company during the periods presented arises from:

- its stage of development: research and development costs for projects in progress, particularly Jazz (posterior fixture and spinal deformity reduction system): mechanical testing, filing of patents, protection of intellectual property, etc.,
- commercial rollout costs (launch of new products, territorial expansion, etc.).

To assist the understanding of the financial statements presented, the principal valuation methods used are set out below, in particular when:

- a choice is offered by the legislation;
- an exception provided for by the regulations is used;
- the application of an accounting rule is insufficient to give a true and fair view;
- an accounting rule is waived.

2.2 Transactions denominated in foreign currencies

Expenses and income denominated in foreign currencies are recognized at their counter-value on the date of the transaction.

Receivables and liabilities denominated in foreign currency which exist at the year-end are converted at the exchange rate in effect on that date.

The difference resulting from the conversion of liabilities and receivables denominated in foreign currencies at the year-end exchange rate is recognized in the balance sheet under "Translation differences" in assets and liabilities. Translation differences - assets are the subject of a provision for liabilities and expenses of an equivalent amount.

2.3 Research tax credit

Research tax credits are granted to businesses by the French government to encourage them to carry out technical and scientific research. Businesses which provide proof of expenditure fulfilling the required criteria (research expenditure located in France or, since January 1, 2005, within the European Community or in another State which is a party to the agreement on the European Economic Area and which has concluded a tax treaty with France containing an administrative assistance clause) benefit from a tax credit which can be used for the payment of corporate income tax due in respect of the fiscal year in which the expenditure was incurred and the three following fiscal years or, where applicable, the excess can be reimbursed.

The research tax credit is presented in the income statement as a credit under "Corporation tax".

The Company has received research tax credits since it was first created.

2.4 Research and Development expenses

Research and Development costs are recognized as expenses.

3.1 Intangible fixed assets and property, plant and equipment

Accounting principles

Intangible fixed assets

Intangible fixed assets mainly comprise licenses and software development.

Intangible fixed assets are valued at their cost of acquisition or their production cost. They are depreciated on a straight-line basis over the term of their utilization by the Company, namely:

Items	Amortization terms
Software licenses and development	1 to 3 years – Straight-line
Management and accounting software packages (SAP)	3 to 5 years – Straight-line

The expenditure related to the registration of patents and to product development is recognized in expenses for an amount of €870,903.

Property, plant and equipment

Property, plant and equipment are valued at their cost of acquisition (purchase price and incidental expenses) or their cost of production by the Company.

Asset items are the subject of depreciation schedules determined according to the actual useful life of the asset.

The depreciation terms and methods used are principally the following:

Items	Amortization terms
Ancillary devices	3 years – Straight-line
Technical installations, equipment and tooling	5 years – Straight-line
General installations, fixtures & fittings	5 years – Straight-line
Transport equipment	5 years – Straight-line
Office and IT equipment	3 years – Straight-line
Furniture	4 to 7 years – Straight-line

Ancillary devices refers to specific surgical instruments for the fitting of implants.

The latter are recognized under property, plant and equipment when they are delivered to healthcare facilities.

Where this is not the case, they are presented under inventories and are considered to be available for sale.

Summary

GROSS VALUE OF FIXED ASSETS (Amounts in euros)	12/31/2015	Acquisitions	Disposals	12/31/2016
Incorporation and development expenses	-			-

AMORTIZATION AND DEPRECIATION OF FIXED ASSETS (Amounts in euros)	12/31/2015	Allocations	Reversals	12/31/2016	Net values 12/31/2016
Incorporation and development expenses	-			-	-
Other intangible fixed assets	353,949	20,149		374,098	539
Intangible fixed assets in progress	-			-	-
Total intangible fixed assets	**353,949**	**20,149**	**-**	**374,098**	**539**
Technical installations, equipment and tooling	3,030,568	404,029	371,097	3,063,501	644,130
General installations, fixtures & fittings	84,844	941		85,785	12,469
Transport equipment	-			-	-
Office and IT equipment and furniture	215,220	17,696		232,916	31,312
Property, plant and equipment in progress	-			-	-
Total property, plant and equipment	**3,330,632**	**422,666**	**371,097**	**3,382,202**	**687,911**
GRAND TOTAL	**3,684,581**	**442,815**	**371,097**	**3,756,299**	**688,450**

The technical installations, equipment and tooling principally comprise ancillary devices commissioned when they are delivered to healthcare facilities.

3.2 Long-term financial assets

Accounting principles

Investment securities are entered in the balance sheet at their acquisition cost. Their value is assessed annually with reference to their value in use, which is based in particular on the actual and forecast profitability of the subsidiary concerned and the proportion of shareholders' equity that is held. If necessary, a depreciation is recognized by means of a provision, if the value in use falls below the acquisition cost.

Loans and receivables are valued at their nominal value. These items are, if necessary, depreciated by means of a provision to reduce them to their value in use at the closing date of the fiscal year.

Treasury shares are compared with their probable trading value and depreciated if necessary.

Summary

GROSS VALUE OF FIXED ASSETS (Amounts in euros)	12/31/2015	Acquisitions	Disposals	12/31/2016
Other investments	246,793			246,793
Other long-term financial assets	487,701	104	63,499	424,304
Total long-term financial assets	**734,494**	**104**	**63,499**	**671,097**

AMORTIZATION AND DEPRECIATION OF FIXED ASSETS (Amounts in euros)	12/31/2015	Allocations	Reversals	12/31/2016	Net values 12/31/2016
Other investments	-			-	246,793
Other long-term financial assets	-	350,884	297,005	53,879	370,425
Total long-term financial assets	**-**	**350,884**	**297,005**	**53,879**	**617,218**

Long-term financial assets essentially comprise:

- holding of shares in the subsidiary Implanet America Inc. for USD 300,010;
- a guarantee deposit in favor of KREOS for €191 thousand under the bond issue in 2013 at an nominal value of €5.0 million;
- guarantee deposits paid under the terms of operating leases for the French premises;
- a liquidity contract (cash reserve for €40 thousand and treasury shares for €109 thousand).

Liquidity contract

Following its listing on the Paris Euronext stock market, the Company signed a liquidity contract on November 20, 2013 with Banque Oddo et Cie in order to limit the intra-day volatility of Implanet shares.

For this purpose, the Company entrusted €400,000 to this institution in order that the latter can take long or short positions in the Company's shares.

Note 4: Inventories

Accounting principles

Inventories are measured using the weighted average unit cost method.

The gross value of the goods and raw materials includes the purchase price and any incidental expenses.

A provision for impairment of inventories is determined on a statistical basis using the average consumption period for products in inventories and its potential impact on the term remaining until the expiry date of said products.

Summary

INVENTORIES (Amounts in euros)	12/31/2016	12/31/2015
Inventories of raw materials	65,188	79,937
Inventories of goods for resale	3,262,333	2,966,917

Net total inventories	**3,337,360**	**3,167,301**

Composition of the inventories

Inventories of raw materials essentially comprise polymer components, reels of wire (manufacture of the Jazz braid), product manuals and packaging.

Inventories of goods for sale principally comprise the various categories of implants for arthroscopy, spines and knees.

Inventories of ancillary devices and instruments comprise new equipment available for sale and not made available to healthcare facilities.

Note 5: Receivables

Accounting principles

Receivables are valued at their nominal value. Where applicable, they are depreciated on a case-by-case basis by means of a provision to take account of difficulties in recovery to which they may be subject.

Other receivables comprise the nominal value of the research tax credit, which is recognized under assets in the year of acquisition corresponding to the fiscal year during which eligible expenses giving rise to the tax credit were incurred.

In accordance with the General Accounting Plan information sheet of February 28, 2013, the Competitiveness and employment tax credit (*Crédit d'Impôt Compétitivité Emploi* - CICE) is recorded as a deduction of payroll expenses. The Company used this tax credit in Research and Development.

Summary

5.1 Trade receivables

TRADE RECEIVABLES AND RELATED ACCOUNTS (Amounts in euros)	12/31/2016	12/31/2015
Trade receivables and related accounts	3,346,057	4,409,678
Gross total trade receivables and related accounts	**3,346,057**	**4,409,678**
Impairment of trade receivables and related accounts	(328,615)	(768,864)
Total impairments of trade receivables and related accounts	**(328,615)**	**(768,864)**
Net total trade receivables and related accounts	**3,017,442**	**3,640,814**

The Company's products are sold to public and private hospitals and to distributors (including the Implanet America Inc. subsidiary). The risk of default has been assessed as low.

The impairment of customer receivables is established on a case-by-case basis based on the estimated risk of non-recovery.

For the 2016 fiscal year, bad debts, for a total amount of €517,065 were recorded in expenses, partially offset by a reversal of provisions for impairment for an amount of €507,820.

5.2 Details of the receivables and breakdown by maturity

The tables below show the detail of "Receivables" at December 31, 2016 and December 31, 2015 as well as their breakdown into receivables due in less than one year or in more than one year:

(Amounts in euros)	12/31/2016		
	Gross Amount	Due in less than 1 year	Due in more than 1 year
Fixed assets			
Other long-term financial assets	424,304	-	424,304
Total fixed assets	**424,304**	**-**	**424,304**
Current assets			
Trade receivables (1)	3,346,057	3,013,910	332,147
Employees and related accounts	22,491	22,491	
State - Research tax credit (2)	202,970	202,970	
State - Business competitiveness tax credit (3)	41,577	41,577	
Value added tax	478,256	478,256	
Trade payable debit balances	15,324	15,324	
Factor - guarantee fund	81,153	81,153	
Factor - available reserve and other receivables	816,333	816,333	
Group (4)	4,478,242		4,478,242
Other debtors	12,234	12,234	
Total current assets	**9,494,637**	**4,684,248**	**4,810,389**
Prepaid expenses	179,795	179,795	
Grand total	**10,098,736**	**4,864,043**	**5,234,693**

(1) Trade receivables due in more than one year represent doubtful or disputed receivables.

(2) Where there is no taxable net income, the receivables due from the Government in respect of the Research tax credit (CIR) are payable in the year following that of their recognition:
- CIR 2016: €202,970 reimbursement expected in 2017;
- CIR 2015: €225,193, amount repaid in 2016.

(3) Where there is no taxable net income and considering the Company's European Union SME status, the receivables due from the Government in respect of the Research tax credit are payable in the year following that of their recognition:
- CICE 2016: €41,577 repayment request made in 2017;
- CICE 2015: €37,019 amount repaid in 2016.

(4) Group receivables relate to the Implanet America Inc. subsidiary.
A five-year budget has been drawn up for Implanet America Inc. based on the outlook for sales growth in this subsidiary, notably the expected expansion of the Jazz product. On this basis and given future cash flow at the subsidiary, a provision of €2,917,959 for impairment of current account was recorded at the end of the 2016 fiscal year. This provision for impairment was €1,287,405 at December 31, 2015.

(Amounts in euros)	12/31/2015		
	Gross Amount	Due in less than 1 year	Due in more than 1 year
Fixed assets			
Other long-term financial assets	487,701	-	487,701
Total fixed assets	**487,701**	**-**	**487,701**
Current assets			
Trade receivables (1)	4,409,678	3,639,769	769,909
Employees and related accounts	18,282	18,282	
State - Research tax credit (2)	225,193	225,193	
State - Business competitiveness tax credit (3)	37,019	37,019	
Value added tax	349,313	349,313	
Trade payable debit balances	24,680	24,680	
Factor - guarantee fund	30,000	30,000	
Factor - available reserve and other receivables	211,179	211,179	
Group (4)	3,159,755		3,159,755
Other debtors	16,049	16,049	
Total current assets	**8,481,148**	**4,551,484**	**3,929,664**
Prepaid expenses	71,760	71,760	
Grand total	**9,040,610**	**4,623,245**	**4,417,365**

Note 6: Marketable securities and cash

Accounting principles

Marketable securities appear in the assets at their acquisition value.

Any provisions for impairment are determined by comparing the acquisition value with the probable realizable value.

Summary

The table below sets out details of the marketable securities and net cash:

(Amounts in euros)	12/31/2016	12/31/2015
	Value in use	Value in use
Medium-term bonds (1)	300,000	5,600,000
Term accounts (2)	1,350,000	350,000
Bank accounts and cash	5,680,698	1,034,057
Total Marketable Securities and Net Cash Balances	**7,330,698**	**6,984,057**

(1) Including, at December 31, 2016:
- a €300 negotiable thousand medium-term note maturing in 2019, pledged as security for a lease-back agreement signed with Banque Courtois in 2014, ending in 2017.

(2) Including, at December 31, 2016:
- a €700 thousand term deposit maturing in 2021 with early redemption possible;
- a €300 thousand term deposit maturing in 2019 with early redemption possible;
- a €200 thousand term deposit maturing in 2018, pledged in favor of Banque Courtois as security for the €500 thousand loan taken out in 2015;
- a €150 thousand term deposit, renewed every six months and pledged in favor of HSBC as security for the lease-back agreements in force with this bank.

Note 7: Prepayments and accruals

The amount of prepaid expenses is broken down by type as follows:

PREPAID EXPENSES (Amounts in euros)	12/31/2016	12/31/2015
Real estate leases	59,818	20,238
Equipment leases	7,876	11,873
Insurance policies	17,227	2,500
IT Maintenance	8,021	12,387
Fees	68,301	1,053
Miscellaneous	18,552	23,708
Total prepaid expenses	**179,795**	**71,759**

The amount of prepaid expenses only concerns operating expenses.

The increase in prepaid expenses compared to the previous fiscal year is due to quarterly lease invoicing in advance (new lease signed for the new building), and by the invoicing of new services linked to the American stock market.

There were no prepaid expenses at December 31, 2015 and 2016.

Note 8: Shareholders' equity

8.1 Change in shareholders' equity

The change in shareholders' equity over the 2015 and 2016 fiscal years is detailed as follows:

IMPLANET Changes in shareholders' equity Amounts in euros	Capital *Number of shares*	Capital	Issue premiums	Retained earnings	Reserves and net income	Shareholders' equity
At December 31, 2014	**5,399,522**	**8,099,283**	**12,500,647**	**(7,005,705)**	**(5,288,306)**	**8,305,919**
Appropriation of the 2014 net income				(5,288,306)	5,288,306	-
2015 net income					(6,776,643)	(6,776,643)
Issue of shares	*4,967,558*	7,451,337	3,725,669			11,177,006
Conversion of bonds	*224,519*	336,779	118,622			455,400
Share subscription warrants (BSA)			12,963			12,963
Cost of fund raising			(1,306,569)			(1,306,569)
At December 31, 2015	**10,591,599**	**15,887,399**	**15,051,331**	**(12,294,012)**	**(6,776,643)**	**11,868,075**
Appropriation of the 2015 net income				(6,776,643)	6,776,643	-
2016 net income					(7,792,520)	(7,792,520)
Capital decrease		(8,589,162)		8,589,162		-
Allocation of retained earnings on issue premiums			(15,074,052)	15,074,052		-
Issue of shares	*9,833,105*	6,883,174	-			6,883,174
Conversion of bonds	*880,357*	732,132	386,568			1,118,699
Share subscription warrants (BSA)			13,840			13,840
Share issue costs			(7,063)			(7,063)
At December 31, 2016	**21,305,061**	**14,913,543**	**370,623**	**4,592,558**	**(7,792,520)**	**12,084,204**

The General Shareholders' Meeting of May 24, 2016 decided to carry out:

- the allocation of retained earnings on issue premiums for €15,074 thousand;
- a capital decrease by an amount of €8,589 thousand as a result of losses by reducing the nominal value of the shares to €0.70;
- the constitution of an unavailable special reserve resulting from the capital decrease for €4,593 thousand.

In November 2016, the Company carried out a capital increase with preferential subscription rights, through the issue of 9,833,105 new shares with a nominal value of €0.70 giving a total increase of €6,883 thousand.

In the absence of issue premiums, the costs associated with this transaction, of a total amount of €943 thousand were recorded in non-recurring expenses (see Note 19).

During the 2016 fiscal year, 113 bonds held by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND were converted into shares generating the issue of 144,853 shares with a nominal value of €1.50 and 735,504 shares with a nominal value of €0.70, i.e. a capital increase of €732 thousand and an issue premium of €398 thousand.

8.2 Composition of the share capital and detail by class of shares

COMPOSITION OF THE SHARE CAPITAL	12/31/2016	12/31/2015
Capital (in euros)	14,913,543	15,887,399
Number of shares	21,305,061	10,591,599
of which, Ordinary shares	21,305,061	10,591,599
Nominal value (in euros)	€0.70	€1.50

The share capital is fixed at the sum of €14,913,542.70. It is divided into 21,305,061 ordinary shares which are fully subscribed and paid up with a nominal value of €0.70.

This number is stated exclusive of share subscription warrants (BSAs), founders' warrants (BSPCEs) and stock options granted to certain investors and individuals, whether employees or not of the Company, and which have not yet been exercised.

Management of capital

The Company's policy consists of maintaining a solid capital base, in order to maintain the confidence of investors and creditors and to support the future development of the business.

In this respect, a liquidity contract was signed on November 20, 2013 with Banque Oddo et Cie.

At December 31, 2016, the Company held 136,500 treasury shares.

8.3 Distribution of dividends

The Company did not distribute any dividends during the fiscal years presented.

9.1 Share subscription warrants (BSAs)

The table below summarizes the data related to the plans issued:

Type	Award date	Features of the plans			
		Total number of options awarded	Exercise period	Initial exercise price	Adjusted exercise price (1) (2) (3)
BSA 09/11	AGM of 09/26/2011	**60,000**	10 years	€1.00	€8.21
BSA 05/12	AGM of 06/29/2012	**10,245**	10 years	€1.00	€8.21
BSA 2012	AGM of 06/29/2012	**165,000**	10 years	€1.50	€12.31
BSA 09/2012	AGM of 10/11/2012	**100,000**	10 years	€1.50	€12.31
BSA 01/2013	AGM of 01/22/2013	**25,000**	10 years	€1.50	€12.31
BSA 01/2014	Board meeting of 01/08/2014	**27,398**	10 years	€6.68	€5.48
BSA 07/2015	Board meeting of 07/15/2015	**44,699**	10 years	€2.89	€2.75
BSA 07/2016 T1	Board meeting of 07/11/2016	**56,000**	10 years	€1.33	€1.27
BSA 07/2016 T2	Board meeting of 07/11/2016	**30,000**	10 years	€1.33	€1.27

(1) Following the reverse share split decided on by the extraordinary General Shareholders' Meeting of July 19, 2013, ten warrants awarded prior to this date give the right to subscribe to one share.

(2) Following the capital increase with preferential subscription rights in March 2015, the warrants were adjusted to parity at 1.16 (Board of Directors' decision of March 18, 2015).

(3) Following the capital increase with preferential subscription rights in November 2016, the warrants were adjusted to parity at 1.05 (Board of Directors' decision of November 17, 2016).

The vesting period for the plans issued is as follows:

Type	Vesting period			12/31/2016	
				Number of exercisable warrants	Number of warrants in the process of being vested
BSA 09/11	All options on award date			60,000	-
BSA 05/12				10,245	-
BSA 2012				40,000	-
BSA 09/2012				100,000	-
BSA 01/2013				25,000	-
BSA 01/2014	1/3 on 01/08/2015	1/3 on 07/08/2015	1/3 on 01/08/2016	16,199	-
BSA 07/2015	1/3 on 07/01/2016	1/3 on 07/01/2017	1/3 on 07/01/2018	14,899	29,800
BSA 07/2016 T1	1/3 on 07/01/2017	1/3 on 07/01/2018	1/3 on 07/01/2019	-	56,000
BSA 07/2016 T2	All options on award date			30,000	-
				296,343	**85,800**

The BSAs awarded to Directors are subject to a condition of attendance of the beneficiaries at the Company's Board of Directors' meetings. With regard to the BSAs awarded to consultants and in the process of being vested, they may be acquired provided that their contract with the Company was in force for the entire calendar year prior to the date in question.

Type	Award date	Number of options outstanding					Maximum number of subscribable shares (1) (2) (3)	
		12/31/2015	Awarded	Exercised	Void	12/31/2016

9.3 Stock options

The table below summarizes the data related to the plans issued:

Type	Award date	Features of the plans			
		Total number of options awarded	Exercise period	Exercise price	Adjusted exercise price (1)
Stock option 07/2015	Board meeting of 07/15/2015	**22,500**	10 years	€2.66	€2.53
Stock option 03/2016	Board meeting of 03/24/2016	**70,000**	10 years	€1.50	€1.43

(1) Following the capital increase with preferential subscription rights in November 2016, the warrants were adjusted to parity at 1.05 (Board of Directors' decision of November 17, 2016).

The vesting period for the plans issued is as follows:

Type	Vesting period			12/31/2016	
				Number of exercisable warrants	Number of warrants in the process of being vested
Stock option 07/2015	1/3 on 09/01/2016	1/3 on 09/01/2017	1/3 on 09/01/2018	7,500	15,000
Stock option 03/2016	1/3 on 04/01/2017	1/3 on 04/01/2018	1/3 on 04/01/2019	-	70,000
				7,500	**85,000**

The stock options are subject to a condition of presence of the beneficiaries within the Company as employees.

Type	Award date	Number of options outstanding					Maximum number of subscribable shares (1)
		12/31/2015	Awarded	Exercised	Void	12/31/2016	
Stock option 07/2015	Board meeting of 07/15/2015	22,500				22,500	23,625 *
Stock option 03/2016	Board meeting of 03/24/2016	-	70,000			70,000	73,500 *
Total		**22,500**	**70,000**	-	-	**92,500**	**97,125**

** Note that these warrants are in the process of being vested.*
(1) Following the adjustments to parity as described above.

9.4 Equity instruments awarded to executives

	Issue and award decision	Type	Issued, awarded and subscribed	Awarded and likely to be subscribed	Exercisable at closing 12/31/2016	Exercisable subject to conditions	Void (2)	Number of subscribable shares (3)

	TOTAL		**90,779**	**-**	**63,784**	**-**	**26,995**	***7,769***

(1) Following the departure of Denis Saint-Denis on June 30, 2015, all founders' warrants allocated lapsed in 2015.

(2) The allocation of BSPCEs carried out on July 11, 2016 for the benefit of employees, Ludovic Lastennet and Jean-Gérard Galvez replaces the BSPCEs awarded on January 8, 2014, and was, therefore, subject to their renunciation of the said plans.

(3) After adjusting the number of shares that may be subscribed upon exercise of BSPCEs and the exercise price of the BSPCEs following the successive increases in capital while maintaining the shareholders' preferential subscription right, in accordance with Article L. 228-99 of the French Commercial Code. The warrants were adjusted to parity at 1.16 in March 2015 (Board of Directors' decision of March 18, 2015) then at 1.05 in November 2016 (Board of Directors' decision of November 17, 2016).

9.5 Equity line of credit with Kepler Cheuvreux

The Company opened an optional equity line of credit with Kepler Cheuvreux on July 9, 2014. Implanet had the option to ask Kepler to subscribe for new shares, within the overall limit of 530,000 shares. Kepler Cheuvreux had made a firm subscription undertaking at the exclusive request of Implanet. The Company did not use this line of credit during the fiscal years presented and it expired in July 2016.

Note 10: Provisions for liabilities and expenses and for impairment

Accounting principles

Provisions for liabilities and expenses

These provisions, recognized in compliance with CRC Regulation No. 2000-06, are intended to cover the liabilities and expenses which current or past events make probable, whose amount is quantifiable in terms of their scope, but for which the realization, due date or amount are uncertain.

the Company may be involved in judicial, administrative or regulatory proceedings during the ordinary course of its activities. A provision is recognized by the Company where there is a sufficient probability that such disputes may lead to costs for the Company, on the basis of claims, legal obligations and lawyers' opinions.

On December 31, 2015, the Company recorded provisions for litigation of €55 thousand.

No other provisions and/or reversals of provisions were recorded during the 2016 fiscal year.

The amount of provisions for risks and litigation is therefore €55 thousand at December 31, 2016.

Provisions for impairment

Issue of bonds to KREOS for a total amount of €5,000 thousand.

On July 19, 2013, the Company concluded a venture loan agreement with KREOS CAPITAL IV (UK) LTD ("KREOS"), which took the place of a master agreement organizing the subscription by KREOS of a bond issue of €5.0 million, the issue of 65,000 Company warrants in favor of KREOS and the pledge of the Company's goodwill in favor of KREOS.

These transactions were implemented as follows:

- the €5,000,000 bond, by issuing 5,000,000 non-convertible bonds with a nominal value of €1 each to KREOS was approved at the Company's Board of Directors meeting of July 19, 2013 and wholly subscribed by KREOS on July 24, 2013;
- the free issue of 65,000 share subscription warrants (BSAs) for shares in the Company to KREOS was resolved by the extraordinary General Shareholders' Meeting of July 19, 2013. These share subscription warrants (BSAs) have a term of five years with effect from the date of the stock market listing (i.e. November 25, 2018);
- the Company's business (i.e. *fonds de commerce*) was pledged on July 19, 2013.

At the time the bond contract was arranged, the Company incurred €185,000 in fees (of which €112,500 were paid at the time of issue and €72,500 are payable on the maturity date).

The bond is repayable in fixed monthly installments between January 1, 2014 and June 1, 2016. It pays interest of 11.5%.

On April 16, 2015, the Company and KREOS CAPITAL IV (UK) LTD concluded an amendment to the venture loan agreement dated July 19, 2013, by which the parties decided to reschedule the abovementioned bond issue as follows:

- the term of the contract is increased from 36 to 54 months;
- the fixed monthly installment (capital and interest) is reduced from €190,735.43 to €94,160.22;
- the annual interest rate remains at 11.5%;

On April 24, 2015, the Company also entered into an agreement to issue 18,473 share subscription warrants to KREOS, validated by the General Shareholders' Meeting of June 24, 2015. These share subscription warrants (BSAs) have the following characteristics:

- number of shares to be issued: 18,473;
- subscription price: €2.91;
- terms and conditions identical to those for the 2013 KREOS share subscription warrants.

The amount of repayment during the 2016 fiscal year is €947,663.

At December 31, 2016, the total number of BSAs allocated to KREOS CAPITAL IV (UK) LTD is 83,473 warrants, giving the right to subscribe to 98,567 new shares.

Issue of Convertible bonds with warrants attached ("OCABSAs") in favor of L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND

On October 12, 2015, the Company entered into an OCABSA contract with L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND, enabling the Company to potentially raise €5 million at its discretion.

The Board of Directors' meeting of October 12, 2015 resolved the free issue of an initial tranche of 100 OCABSAs with a total value of €1.0 million.

The Company may issue 400 additional warrants to L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND, which may give rise to a bond issue of a maximum additional amount of €4 million (in several tranches of a maximum amount of €250,000 each, it being stipulated that L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND may ask for the amount of one of these tranches to be increased by €100,000), subject to certain conditions:

- the necessary authorizations must be obtained at the next annual General Shareholders' Meeting to be held before June 30, 2016;
- direct and indirect investments by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND in the Company's capital do not exceed 3% of the capital and voting rights given the number of potential shares resulting from the conversion of convertible bonds;

- the previous tranche must be repaid or converted or there must be a period of 35 days after drawing down the previous tranche (excluding the first tranche); and
- both the closing price and weighted average price over the five trading days preceding the issue request being at least €1.10.

The Board of Directors decided the issue of:

- an initial tranche of 100 OCABSAs with a total value of €1,000 thousand on October 12, 2015;
- a second tranche of 35 OCABSAs with a total value of €350 thousand on June 29, 2016;
- a third tranche of 25 OCABSAs with a total value of €250 thousand on July 29, 2016.

The OCA have the following characteristics:

- Nominal value: €10,000
- Subscription price: 99% of par value
- Maturity: 12 months
- Conversion terms: N = Vn/P where
  - N is the number of shares that can be subscribed;
  - Vn is the value of the bond receivable;
  - P is 92% of the lowest of the ten average daily prices quoted weighted by the volumes of the Company's share immediately preceding the conversion application date.

At December 31, 2016, 1 OCA and 831,322 BSAs were in circulation.

The share subscription warrants (BSAs) have the following characteristics:

Type	Award date	Features of the plans				Number of options outstanding					Maximum number of subscribable shares (1)
		Total number of options awarded	Exercise period	Initial exercise price	Adjusted exercise price (1)	12/31/2015	Awarded	Exercised	Void	12/31/2016	
BSA $_{L1T1}$	Board meeting of 10/14/2015	**400,000**	5 years	€2.50	€0.70	400,000				400,000	1,428,400
BSA L1T2	Board meeting of 06/29/2016	**244,755**	5 years	€1.43	€0.70		244,755			244,755	500,035
BSA L1T3	Board meeting of 07/28/2016	**186,567**	5 years	€1.34	€0.70		186,567			186,567	357,090
Total						**400,000**	**431,322**	-	-	**831,322**	**2,285,525**

(1) Following the capital increase with preferential subscription rights in November 2016, the warrants were adjusted to parity at 3.571 for the BSAs$_{L1T1}$, 2.043 for the BSAs$_{L1T2}$ and 1.914 for the BSAs$_{L1T3}$ (Board of Directors' decision of November 17, 2016).

Note 12: Loans from financial institutions

Accounting principles

Loans are valued at their nominal value. Issue expenses for loans are recognized immediately.

Accrued interest is recognized in liabilities, at the interest rate set out in the contract.

Summary

CHANGE IN BANK LOANS (Amounts in euros)	Bank Loans
At December 31, 2014	-
(+) Subscription	500,000
(-) Redemption	(81,320)
(+/-) Other movements	
At December 31, 2015	**418,680**
(+) Subscription	
(-) Redemption	(165,033)
(+/-) Other movements	
At December 31, 2016	**253,647**

On June 10, 2015, the Company took out a loan with Banque Courtois.

The main characteristics of the loan are as follows:

- Nominal value: €500,000
- Term: three years
- Interest rate: 1.95% per year
- Interest paid quarterly in arrears

The amount of repayment during the 2016 fiscal year is €165,033.

Note 13: Loans and miscellaneous financial debts

Accounting principles

Conditional advances

Advances received from public bodies for the financing of the Company's research activities or for regional commercial market prospecting, for which repayments are conditional, are presented in liabilities under “Loans and miscellaneous financial debts” and their characteristics are detailed below.

In the event of a bad debt, the waiver of the receivable is recognized as a subsidy.

Subsidies

Subsidies received are recognized as soon as the corresponding receivable becomes certain, taking account of the conditions imposed for the grant of the subsidy.

Operating subsidies are recognized in ordinary income taking account, where applicable, of the rate of the corresponding expenses in such a way as to comply with the principle of matching expenses to income.

Summary

Loans and miscellaneous financial debts comprise reimbursable advances granted by public bodies (OSEO Innovation) and an interest-free loan for innovation (BPI France).

The table below sets out the composition and changes in the loans and miscellaneous financial debts:

CHANGES IN REIMBURSABLE ADVANCES & INTEREST-FREE LOANS (Amounts in euros)	OSEO Knees	BPI - Interest-free innovation loan - JAZZ Braid	Total
At December 31, 2014	**240,000**	**-**	**240,000**
(+) Subscription			-

(+/-) Other movements			-
At December 31, 2016	**90,000**	**800,000**	**890,000**

13.1 Reimbursable OSEO Innovation advance - Knee

On February 25, 2010, OSEO granted Implanet an interest-free repayable innovation loan of €350,000 to "develop a three-compartment knee prosthesis for first-line treatment and the related instruments".

The payments from OSEO were made in stages between the signature of the contract and the end of the project, the principal stages being:

- first payment of €280,000 following the signature of the contract (received on March 1, 2010);
- the balance on completion of the work on May 9, 2011.

Following the technical and commercial success of the project, the reimbursement of this innovation subsidy has begun in accordance with the following schedule:

- €12,500 per quarter in 2013 on the last day of the quarter;
- €15,000 per quarter in 2014 on the last day of the quarter;
- €17,500 per quarter in 2015 on the last day of the quarter;
- €20,000 per quarter in 2016 on the last day of the quarter;
- €22,500 per quarter in 2017 on the last day of the quarter.

The balance of this reimbursable advance was €90,000 at December 31, 2016.

13.2 BPI France interest-free loan for innovation – Jazz braid implant

In June 2016, the Company obtained Bpifrance's agreement for an interest-free loan for innovation of €800 thousand for the "development and clinical assessment of the Jazz braid implant for degenerative spinal surgery (particularly the securing or replacement of pedicle screws)". The funds were received by the Company on August 19, 2016, after deduction of the processing costs of €24 thousand.

This loan has the following characteristics:

- deferred redemption of three years;
- repayment of €40,000 per quarter from July 31, 2019 until April 30, 2024.

The balance of this BPI France repayable interest-free loan for innovation amounts to €800,000 at December 31, 2016.

Note 14: Maturity dates of the debts at year-end

STATEMENT OF LIABILITIES (Amounts in euros)	12/31/2016 Gross Amount	Due in less than 1 year	From 1 to 5 years	Due in more than 5 years

Note 15: Details of accrued expenses

Accrued expenses are broken down as follows for the two fiscal years presented:

DETAIL OF ACCRUED EXPENSES (Amounts in euros)	12/31/2016	12/31/2015
Bond issue		
Interest payable	56,389	40,278
Total bond issue	**56,389**	**40,278**
Trade and other accounts payable		
Suppliers - Invoices not yet received	481,271	499,667
Total trade payables and related accounts	**481,271**	**499,667**
Tax and social security liabilities		
Employees - provision for vacation pay	185,212	166,275
Employees - accrued expenses	192,434	50,272
Accrued social charges	121,942	55,419
State - accrued expenses	39,968	41,512
Total tax and social security liabilities	**539,556**	**313,478**
Other liabilities	20,360	15,000
Total other liabilities	**20,360**	**15,000**
Grand total	**1,097,576**	**868,423**

Note 16: Revenue

Accounting principles

The recognition of income depends on the nature of the sales made by the Company:

- **Export sales to distributors or to its distribution subsidiary:** the transfer of title occurs at the time of collection of the merchandise from Implanet (Incoterms: EXWORKS). Contracts do not include specific clauses for returns.

- **Sales in France to hospitals and clinics:** the invoicing takes place at the time of the effective fitting of the implant to a patient, based on information provided by the healthcare facilities.

- **Sales in France to distributors:**
  - instruments and a set of implants are provided to healthcare facilities (instruments in Implanet's fixed assets and implants in consigned inventory);
  - invoicing to distributors takes place on the date of the fitting of the implants, generating restocking from consignment stock.

- **Sales in France via sales agents:**
  - invoicing of healthcare facilities is carried out directly by Implanet on receipt of the information related to the fitting of implants;
  - agents' commissions are recognized in "Other external purchases and expenses".

The Company's revenues essentially comprise the sale of orthopedic implants.

Summary

Revenue by geographic region for the last two fiscal years ended December 31, 2016 and 2015 are as follows:

REVENUE BY GEOGRAPHIC REGION (Amounts in euros)	12/31/2016	12/31/2015
France	3,871,226	2,852,681
Rest of the World	2,730,911	3,765,325
Total revenue by geographic region	**6,602,137**	**6,618,006**

Note 17: Transfers of expenses

TRANSFERS OF EXPENSES (Amounts in euros)	12/31/2016	12/31/2015
Movement of inventories of ancillary devices into fixed assets	587,771	207,182
Benefits in kind granted to employees	54,907	66,431
Reimbursement from training bodies	3,666	5,072
Rebilling of expenses	37,000	49,481
Employment aid	1,500	
Insurance reimbursements related to claims	12,296	7,070
Total transfers of expenses	**697,140**	**335,236**

At the time of provision of ancillary devices to healthcare establishments, a transfer of these devices from inventories to fixed assets is carried out by means of a transfer of expenses.

Note 18: Financial income and expenses

Accounting principles

Financial net income mainly comprises the following:

- interest expenses related to the factor and loans;
- interest income from term deposit accounts and Medium-Term Notes ("MTN");
- charges to and reversals of provisions for impairment of treasury shares;
- charges for impairment of current account with the subsidiary Implanet America Inc.;
- and foreign exchange gains and losses.

Summary

FINANCIAL INCOME (Amounts in euros)	12/31/2016	12/31/2015

Reversal of provisions for impairment of treasury shares	297,005	113,369
Reversal of provisions for foreign exchange losses	-	-
Total financial income	**321,128**	**166,393**

FINANCIAL EXPENSES (Amounts in euros)	12/31/2016	12/31/2015
Foreign exchange losses	9,118	11,200
Provisions for risk of foreign exchange losses	3,645	(976)
Provision for impairment of Implanet America's current account	1,630,554	1,287,405
Provision for impairment of treasury shares	350,884	28,917
Interest expense	205,506	303,980
Total financial expenses	**2,199,707**	**1,630,526**

Note 19: Non-recurring income and expenses

Distinction between recurring and non-recurring net income

Recurring net income records the income and expenses related to the ordinary activity of the business.

Unusual items related to ordinary activities are recorded in recurring net income. In particular, these include the following items:

- charges to and reversals of provisions for impairment of receivables;
- operating subsidies;
- transfers of operating expenses relating in particular to capitalized production and inventories of ancillary devices transferred into fixed assets at the time of their delivery to healthcare establishments.

Exceptional items not related to ordinary activities constitute non-recurring net income.

Summary

NON-RECURRING INCOME (Amounts in euros)	12/31/2016	12/31/2015
Proceeds from sales of assets	15,000	137,739
Gain on lapsed trade payable		201,388
Profit from buyback of treasury shares	20,928	9,108
Miscellaneous non-recurring income		-
Total non-recurring income	**35,928**	**348,235**

NON-RECURRING EXPENSES (Amounts in euros)	12/31/2016	12/31/2015
Net carrying amount of assets sold	9,883	143,099
Cost of fund raising	942,562	
Loss from buyback of treasury shares	79,324	119,905
Miscellaneous non-recurring expenses	1,676	34,764
Total non-recurring expenses	**1,033,445**	**297,769**

Fixed assets divested during the fiscal years presented relate to lease-back agreements.

Note 20: Corporate income tax

Since the Company made a loss, it did not bear any income tax charge.

The amounts recognized in the income statement in respect of corporate income tax are income related to the research tax credit (CIR) and amounted to:

- €202,970 in 2016;
- €225,193 in 2015.

At December 31, 2016, the amount of the Company's tax losses which can be carried forward indefinitely amounted to €57,139 thousand.

The corporation tax rate applicable to the Company is the current rate in force in France, namely 33.33%.

Note 21: Related parties

21.1 Transactions with related parties

As part of the ordinary management of the Company, it maintains arm's length relations with its subsidiary.

21.2 Executives' compensation (excluding awards of capital instruments)

In application of Article 531-3 of the General Accounting Plan, the Executive Directors of a *Société Anonyme* (public limited company) with a Board of Directors are deemed to be the Chairman of the Board of Directors, the Deputy Chief Executive Officers and the natural or legal person Directors (and their permanent representatives).

No post-employment benefits are granted to members of the Board of Directors.

The compensation due to the executives of Implanet during the 2015 and 2016 fiscal years was as follows:

DIRECTORS' COMPENSATION (Amounts in euros)		12/31/2016					
	Function	Fixed compensation	Variable compensation	Benefit in kind	Advisory fees	Attendance fees	Total
Mr. Ludovic Lastennet	Director since January 22, 2013. Sales Director CEO since November 27, 2012	201,300	35,000	14,814			**251,114**
Mr. Jean-Gérard Galvez	Chairman of the Board of Directors				108,000		**108,000**
Mr. Brian Ennis	Member of the Board of Directors and Chairman of the US subsidiary	269,872					**269,872**
Ms. Mary Shaughnessy	Member of the Board of Directors					3,000	**3,000**
Ms. Paula Spears	Member of the Board of Directors					6,000	**6,000**
Mr. Jan Egberts	Member of the Board of Directors					7,500	**7,500**
Total Directors' compensation		**471,172**	**35,000**	**14,814**	**108,000**	**16,500**	**645,486**

Mr. Brian Ennis has been an employee of the Implanet America subsidiary since January 1, 2016 and received total compensation of €270 thousand as part of his employment contract fully paid by the said subsidiary.

DIRECTORS' COMPENSATION (Amounts in euros)	12/31/2015						
	Function	Fixed compensation	Variable compensation	Benefit in kind	Advisory fees	Attendance fees	Total
Mr. Ludovic Lastennet	Director since January 22, 2013. Sales Director CEO since November 27, 2012	201,300		10,721			**212,021**
Mr. Jean-Gérard Galvez	Chairman of the Board of Directors				72,000		**72,000**
Mr. Denis Saint-Denis	Chief Financial Officer. Deputy CEO from October 15, 2014 to June 30, 2015	93,101		2,700			**95,801**
Mr. Brian Ennis	Member of the Board of Directors				146,874	6,000	**152,874**
Ms. Paula Spears	Member of the Board of Directors				212,654	7,500	**220,154**
Mr. Jan Egberts	Member of the Board of Directors					4,500	**4,500**
Total Directors' compensation		**294,401**	**-**	**13,421**	**431,528**	**18,000**	**757,350**

The advisory fees due to Mr. Brian Ennis and Ms. Paula Spears correspond to services rendered to and paid by Implanet America Inc.

The terms for the allocation of the variable part of compensation are based on performance criteria.

For the award of equity instruments to executives, see Note 9.3.

Note 22: Commitments given

22.1 Retirement Benefits

Accounting principles

The amounts of future payments corresponding to benefits granted to employees are valued using an actuarial method, using assumptions concerning the trend in salaries, retirement age and mortality; these valuations are then discounted.

These commitments are not the subject of provisions but appear in the off-balance sheet commitment below.

Calculation methodology

The purpose of the actuarial valuation is to produce an estimate of the discounted value of Implanet's commitments in terms of retirement benefits provided for in the collective agreements.

These obligations, related to the legal or contractual compensation due in respect of retirement are evaluated at the year-end dates of the three fiscal years presented. These retirement benefits are not the subject of recognition in the form of a provision in the Company's financial statements, but constitute an off-balance sheet commitment.

This amount is determined on the various year-end dates on the basis of an actuarial valuation, based on the use of the projected credit unit method, taking into account staff turnover and mortality rates.

Actuarial assumptions

The main actuarial assumptions used for evaluation of the retirement benefits are the following:

ACTUARIAL ASSUMPTIONS	12/31/2016		12/31/2015	
	Managers	**Non managers**	**Managers**	**Non managers**
Retirement age	Voluntary departure between ages 65 and 67			
Collective agreements	Metallurgy Engineers and Managers	Metallurgy Gironde Landes	Metallurgy Engineers and Managers	Metallurgy Gironde Landes
Discount rate (IBOXX Corporates AA)	1.31%		2.03%	
Mortality table	INSEE 2015		INSEE 2015	
Rate of revaluation of salaries	2%		2%	
Rate of turnover	Average (AG2R table)		Average (AG2R table)	
Rate of social security charges	52%	47%	53%	47%

Calculated commitments

The commitments calculated for the retirement benefits are broken down as follows:

RETIREMENT BENEFITS (Amounts in euros)	12/31/2016	12/31/2015
Amount of commitments	100,626	82,905

22.2 Personal training account ("CPF")

Since January 1, 2015, the Personal training account has replaced the Individual right to training ("ITR").

Training costs under CPF are now financed by the accredited collecting fund for training (OPCA) to which the vocational training contributions are paid. The Company thus has no commitment in this respect since January 1, 2015.

22.3 Obligation under the terms of the KREOS contract

Within the framework of the KREOS bond contract signed on July 19, 2013 (see Note 11), the Company granted to KREOS the following sureties and commitments:

- pledge of the business goodwill in favor of KREOS;
- commitment by the Company not to contract, without prior authorization from KREOS, debt of more than €2,500,000 other than (a) the KREOS bond, (b) borrowings to cover working capital requirement, (c) advances from OSEO (or any other support or advance from public bodies), (d) the issue of convertible bonds or bonds redeemable in shares, or (e) current account advances from shareholders;

- commitment by the Company not to proceed with any pledge or cede any assets, except in the normal course of its business.

22.4 Obligation under the terms of the L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND contract

Within the framework of the OCABSA contract signed on October 12, 2015, the Company granted the following sureties and commitments to L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND:

- commitment (a) not to participate in any floating-rate financing, (b) not to pay dividends in the form of Company assets or shares, (c) not to issue transferable securities conferring a right to acquire equity without preferential subscription rights as part of an offer to qualified investors or a restricted group of investors without the prior agreement of L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND;
- company commitment not to enter into any mortgage, physical collateral, pledge of goodwill or guarantee against debt securities conferring a right to acquire equity without granting the same guarantees to L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND.

22.5 Lease-financing

LEASE FINANCING (Amounts in euros)	12/31/2016	12/31/2015
Original value	**2,615,627**	**3,826,227**
Depreciation and amortization:		
- cumulative total for prior years	1,711,358	2,494,182
- allocations for the year	362,955	382,098
Total	**2,074,313**	**2,876,280**
Royalties paid		
- cumulative total for prior years	2,464,208	3,144,444
- royalties for the year	327,437	362,192
Total	**2,791,645**	**3,506,636**
Royalties remaining to be paid		
- in less than one year	306,910	305,257
- between one and five years	101,057	282,904
- in more than five years		
Total	**407,967**	**588,161**
Residual value		
- in less than one year	1	-
- between one and five years	2,159	1,393
- in more than five years		
Total	**2,160**	**1,393**
Amount recognized during the year	**349,737**	**359,128**

Finance lease contracts cover software, installations, equipment and tooling.

22.6 Commercial leases

Real estate leases

Implanet SA has concluded the following commercial lease:

Real estate complex (administrative and logistics buildings):

Address	Technopole Bordeaux Montesquieu, allée François Magendie, 33650 Martillac, France
Term	October 1, 2016 – September 30, 2026
Early departure	Possible at the end of the second three-year period
Annual rent excl. VAT and charges	€212,000

Charges and commitments

The amount of the rental payments recognized at the end of 2016 and the commitments up until the next three-year period are broken down as follows:

					Commitment until the next termination date		
Location	**Real estate leasing contracts**	**Effective start date of lease**	**Expiry date of lease**	**Leasing expenses excluding charges at 12/31/2016**	**Due in less than 1 year**	**From 1 to 5 years**	**Due in more than 5 years**
Martillac	Real estate complex (administrative & logistics buildings)	10/01/2016	09/30/2026	**53,000**	212,000	848,000	159,003

22.7 Factoring contract

The Company uses the CGA and CofaCrédit factoring organizations for financing, by assigning to it trade receivables originating in France and export. At the end of the two fiscal years presented, the outstanding balances (amounts discounted at the year-end date), together with the financial expenses arising from the use of the factor, were as follows:

FACTORING COMPANY (Amounts in euros)	**12/31/2016**	**12/31/2015**
Outstanding financing balance with factor	1,180,691	65,098
Total factor debt	**1,180,691**	**65,098**
Commissions on factor drawdowns	30,270	19,672
Interest on factor drawdowns	5,063	4,061
Total factor expenses	**35,333**	**23,732**

The counterpart for the assignment of the trade receivables to the factor is paid into the Company's cash balance by the factor.

The customer risk which may arise from an unpaid receivable included in the outstanding balance is not transferred to the factor but remains borne by Implanet. The Company re-incorporates into its trade receivables those which have been assigned to the factor, where the latter is the subject of a bad debt by a customer and where the factor has reassigned it to Implanet; a provision for impairment of these receivables is made as soon as the risks are identified.

Factoring and financing commissions are recognized in financial net income. The amount of the guarantee fund for factoring contracts was €81,153 at the end of the fiscal year, recognized in assets (see Note 5.2).

22.8 Other financial commitments

Documentary credits and remittances

The Company may put in place documentary credits or remittances on certain markets.
No documentary credits or remittances were in progress at the close of the two fiscal years presented.

Pledge of term accounts and medium-term notes

- Renewable pledge of a €150 thousand term deposit account maturing in 2018 under lease financing agreements with HSBC Bank.
- Pledge of a €300 thousand medium-term note maturing in 2019 under a lease-back agreement with Banque Courtois.
- Pledge of a term deposit of €200 thousand under a bank loan taken out with Banque Courtois in the first half of 2015, maturing in 2018.

Earn-out clause - divestiture of BEEP N TRACK to GHX

The contract for the divestiture of the BEEP'n TRACK business to GHX includes an earn-out clause on the basis of an agreement for the sharing of revenues exceeding the current business plan of GHX for the 2013-2015 fiscal years. Under the terms of this clause, the Company could receive a maximum earn-out of USD 4 million.

No accrued income was recognized at December 31, 2016 as at December 31, 2015, given the uncertainty concerning the receipt and assessment of this earn-out.

Bank sureties

- Bank surety of €10,000 from the Banque Courtois on behalf of Implanet in favor of TOTAL.

The bank surety of €28,630 from the Banque Courtois on behalf of Implanet in favor of the lessor of its administrative building was withdrawn during the 2016 fiscal year.

Note 23: Headcount

The average headcount of Implanet during the last two fiscal years was as follows:

AVERAGE HEADCOUNT	2016 fiscal year	2015 fiscal year
Managers	25.9	24.6
Employees	17.7	15.6
Total average headcount	**43.7**	**40.2**

Note 24: Management and measurement of financial risks

Implanet may find itself exposed to various types of financial risks: market risk, credit risk and liquidity risk. Where applicable, Implanet puts in place simple means proportionate to its size in order to minimize the potentially unfavorable effects of these risks on its financial performance. Implanet's policy is not to subscribe for financial instruments for the purposes of speculation. Implanet does not make use of derivative financial instruments.

24.1 Interest rate risk

Implanet does not have significant exposure to interest rate risks, inasmuch as:

- cash investments include term accounts and medium-term marketable warrants;
- the Company has no variable-rate debt.

24.2 Credit risk

Credit risk is linked to deposits with banks and financial establishments. Implanet relies on first class financial establishments for its cash balances and therefore carries no significant credit risk on its cash flow.

The Company distributes its implants to distributors and to public and private hospitals.

The credit risk on these healthcare facilities and distributors is low. Furthermore, the customer payment terms comply with the requirements of the Modernization of the Economy Act (LME).

It has implemented policies that allow it to ensure that its customers have a suitable credit history.

With regard to the concentration of credit risk, two distributors each account for more than 10% of revenue at December 31, 2016: one Export distributor (11%) and one France distributor (23%).

24.3 Currency risk

The chief risks in respect of the foreign exchange impact on purchases and sales in foreign currencies relate essentially to transactions with its subsidiary in US dollars.

At this stage of its development, the Company has not made use of any hedging in order to protect its business against exchange rate fluctuations. However, the Company cannot ignore the possibility that a significant increase in its activity or the presence of a subsidiary in the United States would result in greater exposure to exchange rate risk. The Company will then envisage making use of an appropriate policy for hedging these risks.

24.4 Equity risk

The company does not hold any equity interest or investment securities that are traded on a regulated market.

Note 25: Post balance sheet events

January 2017:

- European Patent granted by the European Patent Office (EPO) for the universal tensioning system for the Jazz implant.
- FDA 510(k) and European (CE) regulatory marketing authorization obtained for the new Jazz Frame® implant.

March 2017:

- Patent obtained for Jazz Lock® in France and Request for Protection in the United States currently being studied by the Patent Office.
- Signature of an exclusive distribution partnership in Australia and New Zealand

The Company also carried out a capital increase of €262,500 after December 31, 2016 following the exercise of 105,012 BSAs held by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND.

Note 26: Subsidiaries and equity interests

The Company only has one wholly-owned subsidiary, Implanet America Inc.(created at the end of February 2013) whose registered office is located 8 Faneuil Hall Market Place, 3rd Floor in Boston, Massachusetts, 02109, United States.

TABLE OF SUBSIDIARIES AND INVESTMENTS (Amounts in euros)	Capital	Reserves and retained earnings before allocation of net income	Portion of share capital held	Carrying amount of the securities held		Current account advances	Profit or loss from the last fiscal year	Dividends	Observations

20.4. AUDIT OF THE ANNUAL FINANCIAL STATEMENTS

20.4.1. Report by the Statutory auditors on the annual consolidated financial statements at December 31, 2016

"To the shareholders,

In compliance with the assignment entrusted to us by your General Shareholders' Meetings, we hereby present to you our report relating to the fiscal year ended December 31, 2016, on:

- the audit of the consolidated financial statements of the Company Implanet, as attached to this report;
- the justification of our assessments;
- the specific verification required by law.

The consolidated financial statements have been approved by the Board of Directors. Our role is to express an opinion on these financial statements based on our audit.

I. Opinion on the consolidated financial statements

We carried out our audit in accordance with the professional standards applicable in France; these standards require the completion of audit work which gives reasonable assurance that the consolidated financial statements do not include any significant anomalies. An audit consists of verifying, by sampling or by other selection methods, the elements supporting the amounts and information appearing in the consolidated financial statements. It also consists of assessing the accounting methods used, the significant estimates made and the presentation of the financial statements as a whole. We believe that the information which we collected is sufficient and appropriate on which to base our opinion.

We certify that the consolidated financial statements for the fiscal year present, in accordance with the IFRS guidelines as adopted by the European Union, a true and fair view of the assets, financial position and results of the Group constituted by the persons and entities included in the consolidation.

Without questioning the opinion above, we would draw your attention to Note 2.1 "Principle for preparation of the financial statements" in the notes to the financial statements, which describes the information underlying the going concern assumption.

II. Justification of our assessments

In accordance with the requirements of Article L. 823-9 of the French Commercial Code relating to the justification of our assessments, we bring to your attention the following matter:

Your Group recognizes impairment charges for inventories in accordance with the methods described in Note 5 "Inventories". Our work consisted of assessing the data and assumptions used by your Group to calculate the impairment charges on inventories and to review the calculations made.

The assessments thereby made form part of our audit approach for the consolidated financial statements, taken as a whole, and have therefore contributed to the formation of our opinion as expressed in the first part of this report.

III. Specific verification

In accordance with the professional standards applicable in France, we also carried out the specific verification provided for by law of the information relating to the Group, included in the management report.

We do not have any observations to make concerning their accuracy and their consistency with the consolidated financial statements.

Lyon and Bordeaux, March 31st, 2017

„

20.4.2. Report by the Statutory auditors on the annual financial statements at December 31, 2016

“

To the shareholders,

In compliance with the assignment entrusted to us by your General Shareholders’ Meetings, we hereby present to you our report relating to the fiscal year ended December 31, 2016, on:

- the audit of the annual financial statements of Implanet, as attached to this report;
- the justification of our assessments;
- the specific verifications and information required by law.

The annual financial statements have been approved by the Board of Directors. Our role is to express an opinion on these financial statements based on our audit.

I. Opinion the annual financial statements

We carried out our audit in accordance with the professional standards applicable in France; these standards require the completion of audit work which gives reasonable assurance that the annual financial statements do not include any significant anomalies. An audit consists of verifying, by sampling or by other selection methods, the elements supporting the amounts and information appearing in the annual financial statements. It also consists of assessing the accounting methods used, the significant estimates made and the presentation of the financial statements as a whole. We believe that the information which we collected is sufficient and appropriate on which to base our opinion.

We certify that the annual financial statements present, with regard to French accounting rules and principles, a true and fair view of the net income from operations for the fiscal year just ended, as well as of the financial position and the assets of the Company at the end of this fiscal year.

Without questioning the opinion above, we would draw your attention to Note 2.1 "Principle for preparation of the annual financial statements" in the notes to the financial statements, which describes the information underlying the going concern assumption.

II. Justification of our assessments

In accordance with the requirements of Article L. 823-9 of the French Commercial Code relating to the justification of our assessments, we bring to your attention the following matter:

- your Company recognizes impairment charges for inventories in accordance with the methods described in Note 4 "Inventories". Our work consisted of assessing the data and assumptions used by your Company to calculate the impairment charges on inventories and to review the calculations made;
- Notes 3.2 “Long-term financial assets", 5.1 "Receivables" and 5.2 "Details of the receivables and breakdown by maturity" describe the evaluation and impairment principles and methods used for equity investments and receivables, in particular as

regards the Implanet America subsidiary. Our work consisted of assessing the data and the assumptions on which these estimates are based.

The assessments thereby made form part of our audit approach for the annual financial statements, taken as a whole, and have therefore contributed to the formation of our opinion as expressed in the first part of this report.

III. Specific verifications and information

We have also carried out, in accordance with the professional standards applicable in France, the specific verifications required by the law.

We do not have any observations to make concerning the accuracy and consistency with the annual financial statements of the information given in the management report of the Board of Directors and in the documents sent to shareholders concerning the financial position and the annual financial statements.

Concerning the information supplied in application of the provisions of Article L. 225-102-1 of the French Commercial Code concerning the compensation and benefits paid to corporate officers, as well as the commitments granted in their favor, we have verified their consistency with the financial statements or with the data used for the preparation of these financial statements and, where applicable, with the information collected by your Company from the companies controlling your Company or controlled by it. On the basis of this work, we confirm that this information is true and fair.

In application of the law, we have assured ourselves that the various items of information relating to the identity of the holders of the share capital or the voting rights have been notified to you in the management report.

e) Dividends paid	0	0	0	0	0
III - NET EARNINGS PER SHARE					
a) Net earnings after tax and employee profit-sharing but before depreciation, amortization and provisions	(0.12)	(0.76)	(1.15)	(0.48)	(0.27)
b) Net earnings after tax, employee profit-sharing, depreciation, amortization and provisions	(0.16)	(1.20)	(0.98)	(0.64)	(0.37)
c) Dividend per share	0	0	0	0	0
IV - PERSONNEL					
a) Average number of employees during the year	29.8	33.1	38.5	40.2	41.5
b) Total payroll	1,981,032	2,197,670	2,210,587	2,258,155	2,345,807
c) Total amount paid in social benefits (social security contributions, social programs, etc.)	930,148	984,260	1,059,050	1,056,067	1,086,083

20.10.2. Proposed allocation of 2016 net income

After deduction of all expenses, taxes, depreciation and amortization, the Company's operating profit established under French accounting standards (see Section 20.3 of this *Document de référence*) stood at a loss of €7,795,520 which we suggest to be allocated:

- for €4,592,558.66 to the special reserve account entitled "special reserve from the capital reduction decided on May 24, 2016" which is thus fully cleared; and
- for the balance, i.e. €3,199,961.34 to the "retained earnings" account, which is brought down from €0 to €3,199,961.34.

20.10.3. Non tax-deductible expenses

In accordance with the provisions of Article 223 quarter of the French General Tax Code, the amount of expenses and charges that are not deductible for tax purposes, as mentioned in Article 39-4 of said code, comes to €50,029 for the fiscal year ended on December 31, 2016.

20.10.4. Information on supplier payment terms

The breakdown of the balance of debts to suppliers at the closing of the 2016 and 2015 fiscal years is as follows:

In euros	**Debts due at 12/31/2016**	Accruing debts				Total
		0 to 30 days	30 to 45 days	45 to 60 days	> 60 days	
Suppliers	**366,431**	659,638	298,295	74,528	79,760	1,478,651

In euros	**Debts due at 12/31/2015**	Accruing debts				Total
		0 to 30 days	30 to 45 days	45 to 60 days	> 60 days	
Suppliers	**422,198**	462,400	336,915	91,455	16,144	1,329,113

21. ADDITIONAL INFORMATION

21.1. SHARE CAPITAL

21.1.1. Amount of share capital

21.1.1.1. Issued share capital

As of the date of the *Document de référence*, the Company's share capital is €15,176,042.70 divided into 21,680,061 shares with a nominal value of €0,70 each, fully paid up and all of the same class.

21.1.1.2. Unissued authorized capital

21.1.2. Non-equity securities

None.

21.1.3. Number, book value and nominal value of shares held by the Company or on its behalf

With the exception of shares held as part of the liquidity contract signed with the bank Oddo et Cie (see paragraph "Liquidity contract" in Section 21.1.3.), the Company does not own any of its shares either directly or through a third party on its behalf.

On May 24, 2016, the Combined Shareholders' Meeting authorized the Board of Directors, for a period of 18 months from the date of the meeting, to implement a Company share buyback program in accordance with the provisions of Article L. 225-209 of the French Commercial Code and in accordance with the General Regulation of the French Financial Markets Authority (AMF), subject to the following conditions. This authorization replaced the authorization for the same purpose granted on January 9, 2015, with the conditions defined by the latter being identical to those defined by the one on May 24, 2016:

Maximum number of shares that can be purchased: 10% of the share capital on the date of buyback of the shares. Where the shares are purchased to support liquidity and trading volumes of the securities, the number of shares factored in to calculate said 10% limit corresponds to the number of shares purchased less the number of shares sold during the authorization period.

Objectives of share buybacks:

1. to improve trading volumes and liquidity of the Company's securities under a liquidity contract to be entered into with an independent investment services provider, in accordance with the Code of Ethics approved by the AMF on March 21, 2011;
2. to ensure that the Company can meet its obligations associated with share option schemes, free share allocation and employee savings plans, or other share allocations to employees of the Company or associates;
3. to deliver shares following the exercise of the rights attached to securities giving access to the share capital;

4. to purchase shares to be held and subsequently used in exchange or as payment in connection with potential external growth transactions; or
5. to cancel all or part of the shares redeemed in this manner.

Maximum purchase price: €20, excluding fees and commissions and any potential adjustments to take into account any transactions on the share capital.

It should be noted that the number of shares purchased by the Company to be held and subsequently surrendered as payment or in exchange in connection with a merger, demerger or capital contribution, may not exceed 5% of the Company's share capital.

Maximum amount of funds that can be used for buyback of shares: €2,000,000

Shares redeemed in this manner may be canceled.

As of the date of the admission of the shares to trading on the regulated market of Euronext in Paris, the Company will be subject to the following communication obligations as regards share redemption:

Prior to launching the buyback program approved by the General Shareholders' Meeting of May 24, 2016

1. Publication of a description of the share buyback program (complete and effective electronic distribution by a professional distributor and released online on the Company's website).

During implementation of the redemption program

2. Publication of transactions at D+7 on the Company's website (excluding any transactions carried out under a liquidity contract).

3. Monthly filing by the Company to the AMF.

Each year

4. Presentation of the outcome of the buyback program and detail of the use of the shares bought back in the Board of Directors' Report to the General Shareholders' Meeting.

Liquidity contract

For this purpose, the Company signed a liquidity contract on November 20, 2013 with Banque Oddo et Cie to which it allocated €400,000.

Number of shares purchased and sold during the 2016 fiscal year:

Under the liquidity contract:

- 555,397 shares were purchased at the average price of €1.42; and
- 493,918 shares were sold at the average price of €1.47.

The Company did not carry out own share transactions for other reasons.

Number and value of treasury shares held at December 31, 2016:

Considering the purchases and sales made during the 2016 fiscal year, the balance of the liquidity contract was 136,500 shares at December 31, 2016. At this date, the book value was €0.80, on the basis of the closing price at December 30, 2016, namely €109,200.

21.1.4. Convertible or exchangeable securities or securities with warrants

As of the date of the *Document de référence*, the securities giving access to the share capital fall into four categories, as detailed below:

21.1.4.1. Founders' warrants (BSPCEs)

	BSPCE$_{H/12/2007}$	BSPCE$_{H/02/2009}$	BSPCE$_{H/03/2010}$	BSPCE$_{H/06/2011}$	BSPCE$_{H/09/2011}$	BSPCE$_{03/2016}$	BSPCE$_{07/2016\text{-}T1}$	BSPCE$_{07/2016\text{-}T2}$
Date of the Meeting	December 29, 2007	February 5, 2009	March 31, 2010	March 14, 2011	September 26, 2011	January 9, 2015	May 24, 2016	
Date of Board meeting	December 29, 2007	February 5, 2009	April 22, 2010	April 6, 2011	November 18, 2011	March 24, 2016	July 11, 2016

(*) After adjusting the number of shares that may be subscribed upon exercise of BSPCEs and the exercise price of the BSPCEs following the successive increases in capital while maintaining the shareholders' preferential subscription right, in accordance with Article L. 228-99 of the French Commercial Code. The warrants were adjusted to parity at 1.16 in March 2015 (Board of Directors' decision of March 18, 2015) then at 1.05 in November 2016 (Board of Directors' decision of November 17, 2016).

(1) All of these founders' warrants (BSPCEs) are exercisable as of the date of the Document de référence

(2) Exercisable BSPCEs must be exercised by their holder or his/her assignees:

- *within three months from the termination date of any salaried position and/or office of corporate officer within the Company of the BSPCE holder, excluding where the termination of such salaried position is the consequence of a total or partial transfer of the business to a third party,*
- *within 15 days from the signature of a merger agreement through absorption of the Company, or the date of transfer to a third party by one or more Company shareholders, acting separately or in concert pursuant to Article L. 233-10 of the French Commercial Code, of a number of shares such that said third party acquires the majority of the Company's share capital or voting rights;*
- *within six months from the incapacity or death of the holder.*

(3) The BSPCEs$_{03/2016}$ may be exercised, by, the holder in accordance with the following schedule:

- *up to 1/3 from April 1, 2017;*
- *up to 1/3 from April 1, 2018; and*
- *up to 1/3 from April 1, 2019.*

(4) The BSPCEs$_{07/2016\text{-}T1}$ may be exercised, by the holder in accordance with the following schedule:

- *up to 1/3 from July 11, 2016;*
- *up to 1/3 from July 1, 2017; and*
- *up to 1/3 from July 1, 2018.*

(5) The BSPCEs$_{07/2016\text{-}T2}$ may be exercised, by the holder in accordance with the following schedule:

- *up to 1/3 from July 1, 2017;*
- *up to 1/3 from July 1, 2018; and*
- *up to 1/3 from July 1, 2019.*

(*) After adjusting the number of shares that may be subscribed upon exercise of the BSAs and the exercise price of the BSAs following the successive capital increases while maintaining the shareholders' preferential subscription rights, in accordance with Article L. 228-99 of the French Commercial Code. With the exception of the adjustment to parity for the exercise of L1 subscription warrants whose integral exercise will lead to the creation of 2,285,525 new shares, the other warrants were adjusted to parity at 1.16 in March 2015 (Board of Directors' decision of March 18, 2015) then at 1.05 in November 2016 (Board of Directors' decision of November 17, 2016).

(1) The KREOS BSAs will be exercisable (and shall expire concomitantly) until the earlier of the following two events occurring:

- *the exercise of one or more transfers of Implanet shares which would cause any person to hold at least 95% (on a fully diluted basis) of the Company's share capital; or*
- *the end of a period of five (5) years from the date of initial listing of all or part of the Company's shares on a regulated market or a French or foreign stock exchange.*

(2) All of these BSAs are exercisable as of the Date of the Document de référence.

(3) The BSAs $_{01/2014}$ may be exercised by the holder in accordance with the following schedule:

- *up to 1/3, from January 8, 2015 onwards;*
- *up to 1/3, at the end of an 18-month period starting from the date of allocation by the Board, i.e. from July 8, 2015 onwards; and*
- *up to 1/3, at the end of a 24-month period starting from the date of allocation by the Board, i.e. from January 8, 2016 onwards.*

(4) The BSAs$_{07/2015}$ may be *exercised by the holder in accordance with the following schedule:*

- *up to 1/3 from July 1, 2016;*
- *up to 1/3 from July 1, 2017;*
- *up to 1/3 from July 1, 2018;*
- *with regard to Mrs. Paula Ness Speers, the BSAs$_{07/2015}$ may be exercised according to the aforementioned timetable, provided that she has attended at least 75% of board meetings held in the calendar year prior to the date in question, and with regard to consultants, provided that their consultancy contract with the Company was in force for the entire calendar year prior to the date in question.*

(5) The BSAs$_{07/2016\text{-}T1}$ may be *exercised by the holder in accordance with the following schedule:*

- *up to 1/3 from July 1, 2017;*
- *up to 1/3 from July [1], 2018;*
- *up to 1/3 from July [1], 2019;*
- *with regard to Mary Shaughnessy and Jan Egberts, the BSAs$_{07/2016\text{-}T1}$ may be exercised according to the aforementioned timetable, provided that they have attended at least 75% of board meetings held in the calendar year prior to the date in question, and with regard to consultants, provided that their consultancy contract with the Company was in force for the entire calendar year prior to the date in question.*

Options remaining as of the Date of the *Document de référence*	12,500	70,000
Number of subscribable shares as of the Date of the *Document de référence**	4,166	23,333

(*) After adjusting the number of shares that may be subscribed upon exercise of the subscription options and the exercise price of the subscription options following the increases in capital while maintaining shareholders' preferential subscription rights in November 2016, in accordance with Article L. 228-99 of the French Commercial Code, the warrants were adjusted to parity at 1.05 (Board of Directors' decision of November 17, 2016).

(1) Exercisable subscription options must be exercised by their holder or his/her assignees:

- *within three months from the termination date of any salaried position and/or office of corporate officer within the Company of the subscription option holder, excluding where the termination of such salaried position is the consequence of a total or partial transfer of the business to a third party;*
- *within 15 days from the signature of a merger agreement through absorption of the Company, or the date of transfer to a third party by one or more Company shareholders, acting separately or in concert pursuant to Article L. 233-10 of the French Commercial Code, of a number of shares such that said third party acquires the majority of the Company's share capital or voting rights;*
- *within six months from the incapacity or death of the holder.*

(2) The Options$_{7/2015 \text{ may be}}$ exercised by the holder in accordance with the following schedule:

- *up to 1/3 from September 1, 2016;*
- *up to 1/3 from September 1, 2017; and*
- *up to 1/3 from September 1, 2018.*

(3) The Options$_{03/2016}$ may be *exercised by the holder in accordance with the following schedule:*

- *up to 1/3 from April 1, 2017;*
- *up to 1/3 from April 1, 2018; and*
- *up to 1/3 from April 1, 2019.*

21.1.4.4. Free share allocations

None.

21.1.4.5. Bonds convertible into shares with share subscription warrants attached

On October 14, 2015, the Company issued 100 free share issuance warrants ("Share Issuance Warrants") then on June 29, 2016, 400 share issuance warrants, which may give rise to the issue of 500 convertible bonds with warrants attached ("OCABSAs") representing a bond issue of up to €5 million, in favor of L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND.

At the date of this *Document de référence*, L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND had exercised a total of 160 OCABSAs as follows:

- 100 OCABSAs on October 14, 2015;
- 35 OCABSAs on June 30, 2016; and
- 25 OCABSAs on July 29, 2016.

Under the terms of an issue agreement signed with the Company on October 14, 2015 (as amended on October 21, 2015 and March 24, 2016), L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND also agreed to subscribe for an additional €3.4 million in several tranches, upon the exercise of the remaining 340 Share Issuance Warrants to be issued, subject to compliance with certain standard conditions.

Bonds convertible into shares (OCAs)

The main characteristics of the OCA are as follows, given that any OCA that may be issued at a later date upon exercise of the 340 Share Issuance Warrants to be issued free of charge to L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND will have the same characteristics:

- nominal value of an OCA: €10,000;
- subscription price of an OCA: 99% of par value;
- coupon: the OCAs are not interest bearing;
- maturity: 12 months, given that OCAs not converted on their maturity date shall be repaid by the Company (apart from the last tranche of OCA which may be issued subject to approval from the next Annual General Shareholders' Meeting);
- transferability/other: The OCAs are transferable under certain conditions; no request has been made for admission to trading on the Paris Euronext stock market and so they are not listed;
- conversion: The OCAs may be converted into Implanet shares at the holder's request, at any time, in accordance with a conversion ratio determined using the formula below:

  N = Vn/P

  where "N" corresponds to the number of new ordinary shares of Implanet to be issued upon the conversion of an OCA;

  "Vn" corresponds to the bond represented by the OCA (nominal value of an OCA);

  "P" corresponds to 92% of the lowest of the last ten (10) daily volume-weighted average prices of the Implanet share (as published by Bloomberg) immediately preceding the concerned OCA

conversion date, it being specified that the market days during which the OCA holder concerned has sold Implanet shares will be excluded. P cannot, however, be less than the nominal value of one Implanet share, or €0.70 at the current price.

By way of an exception, if the last tranche of OCAs has still not been converted six months after the original maturity date, these bonds shall be converted into shares automatically on the expiry date of said six-month period, in accordance with the conversion ratio determined using the formula shown below:

N' = Vn/P'

"N'" being the number of new ordinary Implanet shares to be issued upon the conversion of the last tranche of OCAs not yet converted on their original maturity date, extended for a further six months;

"Vn" being the bond receivable that the OCA represents (nominal value of one OCA);

"P'" being the greater of (i) 85% of the lowest of the ten (10) average daily prices weighted by the volumes of Implanet's share (as published by Bloomberg) immediately preceding the date of conversion of the OCA in question, given that the trading days on which the holder of the OCA in question sells the Implanet shares will be excluded and (ii) 80% of the average price weighted by the volumes of Implanet's share over the three trading days preceding the date of conversion of the OCA in question. P' cannot, however, be less than the nominal value of one Implanet share, or €0.70 at the current price.

On the Date of the *Document de référence*, 1,104,876 new Company shares had been issued upon conversion of 159 OCAs at an exercise price calculated using the procedures described above, totaling €1,590,000 (€1,068,911 nominal value and €521,089 issue premium).

On the Date of the *Document de référence*, as a result of the conversions referred to above, 1 OCA were still in circulation and the loan amount outstanding on that date stood at €10,000. By way of indication, a maximum of 14,286 shares may be created upon conversion of the only outstanding OCA .

Share subscription warrants attached to OCAs ("BSAs")

The main characteristics of share subscription warrants attached to OCAs ("BSAs ") are as follows:

- exercise price: 110% of the lowest of the ten (10) average daily prices weighted by the volumes of Implanet's share immediately preceding the exercise date of Share Issuance Warrants giving rise to the issue of the OCAs from which said BSAs are detached;
- exercise ratio: each BSA carries entitlement to the subscription by its holder, at the holder's own discretion, of one new ordinary Company share;

- number of BSAs attached to each tranche of OCAs: this number is calculated so that in the event of exercise of all the BSAs, the capital increase resulting from the exercise of the said BSA warrants is equal to the nominal amount of the corresponding OCA tranche. Thus the number of BSAs attached to the OCAs amounts to 831,322 BSAs, including:
  - 400,000 $BSAs_{L1T1}$, given that each of these BSA carries the entitlement to subscribe for 3,571 new ordinary Company shares at a price of €0.70,
  - 244,755 $BSAs_{L1T2}$, given that each of these BSA carries the entitlement to subscribe for 2,043 new ordinary Company shares at a price of €0.70,
  - 186,567 $BSAs_{L1T3}$, given that each of these BSAs carries the entitlement to subscribe for 1,914 new ordinary Company shares at a price of €0.70;
- exercise period: five years from the date of issue of the BSAs;
- transferability/other: the BSAs are detached from the OCAs immediately; they are freely transferable. No request has been made for admission to trading on the Paris Euronext stock market and so they are not listed.

At the date of this *Document de référence*, 105,012 BSA_{L1T1} had been exercised by L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND giving rise to the issue of 375,000 new ordinary shares. Consequently, on this same date, 726,310 BSA (including 294,988 $BSAs_{L1T1}$, 244,755 $BSAs_{L1T2}$, 186,567 $BSAs_{L1T3}$) carrying entitlement to the issue of 1,910,525 new Company shares are outstanding.

21.1.4.6. Summary of dilutive instruments

As of the date of the *Document de référence*, the total number of shares that can be created by the full exercise of all the rights giving access to the share capital of the Company totals 2,977,457 shares, corresponding to a maximum dilution of 13.73% on the basis of the diluted share capital. The dilution in terms of voting rights is identical and amounts to 12.08% on the basis of the diluted voting right[44].

21.1.5. Acquisition rights and/or obligations connected to share capital issued but not authorized, and commitment to capital increase

The issue resolutions approved by the General Shareholders' Meeting of May 24, 2016 and in force on the Date of the *Document de référence* are summarized below:

	Period of validity/Expiry	Ceiling (nominal value)	Pricing principles
Combined General Shareholders' Meeting of May 24, 2016			
Authorization granted to the Board of Directors for the purpose of decreasing the share capital by canceling treasury shares	18 months/ November 24, 2017	Up to a maximum of 10% of the share capital over a 24-month period	-

[44] Excluding conversion of the OCAs (and exercise of the attached BSAs) to be issued upon the exercise of the 340 share issuance warrants to be issued by the Company in favor of L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND, subject to the other usual conditions (see Sections 10.1.4.2 and 21.1.4.5 of the *Document de référence*).

	Period of validity/Expiry	Ceiling (nominal value)	Pricing principles
Delegation of authority granted to the Board of Directors to issue shares and/or securities giving immediate and/or future access to the Company's share capital, with preferential subscription rights	26 months/ July 24, 2018	€7,515,516.40 (1)	-
Delegation of authority granted to the Board of Directors for the purpose of increasing the capital by issuing shares or any securities giving future access to the share capital, without preferential subscription rights, through a public offering and with the option to create a priority right	26 months/ July 24, 2018	€3,757,758.20 (1)	See (2)
Delegation of authority granted to the Board of Directors to increase the share capital, immediately or in the future, by issuing ordinary shares or any securities giving access to the share capital, within the limit of 20% of the share capital per year, without shareholders' preferential subscription rights, by means of an offer to qualified investors or a limited circle of investors in accordance with paragraph II of Article L. 411-2 of the French Financial and Monetary Code (private placement)	26 months/ July 24, 2018	€3,757,758.20 (1) and up to a maximum of 20% of the existing share capital at the date of the transaction and per year	See (2)
Authorization granted to the Board in the event of an issue of shares or any securities giving access to the share capital without shareholders' preferential subscription rights, for the purpose of setting the issue price up to the limit of 10% of the share capital and within the limitation stipulated by the General Shareholders' Meeting	26 months/ July 24, 2018	up to a maximum of 10% of the share capital per year	See (3)
Delegation of authority granted to the Board of Directors for the purpose of increasing the number of shares to be issued in the context of a capital increase, with or without preferential subscription rights	26 months/ July 24, 2018	15% of the initial issue (1) (4)	Same price as the initial issue
Delegation of authority granted to the Board, for the purpose of issuing of ordinary shares or securities giving access to the share capital for the purpose of remunerating contributions, in the event of a tender offer including an exchange component initiated by the Company	26 months/ July 24, 2018	€3,757,758.20 (1)	-
Delegation of authority granted to the Board for the purpose of deciding to issue ordinary Company shares or securities giving immediate and/or future access, by any means, to the Company's ordinary shares, within the limit of 10% of the share capital, in compensation for contributions in kind involving equity securities or securities giving access to the share capital of third-party companies, except in the event of a public exchange offer	26 months/ July 24, 2018	€3,757,758.20 and up to a maximum of 10% of the share capital per year (1)	-

	Period of validity/Expiry	Ceiling (nominal value)	Pricing principles
Delegation granted to the Board of Directors in order to increase the share capital by issuing ordinary shares or any negotiable securities giving access to capital, with cancellation of shareholders' preferential subscription rights in favor of a certain category of persons	18 months/ November 24, 2017	€7,515,516.40	See (5)
Delegation of authority granted to the Board of Directors for the purpose of increasing the capital by incorporation of premiums, reserves, profits or other	26 months/ July 24, 2018	1,427,948 €	-
Authorization granted to the Board of Directors for the purpose of granting options to subscribe or purchase Company shares	38 months/ July 24, 2019	432,123 shares See (7)	See (6)
Delegation of authority to be granted to the Board of Directors for the purpose of carrying out a free issue of BSCPE to Company employees and executives	18 months/ November 24, 2017	432,123 shares See (7)	See (8)
Authorization to be granted to the Board of Directors to make allocations of existing or new free shares	38 months/ July 24, 2019	107,364 shares and up to a maximum of 10% of the share capital existing at the time of the allocation See (7)	
Delegation of authority granted to the Board of Directors for the purpose of issuing and allocating share subscription warrants to (i) members and non-voting members of the Company's Board of Directors in office on the allocation date of the warrants, who are not employees or executives of the Company or one of its subsidiaries, (ii) persons who have entered into a services or consultancy agreement with the Company, or (iii) members of any committee that might be set up by the Board of Directors, who are not employees or executives of the Company or any of its subsidiaries	18 months/ November 24, 2017	432,123 shares See (7)	See (8)
Delegation granted to the Board of Directors to issue 400 free subscription warrants for the conversion of bonds into shares with share subscription warrants with cancellation of the preferential subscription right in favor of L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND (9)	18 months/ November 24, 2017	5,714,285 ordinary shares likely to be generated from the conversion of the convertible bonds and 5,714,285 shares likely to be generated from the conversion of the share subscription warrants	See Section 21.1.4.5

(1) These amounts are not cumulative. The maximum cumulative ceiling authorized by the General Shareholders' Meeting for share capital increases has been set at a nominal value of €7,515,516.40. The aggregate nominal amount of issues of debt securities giving access to the Company's share capital may not exceed €20,000,000.

(2) The share issue price will be at least equal to the weighted average of the prices quoted on the last three trading days before the price was set, less, if applicable, the discount authorized by law (currently 5%), and corrected in the case of a difference in the possession date on the understanding that the issue price of the securities giving access to the share capital will be such that the sum received immediately by the Company, plus, if applicable, the sum that may be received by it subsequently for each share issued as a result of the issue of said securities, is at least equal to the issue price defined above.

(3) The Board may waive the pricing conditions set out in the aforementioned resolutions (within a limit of 10% of the Company's share capital at the date of the transaction) in each 12-month period, and set the issue price of the ordinary shares and/or securities giving access to the capital, immediately or in the future, as detailed below:

- the issue price of ordinary shares will be at least equal to the weighted average of the prices of the last three trading sessions before it was set, less, if applicable, a maximum discount of 20%, on the understanding that it may under no circumstances be less than the nominal value of a Company share on the issue date of the shares involved;

- the issue price of the securities giving access to the share capital will be such that the sum received immediately by the Company, plus, if applicable, the sum that may be received by it subsequently, for each share issued as a result of the said securities, is at least equal to the issue price defined in the Section above.

(4) 15% or any other percentage determined by decree.

(5) The issue price of the shares issued pursuant to this delegation shall be at least equal to the price selected within the context of a capital increase with preferential subscription rights for shareholders carried out previously by the Company (the "Transaction"), and insofar as the investors in this category of persons may have been unable to invest as much as it wished in the Transaction (as confirmed by a written subscription agreement and included in the issue note forming part of the prospectus published as part of the Transaction).

(6) The purchase or subscription price per share will be determined by the Board of Directors on the date when the option is granted, by reference to the sale price of a share when said regulated stock market or stock exchange closed on the day before the Board made the decision to allocate options. However, the purchase or subscription price per share may under no circumstances be less than ninety-five percent (95%) of the average of the price quoted on the 20 trading sessions preceding the date of the Board of Directors' decision to allocate the options.

(7) These amounts are not cumulative. The maximum cumulative number of shares authorized by the General Shareholders' Meeting and likely to be generated by the exercise of share subscription options, free share allocations and the exercise of warrants and founders' warrants is 539,487.

(8) The exercise price of a BSPCEs/BSAs will be determined by the Board of Directors on the date of their allocation and must be at least equal to the weighted average price over the last 20 trading sessions preceding the date of allocation by the Board.

(9) This delegation was entirely used by the Board of Directors' via their decision of June 29, 2016 (see below).

For the fiscal year ended December 31, 2016, the Board of Directors used the aforementioned delegations and the delegations in force at that period, granted by the General Shareholders' Meeting of January 9, 2015 as follows:

- In respect of the authorizations granted by the General Shareholders' Meeting of January 9, 2015 (note that these delegations are no longer in force, and that the other delegations granted by the said General Shareholders' Meeting were not used during the 2016 fiscal year and were replaced by the delegations granted by the General Shareholders' Meeting of May 24, 2016):

January 26, 2016:

- The Board of Directors used the delegation granted under the 16th resolution of the General Shareholders' Meeting of January 9, 2015 to resolve to issue a total of 30,000 share subscription warrants (known as $BSAs_{201601}$), each carrying entitlement to subscribe for one ordinary share with a nominal value of €1.50 at the fixed price of €3 (issue premium included), representing a capital increase of a maximum total nominal amount of €45,000 and an issue premium of a maximum total amount of €45,000 for the Alpha Bronze company.

March 24, 2016:

- The Board of Directors used the delegation granted under the 13th resolution of the General Shareholders' Meeting of January 9, 2015 to resolve to issue a total of 70,000 share subscription options each carrying entitlement to subscribe for one ordinary Company share with a nominal value of €1.50 at the price of €1.50, for two employees of Implanet America, Inc.

- The Board of Directors used the delegation granted under the 14th resolution of the General Shareholders' Meeting to resolve to issue a total of 370,000 founders' warrants each carrying entitlement to subscribe for one ordinary share with a nominal value of €1.50 at the fixed price of €1.50 representing a capital increase of a maximum total nominal amount of €555,000 for the Chief Executive Officer and employees of the Company.

o In respect of the authorizations granted by the General Shareholders' Meeting of May 24, 2016:

June 29, 2016:

- The Board of Directors used the authorizations granted under the 30th resolution of the General Shareholders' Meeting of May 24, 2016 to resolve to issue 400 free share issuance warrants, which may give rise to the issue of 400 convertible bonds with share subscription warrants ("OCABSAs"), representing a bond issue of up to €4 million, to L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND, under the terms described in Section 21.1.4.5. of this *Document de Référence*.

- The Board of Directors decided to issue 35 OCABSAs representing a total nominal amount of €350,000.

July 11, 2016:

- The Board of Directors used the authorization granted under the 26th resolution of the General Shareholders' Meeting of May 24, 2016 to resolve to allocate 259,488 founders' warrants each carrying entitlement to subscribe for one Company share, at a price of €1.33 each, issue premium included, for employees and corporate officers subject to the tax system of Company employees.

- The Board of Directors used the authorization granted under the 28th resolution of the General Shareholders' Meeting of May 24, 2016 to resolve to issue, at an issue price of €0.14 each, 56,000 share subscription warrants, each carrying entitlement to subscribe for one Company share, at a price of €1.33 each, issue premium included, to two independent directors and two consultants.

- The Board of Directors used the authorization granted under the 28th resolution of the General Shareholders' Meeting of May 24, 2016 to resolve to issue, at an issue price of €0.20 each, 30,000 share subscription warrants, each carrying entitlement to subscribe for one Company share, at a price of €1.33 each, issue premium included, to one consultant.

July 29, 2016: the Board of Directors decided to issue 25 OCABSAs representing a total nominal amount of €250,000 (30th resolution of the General Shareholders' Meeting of May 24, 2016).

November 15, 2016: the Chief Executive Officer, authorized by the Board of Directors, decided on a capital increase with shareholders' preferential subscription rights of a nominal amount of €6,883,173.50 through the issue at par value of 9,833,105 shares with a nominal value of €0.70 each (16th resolution of the General Shareholders' Meeting of May 24, 2016).

Whenever necessary, supplementary Board of Directors and Statutory auditors' reports were made available to shareholders in accordance with legal and regulatory requirements.

21.1.6. Information on the share capital of any company of the Group that is subject of an option or a conditional or unconditional agreement to put it under option

None.

21.1.7. History of the share capital

21.1.7.1. Table of changes in the share capital during the last three fiscal years

The following table shows the changes in the share capital during the last three fiscal years.

Date of issuances	Type of transaction	Capital	Gross issue premium	Number of shares created	Number of shares making up the capital	Nominal value	Share capital
2014	None						
2/18/2015	Capital increase with preferential subscription rights	€6,479,424	€3,239,712	4,319,616	9,719,138	€1.50	€14,578,707
3/13/2015	Capital increase with preferential subscription rights (extension clause)	€971,913	€485,956.50	647,942	10,367,080	€1.50	€15,550,620
12/29/2015	Conversion of bonds convertible into shares	€336,778.50	€123,221.50	224,519	10,591,599	€1.50	€15,887,398.50
3/24/2016	Conversion of bonds convertible into shares	€217,279.50	€22,720.50	144,853	10,736,452	€1.50	€16,104,678.00
5/24/2016	Capital decrease justified by losses	€(8,589,161.60)	-	-	10,736,452	€0.70	€7,515,516.40
6/29/2016	Conversion of bonds convertible into shares	€147,769.30	€142,230.70	211,099	10,947,551	€0.70	€7,663,285.70
9/20/2016	Conversion of bonds convertible into shares	€367,083.50	€232,916.50	524,405	11,471,956	€0.70	€8,030,369.20
11/17/2016	Capital increase with preferential subscription rights	€6,883,173.50	-	9,833,105	21,305,061	€0.70	€14,913,542.70
3/24/2017	Exercise of share subscription warrants	€262,500.00	€30.00	375,000	21,680,061	€0.70	€15,176,042.70

21.1.7.2. Changes in the distribution of the Company's share capital during the last three fiscal years

	Situation at December 31, 2014		Situation at December 31, 2015		Situation at December 31, 2016	
	Number of shares	% of share capital and voting rights	Number of shares	% of share capital and voting rights	Number of shares	% of share capital and voting rights

21.1.7.3. Distribution of the share capital and voting rights as of the date of the *Document de référence*

Please see paragraph in Section 18.1.

21.1.7.4. Change in share price – Risk of price changes

The Company's shares were introduced on the regulated Euronext market in Paris on November 25, 2013 at the price of €7.20.

In the course of the 2016 fiscal year, the share price reached its highest level, €2.28, on January 4, 5 and 6, 2016, and its lowest level, €0.71, on November 21 and 22, 2016. At December 31, 2016, the share closed at €0.80.

Over the first months of 2017, the share price moved from €0.80 to €0.86 on Marc 31, 2017, the closing price on the day preceding the filing date of this *Document de référence*, meaning the Company's market capitalization stood at approximately €18.5 million.

21.2. ARTICLES OF INCORPORATION AND BYLAWS

21.2.1. Corporate purpose (Article 3 of the Bylaws)

The Company's purpose in France and abroad is to design, manufacture and market all types of surgical implants and equipment, and to enter into any industrial, commercial or financial, or movable property transactions pertaining, directly or indirectly, to the corporate purpose or any other similar or related purposes, and in particular the granting of manufacturing and distribution licenses and, more generally, any type of transactions of any nature - economic or legal, financial, civil or commercial - pertaining, directly or indirectly, to this purpose or other similar, connected or complementary purposes; the Company also enters, directly or indirectly, into any industrial, commercial or financial, movable or immovable property transactions, in France or abroad, in any form whatsoever, as long as these activities or transactions are related, directly or indirectly, to the corporate purpose or other similar, connected or complementary purposes.

21.2.2. Bylaws and other provisions applicable to the members of the administrative and management bodies

21.2.2.1. Board of Directors

A. Composition of the Board of Directors (Article 11 of the Bylaws)

The Company is managed by a board comprising natural or legal persons, whose number is set by the Ordinary General Shareholders' Meeting within the limits prescribed by law.

Any legal person must, upon its appointment, designate a natural person as its permanent representative on the Board of Directors. The office of the permanent representative shall have the same duration as the office of the represented legal person. If the legal person dismisses its permanent representative, it shall provide an immediate replacement. The same provisions shall apply in the event of death or resignation of the permanent representative.

Members of the Board of Directors shall remain in office for three years. The office of a Member of the Board of Directors shall end upon the conclusion of the Ordinary General Shareholders' Meeting convened to approve the financial statements for the previous year and held in the year during which said office expires.

Members of the Board of Directors can always be reappointed; they may be removed from office at any time by a decision of the General Shareholders' Meeting.

In the event of vacancy due to death or resignation, of one or more Members of the Board of Directors, the Board of Directors may appoint provisional Members of the Board of Directors in between two General Shareholders' Meetings.

The appointments made by the Board pursuant to the preceding paragraph are subject to ratification at the earliest Ordinary General Shareholders' Meeting thereafter.

In the absence of ratification, any resolutions taken and actions carried out beforehand by the Board shall remain valid.

If the number of Members of the Board of Directors falls below the legal requirement, the remaining Members of the Board of Directors must immediately convene the Ordinary General Shareholders' Meeting to appoint new members.

The salaried employees of the Company may be appointed as Member of the Board of Directors. However, their employment contract must entail an actual position. In this case, they will maintain their employment contract.

The number of Members of the Board of Directors linked to the Company by an employment contract may not exceed one third of the Members of the Board of Directors in office.

The number of Members of the Board of Directors aged over 70 may not exceed one third of the Members of the Board of Directors in office. If this limit is exceeded in the course of office, the oldest Member of the Board of Directors is automatically deemed to have resigned at the end of the earliest General Shareholders' Meeting thereafter.

B. Non-voting members (Article 15 of the Bylaws)

The Ordinary General Shareholders' Meeting may appoint non-voting members at the recommendation of the Board of Directors. The Board of Directors may also appoint observers directly, subject to ratification by the following General Shareholders' Meeting.

The non-voting members, of which there may be no more than five, form an advisory board. They are chosen freely based on their competence.

They are appointed for a term of three years, expiring at the end of the General Shareholders' Meeting that approves the accounts for the fiscal year just ended.

The advisory board shall examine the issues that the Board of Directors or its Chairman submits, for opinion, to its review. The non-voting members attend the Board of Directors meetings and participate in the discussions only in an advisory capacity. Their absence, however, shall not affect the validity of the deliberations.

They are convened to Board meetings in the same conditions as the Directors.

The Board of Directors may remunerate the non-voting members by making deductions from the attendance fees allocated by the General Shareholders' Meeting to the Directors.

C. Meetings of the Board of Directors (Article 12 of the Bylaws)

The Board of Directors shall meet as frequently as required in the Company's interests.

Directors are convened to Board meetings by the Chairman. The notice may be served by any means, in writing or verbally.

The Chief Executive Officer may also ask the Chairman to convene the Board of Directors in relation to a specific agenda.

In addition, the Board may be legally convened by Members of the Board of Directors making up at least one third of its members. In this case, they shall specify the agenda for the meeting.

If a Works Council has been established, its representatives, appointed in accordance with the provisions of the Labor Code, shall be invited to all Board meetings.

Board meetings may be held at the registered office or in any other location, in France or abroad.

For Board deliberations to be valid, the number of the Members of the Board of Directors in attendance must be at least equal to half of its members.

The decisions of the Board of Directors are approved by the majority of votes. In the event of a tie, the meeting's Chairman does not have a casting vote.

If adopted by the Board of Directors, its rules of procedure may establish, in particular, that Members of the Board of Directors who take part in the meeting by videoconference or telecommunications in compliance with the applicable regulations are deemed to be in attendance for the calculation of quorum and majority. This provision shall not apply to adoption of the decisions referred to in Articles L. 232-1 and L. 233-16 of the French Commercial Code.

Each Member of the Board of Directors is provided with the information required to carry out their duties and fulfill their mandate and may request any documents they deem useful.

Any Member of the Board of Directors may authorize another Member, by letter, telegram, telex, fax, e-mail or any remote transmission means to represent them at a Board meeting. However, each Member may only hold one proxy per meeting.

Copies or extracts of the Board's meetings are duly certified by the Chairman of the Board of Directors, the Chief Executive Officer, the Member of the Board of Directors temporarily serving as chairman or a duly authorized signing officer.

D. Powers of the Board of Directors (Article 13 of the Bylaws)

The Board of Directors steers the Company's business strategy and monitors its implementation. Subject to those powers expressly conferred on the General Shareholders' Meetings and within the limits of the Company's corporate purpose, the Board considers any issues related to the proper operation of the Company and, through its deliberations, takes decisions on matters concerning the Company.

In its relationships with third parties, the Company is bound even by acts of the Board of Directors that do not pertain to the corporate purpose, unless it proves that the third party was aware that the act exceeded this purpose or could not have been unaware thereof given the circumstances. Publication of the Bylaws itself is not sufficient to constitute such proof.

The Board of Directors carries out the checks and controls it considers necessary.

In addition, the Board of Directors exercises the special powers granted by law.

21.2.2.2. General Management (Article 14 of the Bylaws)

The general management of the Company is exercised, under its responsibility, either by the Chairman of the Board of Directors or by another natural person appointed by the Board of Directors and bearing the title of Chief Executive Officer (CEO).

The CEO is granted the widest possible powers to act on behalf of the Company under all circumstances. He/she exercises his/her powers within the limit of the corporate purpose and subject to the powers expressly allocated by law to the General Shareholders' Meetings and to the Board of Directors.

He/she represents the Company in its relationships with third parties. The Company is bound even by acts of the CEO that do not pertain to the corporate purpose, unless it proves that the third party was aware that the act exceeded this purpose or could not have been unaware thereof given the circumstances. Publication of the Bylaws itself is not sufficient to constitute such proof.

The CEO may not be older than 65. Should the CEO reach this age, he/she shall automatically be deemed to have resigned. However, his/her office shall be extended until the earliest Board meeting thereafter, during which a new CEO shall be appointed.

If the CEO is a Member of the Board of Directors, he/she may not serve as Chief Executive Officer for a term exceeding his or her term of office as a Member of the Board of Directors.

The CEO may be dismissed at any time by the Board of Directors. If the dismissal is decided without due cause, it may lead to damages, except when the CEO assumes the functions of Chairman of the Board of Directors.

By way of a resolution passed by a simple majority vote of the Directors present or represented, the Board of Directors chooses between the two options for the exercise of the Company's general management detailed in the first paragraph of this Section.

Shareholders and third parties are informed of the choice in accordance with the applicable law and regulations.

The choice thus made by the Board of Directors shall remain valid until the Board decides otherwise or, at its discretion, for the term of office of the CEO.

If the Company's general management is assumed by the Chairman of the Board of Directors, the latter shall be subject to the provisions applicable to the CEO.

In accordance with the provisions of Article 706-43 of the French Code of Criminal Procedure, the CEO can validly authorize any person he/she may choose to represent the Company in legal proceedings that may be brought against it.

Upon proposal by the CEO, the Board of Directors can authorize one or more natural persons to assist the CEO as Deputy Chief Executive Officer.

In agreement with the CEO, the Board of Directors sets the scope and term of the powers granted to the Deputy Chief Executive Officers. The Board of Directors sets their remuneration. If a Deputy Chief Executive Officer is Member of the Board of Directors, he/she may not serve in this role for a period exceeding his or her term of office as Member of the Board of Directors.

In relation to third parties, the Deputy Chief Executive Officer has the same powers as the CEO, notably the power to be a party to legal proceedings.

The number of Deputy Chief Executive Officers may not exceed five.

The Deputy Chief Executive Officer(s) may be dismissed at any time by the Board of Directors at the recommendation of the CEO. If the dismissal is decided without due cause, it may lead to damages.

Deputy Chief Executive Officers may not be older than 65. Should a Deputy Chief Executive Officer in office reach this age, he/she shall automatically be deemed to have resigned. However, their term of office shall be extended until the earliest Board meeting thereafter, during which a new Deputy Chief Executive Officer may be appointed.

When the Chief Executive Officer ceases to carry out or is prevented from carrying out his/her duties, the Deputy Chief Executive Officers, unless decided otherwise by the Board of Directors, retain their duties and remits until the appointment of a new Chief Executive Officer.

21.2.3. Rights, privileges and restrictions attached to the Company's shares

21.2.3.1. Forms of shares (Article 7 of the Bylaws)

Shares fully paid-up are registered or bearer shares, at the shareholder's choice, subject to compliance with the relevant legal provisions in relation to the type of shares held by certain natural or legal persons. Shares that are not fully paid up are mandatorily held in registered form.

Shares are registered in an account under the conditions and in accordance with the procedures stipulated by the laws and regulations.

The ownership of shares issued in registered form results from their registration in an account.

21.2.3.2. Voting rights (extract from Article 9 of the Bylaws)

Excluding where otherwise stipulated by law, each shareholder is entitled to a number of voting rights and casts a number of votes at the shareholders' meetings equal to the number of shares he/she owns for which all amounts due have been paid. The nominal value being the same, each capital or dividend share entitles the holder to one vote. The Combined General Shareholders' Meeting of June 24, 2015 decided not to institute double voting rights and confirmed the rule whereby one Company share entitles the holder to one vote at the General Shareholders' Meeting.

21.2.3.3. Right to dividends and profits (extract from Article 9 of the Bylaws)

Each share entitles its holder to a share of the corporate assets, the profits and the liquidation bonuses in proportion to the number and nominal value of the existing shares.

Whenever it is necessary to hold several shares - whether they are preferred shares or not - or transferable securities to exercise any right, shareholders or holders of transferable securities shall be personally responsible for obtaining the required number of shares or transferable securities.

A mandatory deduction of at least five percent (5%) of the profit for the fiscal year, adjusted for any prior losses, is allocated to a reserve fund called the “legal reserve”. This transfer is no longer compulsory when the amount of the legal reserve reaches one tenth of the share capital.

The distributable profit comprises the profit for the fiscal year adjusted for any prior losses and the deduction stated in the previous paragraph, plus any retained earnings.

If the accounts for the period, as approved at the General Shareholders' Meeting, show the existence of a distributable profit, the General Shareholders' Meeting may decide to post it under one or more of the reserve accounts it controls in terms of allocation or use, to carry it forward or to distribute it as dividends.

After ascertaining the existence of reserves available to them, the Shareholders may decide to distribute amounts taken from said reserves. In this case, the decision shall clearly state the reserve accounts from which the amounts will be taken. However, dividends are taken in priority from the fiscal year's distributable profit.

The General Shareholders' Meeting or, where not available, the Board of Directors, shall decide the payment terms of the dividends.

However, dividends must be paid within the maximum legal limit of nine months from the end of the fiscal year.

The General Shareholders' Meeting called to approve the accounts for the year may grant each shareholder, for the distributed dividend or part thereof, the choice between payment in cash or in shares.

Likewise, the Ordinary General Shareholders' Meeting, deliberating under the conditions set out by Article L. 232-12 of the French Commercial Code, may grant each shareholder an advance payment of the dividends and the choice between payment of said advance payment or part thereof in cash or shares.

21.2.3.4. Preferential subscription right

The Company's shares carry a preferential subscription right to capital increases under the conditions set forth in the French Commercial Code.

21.2.3.5. Limitation of voting rights

There are no clauses in the Bylaws restricting the voting rights attached to shares.

21.2.3.6. Identifiable bearer shares

The Company may also, at any time and pursuant to the applicable laws and regulations, ask any authorized body, against payment of a fee, for the name (or in the case of a legal entity, the Company name), nationality and address of the holders of shares conferring voting rights immediately or in future at its own shareholders' meeting, as well as the quantity of shares held by each of them, and if applicable, any restrictions imposed on said shares.

21.2.3.7. Buyback by the Company of its own shares

See Section 21.1.3

21.2.4. Terms and conditions governing modification of shareholders' rights

Shareholders' rights as stated in the Company's Bylaws may only be modified by the Company's extraordinary General Shareholders' Meetings.

21.2.5. General Shareholders' Meetings

A. Shareholders' Meetings (Article 19 of the Bylaws)

General Shareholders' Meetings are convened and held according to the applicable laws.

If the Company wishes to send meeting notices by electronic means rather than by mail, it must obtain the prior consent of the shareholders concerned, who shall provide their electronic address.

Meetings are held at the registered office or in any other location stated in the notice.

The right to participate in meetings is governed by the laws and regulations in force and, in particular, is subject to the registration of the shares in a securities account in the name of the shareholder or of the authorized intermediary registered on behalf of such shareholder at least two (2) business days prior to the meeting, at zero hours, Paris time, either in the shareholder registers held by the Company, or in the bearer share accounts held by the authorized intermediary.

If unable to attend a meeting in person, shareholders may choose one of the following three options, in accordance with the applicable laws and regulations:

- give a proxy under the conditions mandated by the applicable laws and regulations;
- vote by correspondence; or
- send a proxy to the Company without indicating any representative.

The Board of Directors may, in accordance with the laws and regulations in force, arrange for shareholders to attend meetings by videoconference or through telecommunication means that would allow their identification. If the Board of Directors decides to exercise this option for a specific meeting, the decision is included in the meeting and/or convening notice. Shareholders taking part in meetings by videoconference or by any other of the telecommunication means referred to above, as determined by the Board, shall be deemed present for calculating quorum and majority.

Meetings shall be chaired by the Chairman of the Board of Directors or, in his/her absence, by the Chief Executive Officer, a Deputy Chief Executive Officer if they are Members of the Board of Directors, or by Member of the Board of Directors specifically authorized for this purpose by the Board. Failing this, the shareholders' Meeting shall appoint its own chairman.

Tellers duties shall be carried out by the two members attending the meeting who, accepting these duties, have the largest number of votes. The officers in turn designate a secretary who does not need to be a shareholder.

An attendance sheet is kept for each meeting, as required by law.

When convened for the first time, Ordinary General Shareholders' Meetings can only make valid decisions if the shareholders that are present or represented hold at least one fifth of the shares with voting rights. When convened for the second time, Ordinary General Shareholders' Meetings can make valid decisions irrespective of the number of shareholders that are present or represented.

Resolutions by the Ordinary General Shareholders' Meeting shall be passed by a majority of the votes of the shareholders present or represented.

When convened for the first time, extraordinary General Shareholders' Meetings can only make valid decisions if the shareholders that are present or represented hold at least one quarter of the shares with voting rights. When convened for the second time, extraordinary General Shareholders' Meetings can only make valid decisions if the shareholders that are present or represented hold at least one fifth of the shares with voting rights.

Resolutions by the extraordinary General Shareholders' Meeting shall be passed by a two-third majority of the votes of shareholders present or represented.

Copies and extracts of the meetings' minutes shall be duly certified by the Chairman of the Board of Directors, a Director serving as Chief Executive Officer or by the meeting's secretary.

B. Powers of Shareholders' Meetings (Article 19 of the Bylaws)

Ordinary and extraordinary General Shareholders' Meetings exercise their respective powers as provided by law.

21.2.6. Provisions that delay, defer or prevent a change of control

The Company's Bylaws do not include any provisions to delay, defer or prevent a change of control.

21.2.7. Statutory threshold crossings

None.

21.2.8. Specific stipulations governing changes in the share capital

The Company's Bylaws do not include any special stipulations for changes in the share capital.

22. MATERIAL CONTRACTS

22.1. DISTRIBUTION AND AGREEMENTS ENTERED INTO WITH SALES AGENTS

Atlantis Diffusion

The Company entered into a non-exclusive distribution agreement with Atlantis Diffusion, a Monegasque company. Under the agreement, Atlantis Diffusion distributes some of the Company's products (prosthetic and osteosynthesis implants) in France through a network of sales agents and via its own distribution network. This contract was entered into on January 30, 2015 and initially runs until December 31, 2016. The Company can unilaterally terminate the agreement subject to a 30-day notice period if Atlantis Diffusion commits any serious breach of the terms and conditions, including if in any given year it fails to place the minimum orders as defined in the agreement or is subject to a change of control. In case of termination of the agreement, Atlantis Diffusion can (i) request for the Company to repurchase its product inventory at its initial purchase price providing that the related goods are in their original shape and currently commercialized by the Company or (ii) decide to keep the said inventory to resale it. Atlantis Diffusion cannot transfer the agreement in full or in part without the Company's prior written agreement.

Targmed Comércio

The Company entered into an exclusive distribution agreement with Targmed Comércio e Importaçao de produtos Medicos e Hospitalares Ltda (a Brazilian company) ("**Targmed Comércio**"). Under the agreement Targmed Comércio distributes some of the Company's products (prosthetic, osteosynthesis and spinal implants) in Brazil through a network of sales agents and via its own distribution network. This contract was entered into on April 8, 2014. It initially runs until December 31, 2016 but can be tacitly renewed, just once, for an additional two years. The contract's terms prohibit Targmed Comércio from (i) selling competing products in Brazil, and (ii) selling Company products outside of Brazil. If Targmed Comércio breaches this last condition, it will be liable to pay a penalty of three times the corresponding sums billed. The Company can unilaterally terminate the agreement subject to a 30-day notice period if Targmed Comércio commits any serious breach of the terms and conditions, including if in any given year it fails to place the minimum orders as defined in the agreement, sells products outside of the Brazilian territory or is subject to a change of control. Targmed Comércio may, for its part, unilaterally terminate the agreement with a 30-day written notice, assuming that the Company fails to comply with the exclusivity commitment given to Targmed Comércio for Brazil. In case of termination of the agreement, Targmed Comércio can (i) request for the Company to repurchase its product inventory at its initial purchase price providing that the related goods are in their original shape and currently commercialised by the Company or (ii) decide to keep the said inventory to resale it. Targmed Comércio cannot transfer the agreement in full or in part without the Company's prior written agreement.

Medicoscop

The Company entered into a non-exclusive distribution agreement with Medicoscop (a French-law company). Under the agreement, Medicoscop distributes some of the Company's products (prosthetic and osteosynthesis implants) in France to its exclusive clientele (determined by this contract). This contract entered into force on January 1, 2016. It initially runs until December 31, 2017, but may be tacitly renewed just once for an additional two years. The Company can unilaterally terminate the agreement subject to a 30-day notice period if Medicoscop commits any serious breach of the terms and conditions, including if in any given year it fails to place the minimum orders as defined in the agreement or is subject to a change of control. Medicoscop may, for its part, unilaterally terminate the agreement with a 30-day written notice, assuming that the Company fails to comply with the exclusivity commitment given to Medicoscop for France. In case of termination of the agreement, Medicoscop can (i) request for the Company to repurchase its product inventory at its initial purchase price providing that the related goods are in their original shape and currently commercialised by the Company or (ii) decide to keep the said inventory to resale it. Medicoscop cannot transfer the agreement in full or in part without the Company’s prior written agreement.

Spine Enthusiast LLC

The Company's US subsidiary, Implanet America Inc., entered into sales agency agreements with 29 US companies to sell Jazz and the full range of the Implanet Spine System in the United States. These agreements all have very similar terms. Each of them gives the concerned contracting party exclusive rights to sell Jazz and the full Implanet Spine System in one or more specified US states. Each sales partner commits to a minimum volume of sales. If they fail to meet this minimum threshold, Implanet America Inc. has the right to terminate the agreement in advance.

For instance, Implanet America Inc. concluded an exclusive sales agreement with the US company Spine Enthusiast LLC to distribute Jazz and the full Implanet Spine System in the State of Florida. This agreement was entered into on April 1, 2013, for an indefinite period of time and it can be terminated at any time by either party with a 60-day prior written notice. Implanet America Inc. also has the right to unilaterally terminate the agreement with a seven-day prior written notice if Spine Enthusiast LLC is subject to a change of control or fails to achieve 75% of the sales targets set out in the contract. Implanet America Inc. also has the right to unilaterally terminate the agreement if it is taken over by a third party that does not wish to continue the contractual relationship with Spine Enthusiast LLC. In these circumstances, Implanet America Inc. must, if the contractual relationship between the parties has been running for more than two years, pay compensation equal to 12-months' commissions. Spine Enthusiast LLC also has the right to unilaterally terminate the agreement with a 30-day prior written notice if it considers, at its sole discretion, that its enforcement would breach any of its agreements with Stryker Corporation or any of this company's subsidiaries.

22.2. SUBCONTRACTING

The Company has concluded the following agreements with three subcontractors, on very similar terms:

- subcontracting agreement concluded on August 1, 2013 with Cousin Biotech to manufacture Jazz braids;
- subcontracting agreement concluded on August 25, 2014 with Etablissements Coulot Décolletage to manufacture Jazz metallic implants; and
- subcontracting agreement concluded on May 22, 2014 with In'tech Medical to manufacture Jazz instrumentation.

For instance, the Company concluded a subcontracting agreement with Cousin Biotech to manufacture Jazz components. The agreement became effective on August 1, 2013 for an initial period of five years, tacitly renewable for 12-month periods. The Company has the right to unilaterally terminate the agreement with a six-month prior notice if there is a change in the controlling shareholder, the management of Cousin Biotech or if Cousin Biotech sells a substantial part of its business. Cousin Biotech also has the right to unilaterally terminate the agreement with a 12-month prior notice if the parties fail to agree any change in prices and/or delivery periods as a result of changes to technical specifications or the Company's specifications. If it fails to meet delivery times, Cousin Biotech is liable to pay penalties that vary depending on the size of the order involved.

The Company, as a manufacturer under the terms of Directive 93/42/EEC, is liable for any damages caused to a third party, including damaged caused by a failure to meet the safety requirements of this directive, and therefore guarantees Cousin Biotech against any third-party lawsuits for such damages. Cousin Biotech, however, remains liable, and guarantees the Company in such circumstances, for damages arising from a failure to meet its manufacturing quality obligations or its obligations as a subcontractor under Directive 93/42/EEC. Cousin Biotech also guarantees to comply with US manufacturing process standards.

22.3. FINANCING VIA BONDS ISSUED TO KREOS CAPITAL IV (UK) LTD.

22.3.1. Context

On July 19, 2013, the Company concluded a venture loan agreement with KREOS CAPITAL IV (UK) LTD, in lieu of a master agreement for the subscription by KREOS CAPITAL IV (UK) LTD of a bond issue of €5 million, the issue of Company warrants in favor of KREOS CAPITAL IV (Expert Fund) LTD and the pledge of the Company's goodwill in favor of KREOS CAPITAL IV (UK) LTD.

These transactions were implemented as follows:

- the €5,000,000 bond via the issue of 5,000,000 non-convertible bonds with a nominal value of €1 each to KREOS CAPITAL IV (UK) LTD was approved at the Company's Board of Directors' Meeting of July 19, 2013 and wholly subscribed by KREOS CAPITAL IV (UK) LTD on July 24, 2013;

- the free issue of 65,000 warrants to KREOS CAPITAL IV (Expert Fund) LTD was approved by the extraordinary General Shareholders' Meeting of July 19, 2013; and

- the Company's business (i.e. *fonds de commerce*) was pledged on July 19, 2013.

On April 16, 2015, the Company and KREOS CAPITAL IV (UK) LTD concluded an amendment to the venture loan agreement dated July 19, 2013, by which the parties decided to reschedule the abovementioned bond issue as follows:

- the term of the contract is increased from 36 to 54 months;

- the fixed monthly installment (capital and interest) is reduced from €190,735.43 to €94,160.22; and

- the annual interest rate remains at 11.5%.

(see Section 22.3.3 of the *Document de référence* for further information on the features of the bond issue following said rescheduling).

In return for the rescheduling of the bond, on June 24, 2015, the Company's Board of Directors, acting under the authority granted to it on the same day by the Company's Combined General Shareholders' Meeting, resolved to issue 18,473 share subscription warrants in favor of KREOS CAPITAL IV (Expert Fund) LTD, given that the terms of these BSAs are essentially identical to those issued by the Company on July 19, 2013 apart from their exercise price (see Section 21.1.4.2).

22.3.2. The Venture Loan Agreement

This master agreement concluded between the Company and KREOS CAPITAL IV (UK) LTD ("**Kreos**") on July 19, 2013, as modified by the amendment dated April 16, 2015, defines the rules governing relations between the Company and Kreos during the lifetime of the bond.

Under the terms of this agreement, the Company made a number of commitments, notably financial commitments.

These included undertakings to:

(i) not contract, without prior authorization from Kreos, debt of more than €2,500,000 other than (a) the Kreos bond, (b) borrowings to cover working capital requirement, (c) advances from OSEO (or any other support or advance from public bodies), (d) issuance of convertible bonds or bonds redeemable in shares, or (e) current account advances from shareholders; and

(ii) neither pledge nor transfer any assets except in the normal course of its business.

Any breach by the Company of its commitments under the bond could result in early redemption of the loan.

Finally, the Company has granted Kreos the right to ask that a non-voting member be appointed to the Board of Directors.

22.3.3. The Kreos bonds

Number:	5,000,000
Nominal value of bonds:	€5,000,000
Issue date:	July 19, 2013
Subscription date:	July 24, 2013
Subscriber:	Kreos
Date of first repayment:	January 1, 2014
Date of last repayment:	December 1, 2017*
Frequency of repayments:	monthly
Monthly installment amount:	€94,160.22€ (capital and interest) with the exception of the last monthly amount of €72,500)*
Interest rate:	11.5%
Transferability:	the bonds can only be transferred within the Kreos group. Note that there will be no request to admit the Kreos bonds for trading.

**As modified by the amendment to the venture loan agreement of April 16, 2015.*

Restrictions on use

The proceeds of the bond must be used by the Company to finance its working capital requirement.

Early redemption:

Kreos can request the early repayment of the whole amount owed (capital and accrued interest) under the protocol conditions, notably, in the event of:

- any failure to make a payment on time;
- any breach of the protocol and commitments in this respect that is not made good within ten working days of notification of the said breach;
- any default by the Company on any other borrowings;
- insolvency of the Company;
- direct or indirect transfer of more than 66% of the Company's capital or voting rights to a third party other than an existing shareholder;
- change in the Company's business purpose;
- breach of commitments under the venture loan agreement; or
- occurrence of any event or circumstance that causes or may cause the Company a net cost or net loss totaling more than €500,000 or that significantly affects the Company's ability to repay the bond and which cannot be made good by the Company or its shareholders within 20 working days of Kreos notifying the Company that such an event has occurred.

Collateral given:

In guarantee of its repayment of the bond, the Company has pledged the whole of its business (i.e. *nantissement de fonds de commerce*), including, in particular, all the intellectual property that the Company owns or will own (patents, drawings and models, domain names, brands).

The purpose of this collateral is to guarantee all the Company's payment obligations, totaling five million euros (€5,000,000), comprising the amount of the bond plus any late interest payments, fees, costs, compensation and incidental expenses.

The collateral can be exercised if the Company fails to pay on time any amount due under the terms of the bond and after that an appraiser appointed by the parties or by the president of the Paris Tribunal de Grande Instance has issued a report valuing the intellectual property rights.

Exercise of this collateral (particularly in the event of early repayment of the bond) would result in the transfer of ownership of the Company's business, including all of its intellectual property rights.

Information on the 65,000 warrants issued to KREOS CAPITAL IV (Expert Fund) LTD

The extraordinary General Shareholders' Meeting of July 19, 2013 issued 65,000 free warrants for shares in the Company to KREOS CAPITAL IV (Expert Fund) LTD. (the "**Kreos BSAs**")

The Kreos BSAs entitle the holders to subscribe for 75,400 ordinary shares in the Company with a nominal value of €1.50 each at €6.20 per share.

The Kreos BSAs cannot be assigned or transferred except in the following circumstances:

(i) warrants transferred by KREOS CAPITAL IV (Expert Fund) Limited to any entity (i) controlled directly or indirectly as defined by Article L. 233-3 of the French Commercial Code by KREOS CAPITAL IV (Expert Fund) Limited, or (ii) that controls, directly or indirectly, as defined by Article L. 233-3 of the French Commercial Code, KREOS CAPITAL IV (Expert Fund) Limited, or that is under joint control, directly or indirectly, as defined by Article L. 233-3 of the French Commercial Code, with KREOS CAPITAL IV (Expert Fund) Limited during the period when the Kreos BSAs are exercisable;

(ii) Share subscription warrants (BSAs) transferred to its constituent Limited Partnerships, if KREOS CAPITAL IV (Expert Fund) Limited expires during the lifetime of the Kreos share subscription warrants (BSAs).

The KREOS BSAs will be exercisable (and shall expire concomitantly) until the earlier of the following two events occurring:

(i) the exercise of one or more transfers of Implanet shares which would cause any person to hold at least ninety-five percent (on a fully diluted basis) of the Company's share capital; or

(ii) the expiry of a five (5) year period from the initial listing of the Company's shares on the Paris Euronext stock market.

Note that there will be no request to admit the Kreos BSAs for trading.

22.4. FINANCING VIA THE ISSUE OF OCABSAS TO L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND

On October 14, 2015, the Company finalized a financing arrangement with L1 EUROPEAN HEALTHCARE OPPORTUNITIES FUND (amended on October 21, 2015 and March 24, 2016) to raise a potential maximum of €5 million, at the Company's discretion under certain usual conditions, which may be revised upwards by an equivalent amount if the share subscription warrants issued under this operation are exercised.

The terms of this financing are broadly detailed in Section 10.1.4.2 of the *Document de référence*.

23. INFORMATION FROM THIRD PARTIES, EXPERT STATEMENTS AND DECLARATIONS OF INTEREST

None.

24. PUBLISHED DOCUMENTS

The *Document de référence* is available free of charge at the Company's registered office, Technopole Bordeaux Montesquieu, Allée François Magendie, 33650 Martillac, France.

It can also be consulted on the websites of the Company (www.implanet.com) and the AMF (http://www.amf-france.org).

The Bylaws, minutes of General Shareholders' Meetings and other documents relating to the corporate life of the Company, as well as historical financial information and any appraisals or declarations by experts hired by the Company that must by law be disclosed to shareholders can be consulted free of charge at the Company's registered office.

From registration of the Company's shares for trading on the Paris Euronext stock market, all regulatory information required by the AMF General Regulation will also be available from the Company's website (www.implanet.com).

25. EQUITY INVESTMENTS

Information on equity investments by Implanet in other companies which are likely to have a material impact on the Company's assets, financial position or results is given in Sections 7 “Organizational chart” and 20 “Financial information concerning the assets, financial position and results of the Company” of the *Document de référence*.

26. NOTES TO THE FINANCIAL STATEMENTS

26.1. REPORT BY THE CHAIRMAN OF THE BOARD OF DIRECTORS ON CORPORATE GOVERNANCE, INTERNAL CONTROL AND RISK MANAGEMENT

To the readers,

In accordance with the provisions of Article L. 225-37 of the French Commercial Code, I am pleased to present my report as Chairman of the Board of Directors, on the composition and the application of the principle of balanced representation of men and women, preparation and work of the Board during the 2016 fiscal year, as well as the internal control and risk management procedures in the Company.

The report has been prepared by the Company's management according to the terms approved by the Board of Directors during its meeting on March 24, 2017.

1. FRAMEWORK FOR THE IMPLEMENTATION OF CORPORATE GOVERNANCE PRINCIPLES

1.1. Choice of reference code

In order to comply with the requirements of Article L. 225-37 of the French Commercial Code, the Company has adopted the Corporate Governance Code, as published in September 2016 by MiddleNext, as its reference code.

The Company aims to comply with all the recommendations of the MiddleNext Corporate Governance Code. The table below lists the different recommendations of the Code and indicates whether or not the Company complies with them.

Recommendations of the MiddleNext Corporate Governance Code	Compliant	Non-compliant
Supervisory «power»		
R1 - Director ethics	X	
R2 - Conflicts of Interest*	X	
R3 - Composition of the Board – Presence of Independent Directors	X	
R4 - Board member information		
R5 - Organization of Board and committee meetings	X	
R6 - Creation of committees	X	
R7 - Introduction of Board Rules of Procedure	X	
R8 - Choice of each Director	X	
R9 - Term of office of Board members	X	
R10 - Directors' compensation	X	
R11 - Introduction of Board evaluation	X	
R12 - “Shareholder” Relations*	X	
Executive Power		
R13 - Definition and transparency of the compensation of executive corporate officers	X	
R14 - Preparation of “Executives”	X	

Recommendations of the MiddleNext Corporate Governance Code	Compliant	Non-compliant
succession*		
R15 - Combination of an employment contract with a Director position	X (1)

** New recommendations in the version of the Corporate Governance Code published by MiddleNext in September 2016 compared to the version published by MiddleNext in December 2009.*

(1) Ludovic Lastennet was first appointed CEO on November 27, 2012 for an unlimited term, and is also a Company employee. He is Sales and Marketing Director. The Board of Directors has authorized the Chief Executive Officer to hold both an employment contract and a Director position, in view of the size of the Company and the distinct technical functions exercised by these individuals in accordance with their respective employment contracts.

(2) To date, the Company has not attached any performance conditions to the exercise of the founders' warrants (BSPCEs) granted to some of its executives since its stock market listing.

1.2. Organization of the Board of Directors

1.2.1 Composition of the Board of Directors

The table below describes the composition of the Board of Directors according to the appointments made by the Company's General Shareholders' Meetings. As at December 31, 2016, the Company's Board of Directors had six members and one non-voting member.

Surname, First name, Function	Independent Director	Date of first appointment or most recent renewal	Expiry of the term of office	Audit Committee	Compensation Committee
Jean-Gérard Galvez *Chairman of the Board of Directors*	No	Most recent renewal as Chairman: March 24, 2016 Most recent renewal as member: May 24, 2016	At the end of the General Shareholders' Meeting convened to approve the financial statements for the year ended December 31, 2018	Member	Member
Ludovic Lastennet *Director*	No	Most recent renewal: May 24, 2016	At the end of the General Shareholders' Meeting convened to approve the financial statements for the year ended December 31, 2018		
Paula Ness Speers *Director*	Yes	First appointment: June 10, 2014	At the end of the General Shareholders' Meeting convened to approve the financial statements for the year ended December 31, 2016		Chairwoman

Surname, First name, Function	Independent Director	Date of first appointment or most recent renewal	Expiry of the term of office	Audit Committee	Compensation Committee
Brian Ennis *Director*	No	Most recent renewal: May 24, 2016	At the end of the General Shareholders' Meeting convened to approve the financial statements for the year ended December 31, 2018		
Jan Egberts *Director*	Yes	Most recent renewal: May 24, 2016	At the end of the General Shareholders' Meeting convened to approve the financial statements for the year ended December 31, 2018	Chairman	
Mary E. Shaughnessy *Director*	Yes	First appointment: May 24, 2016	At the end of the General Shareholders' Meeting convened to approve the financial statements for the year ended December 31, 2018	Member	Member
KREOS CAPITAL IV (UK) Ltd *Non-voting member*	No	Most recent renewal: May 24, 2016	At the end of the General Shareholders' Meeting convened to approve the financial statements for the year ended December 31, 2018		

During the 2016 fiscal year, Rainer Strohmenger and Edmond de Rothschild Investment Partners (represented by Raphaël Wisniewski) resigned from their functions (respectively on March 24, 2016 and April 28, 2016).

The corporate offices and biographies of Board Directors are presented in Section 14 of this *Document de reference*.

Independent Directors

The Members of the Supervisory Board are considered as Independent Directors according to the following criteria as stipulated by the MiddleNext Corporate Governance Code:

- are not, and over the last five years, have not been employees or Executive Directors of the Company;
- do not have and have not had over the last two years, significant business relations with the Company (clients, suppliers, competitors, service providers, creditors, banker, etc.);
- are not reference shareholders of the Company or hold a significant percentage of voting rights;
- do not have any close relationship or close family relationship with a corporate officer or reference shareholder;
- have not been Company auditors in the course of the last six years.

1.2.2 Representation of women and men on the Board of Directors

The Law no. 2011-103 of January 27, 2011 on the gender balance on company Boards of Directors and Supervisory Boards, and equality in the workplace stipulates that Supervisory Boards must include at least 40% of women after the first General Shareholders' Meeting after January 1, 2017,

given that when the Board of Directors comprises more than eight members, the difference between the number of Directors of each gender must not exceed two.

At December 31, 2016, the Board of Directors includes two women out of six Directors. The Company therefore complies with the law indicated.

1.2.3 Internal Rules of Procedure

Rules of procedure were adopted by the Board of Directors on April 11, 2013 and amended on January 31, 2017 to formalize matters such as the role and composition of the Board, the rules of conduct and the obligations of the members of the Company's Board of Directors, as well as the operating procedures for the Board and the Board Committees. The rules of procedure also set out the rules for determining Directors' compensation.

In accordance with the provisions of the Corporate Governance Code published by MiddleNext, the Board of Directors' Rules of Procedure are available on the Company's internet site.

1.2.4 Report on the activity during the 2016 fiscal year

Minutes of meetings are prepared by the Chief Executive Officer and approved by the Chairman of the Board of Directors before being submitted for the Board's approval during the next meeting. Once signed by the Chairman and a Director, the minutes are transcribed into the minutes log.

The Board of Directors met 11 times during fiscal year 2016 on the dates listed below. In addition to the regular assessment of the activity in the research and development programs, financing, governance subjects such as director compensation, the Board of Directors also took note of the vigilance points indicated in the Corporate Governance Code published by MiddleNext.

Date of Board meeting	Number of Directors present	Attendance rate
January 26, 2016	Directors: 7	100%
March 24, 2016	Directors: 6	86%
April 28, 2016	Directors: 5	100%
June 29, 2016	Directors: 6	100%
July 11, 2016	Directors: 6	100%
July 29, 2016	Directors: 6	100%
September 20, 2016	Directors: 6	100%
September 28, 2016	Directors: 6	100%
October 18, 2016	Directors: 6	100%
November 2, 2016	Directors: 6	100%
November 17, 2016	Directors: 4	67%
Average attendance at Board of Directors' Meetings	**/**	**Directors: 95.5%**

The non-voting member did not take part in the Board of Directors' meeting during the 2016 fiscal year.

1.3. Missions and Operating procedures of the Board of Directors and the Special Committees

1.3.1 Missions of the Board of Directors

The Board is governed by the provisions of the French Commercial Code, Articles 11 to 13 of the Company's bylaws and its rules of procedure.

The main responsibilities of the Board of Directors are:

- to steer the Company's business strategy and monitor its implementation. Subject to those powers expressly conferred on the General Shareholders' Meetings and within the limits of the Company's corporate purpose, the Board considers any issues related to the proper operation of the Company and, through its deliberations, takes decisions on matters concerning the Company;
- to appoint the Chairman of the Board, the CEO and Deputy CEOs and decide on their compensation;
- to authorize the agreements and commitments covered by Articles L. 225-38 and L. 225-42-1 of the French Commercial Code;
  and,
- to approve the Chairman's report on corporate governance and internal control.

It also monitors the quality of the information provided to shareholders and to the markets.

1.3.2 Operating procedures of the Board of Directors

Pursuant to statutory and legal provisions, the Board of Directors is composed of a minimum of three Directors and a maximum of 18, appointed by the General Shareholders' Meeting for a three-year renewable term.

If a vacancy arises, Directors may be co-opted in accordance with applicable law and regulations.

Directors may be recompensed by attendance fees, which are allocated between the Directors according to their attendance at the Board meetings and their contribution to the Special Committees.

Rules of procedure were adopted on April 11, 2013 and amended on January 31, 2017, to define the role and composition of the Board of Directors, the rules of conduct and the obligations of the members of the Company’s Board of Directors. All members of the Board of Directors commit to maintaining independence of reasoning, judgment and action and to actively participate in the Board’s work. They will inform the Board should they come up against any conflicts of interest. Moreover, the rules of procedure refer to the current regulations on the disclosure and use of insider information and specify that the Directors must refrain from transactions on the Company's shares when they are in possession of insider information. All Board members must declare all direct or indirect transactions on the Company’s shares transacted to the Company and the French Financial Markets Authority (AMF).

At least one of the independent Directors must have particular financial or accounting expertise to be appointed to the Audit Committee.

1.3.3 Preparation and organization of the Board's work

To make a meaningful contribution to the work of the Board of Directors, all members must receive the necessary documents. Requests for documentation are submitted to the Chairman, or where relevant, to any Company executive (Chief Executive Officer or Deputy CEO).

All Board members are authorized to meet the Company's senior executives, provided they inform the Chairman of the Board and the Chief Executive Officer beforehand.

The Board is regularly informed by the Chief Executive Officer on the Company's financial position, cash position, financial commitments and significant events for the Company and the Group.

Lastly, all new Board members may request training on the particular features of the Company, the Group, their businesses and operating segments.

The Board members are notified about meetings by letter, fax or email at least five (5) days before each meeting.

Meetings of the Board of Directors may also be called by any other means, including verbally, if all active Directors are present or represented at the meeting.

All documents and draft documents providing information on the agenda and on any other issues submitted to the Board are sent or provided to the Directors prior to the meeting in a timely manner.

Moreover, the Board is informed about the Company's financial position, cash position and commitments during its meetings.

In 2015, the Company set up a tool to assess its capacity to meet the expectations of the shareholders that appointed it to run the Company. This tool reviews the Board's composition, organization and operations. There are plans to put the annual assessment of the Board's work on the agenda at least once a year. This assessment takes the form of a questionnaire given to directors.

1.3.4 Role of the Special Committees

1.3.4.1 Audit Committee

On January 8, 2014, the Board of Directors decided to set up a permanent Audit Committee and to cease fulfilling the role of audit committee itself, in accordance with the French Commercial Code.

The Audit Committee’s responsibility is to assist the Board of Directors and to ensure that the financial statements are accurate, the internal audit is properly conducted, the information provided is relevant and that the Statutory auditors correctly fulfill their mission vis-à-vis the Company, independently of the Group’s management.

The main responsibilities of the Audit Committee include:

- to monitor the preparation and treatment of the financial information;
- to monitor the effectiveness of the internal audit and risk management systems;
- to monitor the audit of the annual accounts and consolidated accounts by the Statutory auditors;
- to recommend Statutory auditors to be put forward for appointment at the General Shareholders' Meeting and to review the terms of their compensation;
- to monitor the independence of the Statutory auditors;
- to check the progress of any major disputes on a regular basis; and
- in general, to offer any relevant advice and recommendations on the points listed above.

The Audit Committee is composed of at least two members appointed by the Board of Directors. The members of the Audit Committee are selected from among the members of the Board of Directors and, if possible, two of them are independent members, one of which having particular financial or accounting expertise, it being specified that they cannot be Directors who hold management positions.

The Audit Committee meets at least twice a year, according to a schedule fixed by its Chairman, to examine the consolidated annual and half-yearly financial statements and, where appropriate, quarterly accounts, following an agenda decided by its Chairman and sent to the Audit Committee members at least seven days in advance of the meeting. A meeting can also be called by its Chairman, or two of its members, or by the Chairman of the Company's Board of Directors.

The Audit Committee can hear any member of the Company's Board of Directors and carry out any internal or external audits on any topic it deems to be part of its remit. The Chairman of the Audit Committee will notify the Board of Directors in advance. Specifically, the Audit Committee has the power to hear any person who is involved in preparing or auditing the accounts (Chief Financial Officer or the main Finance Division managers).

The Audit Committee hears the Statutory auditors. No Company representatives are required to be present at the auditors' hearing.

The Audit Committee met twice during the 2016 fiscal year: on March 24, 2016 and September 20, 2016.

1.3.4.2 Compensation Committee

The members of the Compensation Committee have adopted rules of procedure, amended by a decision of the Board of Directors on June 7, 2013, as described below. Where possible, this committee is composed of at least two members of the Board of Directors appointed by the Board of Directors.

It is hereby stated, for whatever purpose it may serve, that no Member of the Board of Directors exercising a management function within the Company can be a member of the Compensation Committee.

The main duties of the Compensation Committee are:

- to examine the main objectives put forward by general management for the compensation of the Company's executives that are not members of the Board of Directors, including free share plans and share subscription and purchase options;
- to examine the compensation of executives that are not members of the Board of Directors, including free share plans and share subscription and purchase options, retirement and benefit plans, and benefits in kind;
- to make recommendations and proposals to the Board of Directors concerning:
  - the compensation, retirement and benefit scheme, benefits in kind, and the other cash entitlements of the corporate officers, including those leaving their position. The Committee proposes compensation structures and amounts, specifically, the rules for determining variable compensation that take into account the Company's strategy, objectives and results and earning as well as market practices, and
  - the free shares plans, share subscription or purchase options and all other similar profit-sharing mechanisms, and in particular, personal allocations to qualifying corporate officers;
- to examine the total value of the attendance fees and their allocation system among Members of the Board of Directors, and also the terms and conditions of reimbursement of any expenses incurred by Members of the Board of Directors;
- to prepare and submit any reports required under the Board of Directors' rules of procedure;
- to prepare any other compensation-based recommendations requested by the Board of Directors; and
- in general, to provide advice and makes appropriate recommendations in any of the above areas.

The Compensation Committee meets at dates set by its Chairman to discuss an agenda decided by its Chairman, which is sent to the Compensation Committee members at least seven days ahead of the meeting. A meeting can also be called by its Chairman, or two of its members, or by the Board of Directors.

The non-executive Directors who are not members of the Compensation Committee are free to attend any of these meetings.

The Chairman of the Company's Board of Directors, if he/she is not a committee member, can be invited to attend the committee meetings. The Committee invites him/her to put forward proposals. He/she has no vote and does not attend deliberations about his/her own situation.

The Compensation Committee can ask the Chairman of the Board of Directors for permission to invite to the meeting any Executive Officer with the expertise required to handle a specific agenda item. The Chairman of the Compensation Committee or of the meeting will highlight the confidentiality obligations incumbent on all attendees.

The Compensation Committee met once during the 2016 fiscal year, on January 26, 2016.

1.4. Limits placed by the Board on the CEO's powers

The Chief Executive Officer heads up the Company and represents it in its dealings with third parties, within the limit of its purpose. He/she is vested with the most extensive powers to act on behalf of the Company in all circumstances, subject to the powers expressly allocated by law to the Board of Directors and General Shareholders' Meetings, and the limits set by the Board.

The Chief Executive Officer must be under 65 years of age.

The Board of Directors must be informed in advance about commitments relating to investments, acquisitions and disposals for amounts in excess of €50,000.

2. COMPENSATION OF CORPORATE OFFICERS

The Company applies all the recommendations of the MiddleNext Corporate Governance Code relating to the compensation of executive and non-executive corporate officers.
The compensations are listed in the Section 15 of this *Document de Référence*.

2.1. Chief Executive Officer

Ludovic Lastennet entered into an employment contract with the Company on April 2, 2007. He was appointed Chief Executive Officer during the Board meeting of November 27, 2012. The Board resolved to retain him in his position as salaried Sales and Marketing Director. His employment contract includes compensation under a non-compete clause equal to 6/10 of compensation earned in the 12 months prior to his departure.

Targets were set and approved at the Board of Directors, following a recommendation of the Compensation Committee, for the variable portion of the Chief Executive Officer's compensation.

For the 2016 fiscal year, these targets included, in particular, revenue growth for the Company.

2.2. The Board of Directors

The General Shareholders' Meeting of June 10, 2014, resolved, on a proposal of the Board of Directors of February 13, 2014, to allocate attendance fees to certain Members of the Board of Directors for a total amount of €1,500 for each Board meeting attended in person. These break down as follows:

- Jan Egberts: €7,500
- Paula Ness Speers: €6,000
- Mary E. Shaughnessy: €3,000

3. TERMS AND CONDITIONS RELATIVE TO SHAREHOLDERS' PARTICIPATION IN THE GENERAL SHAREHOLDERS' MEETING

Article 19 of the Bylaws includes specific terms and conditions relative to shareholders' participation in the General Shareholders' Meeting.

The right to participate in meetings is governed by the laws and regulations in force and, in particular, is subject to the registration of the shares in a securities account in the name of the shareholder or of the authorized intermediary registered on behalf of such shareholder at least two (2) business days prior to the meeting, at zero hours, Paris time, either in the shareholder registers held by the Company, or in the bearer share accounts held by the authorized intermediary.

4. NOTICE OF PUBLICATION OF THE INFORMATION IN ARTICLE L. 225-100-3 OF THE FRENCH COMMERCIAL CODE

See Section 16.6 of the *Document de référence*.

5. INTERNAL CONTROL AND RISK MANAGEMENT PROCEDURES

This part of the Company's report draws on the guidelines for implementing the AMF Reference Framework for Risk Management and Internal Control Systems for small and midcaps, updated and published on July 22, 2010.

5.1 General risk management principles

5.1.1 Definition

Implanet continues the process of establishing a formal risk management system.

The organization of risk management aims to identify all the risks and risk factors that could affect the Company's activities and processes and to define the resources required to manage these in order to keep them at or bring them to an acceptable level for the Company. The system aims to be comprehensive, to cover all risk typologies and all of the Company's or the Group's activities.

5.1.2 Risk management goals

Implanet applies the definition of risk management proposed by the French Financial Markets Authority (AMF), according to which risk management is a lever for managing the Company that helps to:

- create and preserve the Company's value, assets and reputation;
- secure decision-making and the Company's processes to ensure the attainment of its objectives;
- promote the consistency of the Company's actions with its values;
- bring the Company's employees together behind a shared vision of the main risks.

5.1.3 Components of the risk management system

The risk factors identified to date by the Company are presented in Section 4 of this *Document de référence*.

To date, the Company has identified the following main risk categories:

- the competitive environment;
- the Company's dependence on its sales network;
- intellectual property;
- the manufacturing process;
- risks related to liability arising from its products;
- financial risks;
- legal risks notably in relation to the regulations applicable to medical devices, approvals already obtained or in process, and the regulatory environment;
- company organization.

These risks are reviewed once a year in order to update the risks with the people directly concerned. The goal of this review is to formally draw up the list of actions required to control these risks and to evaluate the effectiveness of these measures.

5.2 Coordination of risk management with internal control

The risk management system aims to identify and analyze the main risks and risk factors that could affect the Company's activities, processes and objectives, and to define the resources required to maintain these risks at an acceptable level for the Company, particularly by implementing preventive measures and controls, which are part of the internal control system.

At the same time, the internal control system relies on the risk management system to identify the main risks that need to be controlled. Historically, the Company has established and developed an internal control system since its inception, however its formal risk management organization is more recent. The Company has embarked on a process of coordinating these two systems, with the aim of identifying the control methods applicable to the Company's key processes that are liable to be affected by the risks categorized as “major”.

5.3 General internal control principles

5.3.1 Definition

Implanet applies the definition of internal control proposed by the French Financial Markets Authority (AMF), according to which internal control is a system that the Company implements. The system aims to ensure:

- compliance with laws and regulations;
- implementation of the instructions and directions given by general management;
- proper functioning of the Company's internal processes;
- reliability of financial information;
  and,
- in general, helps to control its activities, ensure the effectiveness of its operations and the efficient use of resources.

During the fiscal year, Implanet continued to roll out its internal control system aimed at “ensuring internally the relevance and reliability of the information used and distributed in the Company's activities”.

Nonetheless, internal control cannot provide an absolute guarantee that the Company's objectives will be achieved, or that the risks of error or fraud are fully controlled or eliminated.

5.3.2 Components of internal control

The internal control system is based on an organization with a clear definition of responsibilities, reference systems, resources and procedures. The Company has implemented a quality assurance system since its formation. Processes in all areas of its activity are described by procedures, operating methods, instructions and forms. This written documentation traces all stages of the activities, defines the methods and responsibilities of those involved, specifies the Company's knowhow and gives precise instructions for carrying out a given procedure.

All Company employees are involved in internal control.

5.3.2.1 Operating procedures

All documentation relating to the quality management system (QMS) is uploaded to a dedicated Intranet site to optimize access to documents and ensure they are continually updated to reflect developments in the Company's activities (document life-cycle management). The aim of the system is to achieve continuous improvement of the Company's and the Group's quality and operating procedures, across all areas from operations and management to support.

The quality assurance system covers the following areas:

- Company management
- Innovation
- Quality management
- Listening to customers
- Developing and improving products
- Demonstrating value
- Sales
- Product manufacture
- Managing methods and resources
- Purchasing
- Accreditation

5.3.2.2 Organization of the Finance and Accounting Department

The Finance and Accounting Department is made up of four people, including the Chief Financial Officer.

The following organization is in place in the Company to minimize financial management risk:

- the Company's General management and the Finance Department personnel in particular are responsible for improving internal control and incorporating the recommendations of the external auditors and the Audit Committee;
- the Company maintains internal separation between the preparation and oversight of the financial statements and calls on independent experts to evaluate complex accounting entries;
- a chartered accountant verifies the preparation of interim and annual individual financial statements and the financial statements prepared under IFRS;
- payroll management is subcontracted to a specialist independent firm;
- the accounting operations of the subsidiary Implanet America Inc. are entrusted to a firm of chartered accountants.

The accounts are produced internally and then submitted to the Company's Statutory auditors for review before being presented to the Audit Committee for discussion. This procedure is designed to ensure that the Company's accounting practices are in line with French and international accounting standards (IFRS), as well as to guarantee consistency in the presentation of the accounts.

The Finance Division reports directly to the Chief Executive Officer.

5.3.2.2 The budget and "monthly reporting" procedure

At the end of the fiscal year, a detailed budget is prepared by the Finance Department for the following year and submitted for approval to general management. The budget is then presented to the Board of Directors. Periodic budget reviews organized with all operating managers examine and approve individual line items and review expenditure as a whole.

The Company's accounting system is based on French accounting standards, with sales broken down by product line and costs broken down by center and type, which allows it to monitor the budget very closely.

The Company draws up "monthly reports" including an operating account and cash forecasts. These reports are submitted to the Management Committee comprising Ludovic Lastennet (Chief Executive Officer), David Dieumegard (Chief Financial Officer), Régis Le Couedic (Research and Development Director and Clinical & Scientific Affairs Director), Nicolas Marin (Marketing Director), Laurent Penisson (Sales Director, OUS) and Franck Laporte (Operations Director).

The Finance Department prepares a report for each Board of Directors' Meeting for the general management and Directors. Reporting is presented and discussed on a regular basis during Board meetings.

At the end of each half-year, the accounting teams finalize the consolidated financial statements for the companies in the Group.

5.3.2.3 Delegation of powers

Each cost center manager has a capped expenditure authorization, which must be approved by the Company's general management as soon as the threshold is reached. These purchase requests are then checked off against the invoices and delivery notes for the goods before payment is approved.

5.4 Actors in risk management and internal control

General management has been the driving force behind defining and implementing the Company's internal control and risk management systems since the outset.

The risk management system aims to identify and analyze the main risks and risk factors that could affect the Company's activities, processes and objectives, and to define the resources required to maintain these risks at an acceptable level for the Company, particularly by implementing preventive measures and controls, which are part of the internal control system.

5.5 Limits of the risk management and internal control systems and improvement priorities

In 2017, the Company will endeavor to adapt and optimize its risk management system relative to its IT system (SAP) and to improve monitoring of action plans.

6. FINANCIAL RISKS RELATED TO THE EFFECTS OF CLIMATE CHANGE AND MEASURES TAKEN BY THE COMPANY TO REDUCE THEM BY IMPLEMENTING A LOW CARBON STRATEGY IN ALL THE COMPONENTS OF ITS BUSINESS

See Chapter 4 "Risk factors" and the "Corporate social report" in Section 26.3

The Board of Directors approves the terms of this report, which will be presented to the General Shareholders' Meeting called to approve the financial statements for fiscal year 2016.

Chairman of the Board of Directors

26.2. STATUTORY AUDITOR'S REPORT, PREPARED PURSUANT TO ARTICLE L. 225-235 OF THE FRENCH COMMERCIAL CODE, ON THE REPORT OF THE CHAIRMAN OF THE BOARD OF DIRECTORS

“

To the shareholders,

In our capacity as Statutory auditors of Implanet and in accordance with the provisions of Article L.225-235 of the French Commercial Code, we hereby report to you on the report prepared by the Chairman of your Company in accordance with the provisions of Article L. 225-37 of the French Commercial Code for the fiscal year ended December 31, 2016.

It is the Chairman's responsibility to prepare and submit for the approval of the Board of Directors a report on the internal control and risk management procedures implemented by the Company and containing the other disclosures required by Article L. 225-37 of the French Commercial Code, in particular the measures related to corporate governance.

It is our responsibility:

- to report to you on the information contained in the Chairman's report on internal control and risk management procedures related to the preparation and processing of accounting and financial information; and
- to attest that this report contains the other disclosures required by Article L. 225-37 of the French Commercial Code, it being specified that we are not responsible for verifying the fairness of these disclosures.

We conducted our work in accordance with professional standards applicable in France.

Information on the internal control and risk management procedures related to the preparation and processing of accounting and financial information

Professional standards require that we perform the necessary due diligence required to assess the fairness of the information concerning the internal control and risk management procedures related to the preparation and processing of accounting and financial information contained in the Chairman's report. These procedures mainly consisted in:

- obtaining an understanding of the internal control and risk management procedures related to the preparation and processing of the accounting and financial information on which the information presented in the Chairman's report is based, as well as existing documentation;
- obtaining an understanding of the work involved in the preparation of this information and of existing documentation;
- determining if any material weaknesses in the internal control system related to the preparation and processing of the accounting and financial information that we would have noted in the course of our engagement are properly disclosed in the Chairman's report.

On the basis of our work, we have no matters to report on the information concerning the Company's internal control and risk management procedures related to the preparation and processing of accounting and financial information contained in the report of the Chairman of the Board of Directors, prepared in accordance with Article L. 225-37 of -the French Commercial Code.

Other disclosures

We hereby attest that the Chairman's report includes the other disclosures required by Article L.225-37 of -the French Commercial Code.

Lyon and Bordeaux, March 31st, 2017

26.3. CORPORATE SOCIAL RESPONSIBILITY REPORT

1. SOCIAL AND ENVIRONMENTAL INFORMATION

This report presents the information for the company IMPLANET and its subsidiary IMPLANET AMERICA for the fiscal years 2015 and 2016. For the two periods, the presented data represents the aggregate data for IMPLANET and its subsidiary IMPLANET AMERICA ("the Group" or IMPLANET).

1.1 Employment and social information

The Group carries out research, development and sale activities of medical devices. Its personnel are therefore crucial for its economic model. To motivate and retain all of its Key Personnel over the long term, the Group has put in place a talent management policy.

The 2016 fiscal year was marked by the continued commercial development of the Group in its strategic activities. The revenue generated, and the robust performance witnessed in 2016, reflect the sharp increase in Jazz spine business. The interest aroused during the recent attendance at international scientific conferences such as Eurospine 2016 in Berlin, and SRS and NASS in October 2016 proves that the gradual adoption of IMPLANET technology provides innovative solutions for various spinal surgery issues, both for surgeons and patients.

The Group is now confident that this growth will continue, sustained by comfortable financial reserves and by regular receipt of marketing authorizations on the world's most dynamic markets, in particular, in the United States and Latin America. The success of the first surgeries carried out with the Jazz Lock implant (new technology enabling treatment of degenerative spine disorders) at the end of the third quarter 2016, lead us to hope for a wide scale launch of this technology in the short term.

This commercial growth was achieved thanks to the constant growth in the workforce compared to the previous fiscal year, which itself saw a strong 9% rise between 2014 and 2015.

The motivation and loyalty policy implemented by the Group showed results with a limited departure rate, at 12% for the 2016 fiscal year, compared to 8% in 2015.

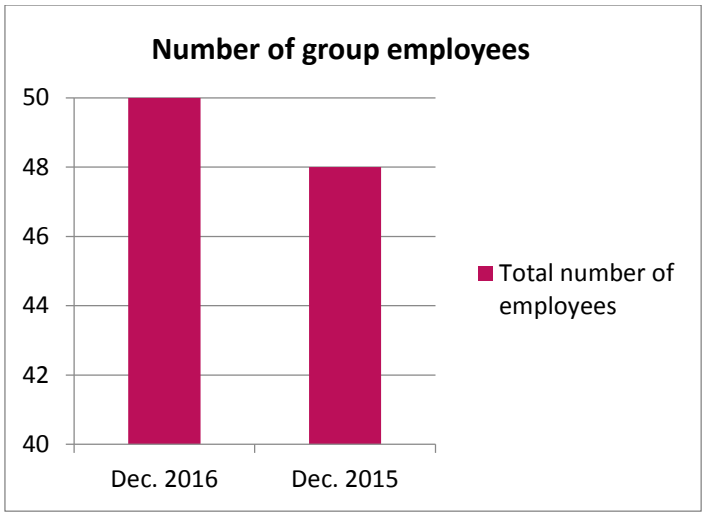
The work and management contracts signed between the Group and its Key Personnel include confidentiality, loyalty and non-competition clauses.

a) Employment:

Workforce:

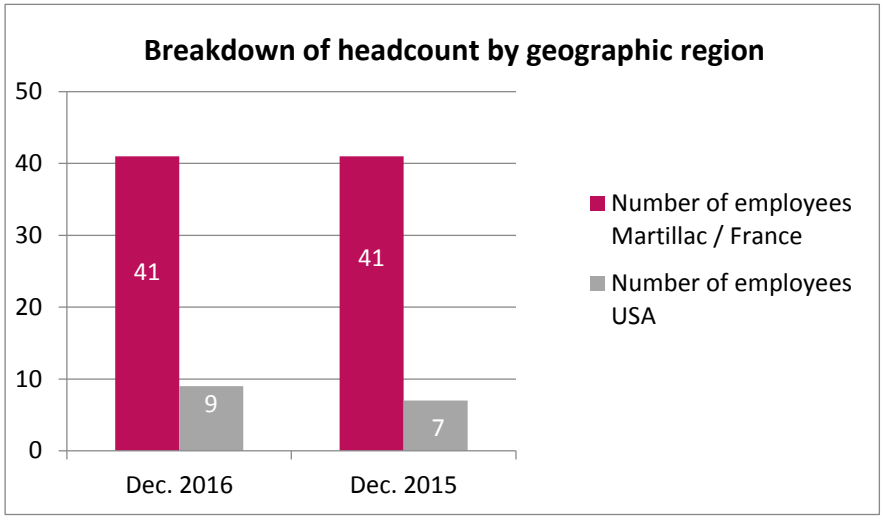
At the end of December 2016, the Group had **50** employees (full and part-time) compared to **48** at the end of December 2015, i.e. a 4% increase in workforce. Among them, 48 hold a permanent employment contract (39 in France and 9 in the USA), one person had a fixed-term contract and one an apprenticeship contract. Please note that in the USA, permanent contracts are standard. At the end of December 2015, 46 employees held a permanent contract (39 in France and 7 in the USA) and two an apprenticeship contract. One employee with a temporary contract was hired on a permanent contract within the sales department during the 2016 fiscal year.

The Group, therefore, favors stable and lasting employment arrangements to ensure its development.



Breakdown per geographic location:

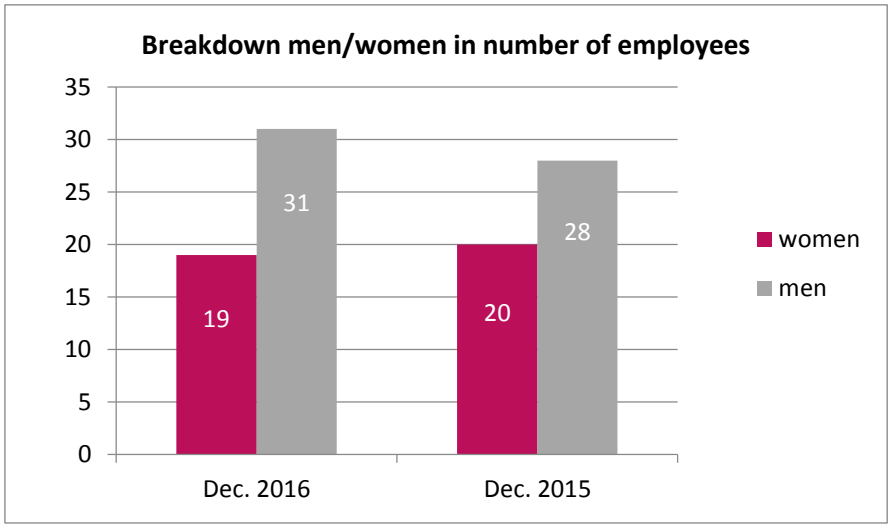
The net workforce was up by two jobs in the USA and remained stable in France.



Breakdown men/women:

At December 31, 2016, women represented 38% of the Group's contractual workforce, a slight decrease compared to the previous year's figure (42%).

The gender breakdown of employees is as follows:



The Group implements a policy of non-discrimination in wages when hiring employees. Whatever the professional category, the procedures for managing compensations and assessing individual value added are identical for men and women. The same applies to access to training.

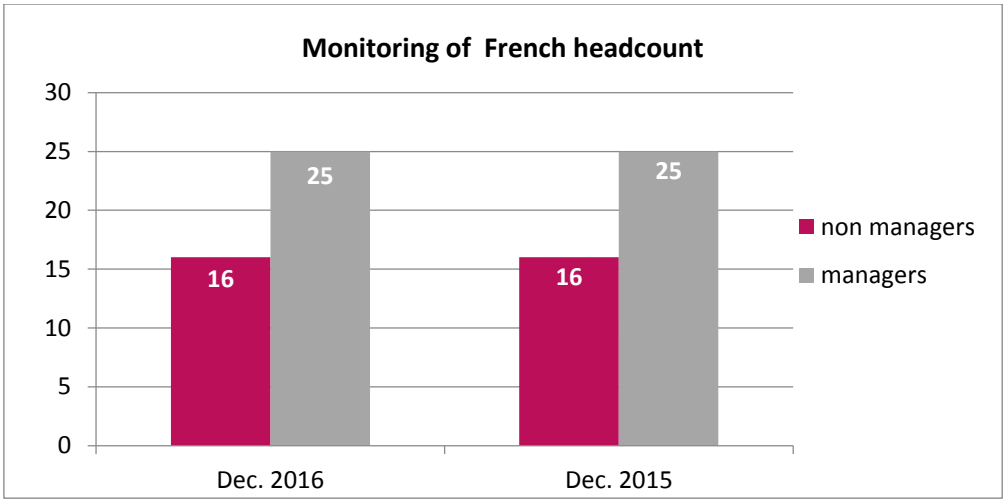
The breakdown of the Board of Directors is presented below in the Section on equal treatment.

Skills:

At the end of December 2016, in France, the Group employed 25 people holding degree-level qualifications or above, representing 61% of its overall workforce, equivalent to the proportion in 2015. Two staff members have doctorates. These staff have wide experience of technology innovation management, and of the development and sale of medical devices and products.

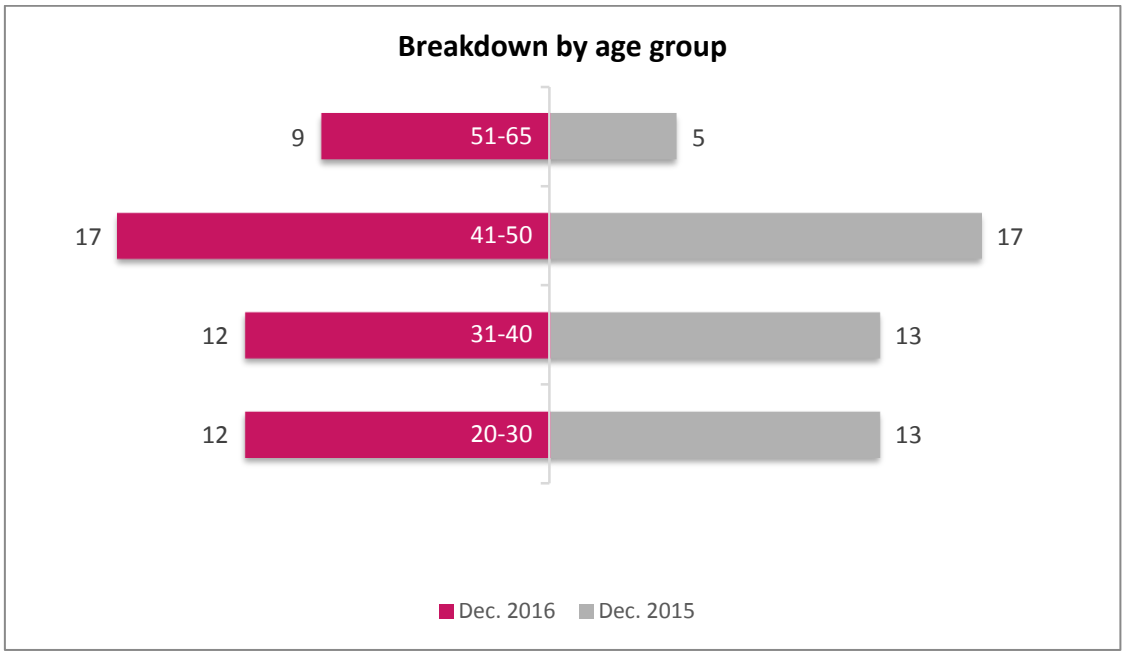
It is specified that five full-time and one part-time staff, or 10% of the Group's workforce, were assigned to the R&D activity in 2015 and 2016. The remaining staff handles support functions such as sales and marketing/administration/quality and regulatory affairs/operations.

The staff is characterized by a high level of qualification: executives make up 61% of the French workforce.



Age:

At December 31, 2016, the average age of the staff was 39 years and 7 months, and the seniority was four years and three months, up by three months compared to 2015.



The Group's workforce is balanced in terms of the breakdown between young professionals and more experienced employees.

Staff turnover:

In France, the Group recruited seven new staff members in 2016: five permanent contracts and two fixed-term contracts, the same as the seven recruitments in 2015.

The major recruitment concerned the following positions:

- a Clinical Research attaché;
- a quality controller;
- a production assistant;
- an administrative assistant for sales;
- a warehouse worker.

These recruitments concern job creations or replacements of existing positions.

For the French workforce, seven departures were recorded in 2016, including one end to a fixed-term contract. The number of departures was slightly up on 2015 (five departures including one end to a fixed-term contract). Only one termination was carried out in 2016, the same as in 2015.

In 2016, the Group recruited four people in the USA in order to continue to grow in this strategic market and strengthen its offer, partially offset by two departures. Between 2015 and 2016, employees were recruited from all over North America.

The four employees recruited in 2016 hold the following positions:

- Sales and Commercial Development Manager for the Western US;
- Sales and Commercial Development Manager for the Eastern US;
- Chief Executive Officer and Chairman of Implanet America;
- Sales Manager.

The recruitment carried out in the US is focused entirely on business growth and should enable the Group to increase its sales in the North American market.

Compensation:

Payroll expenses per fiscal year	**2016**	**2015**
As a percentage of revenue	57.96%	63.20%
As a percentage of operating expenses	30.34%	28.98%
Total in € thousands	**4,535**	**4,205**

Payroll expenses increased by 8% during the 2016 fiscal year. This increase is coherent with the increase in the Company's activity and the Group's operating expenses. Payroll expenses represented 58% of revenue and 30% of operating expenses, as against 63% and 29%, respectively, for the previous fiscal year.

The employees' compensation levels are solely based on the positions they hold. The Group makes no difference in terms of the actual salaries between two employees holding the same position.

The compensation paid to corporate officers is described in Note 16 to the IFRS financial statements. As the Group continues to develop its growth and structure, this compensation increased compared with the previous fiscal year.

The Group has set up an individual bonus policy based on quantitative and qualitative criteria. The bonus criteria and amounts are defined during the annual staff review in accordance with the objectives set for the employees. Following the closure of the fiscal year, a summary review is carried out to validate their achievements and final allocations. Sales bonuses are based on sales targets. Other types of bonuses are based on specific criteria for the positions held by the different employees.

b) Organization of work

In France, the employment contracts of the employees are subject to the national collective agreement for the metallurgy industry; the “national” agreement for executive staff and that of “Gironde et Landes” for non-executive staff.

The work time of executive staff is defined in days (218 days per year) and that of non-executive staff in hours. For the latter, the effective work time is 35 hours per week.

Non-executive staff who work beyond this number of hours gather overtime. The need for overtime remains very limited. Implanet offers its employees the choice of payment or free time for any overtime done. In the 2016 fiscal year, the non-executive staff did 58.80 hours of overtime, or about 0.2% of the hours worked by non-executive staff (compared with 37 hours or 0.1% in 2015). No overtime was paid in 2016, as the hours were all recovered. 6 hours were paid in 2015.
In the United States, the four employees recruited in 2016 have contracts based on US labor law. The nine US employees are employed by IMPLANET USA, INC. Their employment contracts stipulate working arrangements defined between the two parties in compliance with American law.

In France, the Group employs 39 people on a full-time basis and two people part time; in the US it employs nine people full time. IMPLANET makes a limited use of temporary employment.

Absenteeism, excluding absences due to long illnesses and maternity/paternity leave, remains limited within IMPLANET with a slight increase between 2015 and 2016. The “absent working days to present working days” ratio was 1.63% in 2016 for the workforce overall, despite variations between departments. This ratio does not count the long-term absence of an employee for an illness declared in April 2016. This indicator is only monitored for the French workforce. The absenteeism ratio came to 1.25% for 2015.

	Operations	R&D	Raqa	Sales	Marketing	G&A	TOTAL
Days lost per department in 2016	*19*	*5*	*95*	*13*	*14*	*13*	**159**
Days lost per department in 2015	*51*	*-*	*39*	*16*	*1*	*10*	**117**
Ratio of days lost to days worked in 2016	*1.0%*	*0.4%*	*3.6%*	*1.0%*	*1.2%*	*0.8%*	**1.6%**
Ratio of days lost to days worked in 2015	*2.3%*	*0.0%*	*1.9%*	*1.2%*	*0.1%*	*0.6%*	**1.3%**

The monitoring of absenteeism is carried out on the basis of permanent contract full-time equivalents for each fiscal year in question. Staff on fixed-term or apprenticeship contracts, as well as general management, are excluded from this monitoring. No absences were recorded for 2015 and 2016.

c) Labor relations

Labor relations are handled through IMPLANET'S staff representative bodies, the Employee Representatives.

IMPLANET has four staff representatives (two primary representatives for each category and two alternate representatives for each category) who were elected in December 2016 for a four-year term.
The meetings of the staff representatives are held in accordance with the applicable laws and regulations. The minutes are distributed to the staff as and when they are completed.
The Group believes that it has good relations with its staff. It maintains a constructive social dialog with the staff representatives on the basis of transparency and openness. This allows it to operate in a healthy labor relations climate. Please note that no collective agreements were signed in 2015 and 2016.

d) Health and safety

The safety of staff and the management of working conditions are fundamental factors for sustainable corporate development. The Group has made the mandatory declarations for its installations and holds the necessary approvals for its activities. The technical checks and controls of the installations are carried out according to the current legislation. The staff hold the certifications and training necessary for using the equipment, and for maintaining Health and Safety at work.

In France, the death and disability and health insurance contracts offered by the Group to its employees are due to run until December 31, 2016 and will be renegotiated in 2017. Employees in the US are covered by specific insurance contracts.

IMPLANET'S rules of procedure summarize the main health and safety rules with which staff must comply. The Company, with the support of its occupational physician, has drafted a unified document on risk assessment. These elements are made available to all company employees.

For all its French staff members, IMPLANET covers the costs of medical examinations, the frequency of which depends on the position held by the individual employee. The frequency is set jointly with the occupational physician:

- at-risk positions: once a year,
- all other positions: every two years.

During 2016, the Group noted one incident which was qualified as a work-related accident with 18 days absence from work, whereas no work-related accidents were recorded in 2015. The work-related accident followed a dispute between two employees.

No work-related illnesses or illnesses of an occupational nature were declared by any of the Group's employees, trainees or temporary staff in 2016. No permanent incapacity was notified to the Group for this fiscal year.

The latest report of the occupational physician, dated November 22, 2013, identifies no major risks affecting the safety and health of the Company's staff. It lists some areas for improvement, but mainly highlights all the measures already taken by IMPLANET in these domains.

e) Training

The Group has set up a human resources management policy aiming to attract and retain the best profiles. This entails a pro-active compensation policy, a training budget in line with the needs of the Group's activity and employees, and a willingness to promote career development.

The staff's educational level is high and the Group is particularly keen to maintain the high levels of knowledge and skills of all staff members. It promotes training by setting up programs in line with its strategy. Each year, the members of the Company express their training wishes during an individual interview. Subsequently, the annual training plan is drawn up in line with the identified priority areas. This training plan is validated by general management and the finance department.

For fiscal year 2016 IMPLANET had planned 28 training programs, of which 23 were carried out. These training programs represented a total of 280.5 hours, or 55.5 hours more than the previous fiscal year. 22 training programs were followed in 2015 out of the planned 28, for a total of 225 hours. This represents around 5 hours 30 per employee in 2016 compared to 4 hours 30 in 2015.

	2016	2015
Number of training sessions planned	28	28
Number of training sessions attended by employees	23	22
Number of training hours provided	280.5	225

The major focus areas of IMPLANET'S staff training concern patient safety. IMPLANET therefore mainly trains its “quality” and “operational” staff in order to ensure very high product quality. There are a variety of programs. Over the last two fiscal years, the themes covered included: quality training carried out for the FDA inspection, training on spinal products, software training, languages (mainly English), biocompatibility and hospital hygiene standards.

The Group organizes internal “quality” training programs for all new recruits. A training program is developed for new recruits depending on their positions. The training programs can be taken in person by staff belonging to the Martillac site or online with telephone support by staff based in the United States.

These training programs are provided by employees of the company's “quality” department. The training program followed by every employee is summarized in the “introductory training” document, which is kept in the employee's personnel file.

After each training program, an internal training evaluation sheet is filled out indicating the following: type of training, objectives, expected outcome, assessment of attainment of objectives. Following their training and where possible, staff belonging to the “quality” department take a self-assessment test that enables managers of the Quality department to evaluate the knowledge acquired.

f) Equal treatment

Due to the size of its current workforce, the Group is under no other legal constraint than that concerning the composition of its Board of Directors. In 2016, one woman was appointed Director: Ms. Shaughnessy, who has spent most of her career at Partners Continuing Care (PCC) as Senior VP Finance. The arrival of this Director will enable the Group to benefit from her expertise in financing and the repayment of healthcare in the United States. Following this appointment, two women sit on the Board of Directors as Independent Directors. The representation of women on the Board of Directors is 33%, so IMPLANET complies with the minimum quota of 20%.

As regards the recruitment of new employees, in order to fight discrimination in hiring, the Group has set up a procedure enabling it to make an objective selection based on the needs of the positions to be filled. In order to define these needs, the Group produces job description and recruitment sheets. Recruitment for management positions is handled by a recruitment firm. All other recruitment is handled by the company internally.

The job description sheets mainly describe the duties involved and the skills required for the position. These sheets make it possible to define up front the type and level of education wanted, and the level of experience and specific knowledge required.

The recruitment sheets summarize the details and the contract conditions offered to applicants. They present the recruitment process, contract type, terms and the compensation allocated to the position to be filled.

These sheets make it possible to ensure within the Group a non-discriminatory recruitment process offering equal opportunities to all applicants.

Lastly, to promote the insertion and employment of disabled people, the Group pays specific attention to the fact that its new premises in Martillac are accessible to people with reduced mobility. Thus, an internal elevator that complies with disability standards was installed to facilitate access to the different floors, and all the services were adapted (paths, sanitation facilities, terraces, cabins, etc.) to enable suitable circulation and use of the installations.

1.2 Environmental information

a) General environmental policy

Due to the nature of its business (research, development and sale activities of medical devices), the Group considers that it generates only a slight environmental impact.

Its activities do not involve industrial production or distribution, thus no use of raw materials and no significant discharges into the environment. Its activities do not require use of town gas or special gases. They generate no particular noise pollution for the staff or local residents. The Group believes that the discharges to air linked to its activity are not significant and have a very limited impact on air quality.

Due to the nature of its business and its organization, the Group has limited its analysis of its greenhouse gas emissions to scope 1 and scope 2 of the Carbon assessment. The significant emissions noted during this analysis come from:

- the energy consumption of the Company's installations and vehicles;
- the various travel by all employees.

Details on the greenhouse gas emissions linked to electrical consumption, car and air travel are provided below.

Moreover, the Group's research activities are subject to very stringent regulatory requirements, with which it complies. IMPLANET has all of the necessary approvals to conduct its activities.

Within this framework, only the following themes have been retained as relevant for consideration in the rest of the report:

- general environmental policy;
- sustainable use of resources;
    - energy consumption,
    - annual water consumption.

As regards “adapting to climate change”, the Company does not deem this criterion to be relevant given its location and activities.

b) Pollution

Since 2016, the Group has moved to the Montesquieu zone in Martillac in new premises built in accordance with French HEQ (High Environmental Quality) standards, i.e. by taking the location, orientation and proportions of the project into consideration so as to optimize natural resources, views and all-season use. Choosing the HEQ approach saved on costs (design and organization of spaces into functional areas) and site facilities (waste, deadlines, etc). Moreover, the energy requirements are limited thanks to good building inertia and the orientation of openings. This architectural decision combines constructive simplicity, sustainability of materials, optimization of constructions and takes into account environmental factors, whilst also considering the possible best management of layout costs.

Thanks to the rational design of the building, 15-20% cost savings in hot water, energy and air conditioning are expected (for heating and electricity) compared to the old buildings in Martillac.

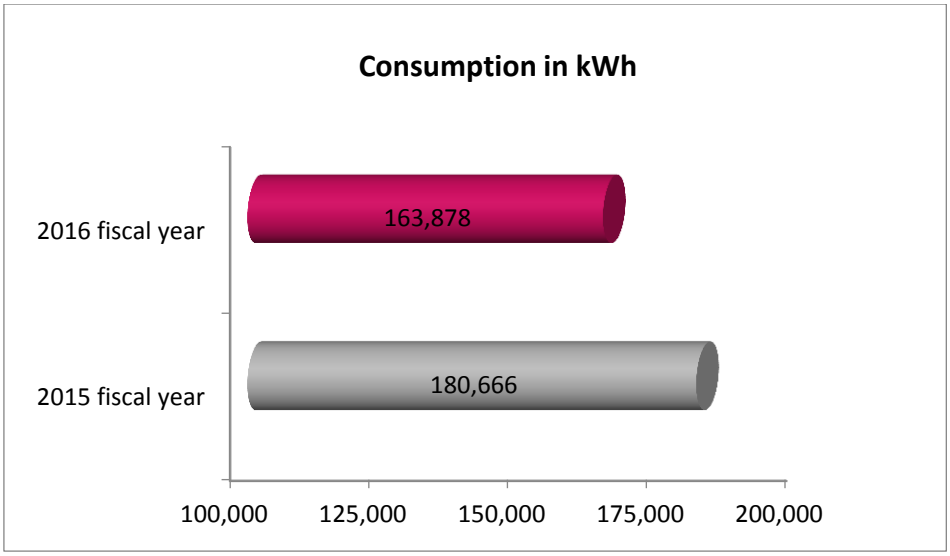
The premises also meet specific energy consumption criteria, such as compliance with French RT 2012 thermal regulations and the use of high energy performance equipment. Energy performance measurement coefficients, such as “Bbio” (bioclimatic needs) and “Cep” (primary energy coefficient) show that the new building's energy performance is 30% below the approved limit.

Lastly, to respect the surrounding vegetation, 126 plant species have been planted on the Martillac site.

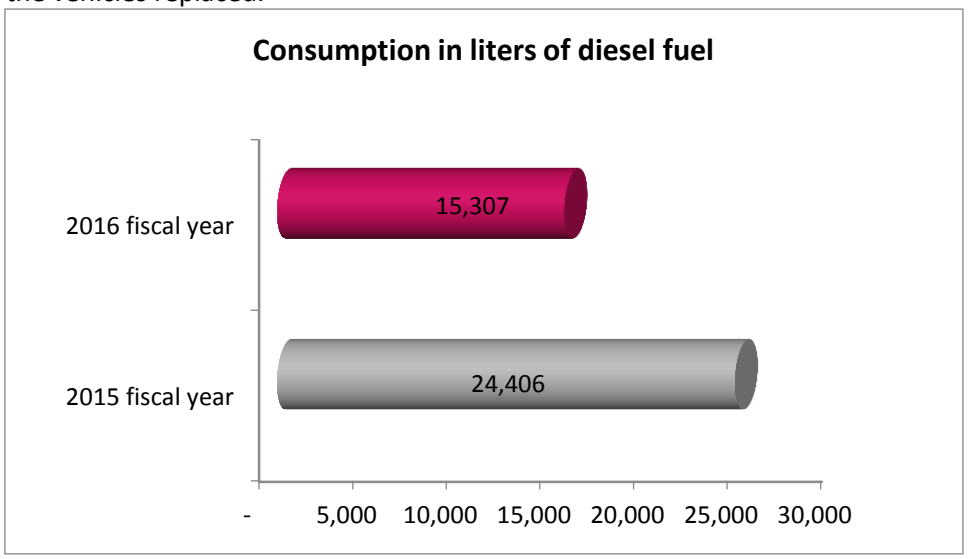
c) Circular Economy: sustainable use of resources

Water and energy consumption:

Natural and energy resources are not inexhaustible and the Group is concerned about its energy footprint. IMPLANET is therefore particularly vigilant about not over-consuming the various natural resources and energy forms to which it has access.
The company applies common sense principles in terms of environmental protection (daily energy savings gestures, particularly concerning the lighting of the premises). For this reason, it decided to implement a guide of good practice in 2016 which was distributed to all employees in order to raise awareness on the issue. This booklet covers four themes: hygiene and cleanliness, living together, eco-responsibility and gives advice to employees.
The Group's activities only require a very low level of water consumption. The consumption only concerns the needs of the staff: sanitary facilities, rest room, maintenance of the premises. The Company consumes around 200 m^3 of water per year. For this fiscal year, the Company identified a water leak on the connection to its new building and repaired it.
Considering the Group's activities, its electricity consumption invoiced by the service provider remains limited, mainly to expenses for lighting, heating, air conditioning and computer equipment.
Consumption was down 9% between the two fiscal years.

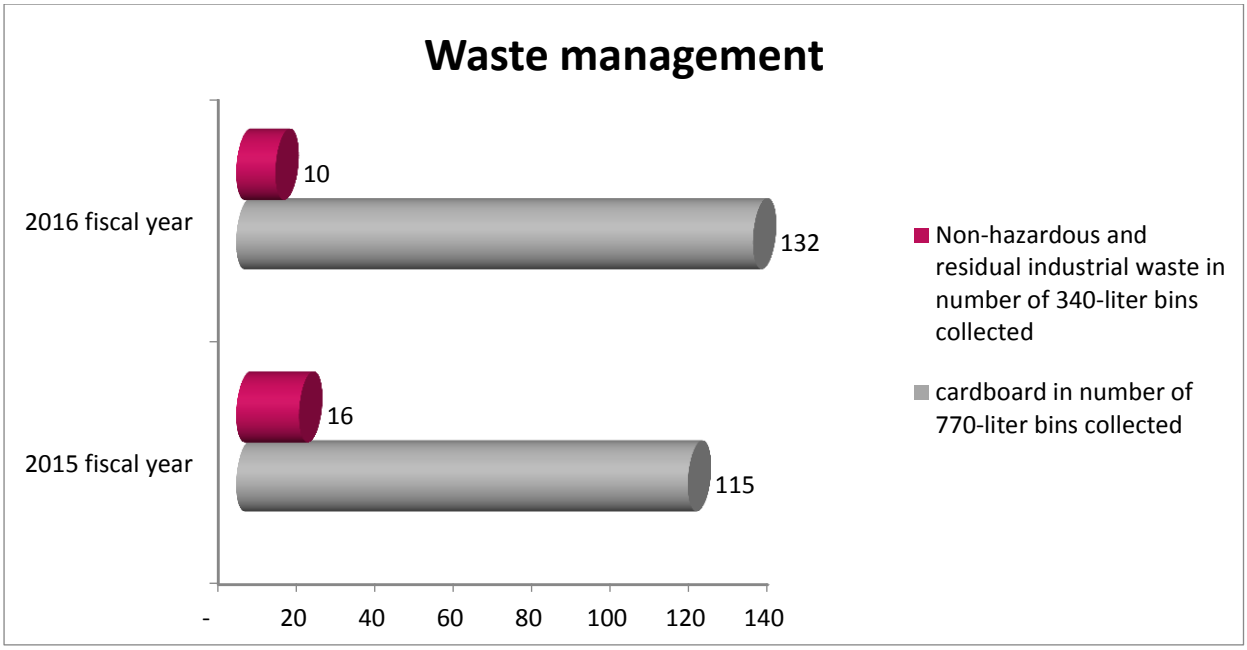


The Group's diesel fuel consumption, presented below, corresponds to the company vehicles made available to staff. Consumption was down 40% between the two fiscal years. In 2016, the Group partially renewed its automobile fleet and acquired two new vehicles with CO_2 emissions up to half as high as the vehicles replaced.



d) Circular economy: prevention and waste management

As the Group has no direct production, it generates only limited amounts of waste. The graph below presents the waste produced by type.



In addition, despite its low environmental impact, the Group strives to respect the environment and has launched the following recycling actions:

- sorting of plastic bottles and caps;
- sorting of paper and cardboard (installation of dedicated bins in 2016);
- sorting of ink cartridges;
- sorting of coffee capsules (implemented in 2016); and
- and sorting of batteries.

For each type of waste, the Company has installed specific waste receptacles, then uses specialized companies for the removal of the waste.
As regards scrapping of the Company's marketed products, the Group uses a local service provider specialized in the handling of ordinary industrial waste and electrical and electronic waste. Implant scrapping is carried out under bailiff supervision.
The selected service provider recovers the waste by means of reuse, recycling or any other action generating reusable material or energy. This service provider ensures monitoring and traceability of the material flows as well as elimination of the waste in an approved waste treatment facility.
Since the second half-year 2016, the service is now carried out by the *Communauté de Communes* (municipal community) of Montesquieu (supply of bins, collection and treatment). Thus, the collection service for non-hazardous industrial waste and paper/cardboard is unchanged.

Actions to fight against food waste:

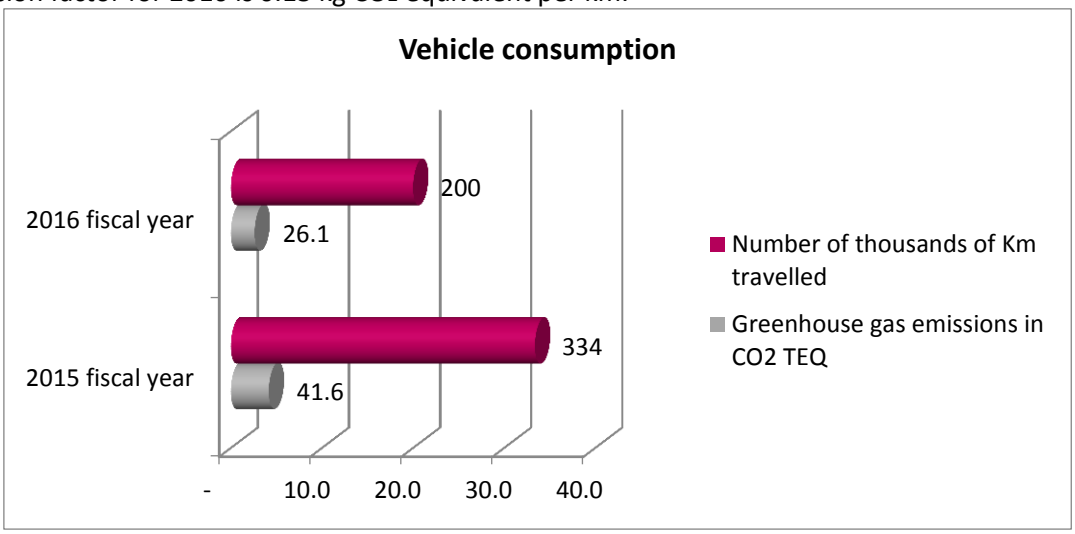
The Group's employees benefit from a shared collective restaurant service with other companies on the Montesquieu site in Martillac. However, these new Martillac premises have a kitchen with a refrigerator. IMPLANET's employees can bring their individual meals, thus taking part in limiting food waste.

e) Climate change

Greenhouse gas emissions:

Emissions associated with energy consumption:
The electricity consumption invoiced by the service provider is estimated at 163,878 kWh for 2016 for the Martillac site (compared to 180,666 kWh in 2015), representing the emission of around 11.8 tons of CO_2 equivalent (on the basis of the emission factor in the Bilan Carbone v7.1 (Carbon Assessment) of the Ademe, estimated at 0.072 kg CO_2 equivalent per kWh).

Travel by employees using company vehicles:
Between 2015 and 2016, the Group's employees reduced their use of company vehicles. The emission factor for 2016 is 0.13 kg CO_2 equivalent per km.



Air travel by employees:
Considering its ongoing international growth, the Group has been forced to make significant use of national and international air travel since 2014. It therefore set up monitoring criteria for its CO_2 emissions caused by this mode of travel in 2014. These criteria were also monitored in 2016.
This information has been estimated:
- for travel by French employees, on the basis of travel agent or airline data and only takes into account the fuel combustion for the flights;
- for travel by US employees, on the basis of internal expenses sheets and extra-accounting flight monitoring. Greenhouse gas emissions in CO_2 TEQ generated by the number of kilometers traveled was calculated using the same criteria as for French employees. Monitoring was performed in real time in 2016.

	2016 fiscal year	2015 fiscal year	change (%)
Greenhouse gas emissions in CO_2 TEQ	169.8	133.5	**27%**
Number of thousands of Km travelled	1,114	1,156	**-4%**

It is clear that this type of travel remains significant for the Group in 2016, as the CO_2 emissions caused by air travel represent six times more than those generated by car travel. The changes in the "kilometers travelled" and "consumption in CO_2 TEQ" are not correlated between the two years due to non-comparability between the domestic flights/international flights mix. The emission factor for 2016 is 0.15 kg CO_2 equivalent per km.
Furthermore, to limit its travel and impact on the environment, the Group strives to use video- or teleconferencing whenever possible. In order to limit the number of trips as much as possible, the Chief Executive Officer prolongs his visits to the USA.

Rail travel by employees:
Since 2015, the Group has decided to monitor travel by train from 2015. For this fiscal year, approximately 71,466 km were travelled, corresponding to 0.24 CO_2 TEQ of greenhouse gas emissions, compared to 59,500 Km in 2015, i.e. 0.17 CO^2 TEQ of greenhouse gas emissions. These values are not significant.

Protection of biodiversity

This criterion is not deemed to be relevant as the Group's activities have no direct impact on biodiversity trends.

2. INFORMATION CONCERNING COMPANY COMMITMENTS TO PROMOTE SUSTAINABLE DEVELOPMENT

a) Territorial, economic and social impact of IMPLANET's activity

IMPLANET was created in 2007 and currently employs 50 people. Over a period of 9 years, the Group has hired qualified and skilled staff, most of whom come from the Bordeaux area (France). Permanent employment contracts are preferred. Fixed-term contracts concern replacements or temporary activity peaks.

The Group aims to carry out a permanent policy of employing and training young people. Every year, the Group recruits people under apprenticeship or professional training contracts as well as a number of trainees for the purpose of training them. Everyone who completes a trainee period of at least one month receives compensation.

The Group also wants to contribute to the integration of disabled people into the economy. For this purpose, it calls on the services of a center providing care to disabled people through employment (ESAT). In 2015 and 2016, the Group purchased supplies from sheltered employment companies, thus partially fulfilling its obligations as regards the employment of disabled workers. Each year, between two and three orders are placed for a total amount of between €4,000 and €5,000.

b) Relations maintained with people or organizations interested in the company's activity (stakeholders)

During the 2016 fiscal year, IMPLANET took part in a relay race, in collaboration with the city of Martillac and the GALA association for people suffering from intellectual deficiencies. IMPLANET also financed a team during the 15th edition of the "Raid des Amazones" which supports the "Handi'Chiens" association to help patients - and more specifically children - suffering from neuromuscular diseases.

In 2016, the Group donated Jazz implants for the CHILDREN ACTION foundation. The donated implants will be used during orthopedic missions dedicated to treating scoliosis organized by the Foundation in Myanmar.

This pediatric orthopedic project aims to:

- treat, i.e. improve the quality of life for the children concerned in a sustainable way;
- allow access to relevant, quality treatment;
- ensure excellent care and the best possible post-operative monitoring of the children operated;
- enable knowledge transfer.

IMPLANET's support for this program enables surgeons to operate in the best conditions and also to reduce the cost of each operation, to ensure, over the long term, the treatment of the highest number of children.

Lastly, in 2016, IMPLANET multiplied its meetings with its shareholders. IMPLANET took part in an evening bringing together investors in the Bordeaux region, in order to present its activity, the market and the growth outlook. IMPLANET also took part in a national shareholders' show.

IMPLANET was widely involved in 2016 in various partnership and philanthropy actions, thus showing its desire to maintain positive relations with the people and organizations interested in the Company's activities.

IMPLANET's Quality Policy

The Group has set up a quality policy for 2015/2018 with the motto:

"A modern vision, socially and economically responsible, applied to the supply of products and services to the world of healthcare".

IMPLANET dedicates this vision to all the actors of the healthcare chain: healthcare product manufacturers, healthcare establishments, physicians, medical staff, healthcare budget and expense management bodies.

By listening to these actors and analyzing their needs, IMPLANET can focus on two main product and services families:

- a specialist range of spinal surgery implants, developed around braided implants offering surgeons multiple solutions and an alternative to traditional attachment systems, particularly in the treatment of the most complex pathologies such as scoliosis;

- a range of knee surgery implants.

Through its ethical and professional approach, IMPLANET conducts research into products with the highest quality standards and full regulatory and performance compliance, whilst aiming to offer a “first in class” quality service to logistics chain operators. For this reason, this policy is applied to the distribution subsidiary, IMPLANET America.

This offer is made possible by IMPLANET's focus on development, product life monitoring, optimization of internal and external operations, and the goal of ensuring the highest possible safety for the patient.

IMPLANET strives to satisfy its customers and undertakes to implement the human and material resources necessary to achieve and maintain this satisfaction within the framework of a structured approach of dialog and continuous control.

IMPLANET organizes and deploys its activities, paying careful attention to deadlines and processes, towards ambitious, measurable and reachable objectives. The tools implemented for this monitoring enable - amongst other items - the following to be assessed: customer satisfaction, training, service rates, return rates, “supplier” quality, product compliance.

IMPLANET is also aware of the crucial importance of the commitment and competence of its employees for its success. Curiosity, innovation, participation and autonomy are therefore key values for the Company.

IMPLANET and all of its management are committed to being particularly attentive and receptive to the needs and suggestions of customers, staff and suppliers, in order to constantly improve the quality and performance of its products and services for the mutual benefit of all actors of the community in which it operates. IMPLANET also organizes meetings, known as “scientific committees” to identify practitioners' needs. In this way, IMPLANET can collect product modification demands. Indicators such as claims monitoring also enable it to improve the quality and performance of its products and services.

General management ensures compliance with these principles and their constant adaptation to industry best practices.

The involvement, commitment and responsibility of all members of the Company are key to its success and to its future.

c) Fair practices

Measures taken in favor of consumer health and safety

The health and safety of consumers is at the heart of the Group's activities, which aims to develop innovative devices and products for everybody, worldwide. In the context of its research and development activity, the Group is obliged to comply with current standards (Good Laboratory Practices/Good manufacturing Practice) and with the regulations laid down by government agencies in charge of public health protection, such as the European Union Agency (EMA) or the Food and Drug Administration (FDA) in the United States.

The Group's main concern is to bring to market implants, manufactured to uncompromisingly high standards of quality and meeting the most stringent clinical performance requirements, for various orthopedic surgery markets, as is reflected in IMPLANET's quality policy based on European Directive 93/42/EEC on medical devices. IMPLANET is ISO 13485 certified and all products offered comply with the CE standard.

Taking into account the development of the healthcare system in each country, the Marketing team identifies a portfolio of products and services based on a detailed analysis of the socioeconomic, regulatory, demographic and cultural characteristics of each market.

The R&D team focuses on the design of scientifically and clinically proven implants, using quality materials, tested according to the most stringent standards in force, combined with simple and user-friendly instrumentation. The working groups, comprising surgeons, engineers and experienced product managers, work closely together to offer a range of implants of high quality with specifications based on solid scientific data, to adequately meet the needs of healthcare professionals and to guarantee the safety of patients.

In 2016, the Group continued its efforts to consolidate its positioning by reinforcing:

- its expansion on the French and North American markets, serviced directly from the Martillac headquarters or from its distribution subsidiary based in Boston (USA);

- its commercial presence across the whole of Europe and Latin America.

Moreover, the Jazz LOCK technology was used for the first time during different surgeries at the end of the third quarter 2016. The success of the commercial launch of these implants leads us to foresee a wide scale roll-out of this technology in the short term.

IMPLANET's portfolio of industrial property continues to expand with, in particular, the grant of US, European and French patents for the Jazz range.

At an organizational level, the Group has pursued its certification processes in 2016:

- completion of the 510(k) registration with the US FDA (Food and Drug Administration) for additions to the Jazz LOCK and Jazz CLAW ranges;

- an intellectual property certificate was obtained from the USPTO (United States Patent and Trademark Office) for a vertebral fixing support system.

Throughout 2016, IMPLANET continued to demonstrate the efficacy and safety of its Jazz implant in adolescent scoliosis surgery, by regular publications of clinical results thus validating the Group's development and innovation strategy and by the publication of an Economic study showing that the use of Jazz in a hybrid construction significantly reduced patient risk and surgery costs.

Studies on the surgical treatment of adolescent idiopathic scoliosis:

A study beginning in 2014 and conducted by the Pediatric Orthopedic Surgery Department of the Hôpital Robert Debré, attached to the Université Paris Diderot, provides the results obtained with the Jazz implant in scoliosis surgery on adolescents by postero-medial translation and, more particularly on the restoration of frontal and sagittal balance. This study was conducted based on the 24-month monitoring of a consecutive series of 20 patients.

This study was extended to 2016 and the results were presented in December 2016. This time, it was conducted jointly by the Pediatric Orthopedic Surgery Department of the Hôpital Robert Debré (Paris), the Timone (Marseille) and Purpan (Toulouse) and confirmed the effectiveness of the Jazz system for the treatment of idiopathic scoliosis as well as its use safety. This conclusion is the culmination of a study conducted on 35 patients suffering from thoracic hypokyphotic scoliosis, treated with sub-laminar Jazz implants and monitored over around 34 months. The results obtained promise major progress in the use of Jazz implants as they confirm that the Jazz system offers a safe and effective alternative to the classical techniques entirely composed of screw assemblies.

As the Group is constantly striving to improve its results, it is pursuing its scientific studies in order to offer appropriate solutions to the healthcare sector.

Medico-economic study:

Health Advances, an external consultant, has analyzed the main factors of hospital costs for two types of implant assemblies used in the surgical treatment of adolescent scoliosis: systems based solely on pedicle screws and hybrid systems made up of pedicle screws and sub-laminar bands. The following patient benefits have been noted for hybrid systems using Jazz Band:

- a reduction in the number of implants for each patient;
- reduced operating time;
- decreased blood loss;
- shorter hospital stays.

The study also revealed a significant decrease in exposure to radiation for the patient, the surgeon and operating room personnel.

Study carried out into the degenerative indications and the correction of spinal deformities in adults:

In the coming years, the Group wants to reinforce the clinical studies on the degenerative indications and correction of simple spinal deformities in adults, in partnership with TFS International (which is a CRO). This company, specializing in clinical trials, will conduct a prospective, multi-center study to:

- confirm the promising results already seen in osteo-degenerative spinal disorders through *ex-vivo* tests and initial monitoring of patients in Europe and the USA;
- generalize the use of the Jazz platform in osteo-degenerative spinal surgery (elderly patients);
- assess and document the interest for the Jazz platform in a new indication to protect adjacent discs (PJK syndrome).

Action taken to prevent all forms of corruption

As regards the risk of corruption, the Group believes that it has set up effective internal controls enabling it to prevent this phenomenon. The separation of payment tasks is one of the measures taken to avoid mistakes and malfeasance. As regards the selection of suppliers, several estimates are systematically requested and compared as soon as certain expense thresholds have been reached.

Within the framework of the Bertrand Law, following the enactment of Decree No. 2013-414 of May 21, 2013, "on the transparency of the advantages granted by companies producing or selling healthcare or cosmetic products for human use," and in order to meet its legal obligations, IMPLANET twice a year publishes, on its website, the amounts and details of the advantages it grants to healthcare professionals and the title of the agreement(s) it has signed with them.

For the first half of 2016, the Group declared €28 thousand for 58 healthcare professionals. For 2015, it had declared €58 thousand for 66 healthcare professionals.

Since 2015, for the USA zone, the Company has introduced a system for gathering and summarizing information in accordance with the requirements of the Sunshine Act, which stipulates an obligation of transparency with regard to financial transactions signed with companies that produce or market pharmaceutical products and prescribers of these products, such as doctors and physicians. Thus, in respect of 2015, IMPLANET AMERICA declared €97 thousand in accordance with the provisions of the Sunshine Act.

Consideration of social and environmental issues in the purchasing policy

IMPLANET resorts to subcontracting to produce the medical devices that it sells. All suppliers from which the Group purchases supplies for the manufacture of these medical devices are located in the EU. In turn, these suppliers procure raw materials from European or US suppliers in accordance with product traceability obligations.

Purchases of raw materials and goods are made from suppliers or subcontractors. This item is substantial in Implanet's income statement:

Purchases of raw materials per year	**2016**	**2015**
As a percentage of operating expenses	21.07%	27.76%
Total in € thousands	**3,149**	**4,070**

The Group has set up a listing and monitoring procedure of its suppliers. It has thereby formalized the mechanisms put in place for selecting, evaluating and auditing these suppliers.

It has not set up specific "CSR" criteria for the selection of its suppliers, but its selection criteria are based on the suppliers' capability of meeting IMPLANET's requirements, which may relate to products, procedures, manufacturing processes and equipment, staff qualifications, quality management systems, and/or delivery times.

The Group thereby creates value added by involving suppliers and healthcare professionals in its ambition to be a responsible social and corporate citizen.

This operating method applies to all suppliers that may have an impact on the quality of the finished, packaged, labeled and sterilized IMPLANET brand product.

Consequently, the following families of suppliers are concerned:

- manufacturers (manufacturing subcontracting, finished product manufacturer, cleaning subcontractor, sterilization, etc.);
- component suppliers (raw material, packaging, labeling);
- suppliers of manufacturing consumables (tooling, abrasives, etc.);
- service providers with an impact on product quality (control laboratory, metrology, maintenance of specific workspaces, etc.).

The Purchasing/Operations Director and the purchaser handle, in collaboration with the Quality and R&D-Industry departments, the listing and monitoring of manufacturers, suppliers of components and manufacturing consumables, and service providers having an impact on product quality.

The listing procedure comprises a documentation collection phase and a supplier audit phase. Once these phases have been validated and the supplier listed, the purchaser handles the monitoring and evaluation of the supplier in question.

To ensure the quality of the services, the Group enters into subcontracting agreement with seven suppliers, in order to define specifications, production targets, prices and delivery times, and legal safeguards for the commercial relationship (list of active patents).

Audits performed on these suppliers for the purposes of supplier listing and ongoing business relations, focus on:

- their internal organization in terms of procurement, traceability and manufacturing;
- their "quality" policy and management and any certifications obtained;
- compliance with requirements in relation to medical devices;
- health and safety conditions;
- staff training;
- internal control set-up.

METHODOLOGICAL NOTE:

This report presents the CSR data for the IMPLANET Group – "the Group" - for the 2015 and 2016 fiscal years. The 2015 fiscal year covers the period from January 1, 2015 to December 31, 2015, the 2016 fiscal year covers the period from January 1, 2016 to December 31, 2016. The Company has only one physical location: Martillac.

The indicators are monitored by the Administrative and Financial Director and the Administrative and Financial Manager. The social indicators are produced on the basis of an extra-financial summary, based notably on the social data from pay and staff files.

Extra-financial monitoring is carried out of environmental indicators. Based on this monitoring, an estimate of electricity consumption invoiced is carried out according to real consumption up to December 31, 2016. For the CO2 equivalent emission factor, we have selected an emission factor estimated at 72g of CO2 equivalent per kWh, based on Ademe's carbon assessment (*bilan carbone*) v7.1.

A correspondence table below presents the information required by Article R.225-105-1 of the French Commercial Code and identifies the criteria selected or not by the Group, with the corresponding comments. For each criteria selected, the collection and control mode selected by the Group is indicated below.

External audit approach:

This corporate, social and environmental information was audited by the independent third-party body, Ernst & Young & Associés, Statutory auditors for the Group, accredited by the COFRAC (*Comité Français d'Accréditation*), under the number 3-1050 for which the scope is available at www.cofrac.fr

CSR INDICATORS OF THE IMPLANET GROUP FOR FISCAL YEAR 2016

26.4. REPORT BY THE INDEPENDENT THIRD-PARTY BODY ON CORPORATE, SOCIAL AND ENVIRONMENTAL INFORMATION

“

To the shareholders,

In our quality as an independent verifier accredited by the COFRAC[45], under the number n° 3-1050, and as a member of the network of one of the statutory auditors of the company Implanet, we present our report on the consolidated social, environmental and societal information established for the year ended on the 31 December 2016, presented in the management report, hereafter referred to as the “CSR Information,” pursuant to the provisions of the article L.225-102-1 of the French Commercial code (*Code de commerce*).

Responsibility of the company

It is the responsibility of the Board of Directors to establish a management report including CSR Information referred to in the article R. 225-105 of the French Commercial code (*Code de commerce*), in accordance with the protocols and procedures used by the company (hereafter referred to as the “Criteria”), and of which a summary is included in the management report and available on request at the company’s headquarters.

Independence and quality control

Our independence is defined by regulatory requirements, the Code of Ethics of our profession as well as the provisions in the article L. 822-11 of the French Commercial code (*Code de commerce*). In addition, we have implemented a quality control system, including documented policies and procedures to ensure compliance with ethical standards, professional standards and applicable laws and regulations.

Responsibility of the independent verifier

It is our role, based on our work:

- to attest whether the required CSR Information is present in the management report or, in the case of its omission, that an appropriate explanation has been provided, in accordance with the third paragraph of R. 225-105 of the French Commercial code (*Code de commerce*) (Attestation of presence of CSR Information);

- to express a limited assurance conclusion, that the CSR Information, overall, is fairly presented, in all material aspects, in according with the Criteria (Limited assurance on CSR Information).

Our verification work mobilized the skills of four people between January 2017 and March 2017 for an estimated duration of six weeks.

[45] Scope available at www.cofrac.fr

We conducted the work described below in accordance with the professional standards applicable in France and the Order of 13 May 2013 determining the conditions under which an independent third-party verifier conducts its mission.

1. Attestation of presence of CSR Information

Nature and scope of the work

We obtained an understanding of the company's CSR issues, based on interviews with the management of relevant departments, a presentation of the company's strategy on sustainable development based on the social and environmental consequences linked to the activities of the company and its societal commitments, as well as, where appropriate, resulting actions or programmes.

We have compared the information presented in the management report with the list as provided for in the Article R. 225-105-1 of the French Commercial code *(Code de commerce).*

In the absence of certain consolidated information, we have verified that the explanations were provided in accordance with the provisions in Article R. 225-105-1, paragraph 3, of the French Commercial code *(Code de commerce).*

We verified that the information covers the consolidated perimeter, namely the entity and its subsidiaries, as aligned with the meaning of the Article L.233-1 and the entities which it controls, as aligned with the meaning of the Article L.233-3 of the French Commercial code *(Code de commerce)* with the limitations specified in the methodological note presented in the management report.

Conclusion

Based on this work, we confirm the presence in the management report of the required CSR information.

2. Limited assurance on CSR Information

Nature and scope of the work

We undertook an interview with the people responsible for the preparation of the CSR Information in the different departments in charge of the data collection process and, if applicable, the people responsible for internal control processes and risk management, in order to:

- Assess the suitability of the Criteria for reporting, in relation to their relevance, completeness, reliability, neutrality, and understandability, taking into consideration, if relevant, industry standards;

- Verify the implementation of the process for the collection, compilation, processing and control for completeness and consistency of the CSR Information and identify the procedures for internal control and risk management related to the preparation of the CSR Information.

We determined the nature and extent of our tests and inspections based on the nature and importance of the CSR Information, in relation to the characteristics of the Company, its social and environmental issues, its strategy in relation to sustainable development and industry best practices.

For the CSR Information which we considered the most important[46]:

-At the level of the consolidated entity, we consulted documentary sources and conducted interviews to corroborate the qualitative information (organisation, policies, actions, etc.), we implemented analytical procedures on the quantitative information and verified, on a test basis, the calculations and the compilation of the information, and also verified their coherence and consistency with the other information presented in the management report ;

-At the level of the company Implanet, we undertook interviews to verify the correct application of the procedures and undertook detailed tests on the basis of samples, consisting in verifying the calculations made and linking them with supporting documentation. The sample selected therefore represented 100% of the total workforce.

For the other consolidated CSR information, we assessed their consistency in relation to our knowledge of the company.

Finally, we assessed the relevance of the explanations provided, if appropriate, in the partial or total absence of certain information.

We consider that the sample methods and sizes of the samples that we considered by exercising our professional judgment allow us to express a limited assurance conclusion; an assurance of a higher level would have required more extensive verification work. Due to the necessary use of sampling techniques and other limitations inherent in the functioning of any information and internal control system, the risk of non-detection of a significant anomaly in the CSR Information cannot be entirely eliminated.

Conclusion

Based on our work, we have not identified any significant misstatement that causes us to believe that the CSR Information, taken together, has not been fairly presented, in compliance with the Criteria.
